

Q and A - April 18th

Sun, 4/24 10:52PM 42:04

SUMMARY KEYWORDS

question, people, rss, trust, billionaire, benefactor, beneficiary, humanitarian, problem, quantum, money, cryptocurrencies, cac, zim, qf, account, program, appointment, alliance, condominiums

SPEAKERS

Ron Giles, Tracee Gluhaich

R Ron Giles 00:00

Good morning humanitarians. This is Ron Childs. I'm here with Tracee, we're going to do a question and answer period. It is the 18th day of April 2022. So let's go ahead with the first question.

T Tracee Gluhaich 00:15

Okay. I have purchased a lot of Zim long ago, I have children that have bought the Zim also. And I had bought it along with mine when I had purchased mine. I do not know how to handle this, should I be giving them their Zim or hang on to it, and sign them up as I will be signing up? I have four children and want to give them all involved and have not talked them about this program? I'm assuming loved ones society, as of yet they have a heart of a giver, or should give them their Zim and let them take the chance of being contacted, let them do their thing, and have an appointment to do what is in their heart. I hope that I have put the words here that explains what I'm trying to say without confusion.

R Ron Giles 00:57

Well, I feel like I understand. It's the same question that we oftentimes have. Now, when I when people start out, I say the first thing to focus on is the preparations for your appointment. That means you need to get all of your going to use a three ring binder with every going to prepare, then you need to focus on that and prepare for it. Because why? Well, it may happen before you get a chance to get all of the information that you need. Okay, now that I've said that for new people, where do you think your children fit into that? Where are they ready to go? Have they done their preparations? Would they prepare in time? It's been my experience, that parents who have the time to do this, have the heart to do it. And then they felt the capacity off to your children? Would they get ready in time? Are they really functioning at a higher level so that they can do that. And most often, and you're the judge that your children, most often though, the children don't have that yet. And yet, we're going to be humanitarians for 100 years. So why not just go through the redemption, appointment yourself with all of yours, then

ask for the higher rate 500,000 or more. Go into the billions if you'd like. It's up to you, and it's up to your heart. And you'll find that out as you go in and you contemplate and think about it. Sometimes your heart will talk to you. And that's the best way for you to understand what rate you should get it and right. Those are the processes. So my suggestion, you go through the appointment, get your zoom, counselor, get your agent, counselor, Alliance agent counselor, and you're going to be doing just fine. And your children will come along just great. They won't be have been Zim benefactor, because they don't have sufficient funds. That if you do if you have sufficient funds, and maybe at a later date that they can become the benefactors as well. We'll just have to take a look at that. See? That's my answer to question number two.

T

Tracee Gluhaich 03:33

On 4/13 Someone posted a video from Annie collet car from the Pleiadians regarding the QFS, she mentioned multiple times about the qf s in the lobster wallet. I have never heard of dissociation between the two before I thought lobster was for cryptocurrency I understand the quantum consciousness and how our thoughts affect the QFS. Could you please explain how these two are connected in regards to the humanitarians?

R

Ron Giles 04:00

I'm not really understanding what that lobster stuff is all about. I don't know this, this lady any pull that curtain or whatever it is called liquor. So I can't really comment on that. Let me let me just kind of put something this this perhaps is a little brand new. When you're talking about cryptocurrencies and the qf s keep in mind that the cryptocurrencies are using third dimension computer programming and operating systems. Now, when the quantum financial system and the quantum internet come into play, then the old systems will go away. So what's going to happen to cryptocurrency? sees it will last until the internet goes down. And when the new Internet just simply takes over, it doesn't have the cryptocurrencies don't have a basis in their computer programs to be able to do that. It's third dimension compared to fifth dimension. And that is people ask me about quantum financial or cryptocurrencies and how that's going to work. And like I say, it's as long as the the old internet is around, then it can continue to go the way it's going. But once that is finished, once a quantum Internet has been implemented and turned on, then the old is turned off, when the old is turned off, what you have with quantum, your crypto currencies, is going to go away. Now, is it going to be really fast? I don't know. I don't know. I'm not involved in it myself. So I don't have anything invested. So I'm not going to lose anything. However, some people may be losing quite a bit. And for those who haven't prepared for that could be a real problem. So if you have a problem with it, write it out until you feel like it's it's just ready to time for the the new internet to be on, bring online, and then make your decision. So your, your Kryptos or do whatever you're going to do. But keep in mind that the cryptocurrency is designed by cabal people are taken over by the banks not taken over completely as obviously. But they've been taken over by the banks, because the banks are going out of business. And that's that's their way of transferring money and doing things that they can't do within the banking system. So guess who your opposition is? All of that is is opposite of what we're where we're going. So there's no, there's no reason for the quantum financial system and the quantum consciousness, which is the quantum computer or internet. There's they're not they don't support that. There's no money in anything that is quantum period. So if you're thinking of cryptocurrency and making money off of it, you might have

some problems and want to rethink that through. And I've said that, as far as what the lobster wallets and so forth? I really don't know, I'd love to know more about it. But you know, it's not a priority on my list. So I don't know how to help you with that. Next question, please.

T Tracee Gluhaich 08:00

As the RSS program expands worldwide, my question is this when an employment contract is written up, will it plug into the RSS qf s that's already in place? Who will manage it? And will it come out of the two benefactors accounts?

R Ron Giles 08:18

Okay, as the RSS program expands, worldwide, my question is, is when an employment contract is written? Will it plug into the RSS, QFS That's already in place? Yes. When you're saying the QFS, I'm not sure that's a different program. That's the financial system. So the RSS is a program and when you have benefactors or beneficiaries and do the beneficiary programs, they have to establish their own QFS account so that the money can be drawn into that account from the RSS program. And then they can spend it. So it'll have to be done the way it is right now. Or when it happens, who will manage it each individual managers level and society will not get involved in people's lives like that. We will accommodate as much as we possibly can, but we're not going to be doing things for people. People have to learn how to do things for themselves. So we'll come out of the two benefactors accounts Yes. One is for the contract and one is for the beneficiary program. It will come out of the benefactors master account in each case,

T Tracee Gluhaich 09:54

but if Okay, so let's clarify this one because this has been something Okay, so if, for instance, the person's living in California gets introduced to the RSS in California, and then six months later, they go to New York. And they see that in Brooklyn, there is a CAC setup and they get on an employment contract there. There's two separate benefactors. And so the second benefactor in New York will set up an account for this individual in the RSS, or in the loved ones society platform. So they will receive their money from two separate benefactors. Right?

R Ron Giles 10:37

That is correct.

T Tracee Gluhaich 10:40

Okay, yeah.

R Ron Giles 10:43

And so, you know, this, this is a programming solution to a problem that's been identified, as we've talked about, that the alliance, who those in the Alliance who are creating loved one society and the RSS platform, they are becoming familiar with this, if not already, there probably already are, but we have to address it with them so that they know what to do. Otherwise, that's crossing dominions. And they can't do that, and won't do that. So I have to be the voice. And say, I give you permission to do this, and this and this, and this. And as I become familiar with the problems and the solutions that we want, then I send that on to the alliance, and they finish it or they complete it, or put it into the program. So that's why it's working. And I believe that will happen just that way. So both benefactor accounts, Master accounts will be affected.

T Tracee Gluhaich 11:51

Okay. All right. That's clarifying. Okay, next question. My husband and I own a rock shop together, once I become a benefactor, how do I get monies to our monthly, our business monthly for operating purposes, as a benefactor? How many family members, can I sign up as beneficiaries in the RSS program? And also, can I hire family to be directors of the CAC?

R Ron Giles 12:13

The question is being asked to me, how should I do this? And I'm saying, whose money is it? It's not my money that's doing all this. It's your money. You're the benefactor? Why would you come and ask somebody else how to do your business? That's not appropriate. Okay, so how do I get money into my system as a benefactor? Or you can use benefactor accounts, which act like trust accounts of some sort? Or you can, you can put them on employment contracts. So there's a lot of different ways that you can do that. It is your choice. It is your responsibility to manage the things that you're doing. So I say back to you, or how do you want to do it? You think it's a good idea? Yeah. If you do, then go ahead and do it. And that's my way suggested that benefactor account, which you just set up yourself, or a contract account? Whichever way you want to do it. Next question.

T Tracee Gluhaich 13:27

Okay. May we also purchase vacant service stores through the NRELS have them made boarding ready, such as a kitchenette, toilet for the owner or one for the customer, for example, floors, ceilings, painting and put them under the same scheme of buying a house with a minimum ECS of 15 years? I think what they're asking, I feel like somebody messaged me this on telegram. I think what they're asking is in order to provide housing for people through the NRELS, can they purchase commercial buildings and remodel them so that they are like residential friendly?

R Ron Giles 14:15

Or like apartments?

T

T

Tracee Gluhaich 14:17

Well, but it's like a, she said a store, right? So some sort of a vacant store. So it's a commercial property and then switch it into residential. Is that okay in the NRELS?

R

Ron Giles 14:30

Well, I'm gonna say yes, because that's effectively what we will do with apartments, make them condominiums, and add some kind of a program where you bought a building and you remodel it and put in ownership or places for people to live and then sell that as condominiums on the ad NRELS. Yes, that's way to do things. So you're talking more specific about a, you know that location. And I'm saying, well look at, look it out, check it out, see what you want to do. There are zoning laws, or residential, or places for people to reside like apartment buildings. And sometimes you might have a business, commercial or operation that does not qualify for to become residential, living quarters. So there's all kinds of things that you have to consider not just what NRELS was going to do. So we want inventory, inventory, meaning houses or condominiums. And whatever you how you do that is your business. So we're new at this, aren't we? So we got people who really do know how to do this stuff. We just haven't met them yet. So you'll look at brokers and you're looking at people who build houses, developers, they're all going to have some very, very good ideas for you. And you just go out and find out all the information, bring it back, and you talk to your counselor, and you come up with the best ideas for things that will be working the way that you want it to go. We'll let that go for now. But there's, there's people to ask, and these are good questions. Because I don't have all the answers because they're specific for a certain location. Next question.

T

Tracee Gluhaich 16:45

Can the plan to purchase the house in this case be combined by purchasing a service trade somewhere else in the town or village, both of which are under the NRELS The reason I asked this is to get as many service oriented retail stores in the streets again. Similarly, you could keep a local car mechanic and service as well as the restaurant bakery Shoemaker, hairdresser, excetera. Oh, I get it, like instead of the business owner renting the property that there are like, say the building that they're able to actually purchase their store instead of renting it. That's what it sounds like, to me.

R

Ron Giles 17:20

That's a good application. And, and, but it's not the normal NRELS. The NRELS is a listing service. When you buy a house and you you fix it up, and then you resell it to our people for 20% Less. Those are the things that are associated with NRELS you're doing something that's different. See how it works. Make it a proposal for your your broker, if you have a building, and you want to buy life for your business, work it out. I don't know that that's NRELS, we're not into commercial stuff yet. That may happen, but we're not into it in the beginning. And businesses could be for sale, all kinds of things. But it's specifically right now until we change it any further, which is not a problem. We can change it. But we haven't done so yet. And there's a whole new set of problems and thought processes that you got to go through to do that. Well, is that not something a really good idea? Yeah, I think it is. Let's let's do whatever we can to serve our fellow man. And that's what I say is that is what we're here for. If you can help people

get into a business and start a business by either buying the building and putting on a program that's similar to what you would with a home, then that's a good idea. Some things just don't fit. But you as the person who has the money. And how you tell the brokers, this is what I'd like to do well, okay, let's do it. There's, there's a lot of things that are are going to present themselves that might not fit just exactly in the right place. But there's ways to possibly do it anyway. So it may not be part of the NRELS, it could be something that you'd want to do on your own with a broker and that's fine. Yeah. So use your imagination, use your heart, use your counselor, and go for the best way to service mankind serve mankind. Next question.

T

Tracee Gluhaich 19:53

As a humanitarian, I have four projects already, but after the redemption when everything's settled down, can I do more? projects as desired.

R

Ron Giles 20:05

What do you think you should do? And this is not this is not a question to be asking me. You're the one in charge not me. And you do more projects is that you didn't present it you're Yes. In fact, what we're doing is project projects projects are doing this, we're doing that project, call it project, don't call it project, still do it. But you are the one that makes those decisions, not me. And who's going to be your boss? It's you. Oh, you have a counselor, but you are the boss. It's your money. He has as much advice as you can and then move forward. Will go with the next question. Yes,

T

Tracee Gluhaich 20:58

I would like to know the following uses of trusts are possible within the RSS, a small company creates a trust and a beneficiary refers it to RSS. Now this trust becomes an RSS beneficiary, the company owner, its employees and customers will use the trust user ID number to register

R

Ron Giles 21:17

a trust. If the trust is a beneficiary. It cannot create more trust. Now, this may be a problem. And I haven't solved it yet. So I'm thinking to myself, well, if it's a if a company is a trust, rather than a corporation, corporations, we don't get involved with that. If it's a trust, then it's acting like a corporation. Now, how do we deal with that? I'm not sure yet. So a small company creates a trust, and a beneficiary refers it to RSS. Now the trust becomes an RSS beneficiary. That company owner, its employees and customers will use the trusts user ID to register. I've said that trust cannot create trust. That's a question. And so I'm not sure how to answer that. That's going to take further contemplation, pondering and coming up with a solution, which is what we do. So let's go on to number two there.

T

Tracee Gluhaich 22:36

I created trust for a CAC and refer it to RSS now the trust becomes an RSS beneficiary. All new beneficiaries referred by the CAC will use the trust user ID to register. This will alleviate any

beneficiaries, referred by the CAC will use the trust user ID to register. This will alleviate any confusion in terms of who becomes the referrer. When someone walks into the CAC and asks about the RSS, we're getting

R

Ron Giles 22:57

into some some areas that are not really clear. If you set up a trust for the CAC and then you start registering people using your your trust ID master ID number. Is that going to be a problem? I'm not sure it's a whole new, new thoughts. So along with the first question, the first area questions of the two. There's similar problems in creating trust, and using a trust as a beneficiary, for referring other people. Because the trust the way that we've set it up prior, they do not participate in the benefit or the bonus programs, and they cannot create new trusts. So let's just put again, let's just put this on the side and we'll bring it up again at some point in the future when we get more chance to see what this is the ramifications are as far as trusts are concerned. So very good question, whoever. Very good question. And thank you for your your thought processes here. Next question.

T

Tracee Gluhaich 24:21

RSS share is transferable to next of kin. Does that mean that the next of kin gets their own RSS share, plus six trust plus all seven from deceased accumulating two Shares Plus 12 Trust for the next of kin? If so, is this only for 10 years renewable every year for 10 more years or is it continuous forever?

R

Ron Giles 24:46

wants to try once a year share you said share the RSS share to transfer the beneficiary or the account is transferable to the next of kin. Yes, it just continues on. We don't know that the next of kin, that's the next of kin as long as you leave the pin number so that they can get into it, and they can change whatever they need to do in order to make it work for them. And that's what it's designed to do. Just go to the next of kin, but we won't know that the RSS won't know that. So is there going to have two shares or two accounts? Yes. Are they going to have 12? Trust to next of kin? Yes. Because it was bequeath to them by their parent or whomever, so that it's all legal. And we have no problems with that. So that's what they're getting then. So they getting and gone, along with their own beneficiary program. Obviously, employment contracts don't work. Because once you're passed away, then you're not employed anymore. We'll go on to the next question.

T

Tracee Gluhaich 26:19

Details of loved one society. Are you a group of nine billionaire humanitarians? With Ron Giles, the main spokesperson, may I submit the structure I have built to this location directly to d lon or another? I think this must be translated. Now. This has got to be Oh, I'm sorry. Details on one sec. Are you a group of nine billionaire humanitarians with Ron Giles, the main spokesperson, I feel like this person's non English speaker or something because these questions well,

R

Ron Giles 26:54

your need this person needs to understand. Nine billionaires is a marketing process. They're not billionaires, they're quintillionaires. Nobody believes in anything more than a billionaire. It's a marketing program for the RSS beneficiaries. So if you're going to nail somebody down on some kind of a question like this, I don't think that's appropriate. You're trying to make something out of nothing. If you're if you're, if you're making this as a okay, there's two ways of looking at this. If it's if you're complaining that this is the case, then I'm sorry, it's a it's a marketing program. And the cards are used for marketing, not for the truth of what's in the cart. So if there's nine billionaires, that's something that people can relate to as the ability to sustain this over a period of time. They don't know that there's quintillions out there quintillion errs out there. Or sin trillion people out there. No, they don't have a clue about that. And if you if you don't take into consideration who you're talking to and their knowledge, you're going to have problems. So you have to do things that a billionaire is more important than a millionaire important, has more money than a millionaire that's why the whole concept of a billionaire is put in place the nine people that I have with me are not going to be billionaires they are quintillion heirs or more many quintillion heirs or more. So, you, you're gonna have to start thinking this is kind of a silly question. Unless you're having some problems with with your language or whatever. But yeah, that's sufficient for now. Okay.

T

Tracee Gluhaich 29:19

may I submit the structure I have built for this location directly to d lon or another?

R

Ron Giles 29:30

What is the structure you're talking about? I'm not sure what you're talking about. If you're trying to do something that changed the loved one society, then that needs to come to me though, and it directly to d lon and have him Have him send it to me forwarded to me whatever. You know, I'm not really open for changes in loved one society. I'll look at things but you've got to understand people. And this is one of the problems I have with those who want to come and change what we're doing. It's taken years to get to this point, years of thought and background information and all kinds of things. And somebody comes up and says, we're we want to change this, we, we don't think that we should have six trusts for a beneficiary. I don't care what you think. I don't care if you try and figure out a better way to do things. But don't come and tell me I was loved one society that we should change things. You can make some suggestions. But I've had one situation today that I've had to deal with. That ship has sailed. Loved One society was created by the Alliance. I just downloaded it. If you have a problem with the way that we're doing things, go talk to the alliance yourself. Don't come to me about it. Because I've already dealt with that. I told the Alliance my connection with the Alliance, I think six trust is too many. For a beneficiary account. I gave my opinion and they said it's still six period. Exclamation point, there's a reason for it. Okay, let's go six. Everybody has six kids, six trusts for a beneficiary plus their, their beneficiary account, that's seven \$7,000 a week. \$28,000 a month. \$246,000 a year. So when you when somebody wants to make changes, I'm just saying this, they want to make changes. It's gonna have to be perfect. If I find one little fault with it, then it's not going to happen that if I can't find some faults with it, that's easy to

do, then maybe that's what we'll do. So I'm open and yeah, I'm not very much open. might stick your camel toe in the door. But that's about it, unless there's something really worthwhile. Oh, go on to the next question.

T

Tracee Gluhaich 32:53

How much time are average time is allowed with someone at the redemption chat? Do you know?

R

Ron Giles 33:01

When the conversation is over, then it will be over. I don't know that there's a timeline. The gurus have a timeline, but they're not conducting the appointment. The most important thing for you to understand is the person sitting across from you is there to get you what you need to be a humanitarian for the next 100 years. If it takes three hours to do that, then it takes three hours. Well, I can't help you anymore. I've got my 45 minutes they theory me no, that's just BS person is there is going to conduct the meeting is going to be appropriate. And everything that needs to be said will be said. Just trust that the right things will take place at the end. So don't worry about those people. Don't worry about those ideas. You know, you don't want to go in there and and have your business plan and expect them to go through all your business plan for the next 567 hours. No, that's they know everything about you anyway. So what are you trying to tell them that they already don't know. You're just going to show them that this is what you've done. And be proud of it. And this is what you want to do. And this is why you're asking for the amount of money that you're asking for. Let it be according to what you want. And let it go. Don't worry about it. Don't make it a big thing. You're going to the person there will make it very helpful for you. It'll be a good experience. But don't go in there with thinking that you're going to be spending a lot of time on or that they want to have you spend a lot of time on projects. That's not yet not what they're there. for their funding you not your projects. I'll say that 27,000 times it's appears, each person has to hear that they're funding you, not your projects. Your projects are important to you. And they're important for things for you to do as a humanitarian, but they are funding you. And if you are not a humanitarian, you won't get any funds. Period. So let's move along to the next question.

T

Tracee Gluhaich 35:40

If I never heard of loved one society would have the Alliance found me through the gathering of of all bank accounts through all banks throughout the world.

R

Ron Giles 35:59

The Alliance will find the people who have been set aside and have a calling to be a humanitarian. Not all humanitarians will have will get money in the beginning. It might be 10 or 15,000. People, it might be 20,000, maybe 25 or 30,000. People, we don't know that until the time comes. And we might have 20,000 people going through the training. And are all of them supposed to have money? I don't know. I'm just it's not it's not my call. Those who are having the calling from the alliance will get the funds. And those who are not, they'll have to wait until

the funds come through other sources from others who have received the funds. So I'm not sure how to say that other than that you are loved and appreciated for who you are, you're going to have opportunities to come from your heart in your humanitarian activities. But your name may not be the ones to get the money in the beginning. And let that just be okay. If you're going to be offended by it, your vibrations are not high. Why should you be offended? It's just it's a judgment call. And there are those who know about these kinds of things that are going to be making a judgment call. Don't let it let it be that there are others who are making decisions. And if you get chosen, then that's great. Because you don't get chosen doesn't mean that you don't have good ideas and don't want to be involved with it and all that sort of stuff. That's not true. You'll have other people that come along and help you projects. Okay, let's go with it. Next question.

T

Tracee Gluhaich 38:12

Beneficiary counts from RSS pastor gets one account plus six trust and signs up the church, or the nonprofit which gets one account plus six trust, then signs up church member, which gets one account plus six trust so nonprofits get six trust two. Are there any other entities besides individuals and nonprofits that get six trusts?

R

Ron Giles 38:39

You have to be a beneficiary to get six trust as far as the the RSS platform is concerned. So I'm not sure what you mean with all of these questions. Yes. The pastor gets it his account, and he's a trust and has six trust. Then he signs up the church and that nonprofit, he gets one account plus six. And then church members get one account plus six trust each. And then they move out and they start working on their bonus programs and getting to payroll or three or four or five or whatever, that are all joining and wanting to be a part of this. Some people have a big lack mentality. What's going to be hard to get people to believe in it. Give them the money. If they don't want to, you pay the 10 \$10 and then you haven't pay it back after their first day. And tell them you're gonna get another 40 after that. You're gonna get \$50 After you give somebody \$10 Where's the problem? Well, the problem is in disregarding the fact that if you make them pay the \$10 Then they have ownership of the whole program. That's their ownership position and they're not under the dole anymore and they're not under the whatever else you want to call it. This money is yours, people. This money is really yours. We're just finding the best way to get it to. Next question.

T

Tracee Gluhaich 40:27

Um, hold on. I just saw I just got a notification that I have a podcast interview in 30 minutes. I'm not showered. Okay, actually, this is perfect timing. This is the last question is a generation bonus only if you sign up large groups and churches or does it work if you just sign up individuals to

R

Ron Giles 40:43

it works just if you just sign up individuals to the generation bonuses is second, third. generations are fine. You won't have the big ones. But Bosch, it couldn't be very, very lucrative

generations are fine. You won't have the big ones. But Dohen, it couldn't be very, very lucrative, very lucrative. You really understand what that one is the boy it can be really big churches with 6000 people in them up in North Dakota, I'm aware of what so you're gonna have they're gonna have a lot of fun with this. So I guess that's it for today. Okay, sounds good daddy for all of your your excellent work and comments, and I appreciate your explanation things. And, and so it's all good. It's all good. We're working things through. So thank you, Tracee, thank you for your good questions for your great questions today. Everybody, I appreciate it. sent forth my love and appreciation for all of you. And us have a great day today. Make it a great day. That's what Tracy said. Make it a great day today. Okay, let's do that. Okay, bye bye for now. Bye
