SPEAKERS

Ron Giles, Tracee, Tracee Gluhaich

- R** Ron Giles 00:00
Good morning humanitarians. It's just Ron Giles. I'm here with Tracee and we're going to do a Q & A today. Today is the Friday the 22nd of April 2022. Let's go ahead and start with question number one.
- T** Tracee 00:15
Where will we go in Canada to redeem our Zim and Dong?
- R** Ron Giles 00:15
I'd like you to read more about what you're looking at. Obviously, that's the most important thing. But if you read our stuff, you'll understand that the alliance is going to contact us. So I have no idea in Canada or any other country, how it's going to work. However, I do know that as humanitarians, we will be contacted by the Alliance at the appropriate time, and given the opportunity to make our appointments. And, and then we'll go ahead with the appointments and redeem and away it goes. Other than that, I'd invite you that to read more before you ask more questions, because all of those questions are available in our documentation, some things so please read, and you will enjoy it better. Next question.
- T** Tracee 01:19
can I give some of my Zims to my husband? Can he ask for larger rates so he can do his own projects? How do I get money to my kids? Do I just give them information to sign up for the RSS program?
- R** Ron Giles 01:35

Well, you're asking me permission to do things that are not mine to say? The answer is yes, you can do whatever you want. However, there are things that are, in my opinion, that would be better, giving your husband zoom and letting him learn how to become a zim benefactor would probably be in his best interest. I don't know the circumstances. I don't know, if he's humanitarian. If you're the humanitarian, and he's not, and you give him the Zim, then the gym is going to be wasted. This is not a money thing. We think it is because that's the most important thing, because we think that money is really important, but it's not. We're going to be funded not by for our projects, your husband is not going to be give his money for his projects. You're giving money because you're the humanitarian. And with that money, you will go and do all kinds of things have projects that are humanitarian in nature. And so the whole premise upon you asking that you're only looking at funds, and I'm saying they're not their projects, you're only getting money for because you are the humanitarian, not for your projects, your projects can be finished in six months or a year or two, what are you going to do for the other two that are 100 years? There's, you've got to be understanding things. So again, just read our stuff and get more of a flavor of what we're trying to accomplish as far as becoming a zim benefactor.

T

Tracee 03:27

Can I answer that to?

R

Ron Giles 03:30

Yes, if you'd like to. Okay, so what I did say there's something about the kids, but go ahead.

T

Tracee 03:36

Um, so for me, personally, my husband, I'm just going to do everything, all the redemption, I mean, we are, you know, best friends. So if he wants his own projects, I'll give him money out of my redemption. But I'm not really engaging in conversation with him about any of this other than giving him a retirement card. And then I'm just going to have my three kids be at the top of the RSS, and then they can go and build it out. And yeah, so I'll just register them in the RSS under my benefactor number.

R

Ron Giles 04:10

That's good idea. If they want to become involved in things and you know, there's different positions for directors and so forth that you can do. So. Good job. Next question.

T

Tracee 04:27

A while ago, I saw questions to ask at the redemption appointments, however, now I can't find them. Can you let us know where they are?

R

Ron Giles 04:35

So you read somewhere about appointment or questions to ask? No, I don't remember where they are. Do you Tracee?

T

Tracee 04:48

I think that's not from us.

R

Ron Giles 04:50

I don't know that it's in our documentation. I think we're not telling people. Yeah, we're not. We're not talking to most often. We're not Talking about questions to ask your redemption, people. But, you know, if if you have some redemption questions, then you can ask them there at your appointment. Your person that's going to help you interview you for the, to become a zim benefactor is very knowledgeable about what's whatever's going to take place. They're going to give us that the ability to understand the quantum financial system, either through a website that we go to, to learn about and to the kinds of things that you want to know. And they're there to help you so, but to ask specific questions, I don't have them. I don't know where they are. Next question.

T

Tracee 05:51

What advice do you give to someone like me who's been following your work for a while, which I dearly respect and also follow some truthers or influencers who are in the politics and geopolitical area. They have such great minds when it comes to deciphering or analyzing the game that has been played in the political arena. But they just missed so easily the idea of QFS revaluations med beds and the Alliance itself saying that we are living in a fantasy or an illusion and they claim that we are giving false hope to people or these paid shills, part of the Cabal has worked to bring down the hope of humanity. Thank you for your insight.

R

Ron Giles 06:26

There there are, there are some really good people and we're in a war. What is a war me? Well, you don't give any information to the enemy, that's going to give them an advantage. So we're kept out of the loop of information because we have we do not have a need to know. We want to know when, especially when it's going to be over. But we don't get to know because that's part of the the intrigue, that's part of the war. So we don't get to know until it's time for us to really get involved. Now, that being said, let's be sure we understand that we're separating our love won society humanitarian activities, from what is going on on a geopolitical situation. And most of the problems that we as humanitarians have is that we focus on the bad the geopolitical stuff, and spend more time there than we do on the love won society stuff. Now, if I focus on that stuff over there, then I get really, I can get really depressed and lose my feelings of self worth. Because they're telling us that you know, you got to have food and all that sort of stuff, going into stores and buy more stuff. All of that's well and good. And I have no problems with it. But let's not focus on that, because that is not who we are. We are humanitarians.

What's going to happen to us, will be just perfect for us. It'll be the greatest experience we will have. I focus on that. And because I do, I'm able to keep a balance. And I'm not sure that I'm doing a real good job with it. But that's my thought. And that's what I tried to do. Try to get involved in all of the different stuff and the different truthers and all they're trying to accomplish and all of that next little bit of tidbit of information and director. I don't care about that stuff. Because it's not really a you learn about it. And what does it do for you? When it happens is going to happen. And that's really what we're looking for. And so from that perspective, I say, just allow those people over there to do what they're going to do. Listen if you want to a little bit, but don't focus on it, and certainly don't go to fear and up and being upset and frustrated. And that's where those kinds of things happen. When we're listening to things that are not as important as what we're here to accomplish. As far as humanitarians are concerned. That's the way I look at things and it makes me feel a lot better. And it'll make you feel a lot better too if you just quit listening to all that stuff, because it's nothing that has anything to do with you. Yeah, get some food. Be sure that you've out there. Listen to it, but don't focus on it. Don't focus on it. That's my suggestions. Go to the next question.

T

Tracee 09:59

Can I see yet that the qf s is God's kingdom, currency now we are sovereign and God's kingdom has come.

R

Ron Giles 10:07

Yes, I'm gonna say yes, for your belief system. Other people will have a different way of looking at it, and it will be true for them according to their beliefs. God's Kingdom is God's kingdom. So what does that entail? What's it look like? Is it is it God's name on it that this, okay, now we're in God's kingdom? And we weren't just before? No, I don't believe that. That's the way it will work. So just allow yourself to be who you are, and believe the things that you want to believe the qf s is God's financial system, per period. So if that's what you're concerned about, yeah, we're under God's control. And this whole golden age of mankind is under the Alliance control, which is God's control, which is the content of consciousness, divine consciousness, and so on, so forth. So we've got a lot to hang our hat on as far as that's concerned. But I when you saying these things about God's kingdom, I'm not really sure what you really mean by that, as I perceive it, I think that's okay. You didn't believe what you're one. As far as I'm concerned. It'll be alright. To fine tune itself. And that's the important thing. Start out where you are, and go to the finer points. And that's what we're trying to accomplish. Let's go with the next question, please.

T

Tracee 11:48

Can we eventually get a list of those crypto currencies that will or will not survive the QFS SSC spit to intrude and against, say, hyper verse as it travels via the satellite system, I am tied up with it. But I think it will cease as it isn't backed by gold or silver.

R

Ron Giles 12:08

Well has really very little to do with gold or silver or any other backing. It's a computer

well, has really very little to do with gold or silver or any other backing. It's a computer program that's on that's functional on the computer system as we now have the internet. When the Internet changes, there's a different operating system and a lot of people are really scared that we're going to lose the internet. And when did that the quantum consciousness, which is the quantum internet, is already working in parallel. It's been doing that for years, with the with the system that we presently have. cryptocurrencies are all involved in computers, and they're computer generated. The Quantum financial system does not have a computer that is consistently this consistent to use for any of the cryptocurrency. So which ones are going to be part of the QFS None of them? They they're operating in a different operating system, so they're not going to be a part of it. Now, can they do what they're doing? Now? I don't know. I suspect we'll have some problems in the future with crypto currencies. Crypto currencies are designed to make money. Am I correct? You bought it a long time ago. And you've made a lot of money on it. That's not a financial system. So if you're going to use that for your financial system, then you're never going to have the same price for the things that you want to buy. Because it'll go up or down. And that's not a financial system that is worth holding on to. That's the curveballs way. And somebody came up with a solution to get rid of the Cabal, and now they've created a new system that the banks want to use because they have no relevancy in the quantum financial system. So they're trying to remain relevant by using a crypto currencies, money laundering and all of the other sorts of stuff that the banks already do. So all of that, is that is that a good thing? You know, if you were a judge in God's kingdom, which I don't believe there are, but if you were the one that was judging things, would you allow stuff that can make money and destroy people's lives or not be a part of the financial system. You can't use your brain. It's not compatible. That whole system is not compatible with where we're going. So you're making money now go ahead and use it to it's fine. But just understand that it's got a computer system that's not consistent with quantum financial system, or the quantum internet. It's not going to survive in that period. Well, we'll see how that how that takes place. But I am very skeptical about the future existence of cryptocurrencies. Next question.

T

Tracee 15:33

If you are looking for an accounting firm, who should be on our side, how do you tell them apart? How do you tell if they are good ones?

R

Ron Giles 15:42

That's a good question. And it's really kind of hard to be able to know which one is which. And they said, that's good, you're not going to have so many bad accounting firms. In fact, they've destroyed some really, really good counting firms just because of the the way that the persons involved in it, running their business in the Cabal didn't like it. And wouldn't let them do the things that they're doing. Those are the kinds of companies that you want to get a hold of, and be a part of, or let them be a part of your life. So that's the way I look at it, and I can inquire about it. So I'm have my own. I don't have to worry about it myself. But, you know, I'm not really here to give other people validation on which one they want to choose. That's not my purpose. I'm just doing that for myself. Next question,

T

Tracee 16:43

is, is there documentation that specifically outlines all that is needed to become as in
manufacture? If so, is there a link directly to it?

benefactor? If so, is there a link directly to it?

R

Ron Giles 16:52

The point is, is that it's all part of becoming a zim benefactor. So what part can you leave out? I don't know how to tell you that. I don't know how to tell you which one year interested in which one is going to support your projects that you're trying to accomplish? I'm not sure how to do that. So is there documentation that specifically outlines all that is needed to become a Zim benefactor? No, it's just all in there. It's in all of the documentation. Documentation, all the documents that we have used to explain what we're trying to accomplish, it's all there and trying to eliminate some of it and then not take all of it in is, is not white. So there's nothing one set of documents or one place other than the QFS2020.com So other than that, it's all in there, go for it. Next question.

T

Tracee 17:57

as a benefactor, are we able to set up trust and be the trustees for the overnight oversight of the funds as they are employed for humanitarian purposes?

R

Ron Giles 18:14

We're making some changes with with trust, when I'm saying that I'm saying one of the three that become beneficiaries was a trust. And I'm eliminating that because trusts have people behind them. The same way as a corporation, it's a legal, it's a legal fiction. When I say fiction, it's not a real person, but it acts like a person. And that person, if he if he owns the trust, and is doing something with it, and signs the trust up, then he can also sign himself up as an individual. And so we're eliminating trusts as beneficiaries. Okay, now, that leaves a lot of questions about trusts. But if you want to use trusts for ownership position in some of the things that you're going to do, that's a decision that you need to make, but it's not part of the financial aspect of it. If I have a ranch somewhere, and I want to put that ranch, I can put it in a trust. And it's safe and secure in that trust. If something happens, and there's a liability or somebody gets hurt, and it's being sued, it's in a trust and the rest of the stuff that I have is not in a trust. If it's in a trust by itself then and I have other trusts, then they cannot get into other trusts. That's what I was trying to say. So it has his purpose and I've ownership asset A lot of times people use that for other things, bank. If you're involved with a bank that's created a trust for you, I would get out of that as quickly as I possibly could they take your sovereignty and make money on it. And we're not going to be involved in that sort of thing. So as far as love won society is concerned as a beneficiary, you are entitled to six trusts, period. That's for your beneficiary program. Thank you. beneficiaries. That's your beneficiary program, six trusts no more. But if you want to use trusts to own something, then that's okay. You're an individual is free to do what you want to do. But let's not be saying that there's only so many trusts that can be done by zim benefactor, Zim benefactor can have 1000s of trusts as a way of protecting certain items that he's got to save, or certain noises he wants to protect. It has to do with with some liabilities and other things like that. So make a decision and do things appropriately. But don't be going to a trust and thinking that you're going to be able to be a beneficiary trust as a beneficiary, because we're eliminating, because that person could get more than two or three or five or 10, or 10, or 15 trust. And that makes it that much more money for him. So we'll leave it at that. Next question.

T

Tracee 21:47

If trusts are the established method for the employment of funds, is there a set of forms for the setting up of those trusts and a banking type system for draws? tranches of the needed funds as the various humanitarian operations are set up and get underway?

R

Ron Giles 22:08

It's an it's an interesting question. And I'm not sure that there is a lot of love won society behind that question. You can use whatever you'd like. Now established method for the employment of funds, is there a set of forms? No, there's not a set of forms. However, if you want to have a trust, we will have a revocable trust document on our website, they have a platform that you can use, if that's what you want to use for your six trusts. You don't have to go to the lawyer and somebody else and give away a bunch of stuff. So it's going to be there. Now how you go about your activities. You're not even taught you to trust her and banking type system to or drawers, you're going to have the quantum financial system. And I don't know why you're using even the term banking. It's a quantum financial system, not a bank. And there's, there's banks are going away, they're going to go out of business. And they will be repurposed as financial service centers and a financial service industry. They're already being changed to do that. How many times do I have to say that banks will go away, there will not be any bank. In the quantum financial system. There will be service financial service industries, or financial service centers, that will be established. And they're not going to be called banks. They may have Chase financial service centers or, or some other name for a bank. We'll see how that works out. I'm thrown by this kind of a question because it's very deep in stuff that is not part of level one society. And I'm not I'm not going to go there's no reason for me to try and figure out what's what's you're really wanting to do that question. So I just have to say, around discretion, just use your own discretion. And things are going to work out for the best. I hope I didn't fail that question. But there it is. There's my answer. Next question.

T

Tracee 24:33

And let me add to that, I believe that the ledger system of the RSS will handle all of this stuff, so you don't need to sweat it because that's where you're putting the money anyway. So Okay, is there support for accounting for the funds and how they are employed, so we may see how effective the funds are being used by the various programs, if it is not within the Zim set. At Apple, there be professionals available that understands funding.

R

Ron Giles 25:08

If you think that somebody is smarter than you are, with that, then professional, you know, what is a professional as far as we're concerned? And are we going to be hiring professionals to because we don't know what we're talking about? Keep in mind that everything is changing. Those who used to be professionals at the old system, are not necessarily going to be the professionals that you want to be using. In the new system. wealth managers are real good, such as a real good example. wealth managers are designed to take your money and make you

money with it. And then they get a large percentage of what they make for you. With your money. That's all going away because we don't make money with our money, period. Exclamation point. So what is the wealth management or wealth manager going to do for you? Well, this is all about wealth, and I don't learn. Because those people are going to have to learn a whole new industry, because the one that they're professionals have is going away. So don't bend over to the reality that somebody might know something more than you. Because you're getting to the point where you know more than they do. It's your money. And their servants, if that's the right word to use. They're going to be hired by people to do things that they're not used to doing, if they get involved with people. I really don't know, I don't have any interest in a wealth manager. What is a wealth manager do? But I can't do it myself. You got to make decisions. You got to do things. You're setting up the CAC, how do you train? How do you take care of your directors and train them? With some old professional guy? Maybe they know something? I don't know. But we're changing. So be critical about everything that's coming? Critical meaning do I want to participate with that kind of stuff. And if I don't, then I don't do that. Because we're not just here to make money. We're distributing money. We're helping people have more money than they could ever have gotten with a cabal situation. The whole world has somewhere between 80 and \$120 trillion in their, their revenue area in their revenue every year. That's how much they spent. Were going to be in the quintillions just one of us with a 100 keynote 500,000 presume they're the 1.25 quintillion, that's Fast Five quintillion per year. Which one of the Cabal wants to trade places with you? So it's brand new. And they have no idea what we're doing. And we don't tell them a whole lot about I'm doing a lot in training. But I don't go around telling everybody about trillionaires or quintillion heirs or sextillion heirs or septillion heirs or even not aliens? No, we don't. We don't have to talk to people about that, because they have no way of knowing and have no way of understanding how much money we're going to get. We don't care if they know, we have a hard time understanding it ourselves. zeros are just a matter of opportunities. The more zeroes you have in your funds, the more opportunities, how many of us are going to be involved in the financial services industries. We're going to be paying for all those things. We're going to be paying for everything. The overhead, the wages for people on employment contracts, everything. That's what we're going to be doing. We're going to be helping local governments in the community because they don't have any income anymore except for the other 17% 3% for the states in the cities. And 14% for the federal government. Those are the sales tax. They're not going to be able to make it without our help. Because they won't have the funds to do what they normally do. And so they're just going to have to shut down. A lot of industries, a lot of things that are part of the government are going to be shut down because they don't have any income tax anymore. So you don't have to have somebody going out and collecting that. You don't think you're gonna worry about sales tax. So we're in a position where we can help out, we'll have to, and how much of that. So a lot of money is going to be required, and we're getting a lot. So, the Alliance is working with us to get things accomplished in an appropriate sort of way. So, next question, please.

T

Tracee 30:52

The RSS program is an accounting system and the QFS system is a financial system. And there are two different things I understood it like this, the Benefactor receives the quarterly payment to his mother lode account in the QFS system. And from there, the funds are distributed to the different accounts, for example, the RSS system, the request for this account is generated through the separate RSS system. And it is through this RSS of S account that the funds are dispersed to the beneficiaries. Are the necessary funds for the RSS program automatically

provided by the mother lode account in the appropriate amount? Or is this done manually, so that the Benefactor has to keep an eye on the accounts for the distribution at all times, so that the disbursement is not interrupted?

R

Ron Giles 31:37

Excellent question. And I appreciate your thoughts on this is something going to be done so that you don't have to worry about it? I suspect that that will I suspect that it'll all take place. There's no reason to not have it that way to where your funding comes out of your mother lode and goes into your master account to be sure that there's no failures in your ability to pay people what they're supposed to get. So is there some kind of a program, I suspect there will be, and I suspect that they will work out some kind of a formula so that you've got so many beneficiaries and you've got to take care of and work it out so that it can keep up with that, that those projections and the moving forward, and how we're going to do things for people. But I love won society's not going to do that. So those are the kinds of things that will come from services outside of love won society. Some times outside of the RSS platform, we'll see. But right now we don't I don't really know what's going on. Right now, it is a requirement that the individual take care of the, the, their, their own financial system as in the master account. Now associated with the master account, you've got the bond account, which is the the bond is designed to protect everybody from things so you're putting money in a bonding account. And that's connected to your master account. So if there's a problem with something, it comes out of your bond, it doesn't come out of your mother lode account. Unless you want to do it that way. We'll see how that all works out. But part of your contract is in benefactor is that you have a bond account. And that the the master account will be paying all of your your people for their things that you're doing your employment contracts and your beneficiary accounts. And if there's a problem with it, and it runs short, then it goes over to your bond account and draws from that not from your master account. We don't want anything to do with your master account, you will just have a bond account that will draw funds out. And that's our that's your a bond your it's a bond you have a contract. And that bond is is to ensure that you financially deal with things the way they're supposed to be done dealt with. So I see some problem, I see very easy solutions to potential problems. And we just need to be on the same sheet of music so that we're doing things appropriately. And that's just part of it. As part of how we'll do things. Next question.

T

Tracee 34:39

Will there be a deadline or timeframe as to how long a benefactor can wait to start the RSS or CAC programs? And is it possible to be a benefactor and still work doing something they love perhaps setting up a template CAC employment contract, no salary necessary for themselves as a way to learn through the experience about what works and what doesn't work for free? feature contracts for others.

R

Ron Giles 35:06

The question is person has the ability to handle things, the way that they would like to, you're in charge, it's your funds. And if you want to do things for RSS and the CAC, and you don't really want to be involved in it, then you find the right people to do so. And give them the

responsibility and the ability to accomplish the things that you want them to do. Designate and require accountability, you'll get management tools, reports, and so forth. All of that is part and parcel to what's going on. But you're the one that has to be the manager, you have to be the one that's involved. It's frustrating for love won society, for me and for all of us to understand how to train people to be responsible, how to train somebody to get used to having quintillions of dollars. And the responsibility that they have to manage that property and their people properly, to accomplish the great good that can come from it. And then you have others who really don't they want to be a humanitarian, but they don't really are involved in all the thought processes that need to take place to manage that kind of money. Well, there's a good chance that the alliance knows that that's not what you want to do. And they're not going to require you to do things like that. You may have set yourself up to become a Zim benefactor. But you don't really have a heart for Zim benefactor, you think the Alliance doesn't know that? And do you think that it's your ally, or you're gonna have to wait for the Alliance to make the decision? If you don't want to do something, then don't get involved? But if you do get involved, then you've got to do it. So how do you want to really go, what is their set up a template for the CAC? Well, that's a really good idea. And do as much of that as you possibly can so that you don't have a day to day? Responsibility for it, set it up automatically. That's why. But if you're doing that out of not being wise, and you're letting somebody else be in charge, then why don't we give the money to those people? Why doesn't the Alliance get them involved? Why have they not been inspired to get Zim? Why are there others who got jam and have really no interest in doing anything with them? Getting a lot of money is offensive to them. I don't want a lot of money. I don't want to have to people coming ask me for loans and all this stuff all the time. Now, those are the kinds of people who really don't need this kind of money. It's not their money anyway, in terms of expended the way they want. I shouldn't say it's not their money, because it is it's our responsibility, our stewardship. And understanding that is, is the key to be able to make things work properly. So there's a lot going on. And there's a lot of learning that needs to take place. So as we try and expedite the training process, and people want to go and do it just haphazardly. How quickly do they have to become a Zim benefactor? That's why I say focus on the preparations for your redemption appointment first. When you have that in line, then you'll at least be getting the money. And then you can work out all of the details to become a Zim benefactor, and how you want to set it up your CAC and, and your RSS program. And if you want to participate in the real estate listing service, all of those kinds of things are a decision that you will make, but it does not require you to make the decision right away. Once you have the money, then you can take two or three weeks or maybe a month or whatever you want to take. And you'll find yourself a med bed and enjoy being healthy and strong again. And then you come back and start working. Who knows what it's going to do. So we allow ourselves to move into this with the expectation that we're going to be in charge, that we're going to be the ones that make the decisions. If that's not what you want, then don't get involved. Because it's required of you to, you don't want to be an airline pilot, and then don't become an airline pilot. If you don't like taking off and landing and sitting in there for hours and hours and, and making radio calls, then don't do it. That if you do and you really enjoy that, then you want to go ahead and get done. But you have to prepare yourself meticulously for the things that you're going to do if it's at that level of service to mankind. This program is not for the people who I'm not gonna say C students, because most of us are speak C students. And we don't have to be A's and B students to get to do what we're going to accomplish. But we have to come up to a standard. And I hope that you've set those standards very high, and become the highest humanitarian or the best humanitarian you possibly can. That's why the alliance has given us a counselor to help us. We've got everything we're going to need. Why are we asking so many questions? I'm just curious right now. But all of these questions will be answered over

a period of time and as you do the education to get to where you need to go to become a good humanitarian and a good gym benefactor. Hopefully that makes sense to you. Okay, let's go with the next question. Please.

T Tracee Gluhaich 41:56

What is the quantum financial system?

R Ron Giles 41:59

you're brand new, the first menu on the QFS 2020.com is QFS and RV information. On that, you can read a very long and meticulous document that tells you about the quantum financial system. Obviously, you don't have any real understanding of what that is. Or you wouldn't ask the question, but it is big. And it's not something you can just pick up and read, oh, I've got this. I understand this fully. Because there's way beyond that. So there are places for you to find that information. qf s is in the that first menu item, and go there and learn everything you possibly can. Just question

T Tracee 43:02

and I am uploading videos that you did that chat about 10 days ago on telegram and those will be finished today. So people can just go to the bit shoot channel and watch those they will eventually get them via email. But yeah, so just go to bid shoot, subscribe. That way, you will get notifications every time I upload a video. Okay, what resources will back the QFS?

R Ron Giles 43:38

There's about 15,000, maybe 20,000 things that will support that. And you need to find that out on your own. Everything we're doing supports that. So I'm sorry, you just need to learn. And this is answering asking questions here is not the easy way to learn. You got to go there and find it out yourself. So I hope you enjoy reading and listening to videos and question and answers. And because that's where he is. There's no other way to do it except for get it done. Next question.

T Tracee 44:23

Who are the people behind this, like the names of those and the alliances etc.

R Ron Giles 44:29

I have done probably eight to 10 different posts about Alliance, the alliance and very distinctly explained who is involved as far as the elements of the Alliance. You have the Spiritual Hierarchy of the heavens. I don't know who was all involved in that. And then you have the ET'S, the benevolent ET'S have the technology and the weapons that are necessary to get rid of

the bad people. And then you have the boots on the ground. I don't know the names role of these people. What good would that be to have those? The spiritual hierarchy is probably is the one that's most important. Because the Spiritual Hierarchy is means that we are connected to God. The Alliance has the Ascended Masters, who would look who's that list of people that are there? Well, the most the one that we know most about, is Jesus Sunanda. Your way? Yes, you have been Java had a article about that the other day? What do you want to call them? That's the Eastern message. So when we, when we're looking for things like that? That's a very broad question. And there's 10 15,000. I don't how many? How many people are in there? How many Archangels? How many angels? How many Ascended Masters? How many resurrected beings? Who are all these people? Well, what kind of a question is that? Once you're just going to ask one or two people? You don't venerate? I don't mean to be facetious. But that's, that's a really kind of an interesting question. What are the names of the people on the earth? I can't tell you all who they are. I don't know. So Well, that looks like the end of the questions for today.

T

Tracee 47:01

Yeah, let me add to that, let me add. So if you go on QFS2020.com, and you click on the tab at the top left, it says RV QFS. Info, there is a whole document there that talks about the Alliance. So please go to the website and check that out.

R

Ron Giles 47:19

Yes, and then if you want more than there's a whole bunch of articles that I have done as far as posts that are in the blog, and you can go there, and it's the top, there's just click on the Alliance, and it will bring up all of the articles that I have have posted there. And there's eight or 10 of those, I guess, I don't know how many. Oh, hopefully, it's all there. For you to go and find out. Thank you, everybody, for your help and tracing for your comments and your interpretation. So thanks, I appreciate that. I really do. And I'm grateful that that you're willing to jump in when, when there seems to be something that didn't quite get there. From my perspective, love to all of you to all of our humanitarians, you're doing a great job. The heavens are pleased with how we as love won society are doing and going about the the education portion of it, they're really pleased with that. There's no people who haven't caught up yet. They're they're just not down the road far enough to get all of this information, but it's there. So just enjoy it and get it and we'll have a lot of fun with it when we finally get the chance to use all of this information because we've got the money now. And the RSS platform is up and running and so forth. So hopefully you have a good day to day the rest have a good day and receive our love and appreciation for who you are. And and thank you. Thank you very much. And with that, we'll say goodbye for now.
