

Q and A - April 7th

Thu, 4/14 8:37PM 1:06:04

SUMMARY KEYWORDS

benefactor, question, people, money, problem, trust, project, zim, cac, humanitarian, director, beneficiary, kinds, changing, rss, person, true, billionaire, set, fifth dimension

SPEAKERS

Ron Giles, Tracee Gluhaich

R Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracee and we are going to do a question and answer period. And so today is April the seventh. It means Thursday, that's April the seventh. So this is April 7 19, excuse me, 2022. And two, it's been a while. We've got some new questions. So let's have some fun today. Question number one, Tracee.

T Tracee Gluhaich 00:29

Okay, as soon as the RSS platform website becomes available, or up and running, will you notify the group? And is that something as potential benefactors can access to study? Or will we Strictly Come be confidential and only accessible for benefactors who have gone through the redemption process?

R Ron Giles 00:48

The program will be opened up for everybody at the appropriate time. When it's ready, we'll I'm not I'm not sure how, if there's anything to do with it, except for just us turn it on. And you'll have some fun with it. So it's hard for me to know right now, but yeah, so we'll, we'll be telling everybody about it. No problemo. Next question.

T Tracee Gluhaich 01:17

Well, the appointment the face to face with an angel.

R Ron Giles 01:21

I suspect so. Whatever you ask for. Next question.

T

Tracee Gluhaich 01:31

I don't see how r v of all currencies one to one will work in a practical sense. For example, one pound GBP. Assuming that's a great Britain pound, is now about 20, South African rand, let's say a tire center in the UK pays 1000 Rand or 50 pounds for one tire from South America, or, yeah, South Africa, sorry, which it sells the UK for 80 pounds at one to one, that tire would cost 1000 to the UK Dealer before any markup against a retail value of 80 pounds. So there will either need to be an exchange rate of some sort, or the South African seller will need to drastically reduce the ramp price of the item. Am I missing something,

R

Ron Giles 02:16

no big cap that there's problems that are going to happen with it problems, I'm not sure how that's going to be resolved. It's on an individual country bases to solve the problems of their disparity with their currency, they may have to create new currencies, they may have to do things that are different. Each country is responsible for their own. Bringing about something that can be a par value with other countries. It's going to be interesting to see how it works. But it has to happen. So that's just one of the things that will take place. We know about it. So we know this has to happen. That's a Global Currency Reset. We'll just have to wait and see how they set it up.

T

Tracee Gluhaich 03:09

And I'm sure they've thought out all the details. So we don't have to worry about all that. That wasn't on us. Right?

R

Ron Giles 03:18

That's correct.

T

Tracee Gluhaich 03:19

Okay, next question. Do I need to know if I should start implementing my Zim Dong dinar in any way that will help get it started for everybody. I'm getting really excited to get involved.

R

Ron Giles 03:33

Okay. There's nothing that you need to do and implemented in my zoom down, dinner and so forth. To go in and you have your appointment, you'll go in and you'll know this is what I have, and they'll count it. And then that starts the conversation. So I'm not sure what the question would be or how you would do anything different than anybody else. It will all just be a process. And then you know, you're gonna get a chance to talk to your new is it going to be face to face? Yes. Obviously, yes. person will be sitting right here. Now, you may not see that as a as an angel. I mean, I don't know that they'll have their wings and start flapping around a bit. I

don't believe that's true. I think there'll be a person in blood that will look like a human being. Oh, well, we'll you can discuss it with them. They're not shrouded in some kind of a mystic appearance or somebody you know, the sixth you just you just talk to them. And they're open they know they know that you're very curious about them and what their they are and how to work together with that don't don't Be afraid, just be in the process with them. And that will just work out wonderfully for you. That's what I, that's my understanding. Next question.

T

Tracee Gluhaich 05:16

Okay. Can a benefactor be involved in presenting CAC employment contracts to small businesses? Or should it be done by only directors?

R

Ron Giles 05:27

That's it's a good question. When you're talking about Zim benefactors, and directors, the two of them work out there their relationship. Now, you're going to be giving that as a director, you're going to be giving, excuse me, as a benefactor, you're going to be giving the director, things to do and you're going to be the boss. And so you're going to figure out how much as a policy how much you want to offer the people. And this is, this is part of your concern. It's part of your essay project, and the CAC project and you're, you're the one that's in charge of it, and you find somebody else and give them a contract to absolutely, yes, yes. And if I were to go and do that, I would take my director with me. And that would be our explanation, turn one to another of how it works out. And you'll you'll explore through things, you may be the boss, but you're there just learning new stuff as well. So don't be don't be putting on the boss role and, and be an artificial, be authentic in your, your presentation and, and make it a good experience for them that you can do what you want to do. And your contract your directors, they'll do what you've asked them to do. You're the boss. So that's the most of the parameters around which you have to work. I would probably shelf I wouldn't be off doing a whole lot of an oh, what should I do today? Well, if I don't have anything to do, maybe go see a few people who knows, it's up to you. Maybe find yourself another director and start training now. There's a lot for you to do.

T

Tracee Gluhaich 07:41

Wrong. What is the what is that? There's a system. And you may have heard of this, but it's almost like, okay, pretend I'm the benefactor and you're the director. Okay. It was like, I go and present and you watch me? And then you go and present? And then I watch you. And then you can then you're on your own. Like there's a whole progression. Have you heard of that? I know, I said it wrong. I think there's a couple steps in between I missed you.

R

Ron Giles 08:14

But I, I believe that there's a training scenario that follows those procedures. And I love that I love as much training as you can do. It's all new for you. It's all new for your, your new directors. And so let's let's not pretend like it isn't. After you've done one, then you have the experience with one person. So that you can have, you know, you can have more than one

experience with people as directors so that you can see how they do. I like the idea of, I'll be the present this time and you present the next one. Let's see we're looking at we're looking at brand new people doing things together. Just don't be worried about it. Don't be afraid of it. This is going to be fun. Let's go in and have some chats with this person. Okay, credibility is always going to be a problem. If you're talking with people that you already know, there's a different main demeanor there. I would talk with people that you know, you've always you're in the community, you know, what's been going on they they're in the community and you may not have had a lot of business with them, but you have had some and you're just telling them that I've got a new program. I'm not really sure all of the ins and outs about it but I'd like to explain it to and as best I can and and you're the first person that I'm going to talk to you about this. So please be helped me with this. We'll get through this but it's gonna be really Deciding for you because it's going to mean a whole bunch of money in your pocket. And listen, there's not a big deal. It's not a hard deal. It's just a good deal for everybody.

T

Tracee Gluhaich 10:15

And I think that in the beginning, when it's just we're just learning together, we will have the training. I mean, today we have a meeting about that, but we'll have a training to show everybody so that they're confident in their answers and, you know, then they'll grow from there. So, okay, ready to go on?

R

Ron Giles 10:33

Yes, let's go. Next question.

T

Tracee Gluhaich 10:35

In the march 28. q&a, there's a question relating securing the monthly payment and making sure that the beneficiary does not spend the money for other purposes. I would like to make a suggestion to that effect, why wouldn't the Benefactor keep the money in his NRELS account and program the computer to start dispersing the beneficiary after the obligation is over? On the 181st month, or when the beneficiary pays off the house?

R

Ron Giles 11:04

I'm not really sure what the question is, you got it specific enough so that you haven't introduced it well enough questions relating to securing the monthly payment, and make sure that the beneficiary does not spend the money other purpose, I'm not sure how the computer will be acting, I think it's, it will take them, it will get the money out. For the payment, that's for sure. Whether it does a little bit at a time or starts making it so that you can't take out and all of your money out of that account. There may be other ways to that the Alliance wants to do to work it all out. But I don't think it's such a big deal. To me, it's not, because that's a that's a payment. And if you're not, if you as a beneficiary, you have a payment, and you're not taking care of it, then the then it's going to be taken over for you. In other words, you're going to have a chance to to be responsible. And be sure that the money is in there to make the payment. I don't know how much it's going to be a month. I don't excuse me, uh, well, I don't, but I don't

know what the payment is going to be. But I do know that the amount that that extra amount of money is going to be put into the account to take care of it. And so as a person who is spending money out of that account, I'm going to be sure that I have sufficient for what I have to pay the payment, or need to pay, make the payment and not be taken out that that extra amount. So I don't want any of I don't want you any of us. Not one person to have to worry about that. Because it's their problem. We're not going to do everything for them, they have to be responsible for themselves. We can't take that away from them by putting on some kind of a program. And being sure that they're they're making the payment, it could get to the point where the the computer will fish freeze the account so that they have enough money to take the care and the monthly payment out. I don't know how they're going to do that as a beneficiary. You're getting a house for health sakes be responsible for it. Don't make the computer be doing all kinds of stuff. We're not going to make to the 100 and 81st month or whenever I don't know how it's going to work out. But I believe it's going to be just perfect for us and we will all be able to get the make our payments and still use our money the way we want to use it you'll come this question is coming from a lack mentality. If you can't make a payment out of \$28,000 a month, then you've got a lot more problems and were aware of so this is why we have these wealth managers with wealth education programs so people can watch so that they can be really good at being homeowners and and provide for their own sustenance that way. But no, we're not going to be babysitting these people and putting up things that are necessary as less they become. What would be the right word to say? It disengaged. I don't know. But I'm not for any kind of programs, waiting for this that the other end? Yeah. I'm not sure how they how they want to do it, we'll see. But if I have a vote on it, I wouldn't be voting for any of that sort of manipulation for people. I expect them to do certain things, I give them the money to do it, and I expect it to be done. And why should we be any different? This is this is being responsible people?

T

Tracee Gluhaich 15:36

Well, it's going back to what you've said from the beginning, as far as certain people not wanting to work because now they have all this money coming in. It's like, that's going to be a very, very small percentage. And once we finish number eight, it's gonna be even smaller. Anyway, Okay, you ready? Move on. Next question. I understand correctly that the humanities will build a new 5D space and not improve 3D After all medical beds and other technologies can only function in four to five d and not all people will switch to five d, and perhaps not all humaneness. That word means, because vibrations play a decisive role in the transition. Is this true? Or do you know?

R

Ron Giles 16:27

you got some definitions of three dimension? That it sounds like, well, this is this way this is. And I'm saying to everybody, let's not just judge the thing. And this is the way it's going to be? We don't know. And when we're there, we may know and somebody might not know that we're in the fifth dimension, it's, it's not going to be really well known. And I was reading something today the same, it's more of an emotional sort of adjustment, where you don't have any fears and things of this nature that you're in the third dimensional realms are vibrating at that third, fifth dimension, excuse me, round. And so things are going to change. But how do we know that we've been there to know that. Don't be don't be putting parameters around the fifth dimension that you don't know about. And then pretend like person things we have to do. While

we're there. To make it different. Let's just allow the alliance and our our counselors to help us through everything that needs to be done. We're going to get the counsel advice we need, we're going to have the help. And with that help, we'll be able to accomplish what we're trying to accomplish in a way that will be beneficial for everybody. So let's not present ourselves with all kinds of things. The third dimension is this race, the fourth dimension is that where the fifth dimension is that when we got to do this, that and the other for the different dimensions, you'll become aware of what you need to do. If you're raising yourself up into the higher dimensions, it will just be a natural flow for you. Other than that, really, really? I do not know, I really do not know. Let's see. Next question.

T Tracee Gluhaich 18:37

Do I understand correctly that if I have children over the age of 20, can I open a trust for them or make a director and a CAC?

R Ron Giles 18:50

That if I have a child a child over the age of 20, can I open the Trust for them? Or take a direct director and a CAC.

T Tracee Gluhaich 19:03

I'm guessing they want to know if they can make them a director of a CAC. And those are typos or translation issues.

R Ron Giles 19:12

Okay, so what we're talking about is can we have a director that's younger than than 20?

T Tracee Gluhaich 19:19

She said over the age of 20, because you can't do a trust if they're under 20. I mean, if they're over 20, but you can sign them up as a beneficiary and make them a director. Right?

R Ron Giles 19:30

Yeah, the age of a beneficiary is 18. Okay, so you can make them wherever you want them to be at age 20. I'm not sure. Where's the what's the reason for the question. They're your people. You're going to be doing the work with them. Or somebody else is going to be doing the work with them. Have you trained them all? Have you done everything you need to do? Is this the 27th director that you're talking came about. And there's a 20 year old son of somebody that wants to be, you want to be a director. You know, there's there's ways to work these things through. Not everybody needs to be a director, trumpet Dillard, you're gonna come in as an assistant director. And they will live their whole life being an assistant director, because they

have a specific responsibility. It doesn't limit them in the amount of money that you can pay them. So you just work it all out so that everybody is in a real, you got to assistance, you got to directors, assistant directors, and you might have specific directors that are working in a community that don't have a larger community, or maybe they have a larger community that they're doing one specific thing for, you can do all of those kinds of things. I would, some of those questions that are predicting or what we wanted to do in the future will come to us as we get closer to it and see what oh, that's why it has to be. And we'll see that as we get into it more. Be really, really good at you're educating yourself, you're gonna need it. Next question.

T

Tracee Gluhaich 21:27

After going through almost all of the training q&a videos based on experience, when implementation happens, more detailed questions would could well arise, especially in the application and use of the online tools. Will there be an LWS hotline to call into the early going to help answer these questions regarding forms, contracts, signatures and other LWS items that the assigned Angel may not answer?

R

Ron Giles 21:53

Yeah, we've arranged for the Alliance to do that with the person who's been assigned to you as your counselor. Does it sound like it's a counselor that knows all these things? More so than any person that we could put on a calling? I believe, in my own mind, haven't thought that through, but there's no reason for us to have a chat line or a question line. When you have a counselor from the other side of the veil. You know, some of these questions that are asked, Do not assume that we have that. And I'd like the questions that come that assume that they do have, that they are familiar with the reality that you're going to have somebody there to give you some information. And it's a lot better than anybody else on this earth can do. Just allow it to be true. And then come from that position when you're asking questions. But as far as love won society is concerned, just understand this is a structure, you'll use the structure for specific things that you want to do, it's going to enhance your project. And how you do that is your responsibility, not ours. If it's going to be helpful for you then use it. If it's not, then don't just love won society, the structures. So we're gonna do all we can. But there's only a certain to a certain point, and from then on, I'm going to be solving the same problems that you're going to be solving. As a love won society, this is my project, this is what I'm going to be using for the things that I'm going to be doing. And I don't, I don't feel it important for me to do those kinds of things. Maybe some people want to get together and do that. I don't know. I'm just saying I'm going to be as soon as the revenue sharing platform is completed. I'm going to be involved in our the RSS program, and the CAC program. And I won't have time to do all of those kinds of things. So when you are looking at love won society to help you into your programs, then you are the one that's in charge of it. And then I make that very clear. You're the one it's your money, you get to do the bid, you get to meet the boss. And there are other people that you can have help you. If you don't feel comfortable enough doing it yourself. It's good. It's going to be a learning curve is going to be a very steep learning curve. But you can do it and that's the most important thing. You're the humanitarian. You're the one that's evolved to the point that you can do something like this. That's why you've been chosen. So why are you here? And there are those who want to be that way and are not yet. And I'm saying, Well, why are you not? Is it because you're not doing the education yourself to the point where you really feel that this is important? Or are you taking the full responsibility to be the the humanitarian you want

to be. And then you come out the other side, and you have a counselor there with, you can get a chance to be really good at what you're doing. Experience is going to have a very heavy training for you. And it's good, it'll be good experience for you. You can make a mistake and you're not going to hurt somebody or everything. You're not going to mess things up, you can't do it. You're going to be doing things for people for with money and helping them get money. How can you really, unless you get really out of bounds, you'll be fine, you'll be doing a good job. And helpful.

T

Tracee Gluhaich 26:18

So here's my suggestion on this. So we always go on websites that are platforms. So for instance, right now we're recording over zoom. If we have a problem with something on Zoom, there's like a lot of training on here, there's like a little chat window, perhaps we can hire somebody to do some sort of a little chat window. But also, we could have like little already done training things. So if there's like, say, a certain, say trust form, or a certain contract, or anything that anybody would have a question with, we could always have like a little, for more info, click this, and then we have a pop up that will explain everything in great detail. So that we don't have to utilize a live body answering that. But we could also part of our CAC program is hire somebody to you know, be in the chat window to answer people's questions. What do you think about that?

R

Ron Giles 27:13

Well, I'm not opposed to it. I'm just saying that when I you know, for me personally, when I, when when the RSS program is up and running? Am I going to be spending a lot of time doing this? Or am I going to be spending my time doing humanitarian work. And there's, there's got to be a balance here somewhere, there's got to be a way to resolve those questions. I'm not gonna walk away from it, I'm not gonna leave people upset about something. I don't want to do that either. But I want each person to take full responsibility for their stewardship as people who are exempt benefactors. And together at first, if there's a problem with solve the problem that we're seeing now, this is a possibility of a problem. And it's not a problem yet, because we don't have a problem yet. But there may be and but I'm looking at the reason why they gave us a somebody to answer our questions, a counselor and advisor, somebody that's there, proponent for us, to get the job done properly. I don't know what more we can do, then then you can get from your, from your benefactor or your that that word that you can get from your counselor. I'm just really sure that you're going to have some really good help there. We'll go with the next question.

T

Tracee Gluhaich 28:54

On the RSS program, people will be wanting to make use of the six trusts that are available, you have said in the past, we need to make the trust in a proper fashion. So the name and function of the trust will be used appropriately, my feeling is that people won't know how to properly activate and utilize the trust. Will there be full training on the RSS program to explain it and also give examples of wording for the use of trust. This would help enormously in clearing up any misunderstanding for its uses.

R

Ron Giles 29:26

I think that the the use of trust is something that is going to require some help and useful words and terms. I don't think that there's a problem with giving some examples of things that you might want to this, okay, you might want to address how the funds are being used. And we can do something about that. Just make some stuff up and then give them some some chances of doing that and feeling the end. The right thing. I don't Want this to be a big burden, the trusts are not going to be out there where people will see them. When I say that, before, you had to have a trust, and you had to have an EIN number, you had to have all of these things so that you could go and make a trust account in a bank. And they require certain things, or they want to see the whole trust document. We don't have that requirement. Because there's been nothing yet that's been given to us from the quantum financial system, that we have to cross t's and dot psi and do all kinds of stuff for, we'll see what happens there. But if you have a trust, it's just a simple revocable trust. It doesn't have to be big at all, it just and you don't have to state for everything, you Well, there's a certain amount that you have to stages to have a trust. And so you do those kinds of things. But to make it very generic, you don't, don't be very specific about it. Because it's just a way for you to have extra funds for other things in your life and your family, especially with children. Tell me that you may be a school teacher and want to use one of your trusts for for for helping with your school kids. And there, there can be all kinds of reasons for trust. So we all do some of that, but we'll see how that goes. We wanted to do some help. Yes. So I guess the word the answer to that question is yes, we'll do something and make it as easy as we can to to establish trust for beneficiaries. Next question.

T

Tracee Gluhaich 32:06

Okay, can I put my children and grandchildren as a beneficiary?

R

Ron Giles 32:13

Yeah. What's the problem with that?

T

Tracee Gluhaich 32:16

Well, unless they're under 18, then there's a problem. But then they can always be set up as a trust under somebody else who is over 18, right?

R

Ron Giles 32:26

Yes. Okay.

T

Tracee Gluhaich 32:32

All right. Next question. I have 27 of the 500. T notes, and other currency does that guarantee me a redemption appointment with an angel? How will we know if the call or email is legit? We've been scammed out here in the real world so bad. It's hard to trust anyone because we

get so many robo calls per day.

R

Ron Giles 32:56

Well, you got 27 \$500,000 Zim note? How many would that make for 100? So

T

Tracee Gluhaich 33:13

14 million, or 14 trillion, I guess? 1400 trillion? I don't know. It's a lot.

R

Ron Giles 33:21

Not well, 505 100,000. And that's a million. And then. And then you go to trillions after billions, and then you go to trillions. So is I without doing all the math properly, I would say that you're at least in need of one 100 T note 100 trillion note, I'm going to say that what you have now is insufficient to, to justify us making you a gym benefactor, you're going to have a lot of problems. Unless you ask for a rate that's like \$10 million present. If that can get you up into the quintillions. That's what that's where I'm, that's my minimum. If if you want to say it that way. Minimum mean that if you're going to be as in benefactor, and still do some other things, you're going to have to at least be 1.25 quintillion in the quintillions in order for you to function properly as in benefactor. So, I don't want to make things all clear is 100 at \$500,000 present, is sufficient. If you don't have a \$100 trillion dollar note, then you're going to have to ask for rates that are going to get you up into the quintillions I guess that's the best way to put it. Then you can function so I don't know where you're getting your robo calls from?

T

Tracee Gluhaich 35:05

Well, you know, they always want to upgrade your house warranty or whatever. Car Warranty

R

Ron Giles 35:12

You just have to learn how to say no. That's probably why we have those. So yes, you're asking this for to become a zimbenefactor, you're gonna have to have more than that. Or ask for 10 millions or whatever it is to get you up to this quintillions. But also, so that you can,

T

Tracee Gluhaich 35:34

if you have nefarious intentions in your heart is not that of a true humanitarian, you will not get a redemption appointment, no matter how many zim you have, right. Now, we're not saying that that's you, we're just saying that in general, for everybody. If your heart is not in it, then it ain't gonna happen.

R

Ron Giles 35:50

R

Ron Giles 35:58

That's correct. Okay, there's no guarantees. Unless you've gone to a redemption appointment, and know that you're a valid humanitarian, then you can say, Yeah, I am guaranteed to have money. Until you have done that. How can you say anything about the guarantee? So I, you're asking a question, that really doesn't have a really good answer for you. I'm just trying to help you with getting into position where you can get yourself out 100 Dino, then if you have problems is, I mean, \$13. And you get 10 of them? Excuse me, \$15. Now, you get 10. Of course, the problem that \$10 This is your future. Don't have a cup of coffee, a cup of coffee for two days in a row, you've got it. got what it takes to do it. Oh, you have to be the responsible one. Next question.

T

Tracee Gluhaich 37:18

I know it will take some time after one starts receiving RSS downloads to also understand and set up the six trust. But this could have a married or not married couple earning over 300k per year, who will want to work in an already difficult employment shortage as an employer wanting to expand. I'm quite concerned about this and would suggest the trust be delayed in favor of a slightly higher employment contract for employment, stability and continuity of products being manufactured and purchased. What good is it to have lots of funds and nothing to do with it?

R

Ron Giles 37:50

Well, you're seeing things the way they are now I'm projecting them into the future. And then you're asking me what to do about it. And I say, I don't know. I know what I would do. But your pre predisposing your pre judging people and the way that they're going to be. And I don't, and I have some problems with that. I have some problems with you figuring out money, and then telling me that there's people who are going to not want to go to work when they have money. And so we should do this, we should do that. We're not going to baby people around, we're not going to set up a program that's filled with all kinds of manipulations for people. It's not going to happen that way. You might have 3%, that will have a problem with it. And we're not going to do everything for the 3% we're going to do everything for the 97%. And if there's some foliage, if there's some problems, it's going to be there. Is it going to cost us the whole humanitarian activity, as you're gonna call them, cause problems for the golden age of mankind because somebody wants to stay home and play video games. Those are the kinds of things that are not part of what we're trying to accomplish. I'm not going to be doing things to people to force them to do something that they should be doing. We give them the opportunity to change. What they do with that opportunity is where they are judged for if you want to call it judgment, if it's really not judgment, if it's the consequences of the decisions that you make. And if you don't want to be a person that's involved in society and justify your means for being there, then you're going to be one of the people are going to be left behind. So how many, how long are you going to be involved in that, if you're not going to be subject to the other things that people want to do, like as in, I want to support society, I want to do my part, I want to be sure that I'm working and getting things done, that are beneficial to society. Well, I'm not, I'm not going to be around and judging you, and, and trying to get you to do things, you're gonna have to do that on your own. We're not slaves anymore. You have to take responsibility for yourself. You're given every opportunity to do things that are just phenomenal. And so if you don't want to do them, then I can't help you with it. I will not change things to manipulate

people to do things that they know that they should be doing. And it may take a year may take two years for them to wake up. Some people won't, it's not my problem, you give them opportunity and let them go with it. Most of the people will pick up and run with it. They've got a good thing. So let's not project into the future, you're stuck this doubt you're looking at money instead of opportunities for service and giving things and I look at people and I say they are going to respond in a way that you could never imagine. Because there's nobody looking over them and telling them what to do. They are free to do what they want to accomplish. That's, that's all we can do for them. And then they seek their own level. And if they want to stay with us in third dimension, then they do if not, and they go someplace where they soul wants them to go. That's, to me, it's very clear. Just let it be. Next question.

T

Tracee Gluhaich 42:20

Oops. So then I'm understanding correctly, we will be giving people that sign up their base, getting basically free money, to help everybody get used to being more abundant. And when we sign them up, unless we have them working for us, our humanitarian project, how do they continue to get paid? Is it automatic or something that we have to keep up with as as in benefactor? Because Ron, I just want to be clear on this after signing them up. If they don't work for us, they will continually to get the money from the Alliance forever. Correct. And we will have to keep up with those who don't work for us. Correct. It's all done by the ledgers have

R

Ron Giles 43:03

There's no way for you to know. Unless you're there working for you. You're not involved in the and you're talking about the gym benefactors or you're talking about the Zim beneficiaries. Beneficiary Jim benefactors, you're gonna you're gonna be held to a higher standard than just a simple beneficiary. I'm not sure. In my mind, if I have this question properly. So I'm gonna go through it again. Sign up, they get basically free money to help everybody get get used to being more abundant. And when we sign them up, unless we have them working for us, or a humanitarian project, how do they continue to get paid is is it automatic or something that we have to keep up with Zim benefactors? Let me pull it this way? You have, let's say you have a 100 T note and you ask \$500,000 And you are getting now getting 1.25 quintillion every quarter. How long before you think that you can work and still not have enough money? And you're still trying to find places to pull it 1520 30 years getting 1.25 quintillion among her a quarter? Every three months. You're going to be praying for people to take the money that praying for him, you know, you're going to put the extra money over in your bond account. Yes. is all going to be taken care of, and it will be done properly. But you're giving it a concern about people because of money, you're going to be trying to get money out to people, you're going to give them opportunities to grow and develop in ways that they never thought possible before. And you're still coming back to you a limited amount of money, this lack mentality. You cannot take what we're doing and, and marry that with the way things that are happening now. And projecting it into the future. Because it's not going to be that way. I wish people would not do that. I wish people would judge other people and say they're going to do a perfect job with this. We're going to give them an opportunity that they can start building things that they want to do as far as their business is concerned. And they're going to share with us. There's there's not going to be people that are sitting back and just taking money and taking money and taking money. And if they do, what does it matter to me, if I've got a 1.25 quintillion dollars, every quarter coming in, and that's just me, that's not the other 10 or 11,000, people who are gym

benefactors. You got a problem on the wrong side there, you're going to be trying to find people to give money to. That's where I would concern myself. So that's an idea. But that's the solution to the idea or the problem that you brought up. And I say don't project this kind of stuff in the future and pretend like is going to be a problem for you, it's not going to be a problem. And one out of three out of 100 are going to perhaps be a problem. Don't worry about it. Let's go along with the other 99% 97%. Next question.

T

Tracee Gluhaich 47:13

Once our RV appointment has been set, and so forth, of course, then we can really start hiring people start doing whatever it takes to get our projects off the ground, buying real estate, whatever is needed. You said we can pay people, whatever we feel they're worth and give raises, as seen fit. Like some who normally make say 50,000 a year with their current job, but we know they're worth 100,000 Just for example, can we not pay them what we choose?

R

Ron Giles 47:42

Yes. Don't ask me if you won't pay him that do you? Worth \$500,000? Yeah, if they're worth 100,000, you're only paying 50? Why not pay him? 150,000? How much are they worth? With no money? You're just you're gonna have a dream come true. Especially if you're the person that was worth 100,000 I was only getting 50. There's, there's just you're asking me, you're asking for a question from me that the answer comes from you. Because these are your people? That's not a question that I would concern myself with because I will already be paying them 200,000 or 150,000. Next question,

T

Tracee Gluhaich 48:47

seeing that there will not be any more federal taxes, credit cards, all mortgage interest, all that stuff that they've been stealing from us. So we don't have to worry about income tax, state tax stuff like that. Correct. All of that will be abolished? Yes. Cool. Hey, April, I hate April for that purpose. Okay, next question, becoming a zim benefactor. Do we have to set up a trust? Or can we not just use our one account for our humanitarian project? Now, if we have multiple projects will have different accounts? Is that correct? And again, if I'm understanding correctly, if we set up a trust or trust max of six, we must set up trusts ourselves with an accountant or attorney and seeing we have to wait to do all these things until we have money to get started. Is that also correct?

R

Ron Giles 49:43

No. Unless you're a beneficiary, why are you talking to me about a maximum of six trusts? You're either a beneficiary or or a benefactor, benefactor does not have a limited amount of trust, they can set up as many trusts as they need to, to work for their projects. So, beneficiary can have six trusts. And they get that and then then they get a chance to get a, an employment contract. And they're just living a life that they never thought possible. All the money that they need, and this is what's going to happen. Money is so important. Now, if you don't have a good job, you don't live, you don't have a life worth living. This is changing. The

Cabal did that as their way of enslaving us in a debt system that we always owe money for, because we can't make enough money to live on, we're doing away with that, there's no way that they're going to continue to have those kinds of problems that they have to deal with. It's not, so money is not going to be so important. You're going to have \$28,000 per person coming in. If you can't live on \$28,000 per month, you got some real serious living problems. Because everybody's going to be have that minimum, unless they don't want it. Everybody can have that in the world, the entire world. Everybody in the entire world could have \$28,000 per per month income. Now, let's let's turn things around and start asking you that way of \$20,000 a month people aren't going to be worried about money, people are not going to be worried about money. And it's not going to be important to them. So things are changing, let's just project into the future, that everybody's got \$28,000 per month, and they're not going to have to worry about how they're going to live. And then we help them get into a home. Where's the problems in the future?

T

Tracee Gluhaich 52:20

I mean, everybody's just going to be happier stress is going to come down, which actually means disease is going to come down because stress causes disease. I mean, just imagine how I mean, the rat race will just change in such a massive way. I mean, it's going to be incredible.

R

Ron Giles 52:39

That's true. Still being treated like rats. That's true. Treat the rats really nice. beams and Queens. benefactors. Yeah, all kinds of stuff. Okay, well, this next question read, so let's not do it.

T

Tracee Gluhaich 52:56

This next question is so long, it's going to take me the rest of the time just to read it. Okay, I was listening to your last call. And it was mentioned about others talking about the QMS system, there are several sites with their own opinion. They all sound good until they try to explain this in exchange and it goes downhill from there. They're all saying 30 million for each 100. T note, which as you've been teaching us is the sekirei because banks do not want us to have that ungodly money. I myself don't see the bank being able to do any exchanges of the Zim because I have my doubts about those types of people. And that kind of thinking will not exist with us on Earth. Also, I have a question on the non disclosure agreements NDA, I understand why we will have them but also after all this exchange, and we are all working with our projects and love won society, wouldn't we need to have to communicate with our people that are helping us in spreading the wealth so to speak? Well, we have to explain to the people helping us in detail to keep their interest. After all, we have you as a mentor, and they didn't. You have been here teaching us about this process for some time. Now. It just seems people helping us we'll need a bit more than just I work for a billionaire that is giving away money. I know they will need more than that to keep their interest. What would you say, Ron?

R

Ron Giles 54:22

I don't believe I don't agree with you. Okay, you go to work for somebody. Everybody has a job

I don't believe I don't agree with you. Okay, you go to work for somebody. Everybody has a job, right? You go to work for somebody. Your concern is how much you're being paid. Your concern is that the company stays alive and stays productive. And you still get your money. That's the important part of the work. Now, you don't need to know that two or three or four levels above where you are or five or six what whoever it is that there's billionaires or trillionaires. You don't know. And so why are you concerned about it? Now? Why would you project just because you're not the one that has that knowledge? Or that understanding? You don't worry about that. So why would people not just simply, hey, that there's somebody there has given me money and I, and it sounds like it's money that I'm supposed to have? Because I paid paid the \$10. And I got signed up for it. So I'm getting it. So I should have had it. I should have had it for all these many, many years. So the Cabal has been involved. You're not going to have problems with people. Now. By the same token, if you have a problem with people asking for where's the money coming from? Just say, it's, I'm under a nondisclosure agreement. Besides that, I don't know. So there's no answer to your question. Just know that it's coming from God. This is a golden age of mankind. This is this is designed by God for us to have an enjoyable life. And that's what we're going to do. And that's going to accomplish what we need to accomplish. And don't throw yourself into somebody getting upset because they don't know who the billionaire's are, it's none of their damn business. Just enjoy life the way it is. And know that God's taking care of them, not the billionaires.

T

Tracee Gluhaich 56:50

Last question, am I to understand correctly, that we just sign up one person for the RSS and let it go from there and then maybe move on to the CAC have that solid and then start our personal projects? Is this what you would recommend?

R

Ron Giles 57:04

That's a good question. And I say, in my own mind, I would say that I have certain things that I wanted to accomplish. But you're the work of him, the humanitarian work is to get in a position to help as the greatest number of people that you possibly can. Yeah, you're gonna have your projects, you could have the pet projects. But you as a humanitarian have received money, because you are a humanitarian. You didn't receive the money as a humanitarian to do your projects. They don't care about your projects, you care about them. So you're going to take care of it. But they're funding you not projects. Please keep that in mind. They're funding you as the humanitarian, not the project. Your funds will take care of your project in a very short period of time. Once you've got it up and running, or do you want to do work in another project? Well, that's what they assume you'll be doing. And you'll be doing so in addition to some of the other things that you're doing with the love won Society programs, it's up to you to do whatever you want to do. But for me, I don't know what what you have in mind as far as other projects are concerned. Yes, there are other projects. Am I going to be involved in in the banking industry? Yes, I am. Am I going to be using my money to to create the quad? The financial service centers since the financial service industry? Yes. Is that different than love won society? Yes. But I'm going to still be doing all of the other stuff that is associated with the Community Assistance Centers and, and right on up the real estate and right on up into the bigger contracts and the International commodity clearing houses. We're going to do humanitarian work. We're not just simply serving those people who we believe are sick or dying. We're changing the world. You need to get that into your mind. We're changing the way the world works. We're changing the way that the economy works are changing and all of this

for the benefit of the people that we're serving. So I'm not sure how you can just simply start something and then go off to your own project. I really don't understand that. The real humanity Caring work is not setting up a project where you having health centers all over the place. And then you're saying, Well, I'm going to be doing these health centers. Okay, well, what if they've already gone to a med bed? Or what if the blast from the sun or whatever has has changed their life physically, so that they don't have diseases. Like as if they had a bad pet. And so now all of your, your projects have lost all of their, their people. Because nobody is sick. Nobody's dying from these diseases that you're trying to cure. This is the this is the way that we need to look at things. Okay, you do your do your committee or your projects, build your communities build this, that and the other. And then what are you going to do after that? And I'm simply saying you do work in the communities. And you do work and putting money into the communities and into the directors and helping them to, to find the people in the communities. So there's way things way, way, way, way beyond project that you're getting financed for so that you can do it. So that's, it's my opinion,

T

Tracee Gluhaich 1:01:34

okay. So what I'm doing is I'm signing up my three boys, because I have three kids for the RSS and letting it go from there. And then I live in a very small rural town with two small cities on each side. So one of my friends and I were going to set up CAC in each of those small towns or small cities, they're very small, like 35,000 each. So we're going to do those CAC there. And then we're going to start letting things go organically and have systems to duplicate. And that's going to keep us pretty darn busy. But that will also once things get rolling, it will also reveal what else is needed, as far as any extra personal type projects. Because things are going to change. And we're not going to know what's actually going to be needed until it changes, right.

R

Ron Giles 1:02:26

So how many of us have planned for antigravity machines? How many of us have planned for the creation and the manufacturing and everything else? Matter? replicators. There's all kinds of things out there. And I don't want to put them aside because we're going to be doing all that. And yet, we're still going to be working with the communities and assisting them. And we're doing everything, not just one thing at a time. I guess we have to do one thing at a time. But as, as a person with the money, you should be up there helping people to get involved in the work. And, and spreading it fast that way. If you're going to have a person to talk to about things that you're going to do, and you'll get involved with different projects, and once the projects are completed then or well on their way, then you're going to do other things. Oh, we're going to be around for 100 years. So let's be sure that we're enjoying ourselves and have a lot to do. And then we get involved in galactic and all that sort of stuff. And life just changes in such a way that we couldn't imagine that 10 years ago, or even 50 years down the line. We couldn't imagine what's going to happen then. Now, because we have no clue about it. So we're changing things far beyond what we have any concept and understanding about where the gotta be the ones that are doing it. And how's that? Well, aren't you glad you have somebody to counsel with help us? I am really thankful for that. We're not going to be derelict in our duties. We'll get it all down. That's for sure. So, with that, Tracy, thank you for your comments today. I appreciate that. Always appreciate your input, because you're a very smart lady. And it's always helpful for us. Thank you for the questions and perhaps maybe as we think about questions and answering questions and submitting them. Let's not think about what's going to

happen in the future. are where we are projecting people that are not going to have, they're not going to be perfect for what we're trying to accomplish. Let's just put in our minds that the right people will get the money will get the funds that they need. And they will carry on because that's what we're here for. We're not going to have the problems that we've had, as a result of what the Cabal has done. All of those things, there's no energy for it. So it's all going to go away. And we're left with all of this money and all of the creativity and, and doing all the fun things that that we've wanted to accomplish. And we get to do it now. So we'll prepare ourselves and we'll do a really good job. Thank you all for your time today and Tracee and we'll do it again. When we have more questions. For today. Let's say goodbye. Goodbye and have a good rest. Have a great day. Okay, bye bye
