people, money, humanitarian, pay, alliance, question, problems, funds, contract, functioning, appointment, account, kinds, price, cac, rss, cabal, won, happen, understand

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians Today is August the 17th 2022. That's a Wednesday. I'm here with Tracee and we're going to do a few q&a today. So let's go ahead and proceed with the first question.

T Tracee 00:17

Okay. It's a little longer the first one has Ron or the Alliance planned how we can counter these issues of security and safety, there are some obvious options, such as physical security implemented at CAC's, but may I suggest that digital ID is scanned into the system when registering for the RSS to identify everyone who has more than one identity, facial recognition technology embedded into the platform will then be able to monitor and identify those persons who are trying to trick the system. I only say this, because we are aware of the syndicates Cabal, and mafias in our current location. Having members with multiple IDs for operatives, they are often legitimate government IDs is they're easy to get by paying off a government employee also will see a cease be able to contact the Alliance immediately. If they identify a perpetrator and get an immediate response. Security is an issue, we realize that all countries will be restructured with their governments, etc. But we still need to address these issues. Yeah, because it's going to take a minute to restructure the government's maybe.

R Ron Giles 01:31

Well, it's, it's not our job to do that. And I understand where you are. But the Alliance is working all of these things so that we can have the freedom, financial freedom, and the government freedom to do our process projects. So what you're looking at now, you are projecting into the future. What you're seeing and having problems with now you're saying we've got to do something to resolve these issues. And I'm saying to you, it's not our job to resolve these issues, we cannot do it. The Alliance knows that it needs to be done. And they're the ones that will be accomplishing all the things that are necessary for us to get the funds. The funds will not come listen to this, the funds will not come until most countries are GESARA NESARA compliant. That's just the way it's going to be. You have to your country has to be GESARA compliant in

order for the quantum financial system to include your country. In the quantum financial system, period. There's no questions about this, we're not gonna put up with crap. We're not going to put up with these people who think they have power over us. We're the ones who have power over them and what they are trying to do. We don't exercise that until they start to try and have power over us. And then we tell them, you do not do this. Now, if you're not ready to do that, and be that kind of a person, the phones won't come first. So is it the government's problem? Is it the Alliance problem? Or is it us projecting what is now into the future. And this is something that we can discuss a little bit further for this particular person. And I'll be happy to do that. But you need to understand that our fear of things that we're driving forth into the future is not going to be helpful. I trust that the alliance will do everything that they can that guy down there that's causing problems for you, he gets to go away and go someplace else. There are places for those people. They may be uncreated and go to some other location and start all over again because they're not in a there not part of a community that's that's going into the fifth dimension. So there's things that you need to understand about this and I'll help you with this. There's no reason for us to come to them fear absolutely none. I don't fear these people. Because they're not going to be around why spend energy on people who are not going to be around. There's no way to change them. They're going to they're not going to change They just had to be taken away. So I hope this is helpful for now. And if you'd like to have a conversation, we'll do that. And because I understand who you are, and I want to talk with you, so we'll open that up for the future. So let's go on to the next question.

T

Tracee 05:23

This is some a different candidate, additional PIN, a pin number be assigned to all benefactors such that should that number be used to activate the release of funds, it would instantly alert the appropriate authorities that that money is being activated for release of nefarious or forced reasons, they may decide the difference. This may decide the difference between life and death, otherwise, death and torture to force the release of money. An actual pin is sadly and potentially imminent. Does that make sense?

R

Ron Giles 05:59

Yeah, it does God have all this and that now they're told that you're feeling safe. You're coming from fear. And you're creating circumstances that will not be part of our future? Why would we need all of that stuff when the alliance and a God is taking care of things. Now, if you think you need to do something, because God's not going to do it, then your thinking is flawed. There's nothing we can do sufficient to stop the problems that are associated with what's happening. Now, we have no capacity to do that. And yet, the alliance has already worked out all of the things that we are going to need, we just have to wait for it to happen. And it won't happen until after the funds are it won't happen, it will happen. But when it it will happen before the funds come, our cleansing process will happen before the funds come. So we don't have to put up with this. So this is a kind of fear that I want everybody to just say, I let the Alliance take care of it. I'm working for the Alliance. When the time comes, I get my money, and I get the freedom to do whatever I need to do with the money that comes from my heart. That's the humanitarian way. It's not going to be what you're projecting here. Period. We do not have the guns, we do not have the inner intellectual stuff going on. that would that would give us a some kind of an edge over these people do not depend on that, in your mind, depend on the fact that the alliance will take care of the things that are necessary to make it so that we can be safe

and secure. And our money can be safe and secure. As we move into our implementation of our, our projects, and implementation of love won society. So let's just let that be true. And have faith in it. And so you can get rid of all your confusion and all of your fear, just simply believe that the alliance knows everything. It's not been this way before. I mean, they always know everything, but they're not functioning at that level. Until now. And when I say they are the we're getting this is a dispensation of the fullness of time, we should have had everything we're supposed to have, instead of being shut down by the people who messed with our DNA. We have had these problems for 1000s of 1000s of years, other locations on the universe in the galaxy, have not had to put up with this kind of crap. They have become fully progressive in their thinking and their ideas that their bodies were already wired for God. They've been functioning at that level, we haven't been able to. This is a dispensation of the fullness of times, meaning we get to make up for all of the garbage that has happened to us. We're going to function with a full set of DNA that will bring us into the fifth dimension in a very short period of time. We don't have to wait for this eternal progression to get to where we're supposed to go. It's happening now and it's happening before the dispensation of the fullness of time, or excuse me, the golden age of mankind. We get accelerated exponentially Get ready for it. It'll be very uncomfortable for those who have not made the choices to ascend, because we are ascending. And if you're not going to ascend, you won't be staying with us. I hope this is helpful. Don't project your fears into the future, it's not going to be there, you'll be happy to know that it's not going to be there. Unless you're dragging that into the future and focusing on which time you're going to be very disappointed and very uncomfortable with some of the things that are gonna take place. Go on to the next question.

T

Tracee 10:42

I don't think people are really aware. I think most people rather are really aware of how deep it goes. So that's just what I think people like, I only learned recently, I had no idea until the last couple months, you know, so. Okay, next question. Do you believe the alliance will use your email list to set appointments with us? I thought that was interesting.

R

Ron Giles 11:09

No, no. Why did they need our email list? They have their own. How many people have not joined with us? And have not given us their email, but they're supposed to be here. The Alliance knows who they are. They know their line. They know their emails, they know their phone numbers. They know where they live, they know where they're located. They know everything. So no, they won't be using our email list. They probably won't be using emails. I don't know. I don't know. Some people are in areas where they don't have emails. I guess they don't have the sophistication, they may have a phone. They will be contacted by the Alliance in a way that is just specific for them. Each individual humanitarian, who will we see these funds to do humanitarian work will be contacted by the Alliance in a personal way, have their appointments? No, we don't need to wait. Yeah. It's an interesting question, but it's just a question of your asking. Go ahead with the next question, please.

T

Tracee 12:34

My idea is to get E cards through the Chamber of Commerce set up an appointment contract with them and their employees and offer these cards to the community to pay for anything.

Within local businesses within the county the cards can be programmed for specific businesses on a POS system, which I think is point of sale. This would give local businesses a boost and an opportunity for the directors to do employment contracts with a small businesses and spread the wealth quicker. This would also help protect the identity of the benefactors keeping the accounting at one place. Most chambers have listed businesses so a director can easily find them start out offering 1000 per card that can be picked up at a chamber until you build your CAC centers,

R

Ron Giles 13:22

I'd have to see more of that. But it's kind of an alternative way of doing things rather than just the director going and talking to people sooner the thing that we're looking for. I mean, you don't want to be wasting time. I don't I'm not sure that if we start out with something different than what is this, what are you trying to change back to what it's supposed to be? And I'm not sure how to do that with some of these projects. Think it through if this is something you want to do, you're the one in charge because you've got the money. It's your CAC not my and it's your way of doing your uniqueness, bring your uniqueness to the projects that you're trying to accomplish. And that is your responsibility and an opportunity as well. So think this thing through I'm not going to criticize it other than to say there's there's a what we're trying to do with the CAC program is a little bit different than this. But maybe the same NS different different starts will end up the same place we'll see. I hope that's okay. Next question.

T

Tracee 14:42

My spiritual name is on SKR, but my legal name is on all my other documents as I have not been able to do an official name change as yet. Does that matter?

R

Ron Giles 14:54

No. Doesn't matter. They know who you are. Okay, they know you by different names. Anyway, and you don't know that name. So that's your spiritual name. They know who you are.

T

Tracee 15:05

How do we find out our spiritual name?

R

Ron Giles 15:09

There'll be times.

T

Tracee 15:13

Okay. If I told Antonio, I told Antonio, I don't have any of my memories back yet. And so anyway, okay was wanting to know Ron's thoughts on all the IRS agents being hired.

R

Ron Giles 15:32

Good luck to them. They're not gonna do anything. who's hiring them? Who's paying for them? You know how artificial the whole government is right now. It's all a show. If they hire these people, how are they going to pay and they don't have any money to pay them? No, I don't know.

T

Tracee 16:00

I have a comment on that. I

R

Ron Giles 16:01

don't think I Okay. I'd love to have somebody else come in?

T

Tracee 16:07

Well, I'm, well, thank you. Holly said she thinks that they are going to be a refund agency. And that's what they're for. And then the whole gun thing is just to, you know, wake up the normies houses all this other preposterous stuff?

R

Ron Giles 16:28

Well, I like that idea. I like that idea could be that they are going to assist in helping people to get the refunds from their taxes have to go through all of that stuff to do it. So. Yeah, that could that could happen very easily. I think. Where to go Holly. Okay. Other than that, you know, who? Yeah, rest has gone away anyway. So functioning, if they think they're functioning, I think they still have their, their fangs, but they don't even have any teeth in their mouth.

T

Tracee 17:08

Okay, no teeth, they took out their dentures.

R

Ron Giles 17:14

They were false teeth anyway, at any rate.

T

Tracee 17:19

Okay, if all are going to get backwards been stolen them and everything is going to go down in price and taxes, etc. Gone, then the RSS plan? Are they just for the interim?

R

Ron Giles 17:33

It sounds like you're believing the story, the movie that's going on? I have when we talk about being things being returned and have been stolen? How do you give the farmers back? Their lands that were stolen? That precipitated? NESARA? How do you give them their money, their their farms back when there's people who are bought and paid for them? And are working the land instead of them? How do you give that land back to them? There's other ways to be compensated. So I'm not sure what your I do not believe I'm gonna say it that way. I do not believe you will get back what you have been what has been taken from you. I think that there's a brand new start this taking place and love won society is one of the best places to start that that money is going out regardless of what you have lost or was stolen from you insufficient funds that you've never had before. How many people are living off a fit \$28,000 a month? You know, there are there are quite a few. Yes. And there's people that have a lot of money that we don't really understand. But the average person doesn't have \$28,000 a month, then their husband and or wife or whatever, is also going to get the 28 to make it \$56,000 a month for that family. That's never happened before. So would you rather go back and try and fix everything that was bad in the past or just move forward with good stuff now. And that's the way that I look at it. You saying go into price is going down who said that? There are people who believe that and there are people who pass it on as if it's going to happen. Why would you ever do that? Why would you change prices to go back? When everybody now is getting sufficient funds to work for themselves right now? So this idea of prices going down. I've heard it said in the very beginning that the price will be reduced by 50%. Who does that? Who's in charge of that? How much student how, what price is that that's going to go down to half way is that the price that's on sale, or the price, that's some manufactured retail price or suggested retail. There's too many variables involved in any of that to, to make it functional. So why not start from where we are and go from there. This is the way that I see it. Taxes and stuff. I'm talking about a travesty. And you're going to go back and try and resolve the travesty. Why don't we just say, Screw those people, we're moving forward, we don't have to have all of this garbage. If I if love won, society has 1/10 of what we have have available to accomplish. We're talking about a brand new economy. We don't have to go back 50 years, or ever, whatever your we don't have to go back and prices. Because love won society will buy everything and the ESS. And we will distributed to the normal distribution systems at a price that will never be inflationary, the, the cost of things will go down because we don't have to make money on our money. We're putting in trillions in quintillions of dollars, every quarter, every year, there's going to be an overwhelming amount of money to the point that people will have that abundance mentality. They know that they can have all they got the money that they need for whatever they need to do with it. And in that situation, they have the freedom to go ahead and start creating their own uniqueness of how they want to give to the communities. It may be dance studios, it may be old folks home, it may be all kinds of different things. It might be that there's a party every weekend at the park. And food will be just given away. And the kids can go and have fun and just excited and be happy. And just go up to this. I would like a hot dog, please. Okay. Would you like some? Some mustard on that? And, yes, please add a little relish if you would, thank you. You're welcome. Have a good day. And here's a napkin so you don't mess up your cars. Those are the kinds of things that can happen for us. Those are the kinds of things that we don't need to have a drop in price. We provide the funds at this level of the economy right now. And that's what's going to be taking place. So you have all of these ideas, this people have all of these ideas about prices barbaric, we're gonna get paid our taxes and so on. It's not, it's not real, it's not realistic. There may be people trying to do that, I don't know.

But as far as I'm concerned, we're not going to participate, and there's no need for that we'd have the funds, we got the money. And we can make up a lot of problems that are caused by these kinds of things by just simply letting things go the way they are, and we start giving our money and gifting our money away through the RSS program. Let's go to the next question. Okay, I

T Tracee 24:14

want to interrupt this broadcast for a very special poem that I forgot to read before from Kevin. It's called zeros. And this is I think, relevant because all the new people are probably really I don't know, over over the top with the zeros, okay. It's not the zeros, but the heroes made in the eyes of children. It's not greed, but the need to achieve our dreams. It's not the root of evil but the blossoming of love beyond all measure. Together, we will bring in the golden age of mankind sublime to the end of time. I just wanted to share that. And that's relevant with this question. Okay, was that cute? I am. So the next question. The reason that reminded me is I am feeling so much at home with all the things you say and do but I'm confused with the 10% for 100 years, isn't it? 1,000%?

R Ron Giles 25:20

Okay, I tried to help you to understand 10% is what 10% Of what? It's a figure, you take your gym and you multiply it by your rate, what is that? We call it, I've called it a primary principle. And you get 10% of that, that you're asking for your annual payment for 100 years? Well, what happens to the other 90%, if you're going to start talking about percentages, because 10% will last you 10 years 10% Every year, it's consumed in 10 years, you're gonna get that for 100 years, because there's a difference from the way that things are happening. And you're not allowing that to take place. 10% of principle means that you get 10% of that amount of money for your annual budget for your structured payout payments. Okay, what can I say? Get away from this idea that it's 10%. Let's just simply say, let's divide that primary principle by 10. And 1/10. Of that is, well, I'm going to get in my annual payment for 100 years. Where does that money come from? The Alliance takes that figure and says, This is yours, it's in it's put into a queue Fs okay account. And in the cases that we've gone through before, if you're going to get five Quintilian per year, there's 500 Quintilian, in that account. Now, see, you're not looking at the overall thing, you're just looking at that 10%. And you're not getting past that, to see what happens on the other side, it's 1/10 of that amount that you're going to get every quarter or every year, multiplied by 100 years got to have that money somewhere, it has to be done at the appointment. Because the redemption is not going to last forever. So they're taking the redemption money, or the redemption now putting it in the structured payout account for 100 years. So that you'll be able to get your 10 1/10 of that primary principle yours to do your humanitarian work. Maybe that will be helpful.

T Tracee 28:15

Okay, so let me just ask if the word to use simple interest, that it would be 1,000%, essentially, that you would be getting, but because it's almost this is my understanding way. It's almost like reverse compound interest. Like, you know, we pay way more for our home, then the actual interest rate because it's compounded. So, but if is this kind of like reverse compound interest?

R

Ron Giles 28:46

I'm gonna say no, Tracee, because if we use that figure, people, how do you figure 10 Pay your compound interest, and the payments and everything I have money, that payment takes off the prints or gives pays the interest and then there's a little bit of the principal is paid in the beginning, and then in the end, a large amount of money because the percentage going to pay for this. Very small.

T

Tracee 29:15

Okay. So we're not going to use all the funds. So it just goes back and recycles. At the beginning at least. So then that would mean why we're able to have that amount for so long because we have it available but we don't use it. So it just kind of rolls back in. Well, it's really complicated for me to understand, but I don't feel like I need to understand I just trust it.

R

Ron Giles 29:42

Well, and that's part of it. But if you want to understand you're gonna get 505 Quintilian per year. Just see using the figures that we've used for examples. Five Quintilian per year. Okay, the Alliance says, well, if I'm gonna pay you 5% Or Five quintillion per year, I'm going to hit for 500 years, for 100 years, I'm going to have to put 500 quintillion in the structured payout account that it has your name on it. But the alliance is the ones who will give you five quintillion per per, per year, divided up into quarters that it's, then it's on a quarterly basis, a 1.25 quintillion. But all of the money to do that, in the beginning has to be put into that structured payout account, because you don't make money on money ever, again, that is cabals way of business. So you, you put your money in there, and they pay you a percentage of, of what they earn and using your money as a very small percentage of what they give to you, their earnings very small. And they give you a percentage and 1.7% per 30 years or with 20 error, a CD, which is six months or 180, whatever. All of that has to do with making them making money and giving you a portion of it on the money that you receive. But in the quantum financial system, there is no profit. When that 500 quintillion goes into that account, you will be drawing five five quintillion per year. And at the end of the year, then the the the last five quintillion will be paid to you. And there's no profit, there's no interest that has been earned on that for 100 years. Because that's not part of the new program. So the only way, and Jared grin, bless his heart says that there's there's no value in the quantum fund or the structured payout system, but he doesn't understand the system. Why? Because he thinks 10% of the principle means that I'm going to lose 10% of everything that I have. And I will only last me for 10 years. Well, da, that's correct, if that's the way it set up, but it's not 500 quintillion is put into that account at the appointment. And your first tranche that you're going to get comes out the appointment. So you have 99 more years to complete that 500 quintillion dollars.

T

Tracee 32:49

Okay, well, that makes sense.

R

Ron Giles 32:52

Okay, good.

T

Tracee 32:53

Okay, let's move on. Can we sign up with new Earth foundations, and also use our own resources and activating our projects, I have a business plan on my own establishing groups to do the same things that New Earth has on their list. So can we do both our own plan and new Earth plan.

R

Ron Giles 33:13

You work out what you're going to do with new words. And they'll work out what they're going to do with us. They have really good projects, and really good plans to implement them. And they're sharing that with us, because some of us are going to be doing the same thing that they're doing. And we just can join forces. Love won society has the ability to show them how to get the funds that they need to do their work. And we have the s, the SKR's and all of the other funds that they have purchased. Or if they have, and they join with us and become part of our program. They all learn how to get the money, and they'll have all the money that they need for their projects. So it's a win win situation. We can show them how to get the money. It's not our money, it's their money, and they'll qualify for it. And we just teach them how to raise the rate in their minds and go for the higher rates and go for the higher bonds if they want to have additional to what we're giving them. So it's a win win situation. humanitarians are getting funded. And that is the greatest thing that they need. They've got all of their brilliance and skills and things to do the the projects that they want to do. They just didn't have the money. And now we can show them how to get all the money they want more than they'll need. So that's a good win win situation for for both groups of people. And let's not let's just quit saying groups of people there, that becoming one of us will be Coming down. I don't you know, I think Holly will keep Earth foundation. Newer foundation alive and and functioning. and that's fine. I have no problems with that. But working with but we're working together collaboration. This is synergy. We work with them, they work with us. That's two entities. And the third entity which I call synergy is the sum of both of all parts plus one. What is the one? It's the combination of all that is functioning within that synergistic event. And then the event is the one. So it comes out that one and one are three, when you use synergy, so we're one there one, together, we have created the synergy between the two. So that's why I'd okay.

T

Tracee 36:07

Okay, let's move on. Next question. This is more for clarification purposes. When you sign a business under an employment contract, and they have signed up their employees under the contracts, if you set the employees up in the RSS program, which will stay with them, in addition to the employment contract with health benefits, I understand from the videos that if an employee, an employee doesn't honor their employment contract, and they that they will be paid from the employment contract for one month after they leave. The question is when that

employee leaves, would you continue their health benefits, taking care of someone who decided they want to do something else is not the issue. This question is more directed about the people who just don't want to work and just don't show up for work without a reason.

R

Ron Giles 37:00

For those who sign a contract for an employment contract, and they don't show up for work. And the boss says, the normal way of working with somebody is you give them three chances, a warning, a second warning, and the third time it happens, they get fired. And that's the process. If somebody goes through, I'm late for work all the time. I'm not respecting my work, I'm not respecting the fact that I'm getting paid to go to work. And if I disrespect that system, then I suffer as a result of not conforming to it. And then this suffering of the nonconformity is you get fired. Now, I've said that if a small boss, or boss of a small organization, as a young kid out of high school, and he's, he's going to start this, that and the other, and he wants to quit. Well give me money for 30 days, until we find something else to do, but we're not going to persist with them if he's not going to work. That's all that is for. Now, if you're in a corporation, a large corporation that has the the functioning of the human resources, they have rules and regulations that you have to live by. And we're not going to change those, our contracts with them is not gonna be changing that sort of thing. It is in harmony with Him. If people don't show up for work, or if they use foul or abusive language are certified, all those kinds of things will come back to haunt them. If they don't take care of themselves. Now, if they get fired, it'll go through an arbitration board. And when they get fired, if they get fired, and they they expected that, well, I'm gonna say I didn't do that. And then they try and go and before the arbitration board and try and resolve the issue, if it's not resolved, the the arbitration people have the ability to go into not only the contract, but in the beneficiary accounts, including trusts. And they can eliminate them all except for one beneficiary account, and they can't do that. Can't stop that. So if a person is is signs a contract, a contract is you're in Tegrity. We're not putting up with things like that in the newness of what's going to happen. The Golden Age of mankind will not participate in cabal type of thinking. That is cabal type of thinking that you can get away with it. That's why you can declare bankruptcy. That's why you can do all kinds of stuff to get out from underneath all of their garbage that they thrown at us. But if you're a responsible person, a human humanitarian, and you're a sovereign, your responsibility rests with you. And if you sign a contract, that is your word, that is your bond. And if you go into a contract with the idea that you're going to break it, you're still cabal thinking you're still a slave to the system. Thinking you're going to get by where the people who are getting the funds, will use those funds to take care of what they need to do. being lazy does not work in a communal situation. Why should it work for us when we're trying to come into oneness and in a community setting? So I wonder why we need to talk about people breaking their contract. A contract has remedies, a contract is filled with Well, yes. These are the things if you do this, then this happens. If you do that, then this happens. It's usually decades here. But contracts can also have bonuses. Let's put those in there too, in the contracts. But contracts have what uh, what if they're thinking of things that can go wrong? That's when a contract does. Okay, on one side. Yeah, that's what that's what you have to live by love won society, when we're going to give out contracts for managing directors. They will be creating liabilities. Who stands behind those liabilities? Love won society. And the funds that you get are for humanitarians are not for your your son or daughter, who has not been vetted as a humanitarian. They're given to you. And they're given to you because you're the humanitarian. If you want to just stop becoming a want to stop you're being a humanitarian, then, and say to a love won society, I don't want to be a humanitarian anymore. And I say, Well, okay, we take over your income, we take over your savings account, we take over your master account, we take over your bond account, and

we take everything that is necessary as a humanitarian from you, because you're no longer going to be a humanitarian, you do not have the desire to be fulfilling as a humanitarian, therefore, the things that you're supposed to get to be a humanitarian will be taken away from you. Is that really hard to understand? If I have 30 to 35,000, people that want to stop becoming love won society or wanting to start becoming humanitarians or managing directors. Is that a feasibility? I don't know. I don't think so. But I don't know. I have to be set in a position where I can take care of all that. And I can't do it without all of the funds that everything that they had, that they don't want to use anymore. If they don't want to use it as a humanitarian, they don't get it anymore. They have no control over it. Those are the kinds of things that we have to stand up for as humanitarians. Your word is your bond. Your stewardship responsibility is to God. You break that and you break all of the things that go along with it. And that's what this contract for us is going to be like. So there's clarifications in a in a contract, and if you take it with the way that the cabal teaches us, like, I'm just gonna declare bankruptcy. And I don't get I don't have to pay for all that stuff. If you are that way in your mind and in your thinking of this new economy is going to be very, very difficult for you. And you may not get involved or become involved in in a new way, things are going to be working out because you don't belong there. There's really good things that can happen when we get together. But if people want to take advantage of other people they're gone. Is we don't need those kinds of people. And

T

Tracee 45:22

can I add something, I'm gonna add something, because I think it's important. You are not trapped. Okay? Because we've been trapped all of our lives, you are not trapped into a contract. However, you don't want to just abandon it, what I would suggest is if you are doing a job that is not like lighting you up and bringing you joy, perhaps you can renegotiate a contract. So it is again, a win win situation for both the employer and for you. We want to be living in our highest light every day. So I feel like if you absolutely despise doing something, you don't want to have to spend seven years doing it. But renegotiating it would be better, don't you think?

R

Ron Giles 46:12

Absolutely. And that is one of the in the newness of the way things will be negotiating, not necessarily in negotiating but talking out the problems, working out the problems. If you don't want to go to work anymore, so you've quit going to work well, that's damaging people. And go to work. And then tell people that you'd like to get out of this kind of employment. Is there some other thing that we is there something we can do to get out of this. And as a man, Managing Director, I'm not going to have any problems with negotiating with people. I'll work with them, if they'll work with the system, if they will work with what I have to work with. I want your working I'd like to have you producing for for other people who want to have something to buy with their money. If we shut that all down, then it's going to be a problem. So that's why the contracts have teeth in it, but let's negotiate when it's necessary. Let's not punish when it's not necessary. If there's circumstances that come about, let's work it through to we have a win win situation. And people are not destroyed. Nor businesses or places that won't have people working. Okay, next question. Good. Good point. Good point. Tracee.

T

Tracee 47:49

Thank you, when the divine timing comes to be called upon to have my redemption

appointment by the Alliance will love won society be also notified of my appointment?

R

Ron Giles 48:02

No estimate of our business, what you're going to get out of the appointment as referral letter. That's our business. Now we start moving towards getting your your your Aster ID and your master account set up and your RSS program going? Well, we'll help as much as we can, but we're going to be doing the same thing. Now we won't know about your appointment. We'll know the results of the appointment if you're going to move forward for as a master. Managing Director Seamaster managing director. Okay, next question.

T

Tracee 48:43

So how do we know if it is actually the Alliance that is contacting us for redemption and not some other scammer that's trying to steal our our currency,

R

Ron Giles 48:54

you're opening yourself up to a brand new way of living, that will be heart centered. Your heart will not allow you to get involved in something that is not for your best good. The Alliance will not do something that's not in your best good. So if you feel uncomfortable with what is happening, then start talking about how uncomfortable you feel. And if it's the Alliance, they will address that with you. The Alliance will have your counselor who has been prepared to be your assistant to be your helper to be your guide to be your mentor to be the one that to go to for you. You cannot just dump that kind of love. And I'll tell you there's a lot of difference between that kind of an experience and the ones that the cabal or the goes bad people are trying to do. Know, your heart will tell you. Now other than that, you have to develop that ability to listen to your heart. And so you don't get involved in some of the things that are really bad that the cabal or other people are going to do. Number one, number two, those kinds of people will not be around, when we get our funds, they will have been terminated, released from positions of authority or whatever, we don't care what happens to them, they just will not be available to answer any kind of called give us problems. Once that, once a quantum financial system takes place, these kinds of people will be running like scared rats, because there's no existence for them, that they can see coming their way. There's nothing for them. They may try to do some of these bad things. But they won't have the ability to do them because there's nothing to support it. They can't spend money. Because it's because it was stolen money. There's all kinds of things that will happen to those people. Are they going to know about it, they'll know about it firsthand, if they try. They will be arrested or dealt with by perhaps even your counselor. You won't have to worry about it. Just let the Alliance do what's going to do it would be a lot of fun. Don't worry about it. Nobody's gonna be messing you up. Nobody. There's there's 3530 30 35,000 People are designed to be taking over the situation as a humanitarian activities. And the Alliance knows who you are, and you're not going to have any problems from people tell you that for sure. They won't be around. Next question.

T

Tracee 52:26

I have many clients lined up across Europe and manufacturing in Russia, Ukraine, Eastern Europe and

I have many clients lined up once I am a zim penetrator in Russia, Ukraine, Eastern Europe and Africa. That \$10 US is going to be a problem for many of these people due to their current situations, these people simply do not have the funds and do not have a bank account, or a bank card in order to make the \$10 activation fee. could you advise these people be exempt from paying the \$10 to activate their kFS account to receive the 10 cents per minute or equivalent download?

R

Ron Giles 53:01

Okay, it's a if I would say yeah, I'll just go ahead. Eliminate the \$10. Don't worry about that. Then You've robbed them of their ability to say I'm not getting a Dole here. I'm not a government dole. I paid my \$10. And then I have purchased an account within the revenue sharing solutions. That account is my money. It's nobody else's money. That if I haven't paid the \$10, where do I get that concept from? So you're toying with some things here that can cause some major problems. And I say don't do that. accommodate people on a per person basis. Something like, I will give you the \$10 to pay for this. But I want you to pay me the \$10 back. Let's not just be giving things away that are destroying people's thought processes. And the way that they're going to deal with the rent a tremendous amount of money that they're going to get they didn't pay the \$10 then they don't think well this isn't fair that I get all this money. Just because I didn't have I didn't have the \$10 in the beginning. There is a problem with the thought processes if you do that. And so try and avoid it. Work it out. That \$10 I'm gonna say a sacred sacred.

T

Tracee 54:48

I have an idea. Sorry to interrupt you. Okay, what if you gave that first person \$10 With the promise they pay it forward? herd. So within a day, they will have \$10. And then they can sign somebody up with that \$10. And then that person has to do the same exact thing. So that way, it's just a Pay It Forward program so that everybody gets to just, you know, pass it on. And then they have that ownership that Ron just mentioned, and they're able to actually help somebody else.

R

Ron Giles 55:26

Well, I think that that's an answer to a problem. Paying forward is a really good concept. Really good thing. And if you can, okay, I got mine. So I'm gonna give my \$10 gift, you're getting \$50 For that each time you give \$10 to somebody. But don't don't say you can give it back to me just pass a forward to on to other people. Yeah. And maybe you can do that for four or five people because \$10 is taking \$50 way for five people. Is there a problem with that? You're still getting your \$144 equivalent and I'm, you know, over those countries, it may be a different amount. So we'll see. Even the \$10 may be two or \$3. We don't know. Okay, we'll have to make those decisions as we move forward.

T

Tracee 56:24

This is going to be the last question. Okay. If I understand the savings account, right, the rate and primary principle except our won't be used, so they won't be a part of the structured

payout. If the yotallillion are in the savings account, will I be able to utilize my yotallillion whenever I need them. I plan on doing the ESS and the ICCH where I will really need them?

R

Ron Giles 56:51

Correct? Good thinking? Yeah, I agree with your thought processes. The structured payout will be a certain amount, but your savings account will be for the bigger things that you don't. If it goes through the structured payout account, then it's a budget. It's like a budget. And you have to save up your money from a budget to be able to buy a car or home or whatever. But if you have that savings account that's separate, and you can buy that house or buy a new car, whatever you need to do, because it is your money. And we're players with the Alliance, if a would like us to come and help do some things. We're there. It's we're in gratitude, to be able to use our money for some really good things. We'll see what happens. So yes, well, let's let's go ahead and terminate today or an

T

Tracee 57:51

eliminate. That's a big burning.

R

Ron Giles 57:56

Somebody shoot me play. Let's have a really good day. I hope that the questions and answers were helpful today. There's a philosophy that I'm holding very strongly to. And I hope that people don't get offended if they do, that can be a problem for them moving forward with us. But I want to be sure that you realize that you're loved and appreciated for who you are. And and if you're the humanitarians that are going to be involved with love won society and then you know, welcome to the team. We love you and you can love us if you'd like and and we'll support each other and do the things that are in our best good. So have a good day today. Thank you Tracee for your always for your input and, and your judgments and your ideas because obviously, you have a lot of difference in your ideas and in solving problems. And I do and I really appreciate that. You're the feminine, that gives the masculine here. Some really good support, and I appreciate it. Gratitude. Have a good day, everybody. And we'll have another q&a When the questions come in. Bye for now. Bye
