

Q and A - August 1st

Thu, 8/4 10:45PM 58:25

SUMMARY KEYWORDS

question, cac, zim, bond, humanitarian, money, people, account, benefactor, rss, alliance, projects, quantum, directors, sk, put, colombia, person, appointment, donate

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians. This is Ron Gile. I'm here with Tracee. We're going to do a q&a and today is the first day of August 2020. So we'll go ahead and start with number one, Tracee.

T Tracee 00:16

Okay, if Love won society is planning to appoint continental regional national level ambassadors or representatives or directors to oversee or monitor the work to be carried out by Zim benefactors across the globe, is there any accountability mechanism?

R Ron Giles 00:33

Well, we have never said anything that we are going to do like that. The concern that I have with all of this is that loved one society is a structure that people can use to enhance their humanitarian efforts. Other than that loved ones, society is not in some kind of a position to monitor anything, because I have my own stuff that I'm going to do. I'm sharing this with those who want to do it and enhance their humanitarian efforts. But beyond that, there's no reason for me to be involved. So are you or somebody else wants to do something about it? Then they came and asked me, I'd probably say no, I don't think that's appropriate. I don't want people in control of humanitarians period, not one over the other, not husband or wife, whatever. I want each individual to have their own responsibility, their own stewardship responsibility that they are going to be judged for as far as God is concerned. Why would we ever appoint somebody to be a even a leader over that? I'll get if I get confirmation from there, get suggestions from the Alliance to do something like that. That may be what we'll do, but without they're suggesting that to me, and I'm open for them to do that if they want to. But without without there wanting it to happen, then it's not going to happen. So I'm going to be happening for me. Let's just leave it at that. Okay, next question.

T Tracee 00:35

T Tracee 02:25

Will the new CAC dot solutions database be dovetailed into the RSS dot solutions platform located on the queue QFS, as all systems we know of in 3D land are going away soon?

R Ron Giles 02:42

Will the new CAC solutions database, I'm not sure what that means? Are you talking about the one on the maps?

T Tracee 02:50

Yeah, that's an Alkalyn.

R Ron Giles 02:53

Yeah, there's no plans. Other than just the CAC is here, there's the maps and people are doing what they're gonna do. And then this solar revenue sharing solutions program. Other than that, I'm not. I'm not saying that there will be any dovetailing or anything of this nature will say, I don't know what I that. Tracee, do you know where that that kind of question would come from? Is there something that I'm missing out?

T Tracee 03:27

Yes, at the beginning of our call with Ryan and Francis Ryan mentioned that the platform he built is able has the capacity to expand and include whatever we want to have on it insinuating or perhaps helping somebody suppose that the RSS might be integrated or built within that system? So the answer to this question, in my opinion, is we don't know yet. And also, why would you think that all systems are going away? I mean, like, why, why, why would that be? I don't know where that came from. But anyways, yeah, that's my answer.

R Ron Giles 04:09

Yes, just just just the overall, we're changing everything, and everything is going to change. And up to that to the you don't know what's going to be changed until it changes. And so when you assume you know what assuming does, about you and me, then you're liable for a lot of real happening and going things that are not perhaps going to happen, so don't assume things. I think that's sufficient for now.

T Tracee 04:49

Is there any document that justifies and certifies the origin of my lawful funds here in Colombia, it is needed to support the legality of the money that is going to be used in doe nations and projects.

R

Ron Giles 05:04

Colombia will have GESARA a complaint country or government. And there's no there's no ability to legality couldn't legally control anything to do with the quantum financial system. They will have no access to it except for their own count account that they set up for themselves. The largest corporation in the world will set up their own account. And mine, my account might be right next to it. I won't know they're there, they won't know that I'm there. It is absolute privacy. I don't even believe law enforcement will have opportunities to go and check out things of other people's privacy. That's cabal orientation, and it's not going to happen. So if there's a problem in Colombia, it's because it is not just our complaint. If it is not just our complaint, there will be no activities from Colombia and the government involved with quantum financial system. I hope that's very clear. Now it looks like we have another one from Colombia, I only can call him.

T

Tracee 06:30

In Colombia, will it be necessary to create and register a foundation to manage just fine negotiate the money of all the projects? And that is the representative to negotiate before companies entities and people?

R

Ron Giles 06:44

Know? That's a question that I've already answered. But I don't believe that's going to happen. That does then there are some problems. Next question.

T

Tracee 06:55

Today I received a debit card to withdraw fiat money and pay what I owe and is it used for online payments and purchases?

R

Ron Giles 07:02

Yeah, whatever you've got going on with your bank has nothing to do with us.

T

Tracee 07:07

Okay, what maximum daily and monthly limit can I use for online or face to face cash payments?

R

Ron Giles 07:16

Read the documents, please. And then make up your own mind what you'd like to do. I can only say we've got it all covered. And you you're going to you're going to be swimming around in

circles until you read the documentation. If I ask you a question, then that's one out of 100 that you're going to come back and ask again. Because you haven't read the documents. We're going to start getting really serious about this. Don't ask questions. Find out for yourself. Because this is a basic question. It's already been answered. And perhaps not in the way that you think it is. But it is there. And you've got to interoperate interpolate what we say and see how it really does affect you. There's nothing to say about that face to face cash payments. It's all in there if you want cash, you get cash. If you don't want cash, then you don't can you use cash for face to face payment? Yes. You just have to get the cash out. Tim the documentation so continue on and

T

Tracee 08:36

and we don't know about monthly or maximums or anything we've never talked about that.

R

Ron Giles 08:42

So we've never have and why would we assume that there is a maximum? This is your money. And the alliance will never put concerns or limits on you like a bank. Don't think that they're like a bank. Get out of that banking thought process where you have well I can only spend so much a day. That's there so limitations. I'm spending 15 quintillion dollars one day who's limited that break? There are no limit. It's your money. Quantum financial system has no limits like that. And I don't think they ever will. Okay, next question.

T

Tracee 09:35

I feel like all these are from the same person, okay, because of the Columbia. Can I name inherit and allocate the six additional accounts, the trust accounts in case of my death to my loved ones? Yes. How when and where can they use the resources wherever you want? What are the additional accounts that I must and can Oh, If, while they're probably brand new, and I just sent out that job form the other day, so some people perhaps haven't had a minute to, you know, get up to speed. So and I sent it to everyone, so maybe there's a lot of rookie questions on this that people just need to go get the studies. But what are the other additional accounts that I must and can open? Please just follow the form that's on the website under the redemption appointment program. Okay. Although there, although there's a process for requesting and using the med bed, Can I request the three types of medical beds for each Medical Center in each capital city of each department in Colombia? Include them in my support projects for child care foundations, old people and animals?

R

Ron Giles 10:45

I don't know. Next question.

T

Tracee 10:48

Is there a payment structure that is more than 100 years old? Is it possible? No, no. Okay, in my CAC who is the RSS manager? Is it the same all IWS action plans?

CAC, who is the RSS manager. Is it the same as EWS action plans.

R

Ron Giles 11:07

You haven't seen benefactor? Any of the programs will be going back to that Zim benefactor, as far as payments and things are concerned. Next question.

T

Tracee 11:20

Well, the CAC director work with the business owner to set up the contracts for employees. Yes.

R

Ron Giles 11:27

Next question.

T

Tracee 11:29

If I am an RSS administrators are starting to see see am I also a director in the community? What accumulates from there?

R

Ron Giles 11:40

I don't know. I'm sorry that these are just you? I'm not going to answer 27 questions that are in the documentation just because you haven't heard that they're in the documentation. It's in the literature. And we're putting it out there. So, you know, I apologize for being a little bit abrupt. But these are your spending five or six or seven or eight questions that are already answered, and then I'm not gonna go through them again. Okay, I'm sorry, that's just the way it's gonna be.

T

Tracee 12:14

Okay, but maybe just maybe this person joined the day before we send out the JotForm to everyone. So they haven't even received the CAC training yet? Maybe.

R

Ron Giles 12:25

Okay. Well, they haven't.

T

Tracee 12:28

Do you want to answer this question regarding Elon Musk and Starlink?

R

Ron Giles 12:33

No, I'm not involved in that. Okay. Garlic, why do you think it'd be Listen, let me just go back. Starlink was put together by Elon Musk, is it going to be the quantum financial system? Who has ever said that that has authority to say it? I'm not going to say it because I don't believe it's true. There may be something that's being done to us, the Starlink. But it is not part of the quantum financial system, or the quantum pneus of what's going on. Period. These are all a bunch of garbage gurus that think they know something about it. And they're saying we're going to be doing this and we're going to be doing that. I'd like to talk to that person to say where do you get your information from it? Because it's not from the Alliance? Sorry, but that's the way I feel about that. Don't Don't be coming on here and asking questions about stuff that the gurus are passing by. Come on. This is prestart. This is for loved one society. Or programs, I could care less about Starlink. Or Elon Musk might be a guy a good guy. I don't know. I don't care. This is loved one society. Why are you asking questions about that?

T

Tracee 14:03

Okay, I'm gonna make sure that none of these types of questions even get on this form. Okay, so that we don't even have to go down. Okay, next, I already hold my own Zim, will that be kept separate from what we received from the Alliance? I am a little confused, or will this be used for humanity also, because I have heard a few different things.

R

Ron Giles 14:25

Okay, I'd like to invite you to the qf s on the website. There's two documents on there. And in between those two documents, there's some job forms for questions and for the SKR's. That's all I'm gonna say about that. It's there. And so I'd invite you to get because I can't copy or give you all of the information in those documents. That's why we wrote them. And it's all there. So let's go to the next question.

T

Tracee 14:59

Is it preferable let people do the trainings and wealth management first before they receive their funds. What about hyperinflation? Wouldn't we be flooding the market,

R

Ron Giles 15:10

there will be no hyperinflation. If you understand loved one society, we will be entirely in control, there will be no hyperinflation. We will own everything that we can get that we can buy for people who are part of our program, then we buy it and distribute it through the normal channels at the prices that we want to have. Now, where can you? How am I as a dim benefactor with quintillions and whatever your Lillian's of dollars? How am I going to just simply say, Oh, we got to have let hyperinflation go. That's not true. So it won't happen. We are when you talk about flooding the market, what are you talking about? You're not understanding what we're about. So when you do the thoughts, when you do the, read the documents and listen to

the things, loved ones society as a whole program, we go from giving money. And then we have the PAC is a for a community, then we say we put in the IRS, the real estate listing service, and everybody can get their house, and we go into the economic stabilization system. Everybody gets contracts. Then we go to the International, the International commodity clearing houses. It's a step by step process that will take care of all of the things that are going on in the economy. It's not just for the world, it will be going into the galaxies. And maybe, because I'm saying that people are saying, well, this guy's crazy. I don't care if you think I'm crazy. I think God's crazy. He's the one who told me. And what do you say to God when he says something like that? Boy, I don't think that's true. Those who say that the Bible worked out am I talking to? Well, I don't do that kind of questioning. When you told something, that's the way it's gonna be period. So

T

Tracee 17:37

it is clear, we will bond the RSS and the ESS program liabilities for 10 years. I am not sure if you have said these will need to need to be funded at 100% of our liabilities or not. So if we have \$100 trillion in liabilities over the next 10 years, we will need \$100 trillion set aside in a bond account and or Astros? Is this correct? I just want to plan for it.

R

Ron Giles 18:02

Yes, it is correct. Every time you sell a 10 year bond contract with a bond. Every year it is renewed, you're gonna put in let's say you're gonna put in 10 trillion \$100 trillion in that bond account. It'll never be touched. So it's just stays there. And it just works out for another 10 years, or for another year. Every year, it is already there for the for the next 10 years. We just renew that for on an annual basis. So the 100 trillion is going to be there for a very long time. Is it bother you? Is it going to be short? Are you short something somewhere else? Are you listening to what we're saying about putting a lot of money away that you will own and if the Alliance wants to use some of it, they will come and ask you. Otherwise, it's for you. 100,000,000,000,200 500 Let's get into the billions in the quintillions and quadrillions and, and write on that. Because it's money that we have. And it's not going to return us on an investment and there will never be a shortage of what we're trying to accomplish. Unless you're listening to the Guru's and get your 12 million or 11 billion for a 100 keynote. And when you do that, then you have the consequences are associated with that. So if you get your higher rates get the highest bonds, you can't get your highest rates out there and put that money in an account savings account. I call it a savings account. And it'll just be sitting there until you need to use it or unless the law He comes along and says, Would you like to be involved in this thing? Okay? Yeah, good luck, dude. Okay, it's gonna cost quite a bit of money and you got plenty of it so it can do it. So those are the kinds of things, you kind of be thinking about these things, because this is what's coming. And putting limits on anything that humanitarian is does is not part of the Alliance. It is only part of the Cabal, and their minions that are out there preaching their version of what's going on. But they don't have a clue because they're not part of the Alliance. I hope that some day, we can get an idea that Ron Giles talks to the alliance proofer that is the loved one society programs. I'm not taking a bow for it, I'm just telling you that they downloaded that information. Do I talk to the alliance? Yes, I do. You can question that all you want. But I've got proof in the pudding, and you're part of the pudding. So connect the dots,

that the lion says it's fine. That's true. If the Alliance doesn't say it, then it's not it could be true, it may not be probably won't be. If it doesn't come from the right source, you're gonna have problems eventually, with your information.

T Tracee 21:35

Can we enroll as many local churches or organization members as possible, as in benefactor who will provide the performance bond, it could be in the hundreds of 1000s or 1000s.

R Ron Giles 21:49

The whole bond of a revenue sharing solutions, loved one society is is the ultimate bond holder on all of that each individual's in benefactor will be the bond holder for all of the activities that that person does. That's why you have a bond account. They're double bonded. Hundreds of 1000s. You've just got to get your mind out of the way and let your heart look at things the way they really are. So if you're talking to me hundreds or 1000s, about billions, or quintillions, or Biogen trillions or quadron, Gen trillions, all the words you want. It goes up to 300 million zeros for a million. I mean, those of you gone be haven't gotten 180 There's there's still something to go for. And if you're not doing that, then why are you telling God? I don't want to do that. I don't feel good about that doing. I wanted to do that God. You don't believe in it. So you don't. Next question.

T Tracee 23:11

I love the information provided today. Ron and Tracee, great job. I really enjoy all the updates of the answers. Yes, I assume we take care of the accounting of all these people, is that correct? In our case, we would use Deloitte CPAs to the world to do the accounting and disbursements Is this acceptable?

R Ron Giles 23:29

Whatever you want to do for your accounting procedures, Deloitte is good. I think KPMG is international, even down into Africa. And that's one that I feel more comfortable with is one I inquire about, and I got confirmation on it. So that's what I probably use. If there's others that come in, let's just take a look at it see at the time. But until that time, we don't really understand and so we don't really know what we're going to be doing. But we can shoot down ghosts in the future by saying, Well, we're going to have these kinds of problems. So let's prepare for it this way. You've got performance bonds, and so forth. Okay.

T Tracee 24:16

County question. Okay. Um, okay. In the event that humanitarians come together as a group to fund a project jointly in a country, for example, are there any suggestions you could give us on how to best approach this, for instance, could one humanitarian set of a bond account others could then commit to funding it on a quarterly basis until the project was completed?

R

Ron Giles 24:42

You're on your own. As far as Balint is concerned, you're a gym benefactor, the money is yours. You're using it for your projects. Why are you getting other people involved in it? For bonding? You don't do that. That's my opinion. Its opinion But I wouldn't have somebody else coming in and trying to bond my stuff. Why would they want to be bonding my stuff bond in their own?

T

Tracee 25:10

And besides, if you have a SKR, you have more than enough money that you're going to need to do your own projects, you're not going to need to combine with a group. So, okay, true. This person wants to set up a corporation sole trust, so I'm gonna have to forward you their email, or do you have do you know, somebody who can set that up for somebody?

R

Ron Giles 25:34

A corporation sole. It's not a trust, it's a corporation sole. Now a trust is something different. A corporation soul is a corporation. I am the sole owner of that corporation. That's why it's called a corporation. So I don't have board of directors. I don't have any of that structure. Tell it's not a trust. And you'd like to do this? Yeah. Oh, yeah. Mine cost me \$4,000 At the appropriate time. But that's all going away. Because all these old systems are old systems that will not survive into the ground into the queue. NESARA GESARA? It's my understanding, I'm just using it because that's what I've got. It just we'll use it until it's not usable anymore. And who cares what's going on from then I'm, I'm in the quantum financial system, and I don't need anything else. Next question.

T

Tracee 26:40

I understand that every beneficiary can have six trusts or these official trusts with different ein numbers.

R

Ron Giles 26:49

I would not go to Okay, first of all, the money is not coming until we're away from that system. So there's not going to be employee identification numbers. For trust. Now, trust can be started in with a banking account, and you can put it in that name, and then you would need to have an EIN number. That's the only way to get an account from a bank. But the banks are not going to survive the they'll be turned into financial service centers. Until, because that's going to be in a quantum financial system. So I don't see an EIN required it is now if you do it that way. And in preparation, I, I would wait. Number one, you can't set up your trust and tell beneficiary trust until you have a beneficiary account. Didn't do all the work you want to do beforehand. They set up trusts and do whatever you want to do with them. But I think you're putting the cart

before the horse. And you might have an engine instead of a horse. So you won't need a horse to drive your car. So those are the kinds of things that I'm looking at. So I asked I answered the questions with those kinds of things in mind. Next question,

T Tracee 28:17

post appointment things to do. You mentioned setting up qf s accounts and to try out the system. Would examples be a homeless account or remodel upgrade account, new autos account, transportation infrastructure account? That's it, it just, it goes on and on?

R Ron Giles 28:34

Okay. Whatever you want to do? Are you in charge to your money? Don't do do things that you'd like to do to help you with what you're trying to accomplish? There's no limit to the accounts. Next question.

T Tracee 28:51

I'm going to answer this one. May we humanitarians use a sample refer a little letter in sampled trust document on the website as our documents. Yes, that's why it's there. Next question. I know that pretty much all possible questions have been answered. I just haven't gotten to them all. I'm interested in spreading the wealth not only here in the USA, in my community, but also in my other country, Spain, will this be doable? Or easy to accomplish? doable? Yes, it'll

R Ron Giles 29:19

be easy, it's up to what you're saying is easy. It's gonna happen, you know, you're gonna do the things that are necessary to get it done. And you will and don't think that governments are, are not making things hard for us. And so just aren't compliant. Governments will not be in the way of Zim benefactors doing the things that they need to get them. It's in it. Besides, it's an individual thing. The Quantum financial system knows no boundaries. Have you set up a quantum financial system in different countries excuse me, an RSS program in a different country? And then we will have some changes in the downloads. And we'll do that in an appropriate sort of way. But as far as the money going to individuals in the quantum financial system, they had no snow boundaries. It'll just happen there. And it'll happen over there. And they'll happen in Germany, France, Mark, whatever, it doesn't matter. Is there no no boundaries, except for what our downloads are? Perhaps Zoho helps him? Next question.

T Tracee 30:36

Regarding the RSS, I understand that you may have different per minute amounts for different countries, does a person have to provide their citizen ship status to determine how much they receive per minute when they apply? Example, I have a friend from Burma who is now working in Singapore under our work pass, does she get the Burmese rate or the Singapore rate? Which changes over into the Burmese rate when she returns home? How will this work?

R

Ron Giles 31:02

I don't know, we'll see how that works out. There'll always be little things that need to change. And I don't know if you set it up in one account in one country, and then you go to another and if you set something up in us in Africa, then it's going to be smaller. And if you've moved to Australia, CAC directors has the ability to change those things. So find the CAC director and, and make the changes. And I'm just saying that off the cuff because I don't know what's going to happen. I'd love to be correct in that, but we'll see what happens. Next question. That may be one of the reasons why you want to go from or stay in the country that you're from? I don't know. Next question.

T

Tracee 31:53

What is an appropriate way to share any of the Benefactor programs, I tried to send a friend to your website? And they said it was a scam? And they weren't interested? Okay, can I answer that? Everybody? I had the same thing happen. I've sent it to so many friends. And only one of them went forward and moved forward. And my idea, my thoughts is that God just doesn't want to use them for this program right now.

R

Ron Giles 32:26

Well, that's got to be true, and are they going to be around? If they're, if they're totally dead, spiritually, they're not going to be around for the golden age of mankind and for the higher dimensions. So everybody's going to be personal. And God knows every one of them and is working out with their soul, the things that are going to happen to those people. So let's not have an opinion about it. We just give them the opportunity. If they if they, if it resonates with them, then they're the ones that helped create it. If it doesn't, it's okay. If it is it's okay. And there needs to be no judgement about it and no. Well, you're probably not very good person or whatever. And those are the kinds of thoughts that come across our minds when somebody wants to turn us down. But the fact that they're not going to be a part of us is enough. And that's just let it go. What's the next question?

T

Tracee 33:38

And then I think is a continuation of their question. They said, if it doesn't resonate, can they just be used as directors?

R

Ron Giles 33:47

Yeah, if you feel comfortable with them as directors, humanitarians have their hearts in the right place. But if they're not resonating with humanitarian stuff, it's probably, you know, I'm not sure I'd have to check it out really good. They'd be making my assistant or put them under some other area. That's not as important. Let's see how they do. Next question.

T

Tracee 34:17

I'm going to address this question because I want to address everybody on this question. Next question says, Do I must I have a CAC up and running now to register on the CACs map? The answer to that is no, because nobody has a CAC running right now. Every single pin on that map should be gray. And I was looking at the map over the weekend and there's yellow and green and all of that, but nobody has money to set up a CAC yet. So every single one of those pins should be gray. So if your pin is a different color, will you please go in and change it to gray?

R

Ron Giles 34:52

Let's wait till you have an actual CAC. Your intention. So doing one is not is not does not then There's not make a.on the map right now only zoom benefactors in this is where I'm gonna say zoom benefactors in the in the city that they live in, should be putting their map, putting their CAC propositions on the map, it helps us to understand where the Zim benefactors are located. If this is a problem for you, you don't want to do that. That's up to you. But it helps us as planning helps us to know, and how we can make some changes. That's why the SKR program came up because we don't know where these embedded packers are, we just simply know that there's a lot of them around and they don't have Zim been been sim bonds. And so the fkr program was designed to give them Zim bonds so that now they can they can be potential training, or they're in training to become potential Zim benefactors. We just gave them the funds to do it. So if we don't know these kinds of things, I guess we just stay blind about it. But for us, that puts your punk put your number or your is it? What color is it? I see.

T

Tracee 36:28

Gray, everything needs to be gray.

R

Ron Giles 36:31

Just put your grey dot there on your city, and don't worry about him. And some people, I don't want to give out my private information or where I am. This is not going to go to everybody. So if you're always worried about that, then you're in fear. Now, where's fear going to get you?

T

Tracee 36:48

Yeah. And somebody, there's somebody in my small town that I don't know, I have no idea who this person is. But heck, I want to collaborate, like many hands make light work. So I need to figure out who it is, it's in my town, so we can do it together. The other thing I want to say to you guys about this is people I've I've had hundreds of emails, okay, so I'm sorry, if I haven't gotten back to all of you. But I really want to take the opportunity to say, you're not going to put your home address, go and find like a building, that would be a perfect location for you. Maybe it's for sale, maybe it's not, but just pretend because we're this is a proposal. So I went and I found a building that is for sale. And I was like, Oh, this would be a good building. So I use

that address. But please don't use your home address, that's just silly, just find an address, somewhere, that would be an ideal location for you and use that as a proposal. And then later on, when you steal the deal, and you know where you are, you can change it. Okay.

R

Ron Giles 37:52

And another thing they've, they've said, you don't use your name, it's a fictitious name, as you're known that plume, if you want to call it that. Use, also known as you know, wing that or the ability of the head or whatever you want to call yourself. But don't use your real name, we don't want your real name, there is no need for your real name. Now, there's people like Tracee and I think that there's, I think that's admirable, they would like to find other people and kind of communicate with them and see what their ideas are and what their plans are. And, and sometimes when you're in that kind of planning process, you don't step on each other's toes, which is okay, it's up to you. But you don't get it, you're putting your name down on that, on that, on that map. Or saying that you got to CAC there. You can do hundreds of those. I'm going to do CAC is all over the world. So I'm going to put them all over the world. And it's going to take you more time to do all that than it is to go out and do one CAC at home first and see how it works. Yes, wisdom in what's going on. So it's all voluntary. There's no, nobody compelling you to do that. There's reasons why it's a good idea. And it's part of the cooperation that we're having. But don't put your own name down there and don't put your own address. Call it into city or whatever other identification thing you want to do.

T

Tracee 39:36

And also don't worry about competition. No, that was all good. But don't worry. It's not a competition. We're not we're not competing against each other, you know, so don't have that scarcity mindset either. Like I've gotten something that somebody was trying to put a pin somewhere in a city and he was upset because he lived there for 45 years, but for some reason, he couldn't pin put a pin They're in one of his pins that was missing. And you guys, there's a lot of moving pieces here. And there's going to be some glitches as we work out the bugs, but everything is going to work out in a perfect way. So just please have patience as we shake it all out.

R

Ron Giles 40:17

Yeah. And don't get heavy and high minded on this thing. Continue to use your heart. That's the saving grace, we're going to have a lot of problems. If people start using their brains. It's just the way it is. Brains cause problems, their ego, the egocentric heart should not that way. Oh, let's go from the heart. And we're going to have a lot of fun with this. Otherwise, we can have drama after drama after drama. And why create that? We don't need it.

T

Tracee 40:55

Next question. So we don't have to all reinvent the wheel will love one society be providing templates for the employment contracts, which we can then get checked over by a lawyer in our respective country or state?

R

Ron Giles 41:11

Well, I think that's a really good idea. Yeah, it is. And we'd like to see the we're going to have, we're going to create a simple trust, this is the one for the for the benefactor, excuse me, the the owners of a business, BOAC a contract account for for small business owners will have one for that. And sometimes contracts can have a list of items that you might want to put in there. And some of them don't work everywhere. So you find a pick and choose which one you feel is appropriate. Put that in the contract. And then that's that's going to be the director. So they're doing it at that level. And it will have some medium size companies with more employees. And then the larger ones, and the larger ones will have to come under loved one industries because of the nature of that project. And the way that that's going to be handled. Next question.

T

Tracee 42:33

If I have three 100 T notes, would that still work if I asked for the highest rate?

R

Ron Giles 42:41

Yeah, of course, this is going to work redeem them. And then what is the rate you're going to add? I don't know. Why don't you get an SKR? You have 180 Mulligan's, which is 300 zeros, 3 million zeros. Excuse me. I get yourself 2100 quintillion as well. Now I'm asking that like, like, why just keep it a three hat 100 T notes? Will Will that still work? Well, of course it will. But why aren't you getting more that you can donate to put in that savings account and be available? If some other stuff comes by that you don't know about? Otherwise, just stay where you are? That's okay. You know, I wonder why you wouldn't want to change but if you don't, then that's up to you. Next question.

T

Tracee 43:38

Next question is how much zim am I supposed to purchase? If I have limited funds? And do I need to purchase bonds? Or will notes suffice? In Australia? I only see notes available to purchase. Do I hang on to these notes that I've purchased? I have purchased minimal Dong and more dinar. I'm not understanding why it's so important to have just Zim.

R

Ron Giles 44:04

Well, if you get a dinar, it's 25,000. Right? Most of them are 25,000. If you get a 100 trillion, how much money you got to get to that in terms of the difference between a 25,000 and 100 trillion. Now, that should be the answer to your question. I hope that it is the the Zim bonds, excuse me, the Dong and the dinar, our symbol in the ocean compared to the ocean when you're talking about money. Why would you spend 100 I can spend \$100 Less than \$100. And I can get 100 100 Your Lilian bonds for \$100, less than \$100. And it comes from China. And yet, I don't care if it comes before the redemption appointment because I can take the receipt and they will redeem that for me. And if the Chinese want to mess around with everything, I just do

what you want with the bonds that I paid for, and you won't deliver them or whenever it doesn't matter. You have the receipt, take it in to the, to your appointment, and you can redeem it. So that's what we have worked out with the Alliance because of the problems that we're having. So they want us to have the higher rates, whatever our heart tells us, and the higher bonds be the Yoda Lilian billion or whatever. It's like I said before, why wouldn't you want an SK Rs 180 million, which is 303 million zeros? What is your reason for rejecting that? That's the thing. You're rejecting what God has given to you as a major, major KEF that he's asking you to hold on to. And maybe he can help you, you can help him with some of the things that he's doing, and expanding to the universe. But if you're not interested in that you don't believe in it. Don't do it. Okay, because I don't want to stretch you so much that you become all paralyzed, because you learn doesn't tell us as humans in other locations in the world. And okay. The Bible doesn't tell you that. God tells me, why do I need the Bible? Good question. Next question.

T

Tracee 47:05

I want to go to Haiti to start there to help with financing humanitarian projects introduce the RSS and CAC, is it right to use their also the 10 cent download? Actually, this seems a little bit high for that country, or do we get after the RV new information? Thank you for your answer.

R

Ron Giles 47:25

We're gonna try and get that information out to you sometime. So there was a wonderful lady that used the gross national product, or the individual income, and from every country in the world that they publish it. And she from that extract had what she thought would be the best. 10 cents a minutes, nine cents a minute, 11 cents a minute, while I think was 17 in Africa, there was some down there, then less than a penny point two or something like that is how there is going to be some changes. But let's wait and see what happens for that. Yes, you're going to go to Haiti. And you're going to have an RSS program, the downloads are which may be quite a bit smaller, but you won't have anything to do with it. It'll be there. And that's where you use. And you can question it or have a serious thought about it. But we're going to get this from what God wants. So go from there. Let's go to the next question.

T

Tracee 48:38

I understand that the money is ours to do with as we see fit, and that we look into our hearts for guidance. But I would like to ask you your heart, what you think would be an appropriate percentage of the total Escarra amount to donate to a loved one society? Well, you're not donating it to a love won society donated to you.

R

Ron Giles 49:03

Let me put it this way. We Yeah, the SKR, we have bonds for those already. And we it's maybe even as little as one or 2% of what we have. So we got plenty. We don't need any bonds from anybody unless you want to dump us on dump them on us. Because we're getting high rates. And that's, that's when I go into my heart now. You donate to loved ones you don't donate to a loved one says hey, here's the philosophy or that are accurate. I have all of these Zim bonds I

have in my heart, an amount and that might be in your heart for the SK ours came or not. They're saying to me have them use the hard sell rates that Peyton have already established for their humanitarian activities. Use that same rate when the SKR's come out with 180 Millions. Now, because it is so big, because it is so large, I have been saying and I will say it until the RV takes place. The person who is going to be at your appointment will be your counselor. talk to that person. This is what I have plans, you have made your presentation. This is what I have planned for my projects. I would like now to discuss with you what we should put in the structured payout. What is a structured payout as the amount of money that you're going to get on a quarterly or annual basis for the next 100 years. I consider that to be my humanitarian working capital to my budget. And what's leftover I put in the bond account, which is going to vary is going to be very large. The rest of the money is going into that I'm calling it now a savings account. You can call it a donation account, or you can call it whatever you'd like. Who owns that account? You do? It is your money. You cannot give that away to anybody else unless you have motion to sell in that way. You don't give it to the alliance and say, Well, I can't use that because it's the Alliance. No, they don't want it. If they do need some money, they will come and ask for it. Or somebody through your counselor will come and say I've got an opportunity for you to to do a project here. You want to discuss it? Well, yeah, well, how many? How much is it going to cost? Well, it's going to cost you about a yard Lillian of dollars for to do this project. Well, I've got that. So yeah, let's talk about it and see what we can do. Because that you're the Lillian of whatever or medallions are in your savings account. And you own it. They will never come to you and tell you that you have to do this or that. That is crossing over dominions. It is trespassing over what God has given you as your your stewardship responsibility. They have laws that they established and they will not violate those laws. The Lord's Prayer talks about trespassing. That is a trespass and there's no high official or higher dimension person who will cross over and cause trespassing on your property. Okay, I want to make that very clear. Because I get all these ideas. Well, I'm wanting to donate it the loved ones. No, you don't own you don't donate it to anybody. You use it for the purposes for which you intended as He commanded terian. So this idea of here's the thought process behind the idea well, I need to donate I'm gonna say this when you're too damn lazy to get out and get the job done yourself. So you got to have somebody else that you can give this money to. Now it's time for you to grow up. It's time for you to mature in your spirituality in your humanitarian efforts. And there's there's flogged thinking in a lot of stuff that's coming across my emails, plugged thinking meaning that they are thought processes that are not serving your highest and greatest good. And I'm hoping that you'll understand what I'm saying because if you go into your redemption appointment with those with a whole collection of those slob thinking what do you think that kind of look at and say? You're just not thinking you don't you're not humanitarian? I mean, let's get real. Just because you feel like you'd like to do some humanitarian work, you're going to have to become a humanitarian as a humanitarian as do not have those kinds of thought processes. So let's just simply get rid of them now. Instead of walking out of that appointment with your tail be between your legs, and you are embarrassed, because they said, You're not humanitarian, you don't get the money. Is that a possibility? Is it a possibility for you? For that to happen to you? Would you put up with that? Well, I'm just simply saying mature into the processes of being a humanitarian. And get to the point where none of that stuff stuff who's going to prevail in your life? And then you'll be okay. So we're not going to donate to loved one society, we're not going to donate to the UN. I did say that in the beginning. But that's not really what I wanted to say are meant to say it's, it's my savings account that I get to use for other things. Besides the projects that I've already got identified. And they may be really big. But I'm big enough to handle that. We might be having to buy some or manufacture spaceships. We don't know it's gonna be. So maybe you don't get one unless you can afford it yourself. Are we? Are we finished? Yeah, I guess we are. Well, okay. I didn't mean to do that on the end. But well, it has to be sad, because this is important for you

to understand, I hope it doesn't turn people off. If it does, then maybe this isn't for you. I love and appreciate all of you. I send my love and my appreciation to you. Who heartfelt thank you. And for those who opened up their hearts and donated. Thank you. It was Thank you. So appreciate it. Very kind of you. I don't get a chance to email you. Most people don't leave their email address. I don't know I can't do that. And I, for people who've donated some of the larger than I'll put a stamp on an envelope and give you a thank you. But I haven't got an email, so I can't get finished withdrawal until that time, then. Those kinds of nice things. We'll have to wait. Larry, thank you, Tracee, for your participation and for your opinion on things. I think that you're just the jam. And thank you everybody for the questions and those who are new. Get into the books, and study real hard. Don't ask any questions until you've gone through it all and figure out where you can find your answers to your questions because it's all out there. And there's enough or is organized. Casey's organized it so that you can do a really good job of finding out what you want to find out. So blessings to all and with that, let's say goodbye for now.

Tracee 58:22

Thank you, bye bye
