

Q and A - August 29th

Thu, 9/15 10:51PM 50:24

SUMMARY KEYWORDS

people, question, bonds, gold, alliance, humanitarian, prices, redemption, zim, contracts, loved, money, appointment, rss, society, funds, lw, spirit, heart, person

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Good morning, humanitarians. This is wrong. And I'm here with Tracee. Today is August, the 29th. Monday, August 29 2022. So with that, Tracee, let's go ahead and start our questions, please.

T Tracee 00:19

First of all, I'd like to say I'm a positive person. And I've observed my small community and I'm aware that we will need to be prepared for hiccups. I live in the Midwest where many small rural communities have been decimated. I want to use the LWS programs to revitalize these areas. Unfortunately, many rural cities have entrenched minions who manipulate community growth through permits, fees, and dysfunctional regulations, would you please address how we can get our foot in the door of these small criminals continue to operate?

R Ron Giles 00:52

It's an excellent question. And I think that the answer to those questions, that question would be looking down the road and see who is left once the alliance and that team of people, and God does the work on the people who are causing problems for other people by having dominion over them. This is what ACU says, as far as government mense with a T is concerned, the real way should be governance. Governance. So when you talk about government, you're talking about Dark Side dark people. When you're talking about governance, you're talking about the Saara those cities, each one of those cities is a corporation. Each one of those counties is a corporation, each one of those states is a corporation, each one each state is a corporation. So all of the corporations were owned by the Vatican through the USA, Inc. They owned it. And then every other organization that acts as a government comes under the USA Inc, the value of that is going away. If there's anybody left, you could have some problems. But I don't think any of those people are going to be around. Now, if you go in there, and you speak with authority, and you know you have money to do the things that are necessary to get this thing going. You bypass you can bypass those people. If they're there, they're still there. And

all of their so called policies and procedures, and all of that sort of stuff just simply goes away. And we get a brand new governance. So those people will be voted out. And new people will be voted in that will be part of GESARA compliance. I hope that helps you. Those people are going to be gone. So when we're looking down the road, just not, you know, don't put all the garbage in a wheelbarrow and send it down the road or push it down the road where you're going. Yes, let those those people stay right there. And we just bury them in and do whatever, let God takes care of things. But we're not going to have to worry about that. So that's my way of looking at this to alleviate any fears of the future. It's all going to be taken care of isn't going to be perfect. There's a transition we're going to have to go through. So let's have patients with a transition and then we'll see what we have to work with on the other side. Next question.

T

Tracee 04:09

Would you mind maybe providing a specific example and walk through how to implement the RSS step by step?

R

Ron Giles 04:20

Are you talking about you know, when you implement the RSS, you got to go through all the programs in excuse me through the redemption appointment and sign the contract? Is that what you're talking about? Once the sign was? I feel

T

Tracee 04:36

like what they mean is like after like after we are done, you know we're at the other side the platform's launched, like what would we do next?

R

Ron Giles 04:48

contracts or contracts are also you will have a user ID is called a master ID. That's what you will have. You just give that to one person or be a member of your family, or two or three members who your family doesn't matter. You think it's really important because it's a master ID number, but they have no idea what you mean or what you that that is a master ID number. So you might just do that one for your family, and then from then on from the master account, and then from then on, you use theirs if you want to share with somebody else. So you don't have to use your master account and just use their ID number as a referring person. How am I going to do it, that's basically what I'm gonna do, set somebody up. And then if I want to share with other people, then I'll use that account that to use your ID number. And, and that name. So I don't have to be involved with it. But that's how it starts now from there. If I was getting \$144 a day, and I paid \$10, to get my account to do that. How long did you think it's going to take for people to catch on to the reality of this? Oh, that's too good to believe, well, then don't do it. But I mean, I'm making 144. And you know, it's a good idea to get them before they run out of money. Let's see, let's get everybody in so that we can see how long it's going to last. And people will use that to get in. But they won't run out of money because we there's no money to run out of. So the RSS program will just work for everybody. You get your cards, I would get the cards with the name that I'm going to use and the ID number. And I wouldn't be passing them

around. And what am I saying to them, Go to the website, don't take my word for it, go to the website, they've got videos there that you can see everything you want to see the left the left. And then there's also on the website, the place to register. And then once you've registered, you put in your username and your ID, and you have your own office personal office, and you go back in there and you can see how much money is accumulating in your account. It should be happening as soon as you've done it, you'll see 10 cents a minute. And then you can start doing whatever else you want to do. But there it is, if you want to start sharing it then do after 24 hours, you'll have \$144 in there. Create your quantum financial system account and draw down like my \$144. Well, there you are no chance of losing if it's in your hand. So there's a lot of mind playing games that people will use. Well just let them use whatever game they want to play. And dollars is not a lot of money. But I say \$10 don't pay it for them. Unless they plan on paying you back for I mean, you're gonna get \$50 You can say, well, I will pay for it. But you're going to owe me \$10. Okay, I'll do it. That way they have paid effectively, they know they have to pay the \$10 to get the account, that is x, that is very important to do. Don't say I'm just going to pay for you got to pay me back. So then they have ownership of that account and know that they have paid for it properly. Okay, that's the RSS program, how is it going to be used? Well, you're gonna go into all of the things that are necessary as far as the bonus programs are concerned going to use that beneficiary account. When you sign them up as an employment contract, there's all kinds of things that that is going to happen with that. We're going to get away from the use of the word employment because I'm finding that there is something within the COBOL codes and so forth that we start using their terms, and they think they steal on us. So fraud vitiates a contract so we don't have any contracts with those guys, they've they're frauds from the beginning and frauds to the end and we're going to kick them out. So we have no responsibility to them at all to honor their contracts and believe that they have something overs because they don't. So things are going to be changing. And and we just have to prepare. So when that's the I don't know. Other than that, how to tell you what's going on. Okay, the next question.

T

Tracee 10:04

Okay. The training is great. I fully comprehend how the programs work. My question is loved one, society's redemption rates and processes seem to be vastly different than what the boards are talking about. Will the appointment line information be the same for LWS as everyone else? Or will we have a different appointment process? Will it be the same secure link or 800? Number? So this person, I'm assuming is new. But still, yeah, this question I do get because they don't. They feel like if other people post a SafeLink website or an 800 number or something, they don't want to miss out, you know what I mean?

R

Ron Giles 10:48

Well, I do and it's okay. You're in a transition. If you have any doubts about loved one society, those doubts are going to be in your mind and you're going to have a real problem, eliminating them. And the problem will be there until you do eliminate them. And so you're going to have to, to come you're going to have to have a come to Jesus meeting on this. Because if you don't, then you're gonna miss the boat. Am I saying this? Because I I've loved one society? I'm the overseer? No, I'm not I'm saying this, because this is what the Alliance's said there's a lot of things that go along, not just education, not just showing up at an appointment as you perceive it to be. You may not get an appointment if you have not done the work to get the

appointment. And that work is you purifying your life so that you can be a pure vessel, because this spirit is going to be the thing that is that humanitarians carry with them that will accomplish the golden age of mankind. If you're not prepared to do that, then you won't get the money in the beginning, does that mean you can't be a part of it? No, you will have to wait until you find somebody that you want to work with or that wants to work with you. The time and now is is for you to determine whether you want to be the one that gets money or do wait till later and get to have to get money from other people. And you're not the one in charge. So just do your work. All I can say if you don't you're gonna have some problems. Go to the next question.

T

Tracee 12:48

Okie dokie. I have just listened to the q&a session posted from August 23. You mentioned that some people may not get to have a redemption appointment with the Alliance, as they have already been pre vetted. I realized there are important events that need to occur, such as the RV before this will happen. How would you know that you have not been accepted? I am excited to have a chance for the opportunity to help others get out of the struggle mode. But sometimes wonder if I have the skills and experience to be able to work on such a scale.

R

Ron Giles 13:23

I think the most important thing that you can do is not worry about other people and worry about yourself. If you're a humanitarian, but window mirror and look at your shelf. And then tell yourself if you're a humanitarian or not. I am a humanitarian. You can't lie, because your system knows that it's a lie. If you're not. That's a good way to lurk. Now, is it now and forever? No. You can change and there's ways to change. What do you think is going on with the redemption? Or with the training that's going on? Are we only just giving you little bits and pieces about the loved ones society? Or are we trying to help you to get a better feel for the redemption appointment? Or excuse me for your ascension process. This is the thing that you're looking for. This is the thing that the alliance is looking for. A lot of people could have a nice heart and they're the ones that we're going to work with once we get our money. But are you the one that's going to step up and be the one to get the funds or do you have your calling from God to be a humanitarian? I can't tell you those things. Because it's none of my business. I'm not going to be judging you. I don't have to because you'll get a letter from the Alliance from the IRS emption appointment, referring you to love on society to become a zim benefactor or a managing director, whichever one we're losing, we're using now. Whichever one you want to use, you're asking really good questions. But ask yourself and give yourself your own answers. If you're already being vetted, which you are, they already know who you are, if you've been vetted, you've already got your counselor assigned to you. Those are questions to ask. So you can go ahead and do that. Otherwise, I'm not sure how to answer that question, because it's a very personal question. And I can't tell you I just know what's happening. And the results of it are those who are bedded will get the funds those who are not vetted meaning, have you got a calling from God, before you came to this earth to be a humanitarian, that will bring forth the golden age of mankind? Do you think that everybody's going to be involved in that? Well, to some degree or another? But do you think you're going to be the ones that carry the funds, and the money to establish a whole financial system for the galaxies and for the many galaxies? multiverses? I don't know. I don't know all about what's going on. But I do know that there are certain people have been called of God. And if you question that, in your mind,

get out of your mind and get into your heart. I'm going to say this Q has said, do the commands, I command my spirit to, to take the thoughts in my mind and put them in my heart. Are you doing that? If you're not, and you're coming up with all kinds of silliness, then you're missing out on the things that you need to do. And the results of that are going to be that you may not be where you want to be when the funds come. take it upon yourself to purify yourself to be the pure vessel that the Spirit can use as a humanitarian, to get the funds to the earth. That's all that this is about. I can't do that for you. I can train you, you'll know how to use love on society, you'll know how to do the URSS program is all going to be there. But you've got to take the responsibility to learn yourself and to purify yourself and your spirit and your thought processes to come from your heart. You got to do that in order to be a successful, vetted humanitarian. I wish I wish I could give you something more than that. I've tried to do it for a number of years, but it just doesn't work. Because there's no answer to it, except for the answer that you have in your heart. So from that, let's go on to the next question.

T

Tracee 18:26

And it doesn't matter if you have the skills or experience to be able to work on such a scale, right? I mean, that's not what I feel like it is or your heart. No, no, it's not skills.

R

Ron Giles 18:39

Your skill level, this is what you bring to the table. But the major skill that you're going to have to have is how do I determine whether that person is good for our company or in our for good for our projects? When you're going to have to have the spirit to tell you, your whole spirit, your whole process, your whole success is on your projects? Or is if you can get the right people at the right place and they're going to come but how will you know who they are? If the Spirit can't talk to you? Or if you can't listen and hear the spirit talk. There will be the yelling at you, but whatever. Okay, next question.

T

Tracee 19:28

Okay, Ron, as we become more light beings and transfer to fifth dimension, is it wrong to still want the earthly home on the hill or the Bentley? As you discuss, I'm conflicted and just need a nudge in the right thought process.

R

Ron Giles 19:44

Well, the right process is just get the Bentley on the home on the hill. Everything else will take care of itself. You don't have to worry about that. I'm I'm catching on to what Q is saying Find the thing that makes you happy. Do the things that make you happy, find your joy, and then do those things. If the house on the hill brings you joy, good. If the Bentley brings you joy, good then to it. Those are the things that we're learning. Now, this is the process of gaining greater understanding. This is the eternal process being manifest to you ETERNAL progress. So let's go ahead and get our money let's get the higher the house that we want, that we feel that we want. And if we don't like it, and put it on the listing service and get a new one, pay it off and get a new one. There's all kinds of things that are available for you, your mind just has to be

tuned in to the fact that nobody is in charge of you. Nobody. We've had that all of our life. We were slaves. They made us slaves. We have the consciousness of slaves, and how and do we get rid of that? If we don't address it, and learn that I am the one I am Lord God of this being. I don't have to accept other people's ideas. I don't have to accept, they may be in harmony with Well, I think then I can listen. But I'm the one in charge of my life, I have my own stewardship. And each person who has a stewardship will be responsible to talk to God when they're finished with their project and have a nice review and see if you've done a good job. If you didn't, then there's things that you're going to learn that may be pretty heartbroken, raw, heartbreaking. However, let's just look at the positive thing. Let's just know that we're going to really do a good job. We're going to, we're going to listen to the spirit, we're going to be moved by the Spirit to do the right thing at the right time. That's the way the heavens have planned for us to work. We are children of God that makes us Gods. If you have a hard time believing that then either learn it or don't. And if it's a hard thing for you to understand, then you're still part of the Cabal process of learning. As they would never let you have that idea. I've had this idea for 30 years. Because I know who I am. No, there we go. Next question.

T

Tracee 23:01

Okay. I have a question regarding the value of the Zim bonds. The root of the question revolves around my understanding that once the Zim bonds are accepted in cash, they will be backed up by gold as part of the GESARA and the QFS. Assuming I understand this correctly, I asked the following question, how is it possible that all of these them bonds once redeemed will be backed by gold, as opposed to being another fiat currency? Also, keep in mind that the Dong dinar will be in play and I assume they will need to be backed by gold. Research I have completed seems to indicate that the entire world's gold that has been discovered mined and processed. This is a long question sorry, to 205,000 metric tons on the site, high side of the estimate. There are 20 204 pounds per metric ton 16 ounces per pound. By the way, oops, I skipped a line, and the current price of gold per ounce is roughly \$1,800. By the way, a \$100. change in price up or down will result in roughly a 725 billion change in total value when I do the math 10s mined and known x pounds per tonne X ounces, blah, blah, I get a number around 13 trillion of value. This is not nearly enough to backup 100 T Zim note with dollars if there are many 1000s of original and legal Zim bonds in circulation ready for redemption. How is it remotely possible for them to be backed by gold?

R

Ron Giles 24:44

Well, that's more like a rant.

T

Tracee 24:48

Well, no, they just aren't aware of how much gold there is. That's

R

Ron Giles 24:53

what I was. That's what I'm saying. They're not listening to what we're trying to say you take a yodel. Lilian that is three plus 24 zeros. Now that's a lot of money. And if you're cashing it in, if that's yours, is that your Zim bond, and you're cashing that in and getting funds for it, it goes

that's yours, is that your 2000 bond, and you're cashing that in and getting funds for it, it goes into the quantum financial system. Quantum financial system has been designed by God. If you don't believe that, then that's okay. You can believe what you want. God does not give limits. He has no limit. You don't think he can make gold out of thin air or out of lead. Saint Germain spent years and years of his life two lives full of he's an alchemist, he was changing lead to gold during that period of time, how many of your sources know where his gold is? How many of your sources know how much gold the alliance has, or the the Chinese elders. When you want to take cabal garbage, and recreate that as as real, then you can do all the math you want. And we'll be getting our funds at the redemption appointment. And we will be going out there and using those gold back currencies. The financial system will go all over the galaxy. And however many times you want to ask God, if there's enough gold in the quantum financial system to accommodate the redemption of all of these large 100 Yodalillion bonds, which there are 1000s of if you don't think there's enough gold for that, then you plan your life differently than the way that I'm planning my life. Because I know it's true. I know that there's enough gold there and there. It's like a library system. With the gold start said the the serial numbers start down there at one or wherever it is. And they go right through the library in ascending order. When they get to the end, you can take your gold and put it in in kilos, packages or blocks of kilos of gold and put a serial number on it. That's just the same as signing up from then on out. And then there will be gold certificates that are assigned to those kilos. Where are we going to end? You really think you know how much gold there is? Do you really think anybody on this earth knows all the gold? They pretend they do. And I pretend that they do is me. I don't pretend that they do. Because I know differently. Now, girls are starting at \$12 for 118. Now, if you believe in girls, there you go. Make your 1200 and run their 12 million and run with it. But don't ask those guys where they're getting the funds to do that. And don't ask those people why they would redeem a bond that has been out of business and out of circulation for how many years? Who is going to give a bond that is use of money for a bomb that is useless. There are so many contradictions in all of the garbage that you listen from the Cabal if you will just take your mind off of their stupid reality and find out for yourself. I don't take anybody's idea of how much gold we have here because they don't know. They're third dimension characters and they only use their mind they don't use their heart. They don't come from love. Those people are just cabal type. Androids or whatever you want to call them. I don't care what you call they're not people With brains, they're just excuse me there are people just with brains in the heart. How's that work? I don't know, I don't care. So we just go on with what we're doing. I don't have to concern myself with those people. I know because I talk to the audience. So I ask the right questions, and I get the right answers. And if I don't ask the right question and get it the right way, then they say what you need to work on that a little bit. And come back and figure it out. Again, to figure it out again, and come back. Let's talk some more. If you want that kind of life, then then it's, it's different than the one that you've been living. I'm not pulling myself up as a as an example. I'm just telling you that that's what's available for you said, Come follow me and do things that I've done and greater things Sherry, you do? How many of those guys that are telling you how much gold there is? walk on water? How many of those guys can heal people? Were working in a different whole new different life? Maybe it's a different timeline? I don't know. Let's see. Next question.

T

Tracee 31:24

After an employer who is a business owner who sells a product is signed up to an employer contract by a director, can you please explain the steps needed to be taken to bring the prices down to 1960s Prices of said product from the prices he asked for in the old system?

R

Ron Giles 31:45

I can't tell you that, because I don't believe that's going to happen. I've not been told about it. I've not been I've heard from times when back in 2000, when they were starting to talk about NESARA, that things would change. But I don't believe it. Why? Look at the price of gold. You want to go back and gold prices, then? No, we've got the money. We don't need to go back. The people who don't have the money. Each person will be getting \$28,000. If they're a married couple, they get \$56,000. And if they get a contract on an employment contract, and make another dollar an hour, or dollar a minute per download, that's up into the five hundreds per year, divide that by 50. To see what you get, or 20, whatever it is 12 There is so much money that's coming that everybody can can get the money and there's no reason to lower prices. Now, by the way, I'd like to talk to the people who think that this is going to happen because as far as loved one society is concerned, that will not happen. We sell our products, we sell the things that we buy, we buy all that you can make. And we sell it all through the distribution system and chains of of systems, we will be selling it at the price that we feel is appropriate. Maybe it'll go down 10 cent 10% a year, for every car that is made, why we're putting money out to do that. And it snowed, there's no return on our money. We just have to put it out there. Bye think the idea of going back to 9060 with prices is ludicrous. And whoever continues to promote that doesn't understand what's taking place. That's my idea. I've developed love one society in the sense that I come up with the ideas and I get it from the alliance. And that's why I said that I get the downloads from the Alliance on the way it's supposed to be. And if I haven't got it right then I have to go back and and go through Plan B C, D E or whatever it takes to get it right. That's why it took six or seven years. But what we have is the workable source comes from from the alliance is the workable and functional tool that we're going to need for loved ones society to be successful. If you understand love one society You'd never asked me a question like that because if you did the math, you would see if you really understood what the economic stabilization system is, and the International commodity clearing houses, which is not only for this search as for the galaxy as well. If you really understand these things, you will see how ludicrous it is. I'm not pretending I know what God's doing. We're a part of it. Next question please.

T

Tracee 35:35

Okay, I am considering setting up a second CAC in my home farming area. I plan to offer the RSS to the people and BOCA and ECS to businesses in town I don't wish to muddy the water with LWS as farm program, but afraid it will come much later. For the farmers then the town people affluence. I would like to offer BOCA farmers and ease sees to their employees because the pre purchase contracts with LWI be late linked in later. I feel like we covered this recently. And you said yes. Right?

R

Ron Giles 36:14

Well, the idea is you're going to sign up in order to start giving contracts to people who were buying everything that they can produce, you have to be a part of loved ones, industries, it's a contractual basis. If people start doing that, then their other contracts are doing it themselves. Then other contracts, they may be having some problems, and it's going to be part of our contract. You don't be giving contracts, where you buy everything that they produce. Unless you are associated with loved one industries, it will destroy the whole system. If we have

35,000 people out there doing anything that they Dang, well, please notice I didn't swear, dang, well, please, the prices, and there's no control on a central source. People have said, that is ludicrous. How can one or two people be the ones in charge of we're going to be in charge of loved one society, we're going to buy things from people, and we will determine the price. God has given us the money to do that, because he knows we will be in service to mankind. Of those people who don't believe in that, then you're having some problems beyond what I'm interested in dealing with. See, I know what we're going to do I really do. The economic stabilization system is designed for us to buy everything that that farmer produces. And we put it through the same distribution systems that he's already they have already established. Just the difference in the price. And we can call that Christ. And the more people that qualify and become contracted contractors and the loved one industries, the greater success we'll have. And the sooner we will have those successes. I'm not here to just do the Golden Age, I'm here to change the entire world or galaxies, economic system where every individual gets to be financially what's the right word, you get to be fully financial in everything that you want to do. If you want to be part of the economy, you will and you can be and you will be financially viable economic stabilization system economic stabilization system. If it's done properly, it will take the prices and all of the inflation and all of the garbage that has happened to us in the past. And we just move on into the golden age of mankind. I just, you know what, how can I tell you that and you not believe it? How can you I tell you and you do believe it? I don't know. It's got to come from the Spirit testifying into your mind and into your heart that the things that I'm saying are true. And if it doesn't, then you're not part of our group. Isn't that interesting? Next question,

T Tracee 39:56

but the solution would be Correct me if I'm wrong, but you can put them on the RSS and they can make plenty of money with RSS while we're waiting for loved one industries in the contracts to be rolled out. Yeah.

R Ron Giles 40:11

Yes, getting back to do a CAC, that's where it belongs in farming communities as well. Directors can help farmers as part of the ESS program.

T Tracee 40:24

Yeah, that's what the question started. She wants to do a second CAC in her home farming area. So okay, cool. All right. You ready? We have three, two or three more. The poor, the the military and third world countries maimed as a result of terrorism? Can I use the ESS to control prices of food and essentials household products to wreck record? Low and also deploy med beds to regrow limbs of military personal personnel made from terrorist attacks?

R Ron Giles 41:00

Well, yes, if you if that's what yeah, if you want to do that, yes, that's, that's what humanitarians will be doing. And, you know, guaranteeing prices and so forth, unless we have control over it we can't guarantee prices, but we can share by orphans and give it away. If

control over it, we can't guarantee prices, but we can share by orphans, and give it away. That's what is necessary for the survival of a community, or even an area or even a country. The the ability that loved one society will have moving products around the world will be magnificent. We'll get to the right people, they'll get to the right people and get them. And if and we charge very little for it. So you know, I don't know what prices how you're going to figure it out. I haven't gotten any directions from that. But let's keep in mind that we each of us, once we go through the once we get our appointment and go through really the redemption process, we will have a counselor that will help us with all of these kinds of things. Now, do you think that counselor does not have the ability to tap into the knowledge of everything that exists? They do have that so does your heart so we don't have to be walking around Lane brain. Unless we're trying to use our brain over our heart. We're going to be in good shape. I love your ideas. I love your your heart for doing wanting to do those sorts of things. seek and find the best way to do that. And let's get about father's business. Next question.

T

Tracee 42:50

This is one we talked about earlier. I am confused between Zimbabwe notes and Zimbabwe bonds. I was looking at eBay and they're selling 100 T notes. UV tested uncirculated. Do the Zimbabwe notes qualify for redemption or does it have to be the Zimbabwe bonds?

R

Ron Giles 43:10

Okay, I'd like you to in opening this up. I'd like you to under understand that this question has been answered very thoroughly in qf s 20 twenty.com. I'm going to explain it now. The Zim bonds, the Zim notes and people are selling them for \$200 \$300 apiece for a one letter T Notes. Those are bonds from a country that has went bankrupt. Those bonds are useless. They used to be money. They used to buy you a bus ticket across town. When they started you had to have a backpack full of those 100 T notes to get your bus ticket best out of town and all you need is a few quarters or something if you had US dollars, or gym, or excuse me, or the South African rand or the Chinese yuan. Their currency couldn't compete, because it didn't. It was a fraudulent experience in the very beginning. Why do you what you take 100 trillion make 100 and trillion dollar note while you're trying to kid. Zimbabwe's economy didn't even have a zillion or a billion dollar Excuse me? A trillion dollars and yet alone 100 trillion and that's just for one No. Those are the things that you're looking at out there use useless, all of them except that the alliance will redeem them for you for as a humanitarian. You It doesn't matter where the 2008 bonds, it doesn't matter if they're the double A bonds, it doesn't matter if they have been counterfeited. What do you think the gold bonds from China and silver bonds from anybody else? And I got some of those and they had that also the authentic. This is authentic. It's a gold little, little gold thing. And it's authentic, but fantasizes fake stuff as being real. It's real estate stuff. That's all that is. If you take it to the alliance, and you're humanitarian, you can ask for whatever you want to redeem that. That is the magic. Okay, you go ask them well, I've got these, these 2008 we're not we're not doing 2009 No, we're not doing no, you You take everything you've got all of your your dong your your dinars, everything with you. And you ask, and they'll ask you, what do you want for this? Well, this is my the rate is I'm asking for for the Zim is this and I'm asking for the biggest rate that you'll give me and redemption of the Dong and the dinar. So, they Alliance has said to us, they will redeem the bonds, regardless. So we came up with the idea of fkr safekeeping receipts, those SK ours is just as good as the bonds that support them, because I have them right here in my home. Right over here. I can look at him right now. And we've got some other donations in to where what we had before and

thought was, what we had before and thought was sufficient was so far above sufficient that we're thinking we can go ahead and do some more. And we will. But we'll do it when the client says it's a good time. We have the bonds, the SK ours are good. The SK ours will be redeemed by the Alliance, they said that to us. That's the way that we get Zim bonds over into Laos, legit, Nigeria can get them there by any other source, unless you want to pay 300 200 100 to \$200, to to FedEx or DHL or whatever. And that's just too expensive. We can't do that. So the SK RS came up, and now everybody in the world who wants to be a zoom benefit benefactor who wants to be a managing director and the RSS program can have the bonds and it's 180 million which is 3 million zeros for each 1 million Can you imagine what that's going to do to the world? It can you imagine what's gonna do to that person over there that didn't couldn't get bonds and was just distraught because his whole life plan and the the people that he's doing his pour his heart out to to teach the children and and then run the orphanage has. Now he has hope she has hope that they couldn't have before. That's the magic when you're doing things with the Alliance. And so if people don't want to believe that Ron Giles and loved one society is being directed by the Alliance, I don't know what proof you need. I just say that this is the way it is. If you don't like it, then don't do it. Don't be a part of it. But I know it's gonna work. And there's been 1000s of us that do the bonds. Yeah. The notes. Yeah. Take them over there. As Alliance said they will do them all. That's what's in the literature. Next question.

T

Tracee 49:30

That is it.

R

Ron Giles 49:32

That was it. Okay. Did we finish in time? Are there? Yes. Good. Thank you, Tracee, for all your help. And thank you everybody for the questions, a few new ones and yet we had a chance to do some other things with it. So I send my blessings and love to all of those who are a part of our loved ones society team and Been meaning all of us that are working towards the redemption and and becoming humanitarians. And so we'll call it for now and when we have enough sufficient questions to do another one, we'll do it. Okay. Thank you. Bye bye for now. Bye
