Q and A - Feb 22nd

SUMMARY KEYWORDS

humanitarian, question, money, projects, beneficiary, trust, alliance, people, zim, person, redemption, appointment, funds, agent, put, problems, rss, account, pay, commodity

SPEAKERS

Ron Giles, Tracee

Hello humanitarians. This is Ron Giles. I'm here with Tracee and we're going to have another q&a this morning. So, with that, Tracee, let's go ahead, let's see today's February two two two, a whole bunch of twos on this Tuesday. And they're supposed to be some really fantastic energies coming through with this. So we'll just receive them as, as they come. So that's, that's a blessing for us. So with that, Tracee, let's go ahead and begin them.

Tracee 00:33

My hypothetical questions are in regards to the downloads to a trust to a minor who becomes an adult, as a beneficiary, I can have a total of six trusts, one of the trustees for a minor of 17 years old who turns 18. Soon, what happens once the trust beneficiary turns a team? Does he now become a qualified adult beneficiary and receive the 10 cent per minute download with all of the referral benefits that go along with the adult beneficiary status?

Ron Giles 01:05

Okay, that's it, that's a real good question, we'll answer that person, you as the person who set up the trust and put the words in your document that once the child to a minor trust a trust for one of your minor children, and that a team then that person is released, that child is released to do their own beneficiary accounts, including the six trust that they want to the trust is not and it continues on, and you as the one that trustor, one who put it together will continue to hit the funds. We don't you set up a trust or we don't care what it's for. So when you set up a trust for a minor child, or, or anybody else, use the verbiage in the in the actual trust documents to indicate that once a child has reached the age of 18, then he can have his own and you continue on with the the funds, and you are the trustee and so on, so forth. So it's it's gonna work out just fine. For a year, you know, it looks like it'll be a year, one of the things is to pay for the expenses of the child, and then turn over a nest egg of money when they turn 18. They

have to be 21 to buy a house, but this is an opportunity for them to get schooling or whatever else is needed. And then they could start out life in a in a nice way. So does that answer the rest of the questions?

Tracee 02:53

Um, no. So the rest says, and then I want to talk about this with you. So then it says, does the 18 year old now have to register pay as \$10? In order to become a qualified beneficiary? What happens to the trust? Does it continue to receive the 10 cent per minute download? Or does the 10 cent per minute download transferred to the 18 year old?

Ron Giles 03:15

No, it does not transfer to the 18 year old who set it up for you the trust at 18, then he gets the whole posse the possibility of becoming a beneficiary and, and he can do the trust and he's he can go out and start getting other people involved and start getting the bonuses and so forth. So it all depends on his nature or her nature and see how they do. But that does not transfer to them because you are the trustee and the grantor of the trust. So you put in the verbiage for you to continue on and then at 18 He gets his own beneficiary account. So that helps.

Tracee 04:04

So my question is the original beneficiary with a six trust now that they're minor turns 18. Now they only have five trust? Can they go ahead and open up another so that they have six again, but just have it be for another purpose?

Ron Giles 04:21

No, because the trust is still active. So they don't need to do another one there. There. See, that's why I say you put in the what you want in the corpus, the the document itself on how you want it to work out. Now, keep in mind that you don't register you don't have to register a trust. The only thing that you have to do is for this case would be to create a website or QFS account to receive the funds and you are in charge of those. So it In effect, what you use a trust for is your business and how the money is given to a minor child and so forth. But when they turn 18, it's your trust. And you haven't given it away the beneficiary changes at 18. And now you are the beneficiary.

Tracee 05:19

Okay? But they can also keep the beneficiary as the minor child if they choose, right? I mean,

Ron Giles 05:28

Well, they're in charge of the money. And if they change the beneficiary, then they just change

the beneficiary. Okay. But the, the point that I'm trying to say is that you are in charge of the trust, use the words to in the trust, to determine exactly what you want. So at age 80, the beneficiary is on his or her own, its own, whatever. And, and you continue to receive the funds, you are also in charge of the funds and for the mother child. So you're doing things for the child, and they came, then you do whatever you want with the funds, because it's your trust, one of your six. Okay, that means we don't care what you do with it. We don't care what you do with your money. Okay, next question.

Tracee 06:26

Is it wise to start buying properties now and want to buy some farmland for future farming or some land for building houses for the NRELS program?

Ron Giles 06:37

If you got the money, then do what you feel it you'd like to do. There's no problems as far as love won society is concerned for the RSS program, or the NRELS program. If you've got the funds to do whatever your it's, it's your life to what you'd need to do or would like to do, when the funds come that you can implement all of the programs as best you can. So that helps. Next question.

Tracee 07:07

Motherload account is said to have no debit card, can a motherload account, can mother loads account only be transferred, I guess the funds in the mother lode account can only be transferred.

Ron Giles 07:23

Yes. Now see, I put there that I didn't want a debit card for the master load account. Now you've all of a sudden said, they have no debit. If you want a debit card for your mass load account, then you can go ahead, but I don't want one. I don't want a card for that account. If I want to use money, I transfer it to the account that I'm going to be using for that sort of thing. So I put something down there and then all of a sudden, it's in ink, and somebody says this is the way it has to be. That's not true. If you want a debit card for your mother lode account, that's up to you, you're in charge, it's your account. That's the only reason I I don't want a card to have any problems with my mother alone account. Because I'm not going to use a card for the account. I'll transfer money into another account that I'm going to use to spend money. So can mother loads account only be transferred? I'm not sure what that question means. But when you have an account, you are in charge of that account. Okay, I'm getting in. Is it a debit card? Or is it a transfer only account? It's it's for me, it's a transfer only account. I'm not going to use the debit card, you can do the way you want to set it up. Just my preference. Next question.

Tracee 08:58

What is the signal and RA? Whoa, I think? Well, I think this signal is that app that everybody's saying that when the internet goes down, if it goes down, that signal will still be up. So it's communicating and we have a signal room that I started for you and you can find the link to in the important links document that I've said numerous times. And RA i have no idea what's RA, no clue.

Ron Giles 09:36

All right. Okay, well, we gave it a shot. Yeah, okay. Next Sorry. Go ahead. That's okay. Next question.

Tracee 09:48

I noted that your trainings and advice are mostly for the US residents and citizens. So could you explain what I can do or which part of procedures and ideas presented by you I can use in the UK, I have the trillion dollars in bonds. And I want to prepare a medical and scientific humanitarian program in Poland where I was born. I also want to cash a few trillion dollars in bonds within the structured payout program. I appreciate your prompt advice.

Ron Giles 10:20

The structured all of your Zim bonds are going into the structured payout, it's not an option. And the reason for that is because in the structured payout, it doesn't matter how long you want your term, if it's 100 years, or if it's 10 years, then the structured if it's more than 10 years, a structured payout, will will keep paying you for that period of time. So all Zim bonds, they any bonds, that are redeemed go into the quantum financial system, or into the structured payout system. So you don't have it's not an option. It's just, that's just the way it is. Now, I'm a resident of the United States. And so this is what I know. If I go over to United Kingdom, they have different ways of doing things. Okay, so if I'm going to set up business in the United Kingdom, I need to know what they're doing there and how they do it, especially when it relates to the national real estate listing service. So every country might have and every state might have their separate ways of selling real estate and accounting for it through the recording system that they have set up so that there's always a person of record who owns that property. You know, we get rid of the the Cabal, we really will own the property, and you don't have to pay taxes on it, which is just a rent, that you're paying to use that property because they own it still, all of this goes away. So we don't have to do that kind of stuff anymore. But there's different ways of transferring titles to property and things of this nature. So I don't know what's going on over there. If you want to go to Poland, you find out what you need to do there in the United Kingdom, find out how to apply or implement these programs in that location. And I can't do that for you. You have to do it, in order for you to function in that country. So just because I put things here in America, doesn't mean that you can't do the things that you need to do to set up in the United Kingdom. But it is your responsibility to do it. Not mine, I can't do it for you. You're the stewards. This is your stewardship. You don't give that responsibility to somebody, you can get help if you want. But it's necessary for you to be the person the prime mover in getting things done. You are the humanitarian you are this sovereign. And it's your stewardship. So I'm not going to get involved in here's the structure, use it in the best way that

you can. And then you're free to do that. That's obviously what's the case. You'll you'll do well think it through and make the adjustments as necessary for your own purposes. And then proceed for next question, please.

Tracee 13:58

I have been watching all the videos you have been sending me and I find them easy to understand and simple. I came, thank God. I came across a website called the seeds of wisdom. And I was overwhelmed by all the information. They said you needed to redeem your currency. After going through some of the information on that website. Now I don't think I would be prepared to humanitarian projects. They said you would be assigned a team and you would have to have things approved by this team. I'm so confused all the forms and things you need to present your projects. I'm so looking forward to the RSS program, but now feel as though I will not be prepared in time. Can you please comment on my concerns?

Ron Giles 14:36

Yes, I would love to comment on your concerns. When you start reading these other places that start telling you what to do. I'd like you to go to love her QFS 2020 and see what it says there. I've given you the Alliance way of redeeming bonds. If you want to go someplace else and get their information and get yourself all confused and get your panties in an uproar. That's your choice. But I'm saying to you, if you go outside of the way that we have done it, you're going out or presented it, then you're going outside of the way that the alliance has planned for the redemption to take place. If you go outside of that you're on your own. So if you want to go to the seeds of wisdom, be sure that that from the alliance and if it is not disregard, and I'm telling you now, they are not from the Alliance. Because if you've got a whole bunch of garbage that you've got, and all these different loops, and, and teams and websites and all of that garbage, then they have overstepped their boundaries and have taken over your domain, you personally. And that is, is against the universal laws. They do not know what they are doing when they say that you have to do all of these things, to get your funds for your humanitarian work. I want to let that sink in. So if you go outside of our love won society, and the QFS 2020, and read their things, and the way that they want you to do things, I can't help you. I can only say if it's not the way that the alliance has set it up, then go for it. If you don't want, if you don't like what we're doing, then go over there and do their thing. And then see how it works for you. I'm in I'm in contact with the Alliance. Does this do these seeds of wisdom people tell you about the Alliance agent? Who will be coming from the nonphysical to help you that a good question and ask you and ask of them. We've got a package deal. All of the things have been taken care of from the Alliance. You go outside of it and you're on your own. So please don't go over there and then come here and being confused and all upset. I just say don't listen to those people. There go rose. They want to be they could even be cabal shields. We don't know. You don't know. You don't know because you've asked me about it. I'm saying it's very easy. Go to the website, our website and see how the Alliance wants you to redeem. And if it's not that way, then disregard their input because it's not true. It's not accurate. And you will just be confused. Enough said. Next question.

Tracee 18:26

Will been as in benefactor give us an advantage to access a med bed to ensure we are healthy

and strong enough to complete the work we have chosen to do. I am mentally healthy and strong but I have physical limitations from broken bones, age related weaknesses etc. that I would find challenging considering the endurance it will take to do the work I want to do as a benefactor and let me say something with this. Okay. I remember a video and I don't know if you saw or sky said that our redemption appointment, we will be offered the opportunity to sign up for a med bed appointment. Did you see that?

- R Ron Giles 19:09
- Tracee 19:11
 She said it's because they know that we need to be at the top of our game and be very healthy in order to do our projects.
- R Ron Giles 19:22 With that said. I inqu

With that said. I inquired about this and they said there is no priority for a humanitarian. What does that mean? That means that you don't get a priority because you are humanitarian. The priority is if you're going to live or die. If you take if you think that humanitarians are going to be in a position to get that over somebody else who's going to die if they don't. What does that accomplish? Now, I'm going to say it here now. And if this is the first time you've heard it, then that's first time. There are other things afoot. Beyond and beside whatever you want to, say, med beds. The technology that we're getting is new, and it's not from another planet. This is what's happening for us. Now, as a result of us being in the dispensation of the fullness of times, things are changing, and have changed and will continue to change. The new technology is coming from the Divine Presence of God. How that happens, I don't know. But it may be that when that event or that blast of light or whatever takes place, we will have our bodies renewed, and we don't need that bit. That's the latest that I have received. And I had somebody from skies, who was a moderator on Skye's website, or channel, Telegram channel. And she told me that she basically said he's a humanitarian, but he shouldn't talk about med beds and say things that he doesn't know about. Well, I respectfully say that I only know what the Alliance tells me. If I asked the right questions, I get the right answers. And when I inquire about med beds, all of them listen to that word. All of them have distortions, and problems. All of them. Even the celestial chambers, which I thought was the better of all of it. There are new things afoot that will come our way. We are blessed, we are loved, we are going to get everything we need. And it may be that you don't have to have a priority because it happens to everybody at the same time. Let's just kind of wait around and see how that happens. Like I'm all for that. Okay. So let's let that be true in your life, and then move forward. Next question.

Tracee 22:41

I'm in the process of developing my own training material for directors and assistants. One question I'm not clear on is the ability to adjust the permanent downloads for employment contracts. In such in much of the Benefactor training, I see a range of 25 cents per minute up to

\$2 per minute download for employment contracts, will this be a floor and a ceiling that is established in the back office of the RSS are these numbers just use as an example, if a business owner wants to pay less than 25 cents, or more than \$2? Is that something we can adjust in the back office of the RSS?

Ron Giles 23:18

These are just suggestions. There, there are a range of suggestions. If you want to pay your person, a million dollars a month to work for you or to do your your be in charge, whatever of your activity. There's no problem with that at all. Just adjust the down vote for what you want to do. It's your money. It's your freedom to do what you want to do with the people that you're working with. I say being liberal. I've said 25 cents per minute that you get a kid out of high school who wants to be mechanic? Are you going to pay him \$2,500 A week to be a mechanic? Why would you do that? Why would the business owner think that's appropriate when he's got skilled labor that's there and they've been with him for years and years. And they're on 25% 25 cents per download as a contract person. There's all kinds of ways and opportunity to do the things that you want to do that are appropriate to your money. When I put down these suggestions to dollar attention just came out of all the free one paint through dollars now and then go in. You look at farmers and places like that. You know, there's all kinds of things that you can do with them. They have an 11 year old kid that drives the tractor. Okay, well, he's worth quite a bit of money to do that. So farmer can pay his son or could be a daughter, his daughter, whatever he feels he'd like to do And, you know, girl can drive the tractors as good as a kid. So you have the flexibility, it's in there. So don't tie yourself down to a, we're only giving recommendations or I can say it recommended policy. But you are the final go to person, what you say goes, nothing that I've read here except for the structure has to be followed. And even at the that the CAC and so forth, are always at your whim, you can do what you want to do. It's just a structure that you can use to enhance your humanitarian activities. So make your own choices and adjust as necessary. And then everybody gets to be really happy. Next question.

Tracee 26:03

I hold and possess Zim. I have my humanitarian project ready. I have also been in tact with Charlie Ward about my Zim. I think that's the wrong word. I remember watching the video. Oh, been in contact? Okay. I remember watching a video almost a year ago with the both of you talking about NESARA and humanitarian projects? Do you work together? Or are you separate entities?

Ron Giles 26:32

Charlie has his thing. We, we talk, I don't talk to him much anymore. We've had a somewhat of a falling out. Charles is good person. And he's doing a great job for his people. If you want to listen to him, then go ahead. I have a whole different plan. Because I contact the Alliance, I feel that we're on a better track. If you think that putting your money with your gym with Charlie is a good thing, then you're going to get what Charlie? thinks about the Zim. And it's one or two cents on the dollar. I don't know what his plans are? I don't know. But I do know that the alliance is the one with the money and it's not delegated to anybody else to control. Period.

What do you have the redemption appointment, then the money is put in your QFS account and the quantum financial system. It's on a structured payout, you're going to have assigned a personal counselor from the non physical, from the angelic realms where whoever or whatever that is. We don't know yet. And so let's just compare notes here. Which one would you rather have? Would you rather have the process of going through your redemption and have an angel helping you and assigned to you from then on. If you do not go to the redemption appointment that is set up by the Alliance, you will have none of that period. The Alliance will not allow numbers or anything of this nature, or anybody between you. And the redemption agent who is an agent of the Alliance. Nobody gets in between you and your money. And if there's somebody placed in there, and they think that they're going to help you get money and do projects, I say good luck. We're dealing with people who are humanitarians. Yes, but they're the ones that are fully in charge of their projects. And have nothing to do with anybody else as far as managing or saying that you can do this or valuating your project. There's a whole difference thing out there. So if you want to go with Charlie, fine. If you want to go with Simon or any of the other people, fine, that's your choice. But if you want to go with what the alliance is set up for us, then you go through the process that we have here, and are talking about with love won society. Next question.

Tracee 29:38

I just wonder how the alliance will know I have a project ready to go and when I receive the email to make appointments, I get confused to the language of blackout. Now that seems to be media. I'm a person that is still finding work that does not require the Wii and masks. It's been difficult in Minnesota. I'm a former teacher that cannot work in this environment. I pray and Asara come soon in the US I put my faith in God to help me through these financially turbulent times. Oh, there's no question. I appreciate you either way, I'm ready with my projects months ago. Okay. Next question, can I do all my academic projects with universities through LWS.

Ron Giles 30:28

If that's what you want to do, you'll sound the alarm charge, go for it, it's up to you, you're the one, it's your money. That's where you want to spend it. And that's fine. And I have no opinions about that. I would just be very, very careful with the academics in the universities that have been under the control or influence of the Communist Chinese party. And you can't go to university now that is not engaged in that. In my opinion, Hillsdale College, back east is one of the only ones that I'm aware of that has not been infiltrated to the point that you have to be careful about what they're teaching. Now, this is not to say that everybody who's doing research and that sort of thing, are complicit in that, I just say, you'd have to be very careful. I will check it out first, before very carefully, I will bet the university I live here in in Utah, if I want to do some work with the University of Utah, I'm going to bet I got my degree from them. But they have changed over the years. And I'm not going to pull up with any of the Chinese Communist dogma, or thoughts. And support that with my money won't do it. Don't be careful. And yet, be wise in what you do, and follow your heart. Now, in addition to all of this, and it always comes back to this, you will have a counselor who's been given to you specifically to help you in your humanitarian activities. That is your greatest resource. That is your boots on the ground help. That's the the person who can go up to the top of the hill and put his hands

over his eyes and say, looking out over the land and say, oh, there's there, I can see where we're going. There's this there's this. That's what the kind of help that you're going to get. It's different, it's unusual. We're not used to this sort of thing, but it's there. So next question.

Tracee 33:01

I noticed that the definition for beneficiaries trust account includes a \$50 bonus for each Trust, which was never mentioned in the RSS program before I went over your RSS video again, and this \$50 bonus was not mentioned in it. Would you please clarify? I attach the definition below for your reference, which I guess I don't have. So anyway. Okay. So I do agree that with this discrepancy, because I don't remember ever hearing about a \$50 bonus for a trust either

- R Ron Giles 33:37
 Well, the the trust is is a you can sign up and trust.
- Tracee 33:43
 No, I think this was your own.
- Ron Giles 33:45

It's your own trust. I'm just trying to think it through. Okay. And I, I have felt like you pay the \$10 for the trust, you get a \$50 bonus, thank you bonus for creating another trust. Now is that appropriate? I have no problems with it. And I think you know, six, seven, there's \$300. But your account, put it in your pocket. So do I want to take that away? Or will I want to take that away as a policy for love won society? I don't know. I don't think I do. I think the \$50 bonus is a good thing to do. It does not count for any other bonuses though. When I say that the it doesn't count as one person in one in the registration bonus where you get to earn one penny for every two people that you're registered. It doesn't qualify for that. And you can't create a a another trust from a trust. And so there's there's some parameters around there that are safekeeping and make it make it a good deal, and not be too outlandish. But I feel \$50 is probably something I'd like to keep and give them as a trust. Maybe they're offset some of the funds that they need to have somebody help them with setting up the trust. At any rate, as far as it is right now, I think that the \$50 bonus and is appropriate, thank you bonuses is appropriate. Where I have all of the details of everything in line, then I will follow that, but I'm not perfect in that regard. So it has not, perhaps has not been put in there and you say it's not in there, then that's it's not in there. But that's what I'm inclined to do as far as the platform is concerned. Next question.

Tracee 35:57

Do we make vaccinated people, beneficiaries and directors, as worry, they won't be here to carry on the work? Also, do we need to buy commodities like gold silver crystals for fixing spaceships in the future?

Ron Giles 36:17

It's an interesting question. I don't have an answer for that. Except for the fact that I would not treat vaccinated or unvaccinated differently. We're getting into the med beds and the concepts of the med beds and some other perhaps thing that's a foot that will change things around. And so I'm not gonna concern myself with that at all. I have two sons in the military both have have the jab. So I want them to be okay. And so far they are. As far as buying gold and silver, I wouldn't buy gold wouldn't buy silver. I would buy crystals, what do you need them for? Is there enough gold? I mean, can you buy 1.25 quintillion dollars worth of gold? And say, Oh, that's a good purchase. You have no need for gold in the future. There are those who will, and those who need it. And there's the industries and commodity that buy and sell commodities that is part of their business. But I would not do something to hedge against inflation or any of those other things. Because I know it's coming for us. And we don't need gold. Why would you need gold when you've got gold backed currencies? Gold is a commodity. Right now it's pumped up, the price of gold is pumped up really high as result of people wanting gold as money. And they think that's a hedge against inflation, which it is that all goes down the drain because the gold will now become subject to the supply and demand. Because it's not going to be used this way, because you have gold back currencies. And so the price of gold will probably go down to where it's it's the price that people paid in the US gold in their jewelry or wherever they're there. As a commodity, it's a commodity, subject to the supply and demand. Price is probably subject to supply and demand, which all come of commodities are. So I don't see any wisdom percent perhaps, if there's crystals and things like that for fixing spaceships. I wouldn't even go there because I have no idea that spaceships need to be fixed. Especially the ones that we built. That's a thought in. Okay, next question.

Tracee 39:22

It says in several forums that we will only get five to seven minutes to go over our bullet points is that per each project or for all of our projects combined.

Ron Giles 39:35

Whoever said that is only projecting the point that they're trying to say and I agree with this. Your agent is not going to want to go through all of your details. The person who is sitting across from you at that appointment has been assigned to you for perhaps the beginning. of your life, with this whole situation with the redemption plans and so forth, already in place, because they knew it was coming, the individual knows who you are, your agent will know who you are, know everything about you are you going to labor with them so that you can tell them all the things that you want to tell them about your projects, they already know your projects. But you have to voice them, that's your responsibility. And so you just tell them an a short little, five to seven minutes, is your time to tell them about that. But don't belabor it, don't tell all the details, you don't even figure out the details, because they don't care. They just want to know that you are engaged in it in your mind and in your heart. And that's where they're they're ascertain your value as a humanitarian to your heart, your projects will come and go, you're going to do a project, it's going to last you maybe a year or two years, maybe sustain it for longer, then you move on to something different. I know that if we don't know that, then we need to understand it. The projects are their funding you not your projects. So don't put all of

your value in a project and think that they're going to determine your value by the projects that you're going to do. Is there somebody who's not going to build houses for the homeless, will be fighting over homeless people to put into the houses that we build. There's 10,000 11,000 of us has seen benefactors, if they're all becomes in benefactors, then in all over the world, you're gonna be fighting over there, that the homeless will be taken care of. And then you put them on the RSS program. They're not poor. They're going to be wealthy people. It all depends on the individuals help the individual in the way that you can let them make their choices in life. That's the way I perceive our projects. You have to think them through Yes. Once you've thought them through, they have installed what's going on, your agent will know what's going on. So if you want to bore them to death by going into 1520 minute or 30 minute dissertation on your projects, it's going to be a problem for you. It's not a problem is just not necessary. So five to seven minutes is probably a good guideline. And get all of your bullet points put together in seven to 10 minutes or five, seven minutes. Next question.

Tracee 43:19

Well, plus the quantum consciousness already knows. Right? One of my friends sent me my friend Karen, you know, I talked about her. He sent me a thing that somebody is offering to write up your humanitarian project, blah, blah. She's like, do I need to do this? And I said, No. She's like, Do you know her? And I said, don't know her but not necessary. The Alliance already knows your heart, the paper doesn't really matter.

Ron Giles 43:52

Well, the paper the person who's doing this, and I know the source. That's their business. They think they know everything about the quantum financial system. They think they know everything about how it's going to happen. And they're preparing you for your redemption appointment. That I say they don't know what the hell they're talking about. Yeah, they're trying to get in between you. I mean, I'm doing training, yes, but I'm not the one that's going to be sitting in front of you. And you are and you're giving your bullet points to it is so totally unnecessary, and is a source of income for that particular person. And I I don't like that whole concept. They're trying to make money off the process. It's not appropriate

Tracee 44:58

when you speak of the NRELS you have said that the selling broker gets a cash payout when she sells it, I am sorry, but the word cash has confused me. And I've listened to almost every recording I have not found it talked about differently. So when you say cash in this context, you actually mean a bonus monetary download?

Ron Giles 45:19

No, a real estate agent goes out and acts as the selling agent. You have a listing agent and you have a selling agent. As a broker, in the NRELS, you're going out and you're going to buy a house. That house is usually already listed in some other location through a listing service. And they have a commission structure. And you as the selling agent, receive that selling

commission that is cash. Now, the listing house, that house has now come into the NRELS, it goes through its revamping, and reconditioning or whatever, and brought up to a standard. And then all of that in the funds and so forth, go on top of the to fix it up, go on top of the purchase price, then we sell it at a 20% discount. When the agent sells that property through the NRELS, they do not get commissions or cash, they get download increases. And it's permanent. Good idea to be a real estate agent for the NRELS. You're going to be millionaires, if you do it properly. Do I have a problem with that? No. How many people are you putting into a house that have never had a house before? That's the purpose of the whole thing. And it will be paid out like I had put there in that thing. So when I say cash, would you buy a house from a listing service, a listing agent, then the selling agent gets the commission and that is cash. That's the way the normal function of real estate and their commissions happen. So that's not a big problem. I'm just trying to explain that they get cash on one on the purchase of the house. And when they sell it, they get a commission for download increase. Oh, hopefully that helps. Next question.

Tracee 47:56

Thank you for all the tremendous work you are doing. I love this program. And it has brought such joy to my life, I want to help you forward to I guess I should be toward the RSS platform. Therefore I must ask on your homepage. There's an opportunity to donate. But I must ask if it is like the file coming soon and not really authentic, because I've tried donating but it will not let me

Ron Giles 48:24

Oh, you're bringing something up that is a little touchy with me. We put the donate button on there because we needed a little bit to help us with the things that we have expenses with. If I told everybody about the donation button, then everybody's gonna think that we need money and they're going to want to donate not everybody obviously. It's there to help us with the funds that we need to carry on with the mailing and the other programs that we're we're participating in. And I I just really want to thank all those who have found that button and participated with donations. It's been tremendous. It's been a tremendous blessing. And we're using those funds for the right purpose for which it was in that humanitarian activities. So thank you, thank you from the bottom of my of my heart. And Tracee appreciates it too. She's put out a lot of money for love won society over since August when she got involved with us. And I'm reimbursing her for those things because of the the person that she is and what she brings to love won society. So I want to be very careful about the donate button. We don't want to be inundated With 1000s and 1000s of dollars, and yet we need some to take care of what we're trying to do. So total gratitude for those who have found the button and saw fit to bless us with her, their donated funds. Now, if you've had problems in donating, I don't know how to help you with that, that through PayPal, and they're in charge, the button is just a way to get into their program. And it brings up a, a form that you fill out. And then you donate. And then I don't know if from there where there's where a problem might be. I wish there was no problems. But sometimes with technology, there are problems. Keep trying, I guess it'd be the only thing that I can say. But for those who have done so, and donated. Thank you. Thank you.

Yeah, we appreciate it. Definitely appreciate it. Okay, last question. Will I just answer no, I get on telegram LWS forum. We've sent out links, but we will also send out the important links link again, that every all the links to everything is on that one document, it's just called LWS important links. And that should be there. Okay, last question. This is hilarious. I have 31 Zombies. And I'm not sure what, what I should ask for. I have a lot of projects that I would like to do, it will cost me a lot of money to do it.

Ron Giles 51:53

Well, I'm not sure. Have you corralled the zombies? Are they in cages? Or just being facetious here? I'm not sure. Zombies around. But there are people who are perhaps still asleep, the projects, present them at your appointment, and they get the funds that you need for your project. If you're humanitarian, then the funds will be available for you to do your humanitarian work. Oh, I'm not sure beyond that what to say. But, so we'll go from there.

Tracee 52:35

Yeah, I mean, yes. And yeah, that's a hard question to answer. Because, I mean, we don't know what the projects are. So how can we say that there's going to be a lot of money. But if you ask for the higher rates, then you will get the higher rates?

Ron Giles 52:50

Yes. And it's a whole process that you need to go through to prepare for your redemption appointment. Focus on that, in terms of your if you're new focus on preparation for your appointment. Why do I say that, because that's the thing that's going to get you the money. And once you have the money, then you can get all the training that you want, go through everything. And then get your feet wet by putting putting it into a obviously get the Benefactor contract with the IRS, RSS program. And then you start by putting a CAC together in your own neighborhood, your own community, get it started, see what happens. If you think big in the beginning, then you can prepare for an advancement but you can start out small, it's it all depends on what you feel comfortable doing. And, and once you get into it, you'll feel very comfortable because a lot of people are going to allow the fact that you're giving money away. Oh, well, a pretty big one a job to have to give money away. You'll find the right people. So well that's it for today. And thank you Tracee for your input. And for your wisdom and understanding that's I appreciate that. And for me, I am grateful and my heart full with all of the blessings that the alliance is pouring down upon us as we're preparing to do the work to be humanitarians. And I'm hoping that the training has been helpful for everybody and and get involved with it and enjoy it. This is a good time to be alive. And as we prepare for all these things, just Enjoy the time and enjoy the love that the alliance is sending to us and the things that they're doing for us to be good humanitarians with that we'll say goodbye and have a good day thank you
