

Q and A - Feb 28th

Wed, 4/6 7:24PM 43:51

SUMMARY KEYWORDS

question, money, people, trust, contract, alliance, pay, zim, benefactor, humanitarian, problem, set, home, heart, appointment, account, contacted, business, person, directors

SPEAKERS

Ron Giles, Tracee

R

Ron Giles 00:00

Hello humanitarians. Again, this is Ron Giles. I'm with Tracee, and we're going to do a q&a today. It is now February the 28th, the last day of February. And so we're going to enjoy this particular q&a as one that we had a lot of fun with. Anyway, let's go ahead, Tracee, and we'll have our first question, please.

T

Tracee 00:24

Live ed in Cape Town, where do I go redeem or go regarding Zim redemption, or exchange and who do I communicate with because I need a break from financial stresses? That person must have just gotten the gift.

R

Ron Giles 00:39

Yeah, I, you know, bless your heart. It's, it's a, it's all going to be brand new to you, or for you for a while until you get in, dig in and get yourself educated towards love won society and what we're trying to accomplish. All of the information about Zim and how to prepare for your Zim redemption appointment is all involved in our, either the documents that we have, which I suggest you read those for as long as I along with the watching the videos, because it's all important, if all you want to do is watch the videos, you're not going to get it at all. So you have to dig in and and really become acquainted with the love won society programs through the documents as well as through the the different videos that we have prepared. So I suggest and welcome you to go to the website and just dig into it. It's, it's gonna, you're gonna have to do all the work. We've done all the work we can. So good luck to you. Next question.

T

Tracee 01:48

You mentioned on the call of to 20 to 22, something pertaining to directors Academy, can you elaborate with more detail as to when you might be starting that seminar

R

Ron Giles 02:04

where we're preparing for it, but it's going to be fairly expensive to do this. So we're going to have to wait until the the money is available for us to guess the the determining factors or when is the when we get our money. And once that's in place, then it's just a matter of time before we solve all the problems and get everything prepared for the for the Academy. Right now. We're working on the curriculum. It'll be a week long. And how we do that we'll have to see. But there's, we'd love to give you all the information, but it's not available yet. So we're working on it. Next question, please.

T

Tracee 02:48

Since there are still some COVID travel restrictions with some countries, I assume you would wait until all those restrictions have been removed? Yes.

R

Ron Giles 02:59

Yeah, it's going to be that way. Yeah. All of those will be restrictions will be gone before we get a chance to get our money. Next question.

T

Tracee 03:09

This is kind of vague. I would like to know about directors, can you explain

R

Ron Giles 03:15

directorship part of the Community Assistance Center Program, the CAC program, it's, it's all there. And I hope that you take the time to go ahead and look into it. And you'll understand very effectively what directors are for. And they're the basis of our boots on the ground in the local communities where the real humanitarian work is going to be done. So they're, they're a major part of it. And the CAC program is a major part of everybody. Their projects can be gone through there. And that's the basis upon which their projects can move forward. So it's a learning curve. And you got to jump on that curve sometimes. So do it as quickly as you can. Next question.

T

Tracee 04:05

I plan on making an appointment when the link becomes available, unless I'm contacted first, in which case, I know I'm in the right hands, don't hear first and have to use the link that my appointment or when I arrived, my first question to the agent will be if they are with the Alliance, if I don't get a resounding enthusiastic, yes. Then as you mentioned, I will grab all of my stuff and leave, then what we'll be sharing with the group. If you receive any clarification from the Alliance about this possible scenario.

R

Ron Giles 04:35

Well, you're you're projecting a very negative situation or a potential negative situation. And I can understand where you're coming from, because that's the way we're living right now. But you need to understand also that things are changing. And the way that we're doing things now, we're not going to be the way we're going to be doing in the future. Now Having said that, only humanitarians will be contacted for that appointment. Now, I don't know how you're going to be contacted, that if you're a humanitarian, and I'm going to say this very clearly, if you are already a humanitarian, that is on the Alliance radar, as a person who they want to have money, you're already in line. Down, you get contacted. And you pollute that with your negative thoughts and understandings and posturing. If that's the right word use, you understand that. You don't go in a posture to God, you don't go in and posture to the people who God sent us to take care of you. If you want to do that, I wish you the best of luck, because you probably won't even be contacted. This is very serious. Only humanitarians are to get funds from the redemption of Zim, or the redemption and any other bonds that matter. And if your get your appointment, and you question whether that's true or not, or whether they're from the Alliance, you have a disconnect between you and the Alliance, because your heart knows what's right. And you, you have to establish a credibility for the Alliance to be able to contact you and do the things you need to do to become a humanitarian that has funds to do things with. So I understand where you're coming from on this, I'm counseling you to be very, very careful. Because if you have not resolved those kinds of problems, there's a very good chance that you won't even be contacted. So don't disqualify yourself through your lack of faith and trust, and the goodness and the appropriateness of the Alliance to get hold of you. And to deal with you in an appropriate sort of way so that you can get your friends that you need as a humanitarian. It's all laid out there. Don't be careful what you do. Be careful that you're projecting negative stuff into the future. I don't have any question in my mind, that we're going to be contacted by the Alliance, only the Alliance at the appropriate time for us to go and get our redemption taken care of, I share that with you with a hope that you'd have the same kind of faith that I have in that whole process. So with that said, let's move on to the next question.

T

Tracee 07:59

Are you allowed to say if your daily Alliance interaction is with a boots on the ground human, so to speak, or someone higher?

R

Ron Giles 08:09

We'll have to see on that, we're going to be contacted, and we're going to go into our appointments, let's be open to whatever is presented to us as the best thing for us on an individual basis. Have faith and trust in that to the alliance loves you. Were the ones that are going to do all the work that you sit up there and they're fluffy clouds and play their hearts or whatever they're doing. I don't know. I'm being facetious, but our job will be to do the work on the ground, the boots on the ground. So that's what we're preparing for. Next question.

T

Tracee 08:52

Is it possible to have your six trust with the same purpose, like to buy your dream property faster?

R

Ron Giles 09:01

I'm not going to say a whole lot about the six trust, you can do it for whatever purpose you want. If you're saying if each trust is the same thing that's it's got to be reflected in your trust documents are six trusts because you have the chance of making them different for each different ideas or things that you want to do? I'm just saying that you have to have a trust document in place in order for you to set it up as as a source of income, either income for you or income for the purpose for as the benefactor of the trust. So it's up to you. Can you do stuff like i don't i? Yeah, you can do whatever you want. But I'm saying to you, if you've got a trust document, and it's all done properly, and legally, then you've got to trust if you Don't if you don't do it all property and legally, then you don't have a trust and that isn't that kind of being fraudulent. So it's you could set up the Trust for anything you want. If it's all going to be the same thing, it's okay. Doesn't matter to me. Does it matter to you? Because it's your trust, it's your money. And it's your responsibility to use it appropriately for the purposes that you set up the trust. Oh, with that said, let's just move on to the next question. Please.

T

Tracee 10:32

Under contract provisions for corporations, please clarify this 10 year performance bond for the upfront annual purchase of the company's production, and pre purchase five year average production, which is purchase something in advance or paying for five year average production? Is it annual purchase of five year average production for 10 years?

R

Ron Giles 10:56

Yes, it is. It'll all be spelled out in the in the contracts that they get together into. Now. At that level, you'll be working with love won industries. And it has to be under a central control because of the nature of what we're trying to do with it. Economic Stabilization, that is our project and has to be in control. It has to be have controls, so that everybody is on the same sheet of music, and we have one person that's leading the band, or the orchestra, then we can all play together and do a good job. So the love won industries is going to be for those who really want to get in and have an understanding of business and how people think there are those in the industry, who will be part of it. The different industries, automotive, you might have tractors and farm equipment, and all that for manufacturers as well. So it runs the whole gamut that it has to be under control. So love won industries will be the entity for that. And that will, that will help you with contracts. And on all the other print parameters that are associated with setting up something of this nature, you have to have it bonded, because you're changing the way forward or whatever company is doing business completely. And they have to have some assurance at that bond. That amount of money for 10 years for them should be put in an account that has an escrow account. We can call it whatever you want. But it's that's will assure our position in the contract so that they can have faith and trust in the fact that the money is there. It won't be touched during that period of time. So if they want to borrow from that, that's, that's a source of loans, and so forth. So they can expand their business and do whatever, the contract itself will have to be a little bit flexible. So things can change. And

you're not strapped down to something that's not workable, till the contract may be signed in the beginning. And it may look something quite different in 10 years, but it will because we all agree to adjust it so that it can function as it's supposed to. Well, there's a lot involved in that. Not everybody will do it. Probably very few. But we hope that anybody that wants to, and has that ability can get involved with the money. Hope that answer your question. Next question.

T

Tracee 14:06

Will we be able to offer employment contracts or CAC directors in addition to the RSS beneficiary program, to a parent who chooses to stay home and raise their children? It's a sacred job and my hope is that more parents will be able to stay home instead of putting their child in daycare.

R

Ron Giles 14:25

I love that idea. A caretaker person who's taking care of somebody, should they not have a contract? I have a friend who's taking care of her mother. She doesn't have any life outside of that. Should she not get paid to do that? Is that not adding to society? I believe it is. And I don't believe that it's important. I believe it is important for the mother or a parent to stay home and take care of the children. I remember Growing up, and when I got home from school, Mom, I'm home. She says, Okay, get your homework done, then you can go out and play. That's the kind of action that I'd like because I felt safe and secure in that. And I want every child to have that kind of safety and security with their parents. That's why we're giving homes and all kinds of things to support the family structure. And it'll be it's going to be a wonderful thing. So the financial situation for families is going to change drastically. And it's going to be fun. Now, can they have contracts to stay home? Up to the director? It's up to the benefactor and how they want to do things. But I see no problem with that. There's certainly plenty of money to do. No, that's beyond the 26 \$28,000, that thing, get a month on the RSS program, beneficiary program, two things you're going to be changing, people are going to be really happy smiles on their face all the time. That's what I picture. Next question.

T

Tracee 16:14

And you just reminded me of something like your friend that you mentioned a minute ago, there should be something that we could set up for respite care for people like her, who choose to help their elderly parents so that they can get a break, you know, so she can go out and enjoy part of life, you know, instead of being stuck and tied to home all the time.

R

Ron Giles 16:37

And there's opportunities in there to serve in many different ways. So if they have enough money to get somebody come in and take care of a parent for a couple of hours or a week, so they can have a vacation. The problem with is you have faith in the person that's coming in to take care of your mother the way that you would take care of her. And, you know, there's some personal hygiene and all that sort of stuff that's, that comes into play to some degree or another and I don't know how much of that, but and it goes for men as well. Oh, but there's

people who will, who love to serve and, and make an opportunity for them to be involved at a level of employment contracts to do the things that they love to do and that need to be done for society. No, next question.

T

Tracee 17:39

I know LWS programs focus on providing the basic living of humanity. Do you think we need to help pay for higher education? I thought about student loans, because I just heard a friend's daughter's applying student loan for her medical school. Would you share some thoughts about future higher education?

R

Ron Giles 17:58

Yes, let's say you're a high school graduate just graduated from high school. That means you're 18 and you've started your beneficiary account. Let's say you're pretty Chloe and his, you've established your six trust accounts as well. So coming out of high school, \$28,000 a month, a month. You can buy all the education you want. Now, what kind of education is available? Are we going to continue to educate young people in a communistic environment that the cabal has set up for us and the Rockefellers have set up for us in the education system for the National Economic Education? People? I don't, don't no point is, is that you will have a chance to do what you want to do as far as your education is concerned. Keep in mind that that's \$364,000 a year. You can you don't have to go get a student loan for that. And if you have a girlfriend out of high school and you want to get married, then that's \$56,000 that you the two of you can join together and and when you're 21 you can have a home, you buy a house, and there's just so many different ways that life will be available for us to choose from. Do we as benefactors need to make education free? I don't think so. We're giving them the money to buy the education that they want and or if they don't want to get educated, they can do whatever they want with their money, but we're making available for them. They will have the opportunities it will be open for them without having to borrow money and and have such high 70,000 or 80,000, student \$1,000 student loans that you have to pay back. You're just pay for your own education as you move along with it. That's going to be available. So I hope that we can clean out our higher education. I have a degree and I enjoyed my times in college. And so it's, it's something that's desirable, but they don't need to go to college in order to have. I'd like to see people by creating their own businesses, instead of going through a system that teaches you to work for somebody else. Prepare yourself to work for somebody else. No, why don't you prepare yourself to work for your own businesses and the things that you want to do? That where you can create from your heart and give that kind of service to mankind? That'll be unique, it's going to be a different way of living. Next question.

T

Tracee 21:07

Okay. Recently, I watched Jason shirkers movies, disclosure and disclosure to the guy named Ray works for the offworld group called the light system, or TLS. TLS does both physical and spiritual activities for the humanity. And currently there are over 1000 members on Earth, it seems there are multiple groups like tell us out there to help the humanity. I feel like each Zim benefactor will be like Ray on the financial side working for the Alliance, what do you think?

R

Ron Giles 21:38

I think that's really good. There's, there's some people, you have to be very careful about people who are knowledgeable, because sometimes their knowledge comes from the position of an agenda. That's not in our best interest. Keep that in mind. Don't, don't negate it. And then don't disrespect the fact that there's people out there that are really good and doing good for people. I listen a little bit to the TLS, whose name is Ray seems like a real person. I didn't listen to it intently. Because they're, if they've got good information, then it's going to be similar to what I have. So I there's a lot of that, that I don't get involved with. And it's mainly because I'm not learning something. And I have a lot to do with level one society. So I don't get a chance to really dive into other people and other philosophies and other ways of doing things. But I'm certainly not going to say that that's not a good source of information. But you have to come from your heart, nothing is real. Nothing we know of right now is really real is either propaganda or false truth or whatever. And so you have to come from your heart and use your discernment as you move forward. And don't be afraid to make a mistake, because if you make a mistake, then you can go back and correct it. If you follow somebody for a while, and then you have some problems, then don't follow them anymore. But it's got to come from your heart, not so much your mind. And most of us have a disconnect between our hearts and our minds. And we let our minds override our heart. And that gets us into trouble. But if you have a balance between your heart and your mind, that is when I say balance that you have some good input from both, then you have a better ability to discern where the truth is and what you want to do. We're each on our own paths. So it's, it's very unique in that regard. We'll have the experiences that we're supposed to have as we came to this earth for the different purposes that we we came to the earth for. Participate in life, allow yourself don't ever come from fear. God loves us. All of the bad stuff that we've had to endure for all these many 1000s of years is going away. We're moving into the golden age of mankind. Let's not drag any at all this garbage with this distinction the place. Next question.

T

Tracee 24:37

Oh, will there be an official bond document letter that managing directors will be able to use for businesses that may require proof of guarantee that their employer and employee financial contracts will be honored for the term of the contract?

R

Ron Giles 24:53

Yeah, that's what the whole surety bond is, is for that we're establishing how we establish that We'll see, I'm thinking escrow accounts. Because let's say, let's say buying all of the cars that Ford Motor Company makes 800,000 a year or something like that. And let's say we Speight, we pay them \$70 billion. To do that, well, we're going to have \$70 billion timespan that we're putting away so that that contract can be fulfilled. And that they have full assurance that the money will be there, at least for the next 10 years. And then we renew that bond every 10 years, it just stays, we stay 10 years ahead of the of the game for them. That's part of the contract. That's part of the credibility that we're creating. And it's not a cheap way of doing business. It's a very expensive way. But we don't need to have a return on our money. And that makes it magic. That means that we can do a lot of things that nobody else can. And the volume of money that we have, as Zim benefactors who have received the higher rates, some of our resume, potentials in benefactors have tremendous amount of them. Or they're still

asking for the high rates. Those are the kinds of people that will be involved in perhaps the new financial system, the new financial services industry, we've got real estate, we've got all kinds of stuff that to put the money. And if you don't have it, then you're you're dragging society down. So get what you need. Go from your heart, and let that see down the road. And then you respond to it. Your mind might not want to go there. But let it go there and position yourself to do the humanitarian work that you're came here to do. It's all in there, it's just a matter of using your discernment. And, and your you've made your, your unique pneus. Your own personality, your own way of doing things. That's what you're offering. And we fine tune that and make it the best we can. But that's what we're offering to society from we as an individual. It's a great thing for us to be able to do that. Are they right? Yes. Move to the next question.

T

Tracee 27:38

Besides a proof of funds letter, can we ask the Alliance counselor at our appointment if a free and clear letter can also be provided to prove that the funds are not from various sources?

R

Ron Giles 27:50

You can do whatever you want with your counselor and ask, I'd like to have letters I can I'd like to do this. So what do you recommend? I know other people gonna ask me if I have proof of funds letter? How do I deal with that? Do I need one now? Or do I need to come back and get one that specific with the amount of money that that person needs to know that I've got the proof of funds letter is not going to give them the actual amount. Because it's nobody's damn business how much money you have in your account, the letters just to show those people that you have the capacity to fulfill what you want to do by even going into and going through a house that is a \$10 million home. Just to get in the door, you have to have that letter? Well, it's appropriate. So counsel, with your advisor, your counselor, and I get the things that you need to function in having a lot of money, they'll be happy to help you with this. So that's why they did it was why the Alliance put it all together for us. They know that we have no real experience in humanitarian activities. Our hearts are there. And sometimes we have done. But we've never been involved with this kind of money. With a world economy that's between 80 and 120 trillion per year. We come along with our quintillions five of them every year. You know, the examples that we've set. So things are going to really change and have some a lot of fun. Fourth, we're going to be doing things appropriate so that there's no concern about our intentions and our nefarious sources and all that sort of stuff. It'll all be just perfect for us if you use the counselor for the right purposes. And they're there for that. Next question, please.

T

Tracee 29:55

For those people who may not have debit cards, like rural tribes are impacted I wish people in India or Africa, for instance, or people who may question why the registration fee is needed if I Ws is a nonprofit, is there a way that the fee can just be set up in the QFS ledger system to automatically deduct the \$10 fee from the initial beneficiary download as a one time deduction?

R

Ron Giles 30:19

No, you don't understand what the \$10 is for the \$10 is your ticket, you buy a ticket, you go into the show you buy for something, and you get a chance to use it for your pleasure. And that's why you bought it. Well, the \$10 is the same thing. I qualify to have this money in my account and be a part of love won society of beneficiary. Because I paid my \$10. But I don't pay my \$10, I don't get to be a part of it. Now, that's the ultimate way that this can go forward, somebody might come up and say, well, I'll give you the \$10 just to get you in, and then you pay it forward. Well, that person is going to get \$50 for signing, you're having you register, you can give them \$10. For that you could do it for five people, or 20 or 10 people, whatever it is, you can you can do it. But don't rob people of the reality that they have paid something they paid their dues, they're entitled to the money because that was the contract that they signed by paying their \$10 fee. That's the way that I look at it. And I hope that most people will do that, instead of saying \$10 for nonprofit, what does that have to do with the fact that we're going to be paying them all this money? Get out of that concept? They pay the \$10, then we fulfill our contract with them. That's the way it is. That's the way we do business. If you don't pay your \$10, and why do you think you have an entitlement to something that's ours? This is our program. This is our game. It's our money. And if you want it, pay the \$10 and enjoy it. That's what I say. However you work it out is the way you work it out. Then dollars has to be paid. And it's not going to come out from some other place. It has to be paid at the time of registration by some source. So don't negate the concept of the \$10.

T

Tracee 32:39

I just idea.

R

Ron Giles 32:42

Yes, sorry.

T

Tracee 32:43

I thought you were done.

R

Ron Giles 32:45

What probably was.

T

Tracee 32:47

So these people, okay, so say it's rural tribe. And maybe they don't have a debit card, but maybe they have cash, let them give you their cash, and then you use your debit card.

R

Ron Giles 33:00

There's always a solution to the problems, you just have to be a little bit clever at it. Yeah. But

you're you're looking at a very small percentage of problems. Rural tribes. How many rural tribes? Are you aware of? Or have you just seen them on the television, it's got to be real for you. And yes, there are situations where there are tribes, and they live in a fairly primitive way of living, but they're all aware of what's going on. And they want to be a part of it. And we want them to be a part of it. So don't just allow the fact that it's a rural area, and they don't have the internet and all that sort of stuff, don't let that bother you. Because things change, internet will be from the skies won't be on the ground. And you'll be able to tune into it and and, and there's going to be a way set for everybody. And by the way, don't just think that because it's Africa, Africans have a way in in the east coast of Africa. They have mobile phones that are their account numbers, so that they can transfer money and use that for the payment of things. And you can receive and pay according to your phone number. It's mobile banking. They've got already got it set up. Is that primitive? Is that in a rural? Yes. They're adjusting to the way things are going to be so let's not put them in a permanent tribal situation that's just allow them to make the changes that they want without forcing them. We have to have certain things like the Internet to be able to do our functions and those who don't have the internet They're gonna have to make some changes and be clever and inventive. But they can solve the problems. Let them solve the problems that way. They're really excited about what they're going to get. You come along and do everything for everybody. The you're you're robbing man of their ability to create, give him money, and then give everything to him for free. Why did you give them the money? So I said, give him the money and, and let them pay for things. Because they got the money. Is that not the right way to do things? I think it is. Give them money and let them use their money for the things that they want to buy. That's commerce. Let's not change things so drastically that we don't lose that common ground of commerce. It's beautiful. You have money in the Cabal didn't want you to have money. So things are changing. They wanted us in a debt slavery situation. So they made things very difficult for us. We don't have to have any of that anymore. It's not going to be difficult. But we need to change your thinking to accommodate those changes. So next question, please.

T

Tracee 36:23

Okay, I'm watching your video with Korean subtitles. My question is who should be the trustee. In the case of a trust for orphans in an orphanage, the maximum number of trust for the orphanage manager is six, and how to use an audit correctly. I would like to ask if it is possible to add a system that specifically manages the special expansion of the trust or the qualifications of the trustee through the foundation or division within my project, I think it'd be difficult to help all the orphans with six trusts.

R

Ron Giles 36:57

Well, you're missing out on the idea of the six trust, they're not there for the orphanage as a beneficiary, a beneficiary can have up to six trust. If you have an orphanage that you're doing things, would it not be a better way to do that? Rather than trust but give them a benefactor account? Is it better to have them on an employment account, you're trying to stretch the six trusts that and put it in a situation that it's not meant to to accomplish or to satisfy the six trust or for the individual? What they do with it? Yes, they can do whatever they want. But if a CAC is in the in the area, and you have directors, why not allow them to do employment contracts, so that the individual who wants to have the six trust for their own use, can have their own use. As long as you've got the director there or somebody else that can give their benefactor account

or employment context, that's a better way to do it. Don't labor with the six beneficiary accounts, it's not what it was designed for. I hope that helps, because there's a lot of applications that people are going to that and causing problems for themselves. So you don't need to do that. Use the facilities that are available for you. benefactor account, set it up for whatever you want employment account, keep them employed, or running an orphanage, give them a grant. Give them whatever they need to get the job done.

T Tracee 38:47

Like the grants idea? Yeah.

R Ron Giles 38:49

Yeah. So. Okay, next question.

T Tracee 38:53

I submitted a question to Dominic for this coming week's q&a on the NRELS regarding a parallel program for those individuals, construction workers, traveling nurses, retired persons, etc, who do not want to be tied to a permanent location for their home. So I was wondering what you thought about providing similar assistance for purchasing RVs trailers, live aboard boats, timeshare vacation, club deeds, etc. For those people, so long as it is their primary residence.

R Ron Giles 39:24

You know, there's adjustments that can be made. And those adjustments that are maybe even as much as 1% of the people, you're working out the whole program for 1% of the people and that's not what it's designed for. If there's people that who don't want to live in a home and want to have a home and it's a mobile home or something like this, they're got plenty of money to do the things that they need to do and want to do. So if I wanted to travel around And I didn't want to be home did have to take care of that I can go out from the home or wherever they take the home with me as a mobile home. There's all kinds of ways to solve the problem. You've created a problem, and now you're trying to find a solution to it. That is not within the program. So it's a good question. It's a unique question, for a unique situation. And you know, how you solve that problem as a gym benefactor is the way that you solve it. That's not going to be what the national real estate listing service is about. We're about people getting homes. So there's some exceptions to what they want to do, then you just work it out. Next question,

T Tracee 40:49

can I as a benefactor under the NRELS program, have the loan amount for a young family at the birth of one child and cancel the loan at the birth of a second child?

R Ron Giles 40:50

R Ron Giles 40:59

I'm not sure how to answer that question.

T Tracee 41:02

And neither

R Ron Giles 41:05

can I as a benefactor under the NRELS program, have the loan amount for a young family at the birth of one child? What is the child having to do with the with a loan?

T Tracee 41:18

You know, I guess what I'll do, let me email this person and get some clarification. We'll add that to the next one. Okay. Okay. Sounds good. Last question for today. Can I do a lot of CAC nationwide with the Indian tribes?

R Ron Giles 41:36

Is there a reason why you can't you need permission to do it comes from your heart. These are the kinds of questions that people ask and just throw it back at him. Was that what you want to do? Do? Germany? It's your stewardship responsibility, not mine. I have an opinion, perhaps. And sometimes I might express that opinion. But I say it as my opinion. And you'll go ahead and do it. What if I said, No, you can't do that? Well, I want to do that we'll do it. There's no permission you need to get from us or anybody else for setting up a CAC program, anywhere that you want, for any purposes that you want. We just give you the structure, you use it as best search you. Oh, there you go. If that's the last one, we've got finished a little bit early. And that's good. No problem. Thank you for the questions. And some of them are fairly unique. And I'll just say, there's no reason to judge a question. But I appreciate the thought processes behind things. I would say don't project into the future things from the past that we're going through right now. And allow things to change as they will. If you have a problem, you solve the problem. And that's, that's the course of action that we need to take as we move forward. Problem solutions. So with that, we'll say goodbye for now. And thank you, Tracee for your excellent work as always, and thank everybody here who is coming from their heart wanting to become humanitarians. And we hope that you can use our love won Society programs to enhance your ability to get your humanitarian projects done, or at least started. So thank you for your participation and we'll do another one when we have enough questions.

T Tracee 43:48

Okay. Thank you
