people, question, rss, money, benefactor, beneficiary, humanitarian, person, program, zim, pay, alliance, society, home, account, business, cac, trust, referral, understand

## SPEAKERS

Ron Giles, Tracee

---

**R** Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracee and we're going to do another in a long series of question and answers. Today is February 7 2022. So with that, let's go ahead and begin, Tracee. Number one.

**T** Tracee 00:19

As we now know medical industry is a cabal controlled practice, as per all your videos, I listened to mention that we don't know when the med beds will be available to all will it be possible to get help from the Alliance to train the medical industry until such time the med beds are available, I would like to set up training centers that would disperse such training.

**R** Ron Giles 00:41

It's a good idea. However, I believe that the military is going to be involved in the initial stages of the med beds, and controlled by them in terms of distribution. If there's some kind of a training situation that we can start now, I have not heard about it. But like I've already put in my indication to the alliance that we would like to participate in that sort of thing. However, at this point in time, we don't have the information necessary to be training people. So it may be down the road little ways. But let's let's hang on to the idea because I think it's a good one. Next question.

**T** Tracee 01:31

As far as I understand, the creator of a trust is the person or legal entity that deposits the assets into the trust. To me this would imply that the trust creator for each RSS beneficiary would be the name legal entity or person provided by there's an benefactor there's an

benefactors, the one depositing the funds into the RSS beneficiaries account, not the RSS beneficiary. Would you agree with this? If so, how are Zim benefactors going to be able to let their RSS beneficiaries know what name they should use as a trust creator.

R

Ron Giles 02:06

I'm just going to simply say it's none of our business, we put up a trust document, we can do that on the website so that people can just fill in the blank, there's a certain amount of explanation that we can have with that, we're not going to get that much involved with it. And the reason for that is because we don't want to have any liabilities or somebody coming back on us. So each person will be responsible for creating the trust. And it may be that we'll need to have a video to explain how to create a trust for the benefit as a beneficiary. And then they can just simply put in their whatever information they want to and who they want us to trustee, the trust or should be the person who owns the beneficiary account. And the trustee can be whomever why for or possibly himself. I'm not sure about the laws for trusts. But I believe that that's a trust door is a person who makes the trust. And I think that person may be able to be the trustee. That somewhere in there, there's a separation so that the beneficiary can, and the trustee is to do the work or spend the money, whatever, for the beneficiary. So we'll give as much as we possibly can. But I don't want to create a liability situation. So at this point, we'll just let it go until we get closer and need to have all the information available so that beneficiaries can create their own trust

T

Tracee 03:46

exome question, when the RSS website is up? Will you be using the Google translator for the benefit of people around the world who don't understand English, I live in the province of Quebec, Canada, which is 90% French speaking. So translation service would be beneficial to all who don't speak English.

R

Ron Giles 04:04

It's my intention is to use some of the latest technology as far as interpreting language. And translating. All I can say is we're gonna use the best we can. I don't know what's out there. And we'll be searching and finding the best one to use. But I don't know that we'll be using Google Translator. I'm not sure that Google will even be around in the new quantum network internet show. Because it's a source of money for them. And the internet is not going to be a source of funds. Where you have providing services like Google has in the past, it's too much control. So we'll be changing how that changes. We'll see. Right now we don't know. Next question.

T

Tracee 04:51

Just wondering if the q&a training sessions could also be written in PDF form.

R

Ron Giles 04:58

We're trying to do that part of thing. We got some volunteers. So it is our intention to do that

we're trying to do that sort of thing. we got some volunteers. so it is our intention to do that, and have a place on the internet around the website so that there's there's training videos. And there's the there's the videos for the price, or the programs and a video for the Q and A's and we're also going to have another one for the PDFs. We may have some limitations, so we have to deal with that. We'll see what we can do. But that's our intent. Next question.

T

Tracee 05:38

Over my lifetime, it's hard to guess how much time and energy has been spent just trying to get money for my projects a lot. If I could just get the money, everything would be alright. Well, now money won't be a problem. If I become a benefactor, the problem now will be finding the people willing to provide the labor. Right now as we speak, it doesn't matter how much money I offer, I can't find help. I'm asking for a reference letter and the chance to work with love won society and my angel. I suppose there's a manpower reorganization with a new quantum system. What are your ideas on this labor issue?

R

Ron Giles 06:14

I've been told that the people to do to help us with the work will come out of the woodwork, that those kinds of people are already being prepared spiritually and in their guidance system, being prepared so that it's not a big problem for us to find them, or for them to find us. I'm anticipating that we will have people coming out of the woodwork, we're already having people coming out of the woodwork to help us with love won society. Tracee is a is a prime example. What a blessing. So we're looking forward to some very substantial help from the alliance. And especially once we get the money, we will have opportunities to counsel with angel or Alliance person, agent to who's assigned to us our counselor to have brainstorming, do things where they'll have a better clue for things like this. So we feel now that we don't have that available to us yet. So not might not be there. But it is going to be there. And we will be taking care of taking making good use of that resource. almost on a daily basis, if not, on a daily basis, if not two or three times a day, I don't know, we'll see. In the beginning, it'll be a lot that as we start moving and going down the road, we're not, we don't need somebody to tell us we're going off the road or something like that, we're going to get really good at it. So there are those. Those indications now one of the things that I wanted to say, the reference letter, love won society will have nothing to do with the issuing of a reference letter. The reference is from the Alliance agent. And referring us it's a referring letter that that is sent to love won society, or has love won society's name on it. We're going to have an application at the appropriate time for each individual who wants to become a benefactor. You save that referral letter for when you fill out that that form that application. And you submit the application and the reference letter referral letter to a love won society at that point, then we go through it and prepare the documentation and the contracts and so forth to become Zim benefactor. That's when that referral letter will be used. Now, why are we doing that? Well, the information that I need to know is that you have sufficient funds to accept the liability as if it's in benefactor. That information should be in the NDA and you should not be sharing that with me. And so that's why I'm Avast the alliance that they would, because they're there they know things they know what's about one society and so forth, and what the ramifications as far as money usage in our programs. And that's why we're using them as a referral. Not only because you'll have the money to do it, and they'll they'll indicate that but also that your Beth had humanitarian in line with the Alliance and ready to go to work. So that is is a vital thing for us to know that referral letter is a new thing that the alliance has approved That process will mean that I don't have to ask questions, and just simply

believe people that they have sufficient funds. Not that they would want to lie, because that wouldn't work very well, when we get into the programs, but there could be those who lie and our cars are going to want to cause problems for us. That's why we have a referral system from the Alliance, so that I don't have to concern myself with them. And I hope that is very clear. A lot of people think that love won society is going to write you a referral letter that you take into your appointment. That's not what this is about. You get your referral letter from the app, the appointment, so that referring you to love won society to become as in benefactor, somehow, people didn't have that don't have that clear. So I'm just trying to spend a little time and be sure that you understand, everybody can understand it. Next question, please.

**T** Tracee 11:06

What is the intent intention regarding online listing of homes for sale, one for the whole world, one per country or benefactors create their own listings? If per country, how will this be set up managed and coordinated?

**R** Ron Giles 11:20

You know, in my not 970, in the beginning, I don't know what all the laws are in other countries, I just assume they're very similar to here in America, where you, you have a process to transfer title, and it's registered by the government, by the county, and so on, and so forth. How that's going to end up I don't know. I'm assuming that will be okay. However, when, when the RSS program gets up and running, it will be on a country basis. But having access from Spain to Americas if you want to come to America by home, that can that can happen. But the listing service will have will be for America will be a large database of properties that are for sale. And I don't think they're going to be on the market for very long at all, I think it's going to work out to where if you want a home, you go find one, and then we'll buy it for you and put it through the program. We'll see how that all worked out. But in other countries, it's my intention to do it in other countries as well, we're going to have to grow really fast and accommodate that. And we're going to need people from those particular countries, people who are involved in real estate to get involved with us. So we don't want to reinvent the wheel and then have the wheel square for some other country and not work. So it's gonna be important that we have the help that we need to set it up appropriately. And that's going to evolve into something that will be very workable and very useful for for the majority of people. So that's our intentions. Next question, please.

**T** Tracee 13:21

If a person sells her home and buys another, for example, after six years will a second increase be added to the beneficiary's permanent download, or the existing additional amount from their first home loan payment be adjusted to suit the repayment for the new home?

**R** Ron Giles 13:41

It's an interesting question. And initially, my my idea or thought was, we're not going to, we'll just let that original amount pay out. But with the use of directors from the CAC program on a local basis we have the ability to be able to change that how we're going to do that at this

local basis, we have the ability to be able to change that, how we're going to do that, at this point in time, I don't know. But I don't think it's, you know, I'm looking at this and saying, wait five years, and you can borrow some money and pay off the loan. And you still get the amount of money that's paying the monthly payments. And then you buy another home and you're doing the same thing again. And so every five years you buy a new home, that makes it a profit source. And that's not what it's about. We're interested in people getting into homes, not people making money with real estate. That all needs to that concept nice in my opinion needs to go away. Homes are not a commodity that markets. Homes are a place for families to live and to be raised and raising their families and so on. That's their sacred home. That's, that's the hearth, that's the center of their life sort of thing. And I want to be sure that we're not doing stuff to participate in people making a lot of money. That's inappropriate and consuming our resources as far as homes are concerned. So we'll we'll fine tune that as best we can. If there's some abuses, we'll find ways to avoid those and, and make it a good program for everybody. Next question.

T

Tracee 15:34

I ordered from eBay 100,000 Dong 10 100 trillion Zimbabwe. Dollars and 10 trillion Zimbabwe dollars. I ordered them from different sellers, because I was not sure if it will be delivered to me on time. My question is, how much should I ask? What rate for 100,000? Dong? How much for 10? trillion? Zimbabwe dollars? How much for 10 times 100? trillion? And if I get them all, how much for all of them? Oh, geez. We're not gonna.

R

Ron Giles 16:09

Yeah, we're not we're, what we're doing is, the Viet ma Vietnamese is not part of a redemption process. So you, you go in there, and you ask for a rate, you take your dog with you, and ask for the highest rate that's available. It's, and they'll tell you. And then that's, that's one deal. But the Vietnamese Dong has. So that's a drop in the bucket compared to a drop in thimble of water in the ocean, because it's so small, in terms of what you can get for the Zimbabwe, the the Zim bonds. Okay, that being said, a 10 trillion Zimbabwe bond is, is insufficient, in my opinion, this is only my opinion is insufficient. If you ask \$500,000, you're going to be 10 times less than anybody else who's needs to be. And so you've got to get your total amount back up to where the the rate will give you sufficient amounts of money. Now, if it's a 10 trillion, you're gonna you should be getting asking for \$5 million, which will get you up to the same as a person with a 100 trillion. I hope that's, you know, without doing the math for you, that's, that's the way it is. So

T

Tracee 17:37

this person has 10 100 trillion, in addition to the 10 trillion.

R

Ron Giles 17:43

See, if indeed, it does show up before the the redemption appointment takes place. I still think that you need to go to your heart. I'm not going to tell you what, what rate you should ask. I would say from as a policy, what I say is, you get the rate from your heart, and it doesn't

matter how much gym you have. If you get more Zim Are you going to use the same rate that you've already seemed to to use? In my opinion, that rate comes from your heart or the heart knows what's coming. And that's the rate you should ask for all of the Zim that you have. That's my counsel to people. We don't know what's going on down the road. We don't know what's going to be required of us as far as on an individual basis about what projects are going to present it to us. And do we have enough money to take care of them? I'd never want to say no, because a humanitarian project means that there's people involved lives of people are involved. And we certainly don't want to be skimping, and not have enough money to do the things that are real good humanitarian project. So I'm saying and deferring your rate to your heart. I hope everybody understands that it is available for them to get that rate. They just have to work with a little bit. It's something that is new. It's just new information for a lot of people. And yet, a lot of people are finding that they tuned into their hearts, they're getting a rake that they feel comfortable with. And that is the pattern that I'd like to reproduce on every person so that their heart is involved and engaged in what they're trying to do. So I hope that that is sufficient. The rate you ask is the sacred rate, I'll call it the sacred rate that comes from your heart your mind might be a little bit behind because our minds have no conception of a trillion dollars yet alone more. However, we have to stretch our thinking because this is all brand new. And you can't just sit around waiting for stuff to happen when you're in the old paradigm. Stretch yourself. You don't know about quintillion dollars, find out. Go on there, go into eBay go where wherever you want to go and learn how much money is involved, that is vital for you to understand. If you do that, then your mind's not going to get in the way of your heart. So and it will, it will get in the way of your heart if you don't learn how to understand the larger amounts and get an idea in your mind that that's what you need. Next question, please.

**T** Tracee 21:00

I would like to know when I will become a benefactor and I want to build a healing center. Is there a time limit for how long that there should be built and been? Because I need to wait for the downloads?

**R** Ron Giles 21:15

Where there's nothing you could do before you get the downloads of funds? So I'm not sure what the question is, that would should be very obvious to us. When how when will I become a benefactor when the funds come, and the RSS program is up and running. And we get all of the things put in place. And if you are that humanitarian which most of us are going to be unless you're a skill. It should be no problems and you getting your funds that you need. You're trying to jump the gun here. If the funds are not available, you don't have funds to use. So it's a simple matter of realizing that it takes funds to do stuff. And until they're there, you can't do those stuff. We're working as hard as we can on it. And maybe it is our group of people that are not prepared. As far as being a benefactors concern. They're just giving us more time to learn what we need to learn. I don't know that that's a factor, but it could be. Are we ready? Are you ready? This person wants to be a benefactor. Are you ready to become a benefactor? Do you know what a benefactor is? Do you know what a benefactor will do? Or is it just because that's a way for you to get your money, you've got to come up to speed. And there's no lazy way to learn anything. Learn how to be observed benefactor, you just have to get in and do it. And that's your job. When I say job, you're going to be humanitarian for the rest of the 100 years. So are you prepared to do that, and as soon as you are, then maybe you will, you will become a

benefactor. And it may take some time. I'm hoping that you'll get them up to speed so that when you when the time comes for the appointment, you'll get the appointment and go ahead and get your your funds. That if you're sitting around waiting for something, and the RV, they happen if the RV happened tomorrow, are you ready to become absorbed benefactor? Do you know how to function at that level? I don't know if you do. I don't know that you don't. I'm just saying that because everybody's different. And everybody has a chance to learn the way that they're going to learn and want to learn and have the time to learn. And so if this is not a priority, then you'll take a lot of time to learn if it's a major priority, and your heart is so centered on this, that you really want to know exactly what you're doing, then you'll get in and become very, very efficient at the use of our programs. So it's coming and if you're prepared, you shall not fear period. And that's where we're hoping we're doing all that we can to get you prepared, prepared. Next question.

T

Tracee 24:20

As a benefactor when we pay for a service what name can we use as our company? Can we give ourselves a company name since Ron said we should not use LWS say a nonprofit blank blank blank so that we don't need to use our own name

R

Ron Giles 24:40

yes, it's don't use lab one society but use a name that you feel comfortable with green one up and, and function from that. You know, I've got level one society who really knows what love won society is and that's your part of our programs. So I can use that if I want to, but I'm not going to use that for the name of the company. You know, especially when my CAC programs, I will name the CAC location. Like I said, Glendale Community Assistance Centers, or Kearns Community Assistance Centers, it'll be on the door. Be a very big office with the very use what you want. I'm not the one that's in charge of it. Just saying don't use love won society. Next question.

T

Tracee 25:40

I have come to realize that anyone can go can get into the QFS 2020 site by either putting in the search engine QFS, or love won society. So if a director of mine wants to know if it's me who has the money, this person can find out by looking at the que Fs love won Society website, and they will have access to all the teachings and the q&a. And they will hear you teach you about how to stay anonymous and how we can spend the money on what we want. And from this draw the conclusions that we are the benefactors? Have I got this wrong? Or am I right in pointing this out?

R

Ron Giles 26:16

You're right in pointing it out. I am asking you, is there a better way to do it? Is there a better way to do it? We've got to do it the way it is right now. It may not be perfect. And you may have somebody that wants to research out and find out what's going on. If you give them information of love won society and start calling a love won society, or even use the QFS 2020.

I don't know if we're going to continue that sort of thing. We'll see. I don't know of a better way to do it. If I did, then I would. But there might be one or two people that find out. And is that and then if they're the kind of people who will cause your problems and fire them, Director, we don't need that kind of stuff. We don't need any problems. We don't need a bad apple in the bushel of apples to turn the whole bushel bad. So the spirit will help you to understand who to who to engage as directors in your CAC program. They will be the right ones who will harmonize very well with the Alliance programs. Next question,

**T** Tracee 27:40  
and why would anybody search up leveling society?

**R** Ron Giles 27:45  
Yeah, they know who knows about it? Who knows that that's the entity and who knows that QFS 2020? Is the is the site to train everybody. I don't I don't know. To me, that's kind of a worthy of question that may happen. But we don't know.

**T** Tracee 28:05  
And I just searched up Community Action Center. And on the first page, there's nowhere about leveling society or QFS. I think we're in the clear.

**R** Ron Giles 28:17  
Well, it's community assistance programs anyway, so it won't come on man search engine.

**T** Tracee 28:26  
Tracee did a big faux pas.

**R** Ron Giles 28:29  
Okay. join, join. Join the movement Tracee.

**T** Tracee 28:38  
That's funny. Okay, next question. Will the employees of the small business that we are contracting with be required to pay the \$10 fee to be able to get paid through the RSS platform? Or will that be waived in the contract with a small business?

R

Ron Giles 28:52

If I were the owner of the business, I'm implying to say I will pay the \$10 for registration fee as a beneficiary in the RSS program. And here's my and I'm referring you and so you're going to be signing up under me and I'll pay you the \$10 to do so. Now, that's just the kind thing to do. Then comes the idea. And I'm very, very adamant about this. so adamant that people don't understand what the \$10 fee is for. It's a registration fee. We'll call it whatever you want. The registration fee is the ticket that you get in to the program. It's like a ticket at the door. You may get \$10 or 1000s of dollars from the program. But the entrance is \$10 when you pay your \$10 you got skin in the game, you have ownership position, you have done everything that is qualified or needs to be done to qualify for the beneficiary program. If somebody just gives you the program, then you have destroyed the ability of that person to be able to pay for their way through life. And you don't understand how vital that is. You're robbing people of their feelings of self worth, when you start giving them something free, that they can pay for themselves. I would like our humanitarian people to get off, and I'm gonna call it this the damn giveaway, things free bandwagon. You're destroying society and the feelings of self worth of individuals by giving things away free, that they can be a part of, and working for themselves. So be very careful when when you say, Well, I have some people now though, well, I think it's, I think it should be mandatory. The person who refers should be paying the \$10. For the person who's going to be a beneficiary, he gets \$50 back. So I think we should make it so that every person that refers somebody pays it \$10 No, no, that's not going to happen. The \$10 is there for a purpose. And if you don't know that purpose, then you're countering what we're trying to accomplish. It's there for a purpose. Don't be giving away people's things to people free that they can get themselves and have the feelings that they have done everything they need to do to qualify for the for the beneficiary account and all the money that you're gonna get. You're robbing them if you pay the \$10. So be very, very careful. There are times when it's appropriate. But you got to follow spirit. And if you do that, then you'll be okay. Paying a forward to good idea, the concept. But giving things away free, I'm not sure that that's a good idea. In fact, I'm opposed to it. Next question, please.

T

Tracee 32:36

Is there a way to prevent RSS registrations overlapping for instance, person A is signed up with benefactor A's ID, then Person A then tries to sign up again, using benefactor B's ID to get twice the amount that is initially given in the RSS program? Or do we not really care considering the vast amounts of money being given out?

R

Ron Giles 32:59

We care. But it's not our responsibility to police this. If somebody tries to guess who knows if you've done that? The Alliance Guess Who knows, guess who's in charge of your quantum financial system account. If you go against what we have done, if you try to, to make this a game and start getting more money than is appropriate for you, you'll be eliminated. Now, when we talk about NDA and getting an NDA and then we break it down, there's consequences. Well, it's the same thing here. If somebody breaks their trust that we're putting in them and tries to go around us and get more money, they're gonna be falling flat on their face, they will not be a part of our program. And the, you know, what are the consequences? You you get another account and you're not supposed to, you may lose what you have, not just the one that you were trying to get. We don't want dishonest people. The Alliance doesn't. We're not

carrying dishonest people into the fifth dimension. They will be eliminated. To understand where we're going understand how important this is. Somebody screws up like this, then they have consequences that they are not going to appreciate. And that's the way it's set up. That's where it's going to be. Next question.

**T** Tracee 34:53

It's been stated that under the employment contracts, small businesses that we can't dictate how they run their businesses. However, I have it written up in my project proposal that a 20 hour work week will be considered full time. And that employees would have the opportunity to work up to 30 hours a week, at most, in addition to a month vacation time taken at the employees and employers discretion. This is in my mind's eye allows for more job opportunities, because staff would essentially be doubled, if not tripled with the current nine to five ways businesses are run, is this something that can be in the contract, I feel work life balance is an absolute must going forward.

**R** Ron Giles 35:32

A business owner is in charge of his business period, we're not going to tell that person that he's got to go to an eight to five, or an eight to 930. We're not going to do that it's none of our damn business. This is his business. We're assisting him. We want him to stay in business. But we sure as hell are not going to be dictating to him what he should be doing with his business, and with his employees. That's overstepping. That's crossing dominion, it is not our responsibility. And in doing so, we're acting like God, we're going to tell you what to do, because we got the money, that is wrong. That is totally wrong. We're not putting ourselves above other people, we're not going to go over and take care of his cash register for him. That's his job. That's his business. You let that man do or women do what they want to do. If the employee doesn't like it, then they quit. We can make suggestions. But we don't dictate. We can say I'd like to see, get more employees and have a 30 hour week instead of a 40 hour, you can do things like that. But it says negotiation, it's a suggestion. A you deal with that person the way that God would deal with you. God's not going to be telling you what to do, giving you a free agency. So there's the right principles involved here. And you've uncovered one that's really quite interesting. We don't dictate to people, we suggest we give opportunities for them to change, but we do not force them or require it. That's not our business. Sorry about that. I'll get down off the podium. And we'll get back to the next question.

**T** Tracee 37:52

Well, actually what I like because, you know, as a health coach, I don't tell my clients what to do, but I guide them to come up with an answer for themselves. So maybe on something like this would be something like, how do you feel, you know, how do you think you'd feel about working less hours? Or how do you think your employees would feel working, you know, just like guide them and ask them questions. So they come up with a with a solution that feels right to them, you know.

**R** Ron Giles 38:23

And I like that, Tracee? I do. And that's the way that the counselors will be working with us. And you're going to have a chance firsthand to see how the appropriate ways of dealing with people are. They're here to assist. They will not make decisions for us, the counselor, there is here to assist us, and we will have discussions will come to conclusions. But they're not going to dictate it. And that's what I think we need to do with the people that we're working with. Putting them on contract so that they stay in business. It's their business, not ours. We want them to stay in business so that they're serving the community. That's our job. To Okay, next question,

T

Tracee 39:15

can I register entire communities with the RSS?

R

Ron Giles 39:20

Is there a reason why you think you can't? When I say that, are you the one in charge of it? How are you going to miss you give a referral of yours in benefactor, you have a master idea, you give a referral. And then that person will will have his own ID and he will go out and refer other people. And that's the way this whole program is going to go. It sounds to me like you're trying to do something on your own. Just let it it's it's, it has a life of its RSS will have a life of its own and you cannot control it. know, everybody in the community will want to be on RSS on the RSS program. So when I can I register, I'll just simply say no, you don't register them, they registered themselves. And then they give referrals to those who want to, they would like to have share with sharing with the program. And then they get a thank you bonus. And every two people they get another penny for their download, which is \$100 a week. You know, in America, that's where it'll be. And it's each different country. We'll see how that goes. Eric, get them registered the entire community, the entire community will be registered eventually. But maybe not even having you involved. This hampson's on its own? Next question,

T

Tracee 40:55

is the registration fee of \$10 per registration, go back to the master RSS account for each registration.

R

Ron Giles 41:03

That is correct.

T

Tracee 41:06

If the accounts are in the QFS, and people want to pay in cash, how will the payments be made?

R

Ron Giles 41:12

That's a good question. I'm going to give you my answer my opinion, the banks will go away. And they will be repurposed as financial service centers. If you want to pay cash, like you're looking on a, for sale, ads in a newspaper or something, and you call the person up, and they want cash, and then you go buy the car from and pay the cash and then they give you the title, that sort of thing. Then you go to the Financial Service Center, and you have them draw out cash from your account. The way that works is the digital gold certificate is then transferred to the serial number on the on the bond or the money that you get. So those people that get your, your cash for their car, whatever it was, they go to the bank and they put it in their account. Well that that serial number is now retired, and the original Gold Gold certificate digital gold certificate is married back to that increment of money. That's how it works. And so it's it's not a problem. We'll have cards and things cards from the QFS that we'll be able to use. I'm not sure how that's going to work out right now. But I believe that's the best way to work. So it's a, it's an account to account transfer, you go to the store and you show them your card or whatever, no, there's, there'll be a device there. Just like we have them now. I'll read your card, and it'll be an automatic transfer, zip, bang, it's done. Money's in their account now that your account transactions completed. It'll be happening all over the world, trillions of them at a time. So let's just be sure we're okay. With that. In workout, they've got good plans for us, and will really love what they're doing. Next question.

T Tracee 43:26

In the beginning, can I focus more on CAC ease rather than the other programs?

R Ron Giles 43:35

Chuck to you at your life, you're in charge. You may never want to do any of the other programs and the RSS and CAC. And that's fine. It's it's all what you want to do, you are in charge. You can implement or not, it's up to you. You can build a big organization or just have one that's just in a community, it's, it's fine. Whatever you do will be just perfect. And then the Spirit will move on you to do other things. And that will just be perfect too. So we'll allow you to allow yourself to be led by the Spirit because that's we're working in harmony. And it's a much, much greater opportunity to work in harmony than it is to just be on our own. Next question.

T Tracee 44:28

Looking for privacy and a low profile, can I set up several trusts for each project and for each purpose?

R Ron Giles 44:37

Yes. That's the way you want to do it. You're in charge.

T Tracee 44:43

You kind of already answered this. Is it possible to do the RSS alone or do the RSS and CAC

need to be done together?

R

Ron Giles 44:53

You have to do the RSS first if you want to do the CAC that's up to you there Question.

T

Tracee 45:01

I have watched a number of training videos, but I am still confused with the exact processes to get started, a more simplified step by step process will be helpful. I am from New Zealand. And I'm confused as to how I will be contacted and how to start the process. Because I don't want to miss out and want to hit the ground running early. I'm extremely excited to give to be given the opportunity to help people, my country, the rest of the world and make Mother Earth a clean, beautiful place as she once was. I'm so many ideas and plans to help people and their communities.

R

Ron Giles 45:36

Well, I think that that's a wonderful heart. And I appreciate where you're coming from. I'm, but I'm not really sure what you're talking about as far as the confusion. What is the step? Simple, more simplified step by step process would be helpful. Here's here's the most simple step by step process. You put in QFS2020.com. And it comes up on the homepage, there's things there that you can read, and so on and so forth. The next menu item RSS, and QFS, or whatever it is the name on the top, click on that. And the first one is the glossary. Then there's some others and there's another list of articles to read. Now, I'm going to ask you have you read those yet? That's a good question, isn't it? Have you read all of that? Do you know what the cue or the the NESARA and GESARA is, there's a whole article on that there. All kinds of stuff and information is there. So you read first, or read as if that's important for you, and then listen to the videos, I think you should read first, because then then videos will sound much more interesting to you. Because you'll have a basis of understanding. And so once you've read through those, and you go through them again, and then you start applying them in your mind, we don't have the money yet, but it couldn't apply it in your mind. How am I going to find a director? Who am I going to have with that they're right in front of you, you just have to make up your mind that they're there. And then seek them out. So the spirit is behind this and will move you to the right place at the right time. And that's a two way street, they will move the other person who is supposed to be a part of your program. And to the point where you might bump into each other going around the corner. Oh, excuse me, and then Oh, you dropped your purse, I'm sorry about that, and you started a conversation. That might be the person that you want. We don't know how it's going to work out. We just know that it is. And it's that faith in the process. It's going to make it a very successful venture for you. But New Zealand is a beautiful place and needs us meet many humanitarians as they can have. It's important for you now to get yourself positioned so that you can really do some good humanitarian work. So don't be afraid. There doesn't need to be a step by step process of outline it but there it is, it's all there. But it is self education program. We can only provide you the information, you have to read it and understand it and get to the point where you feel comfortable with it. Also, when the time comes, and you go get your money, you now have a counselor, somebody who's your advocate, somebody wants you to be the best humanitarian you can possibly be. They love

you. They love you already. They know who you are. This is heaven coming down on Earth to help us to create heaven on earth. If you're going to look at it that way, just know that we are loved and know that we're going to get all of the help that we need to do the work that we have been tasked to do. And that is to create the golden age of mankind on the earth and perhaps other places as well. So I hope that helps. Next question.

**T** Tracee 49:39

I live in Europe. I want to help also with humanitarian projects that are outside of my country in another country. Can I do that?

**R** Ron Giles 49:48

Yes, you can. Have a problem. Next question.

**T** Tracee 49:53

I want to be a benefactor and a beneficiary. I understand that as a benefactor. I cannot have six trust Just motherlode account as a beneficiary, I can't have six trust, both as a benefactor and beneficiary, how will that go?

**R** Ron Giles 50:08

You need to understand what a benefactor is. And you need to understand what a beneficiary account is. A benefactor is the one who finances the beneficiary accounts. Why do you want to be both? If you wanted to use the process, you know, if you want to become a beneficiary, and have a budget for your money, or expenditures, and so forth, you're not going to be a beneficiary set up your own benefactor account. That's going to be available for you set up your own benefactor account. Put in there how much money you want to get on a download, figure out how much money you want on a monthly basis, or weekly or whatever basis and do it that way. It's your money. You see, I'm confused that what you want to do, you want to give yourself your own money? Well, it's your money. So call it what you want. You're a benefactor in the RSS program, you set up your own account, and then you pay your pay yourself. It's simple, but you need to understand more than you do about the benefactor and a beneficiary. The first drop down menu on the website is a glossary of terms that we use, be a good idea for you to memorize what a benefactor is, and what a beneficiary is. Memorize it. So that you are sure that you really understand what it's about, because right now, I think you're confused. And we don't want that. Next question.

**T** Tracee 52:02

In my redemption appointment presentation document, I am requesting a trust us the account to which God's money will be downloaded. This will allow for another successor trustee to take over my humanitarian work in my absence, without having to use my name. Nothing has been

said about what happens to benefactors sustained download obligations after the Benefactor has completed his 100 years, or dies before his term has ended. Any comments?

R

Ron Giles 52:30

Why? Yeah? Why are you worried about that? Why are you worried about 100 years from now? We may not even need money in 100 years, and you still be getting it? We don't know what's coming. And it's one of these speculations? And I don't know how to really answer that question. Now, if you want to trust account to do the things you want to do, then do it. When you have a successor trustee, that's fine. You work all that out. But if you get into med beds, and you take care of yourself, you're going to live 100 years, or 1000 years. Who knows? Why limit yourself? We'll have all the money that we need for whatever we need to do. Even in 100 years. What about all that extra money you've accumulated over that 100 year period of time? It's hard to put a number on that. But you have that available. And you won't use it because there's maybe nothing to buy. Don't Don't worry about these things. And I you know, it's a concern. If it's a concern, then you thought it through. But I'm not the answer to that question. Because I don't know what's going to happen in 100 years. I have no way of knowing. I just have faith, it's all going to work out best the best way it can for us, in the golden age of mankind. 1000 years of peace and so on so forth. We get to be a part of Well, thank you, everybody, for your participation with us. I hope it's been helpful. We're moving along. We're over 10,000 I've said that before, but I don't know how many. You know how many people we have now Tracee?

T

Tracee 54:30

Let me look really quick. We have 11,000 now.

R

Ron Giles 54:37

Wow. Well, it's growing and it's growing. And these are new people that are coming in. So we have patients with them in get involved in the learning process. Love everybody and appreciate their wanting to be a part of us and do their humanitarian activities through us. It's a blessing for all of us. So, with that in mind, let's say And for now and have the rest of a good day Thank you Traee for all you do

T

Tracee 55:06

you're welcome
