

Q and A - Jan 17th Part 1

Thu, 3/31 9:28PM 1:00:38

SUMMARY KEYWORDS

zim, question, money, people, alliance, humanitarian, bond, benefactor, account, appointment, funds, problems, currency, contracts, understand, beneficiary, project, society, redemption, place

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians. This is Ron Giles again here with Tracee, we're going to do a question and answer period. Today is January the 17th. Monday, January the 17th 2022. With that introduction, let's go ahead and start our first question, Tracee.

T Tracee 00:21

Okay, do funds placed into a benefactor bond account remain in this account? And are they still usable by a Zim benefactor for projects?

R Ron Giles 00:32

It's an interesting question practicalities of what we're talking about here. Let's say you're a 100 T note person, and you get the 500,000. That will give you 1.25 quintillion per quarter. All I'm saying is at the end of the quarter, you're going to get another 100 or 1.25 quintillion. What you haven't used goes over in the bond account. What you're presuming is that there's a possibility that you will run out of the money from your new from your each quarterly payment. And I doubt that that will ever take place to be honest with you, I really doubt it. So those that bond account will accumulate over a period of time. Now, if it's a bond account, it's used to bond that the activities of contracts and so forth that you you that you do, as a result of your activities within the different programs. If there's a problem, I suppose you can take the money out of that bond account, but the chances of that being a problem are very limited. almost non-existent in my perception. So but the bond account will be attached to your master account. So if there's a problem, and you forget to put money in the master account, and people in the computer, RSS platform computer is trying to drive down money and yours, not there, it will go over to your bond account, because that's what you have put in backup. And so it'll all be in the contract you do for Zim benefactor, but the bond account will be a backup or a bond. I'm saying bonds a lot. But the concept of a bond account means that you're, you're bonding your performance. And if there's a lack of it, then the computer will pull from that account into your

master account, and then download the money for the persons who are drawing the money. So it's a backup. I don't think you'll ever have any need to do it. But it'll be plenty there in case you do. Next question.

T

Tracee 02:57

I have 10 Tease them, my project will benefit people 100% with jobs, counseling, meditation, temporary shelter, to help them stand on their feet teach to plan fruits, plants, fruits and vegetables, it will be supported by donations and my own income. I'm taking nothing when I go to the other side. So I dream to make a place that will last for a long time and will benefit many generations.

R

Ron Giles 03:21

Well, it's an it's an interesting prospect. It's more of a statement. And you know, and I wish you well with that a 10 T note can get you a long way down the road. But it also depends on the rate that you choose. So I'm saying that a gym benefactor needs to be up into the quintillions. As far as their their payments, structured payout payments come every quarter. You need to get it up there. So if you've got 10T t, which is \$10 trillion, and you need to get up to the equivalent of one T 100 T, then you'd ask for \$5 million instead of 500,000. I'm just saying here's the math, it's it's your decision, you can do what you need to do. I don't know if you have the discussion or the idea of the med beds. And if that's not been introduced to you then take that into consideration. Find out about that because you get in the med beds and you know, you can live for 2000 years, way beyond what we would need as far as a need for a lot of money. So we will have plenty of money and will live a long time and as we move into the fifth dimension, the requirement for money will change and there might not be money necessary. Because there's so much around anyway so what money is needed, there'll be plenty at that particular point in time as I perceive it in my mind. Anyway. So med beds, your, your key for your stuff. And, and keep in mind, and I'm saying this out loud, we don't have, I mean, we've got all of these really good ideas as humanitarians. But you can you're saying you teach people how to how to plant foods and fruits and vegetables, and all that sort of stuff? Well, it's not going to take a big deal for 1000s and hundreds of 1000s of people to be doing that on their own. So you it's not as if you're going to be doing that, and people are going to come and take advantage of it. And, and, and make you feel good and all that sort of thing. It may be a project that you'll get involved with. And once it's completed, then it's, you're going to be looking for other things. And that's why I say the Alliance agent will be funding you, not your projects. Please keep that in mind. Because your projects, once you once you finished once the housing is done for all of the homeless, what are you going to do? What's your next project? So let's be wise with what we're doing, and come from our hearts, but also come from the counsel that you get from the Allied sagent? Who will be your new friend and counselor for the next 100 years or whatever. So we'll go from there. Next question.

T

Tracee 06:36

When a benefactor is set up with our master account ID and they have been shown how to access the system properly, will funds be accessible from that point? And what will the currency be called? I'm Australian, so I'm assuming my currency will be Australian dollars, is

that correct?

R

Ron Giles 06:53

I believe that's true. Yeah. Don't worry about what you call it. Australian dollars AUD or whatever it is, it'll be there. And you'll be able to have access to it. So doesn't matter what you call it. There'll be fans. Next question.

T

Tracee 07:11

I'm listening to the constant stream of questions from people and considering how this begins to take shape. Do you believe as the news and benefactor that you should not actually use your personal name for your master account, and on your hand out referral cards, if we have signed an NDA to help protect love won society and ourselves, especially during transition isn't putting your actual name on the referral card to be counter to the intent of the NDA, I can imagine, even if I have a represent to a humanitarian society, and I personally had no money, I can easily imagine what might happen if I even left bread crumbs to find me, as I try and live quietly in my town.

R

Ron Giles 07:55

I think that in my opinion, this is overthinking it. Because let's let's look at the practicality. You as an individual have as Zim benefactor will have a master ID number. You sign somebody up, haven't go to the website, the RSS website and sign up. So they do. Now who knows that you are a master ID who knows that you are a Zim benefactor, that person won't know unless you tell them there is no trail back to you. Because that person has no idea of who you are. Your ID number has or your ID number has no relevancy to you, they will not come back to you because you're no different than John Doe over in Alaska, as far as they know, unless you tell them. So who's going to start, you start with whomever you want. The only problem you'll ever have is if you start telling people who you are as they sign up. And then you know, maybe your your relatives or something like that, that you sign up. But you need to have your name on it. Show that it can be done processed properly. So when you when I say you needed to have your name on, you need to sign up in a way that will using trust or whatever you wanted to it doesn't have to be a legal entity. You can use your own name or somebody else's name or something of that nature. If you feel concerned about that now Also understand we're going into the golden age of mankind, people who resonate with the higher vibrations will not be doing this sort of thing. Those who don't resonate with the higher vibrations won't be on the earth, it will be a transition. But those who do not belong in the fifth era, and in the higher dimensions, then the golden age of mankind will be removed, we're not going to have problems that would precipitate something of this nature having problem for people in the transition, we won't be sure that we don't have that's why the NDA and that's why there's a limited time on the end, I think it's going to be 90 days, you're going to learn a habit of how to respond to people. And in that habit, and how you respond to people is where your anonymity is going to be maintained. And you will be sitting down with your alliance agent, the angel, whatever you want to call that individual. And you work out the details. That person is invested in you and wants to be sure that you don't have any problems. What greater counselor could you get than somebody like that? Also understand that there is then transition. So the problems are going to

be going away over maybe six months, maybe three months. I don't know how long, I don't know that that will have problems, the alliance is not going to let us have problems. So that's why they give us an agent to counsel with. So don't overthink this next question,

T Tracee 11:48

trying to figure out the structured payout concept. If we receive a quantity of funds at the redemption appointment, that becomes a fixed fee in our primary Alliance held account. If we ask for a 10% payout per year, paid quarterly, wouldn't the totality of funds last only 10 years versus the requested term of 100 years,

R Ron Giles 12:11

you'll need to go through this again, you'll need to find you'll need to go into the structured payout concept. Your primary account is your Zim times the rate that you have that you ask for. Now, what is that I call it a primary because it is only there for one reason. And you can ask for 10% of that, or 5% of that as your monthly or your quarterly or annual payment actually is worked out in an annual sort of way is your annual payment. What you get is a total for your gym times a rate has nothing to do with any money. It's not money put into an account, it's a figure. And you can ask for 10% of that figure on an annual basis, or 5%. Once you ask that right and set it all up in place, the alliance will put the amount of money let's let's go back. And let's say you have a 100 T note at \$500,000. That's going to give you 50 quintillion dollars. And you're going to take 10% of that per year for your structured payout. The secondary principal is put into your alliance account that will hold your funds for the entire period of time for 100 years. So do the math. If I want to 10% for a year, that's five quintillion dollars. How many years have I'm asking for the term? I'm asking for 100 years. So you multiply 500 Or five quintillion times 100. And it's 500 quintillion dollars that goes into that account. And you'll get five Quintilian per year for 500 years, because you set it up in the beginning, that money is set up at the appointment for the next 100 years. That's why you have to make up all this, this idea in the beginning. Now once you've done that, your first payment will be given to you at the appointment, it will be put into your quantum financial system account that you establish at that point in time for them to put your money in. Then from then on, you don't have to worry about money you'll be getting that. So there's no deduction of 10% per year of the primary principle It's only a figure that we used to find to tell the Alliance, how much you'd like on a quarterly basis. I hope that helps. But if you read it and read it with that kind of thought in mind, you'll, you'll, it'll click for you, in my opinion, next question.

T Tracee 15:22

Do beneficiary set the amounts for each trust?

R Ron Giles 15:27

No. They have no say, period, exclamation point, a beneficiary, they get what they get 10 cents per minute for their account, and 10 cents a minute for each trust that they establish. Period. There's nothing that the beneficiary can do to change things that has to be done. And the and

the benefactor, the Zim benefactor, who's in charge of that has no ability to change what the beneficiary accounts are, it will be from love won society, they will have the Benefactor will have the ability to change things, when they do the contracts, contracts. And for the business owner contracts, and that sort of thing. They have complete control over that. Set up the way you want to, but the beneficiary has nothing to do with it.

T Tracee 16:25

They know right? Make it just make it whatever they want. Maybe they met. Maybe that's what they met. Well, we'll see. Okay, I don't understand exactly what you are. I mean, are you from this world? Or from a foreign other world been? Are you have? And for God, our Creator? Or are you from the devil? What? I'm, I can't believe this. I'm scared to read a lot of what you say because I don't want to be led away from God, Jesus is my Savior, can you please explain?

R Ron Giles 17:05

I would I would only differ to your heart. If what I say resonates with you, then what I say is true. I'm not from another world. I'm not from the devil. This information for love won society has been downloaded to me by my guidance system that has given been given to me by my Father in heaven. Period. If it doesn't resonate with who, then I would suggest that you go find something that does. Because what you're saying to me is, I don't believe my heart. And if you don't believe in your heart, do you believe in the Savior and Jesus and all that sort of stuff? Yeah, I do, too. My relationship with Jesus has been there for over 35 years on a personal basis. If you can't figure that out, I'm wondering, if you're connected to your heart, you're being led by your mind. And if you're led by your mind, you know, by my sympathies, there's real love in the relationship that you can have with God. So I'd like to, I'd like to help you. But there's nothing I can do. It's all in your heart. Nothing I can say will change it. But I refer you to your heart. If it's not there, then you're not part of us, period. Next question.

T Tracee 18:54

I have purchased my Zim online with eBay and others. How will the Alliance know I have Zim?

R Ron Giles 19:02

Well, let me ask you a question. Do you know who the alliance is? It's a term that describes an alliance of people that got together to do this. Do you know who they are? Are you aware that Jesus is the one who was in charge of this earth? What do you think is as the head of the Alliance for as they deal with things pertaining to the earth? I can't just sit here and tell you who the alliance is their Ascended Masters. They're the highest form of spiritual nature that there is. They are a new extension of creator and they comprise of the Spiritual Hierarchy of the heavens. You don't get any better than this. And you're wondering why I say that the alliance knows who you are diseases know who you are. This God know who you are, as your Father in heaven, the one that created you know who you are? Do you know that they can tell you everything about you what you have for lunch yesterday, your angel that's going to be working with you is already involved in your life. They are preparing to be of great assistance to

you in any way that they possibly can. They're already engaged with you, but you don't know that. And you won't know that until you get introduced. You need to really understand who the alliance is. Because to me, when you ask this kind of a question, I'm thinking to myself, Wow, where did I go wrong? Why does I've pulled out all of these articles about the alliance? And people are supposed to be reading them and then ask this kind of question. I'm thinking, Oh, where did I go wrong? What have I done? What have I lacked? All I can do is put it out there. All I can do is all other writings and the videos and everything that I've done. But you've got to start learning and thinking these things out for yourself. Because when you ask that question like this is obvious to me that you have not done that. And to be honest with your collar hurts. I'm trying to help you to become the greatest humanitarian that you possibly can be. The heavens are trying to do that. The Alliance is trying to do that. You just need to grab hold of this and get the vision of what you're going to do as a humanitarian. Are you going to tuck right into the Alliance? Because that's who they are. That's who we are, as part of the Alliance. And we are part of the Alliance because we're the ones that are going to do the work for them. They give us the tools, but we got to do the work. Humans on the earth have to do the work. They haven't can't do that. The Alliance can't do that. Well, part of the lions can, the boots on the ground are all involved in the benevolent, extraterrestrial, so they're with their technology. But we have to do the work on the ground, to bring in the golden age of mankind. It's important for us to understand what we have, and quit questioning it and allow it to be true. Next question,

T

Tracee 22:50

please, could you let me know what it is that I should do and how to go about making love won society, a lifelong partner?

R

Ron Giles 22:59

We want you to be a part of love won society, we're training you to be as in benefactor as a humanitarian, you're going to get money. Keep in mind that love won society is only a structure for you to implement your humanitarian projects. We're here to help you to enhance your ability to do your work. What you create with love won society is what you create in your own life. We're here and we will support and do the things that are necessary to accommodate all of your projects, to the use of the RSS program and the contracts and the structure that we have created. But your relationship with us is determined on what you want. We can't force it. I hope you understand that. love and appreciate you as a member of the humanitarian army that the alliance is putting together. And we get to do the work for them. So your relationship with love won society as a partner for all of your life is is there if you want it to happen? Next question.

T

Tracee 24:15

I searched for the information about what is the order of currency. One is a Yodalillian.

R

Ron Giles 24:24

A Yodalillian is a really, really, really, really high number. It has really nothing to do with money. It's just as a way of determining what that amount of money would be called. I've tried to figure out what your Lillian is, and how many zeros are in there. And I have not found somebody that

out what your Lillian is, and how many zeros are in there. And I have not found somebody that can do the math to do that. So I just have a really big amount. That's the granddaddy from my perspective. What is the order of currency? I'm not sure exactly what the order is supposed to mean, the currency that we have our bonds from Zimbabwe and their inflation that took off so drastically, they had to have big bonds. So you don't have to carry a dump truck around for 100 trillion notes, to get enough money to buy a bus ticket across town. So they had to go to these higher notes. And that's what they've done. And that gives us an opportunity because some of these higher notes, and the rates that we're asking are really going to be phenomenal. And it's all setting up so that we can do the work that we are here to do. And get the higher rates get the highest amount of Zim that you can and go for the gold, if it's gold, gold bonds, silver bonds doesn't matter. Or even the ones that are printed, the 200 or 2008 series bonds. The Alliance doesn't care. They're caring about you, not what you've got to get your money. They will redeem any of those things that you purchased for the purpose of getting your funds. I sure have a lot of people still wondering about that they write and I send them the will these are gold bonds. These are gold, and it says here that this is there. They're just toys or trinkets or whatever. I'm saying, Well, what is what are they supposed to say for defunct currency? It's not real. Only the alliance is making it real for any of us. So those are the things that you need to understand. What is your Lillian it's our really, really big number of zeros. Next question.

T

Tracee 27:05

There are videos in my email without the closed captioning, I'm having trouble starting my preparations for my redemption appointment. I'm getting ideas from for RSS CAC. ESS, can you help? Let me answer this, please. So there is a document that we've sent out called important links for LWS. On that document, there are links for all of the YouTube videos, which should be closed captioned. The bitchute, I don't think we can do closed captioning on those videos. But on the YouTube videos, they are closed captioned. So please check out that document, check out the videos over there. And let us know if that helps or not.

R

Ron Giles 27:54

Yeah, just adding to that beautifully said, Tracee the subscripts. I call them sub close capturing whatever is in your particular language. And you can choose the one that you want German, French, Spanish, whatever. And that's where you can really get into and understand them if you don't speak English. I wish I speak I spoke French and German and Russian and Spanish whenever I wish I did, but I don't. And so I that's the only way we can help you. Without hiring somebody to do it. We don't have the money to do them. Next question.

T

Tracee 28:39

As a benefactor, I sign up a beneficiary and this beneficiary signs someone else and so on assuming that I am the only benefactor in the up line. And the person that is 10 levels below does not know me, what if that person is working as say head of the accounting for a company that we could recruit into the ESS? What means would that person have to enroll the company he works for the program and what procedures put in place to put such company under ESS?

R

Ron Giles 29:12

RON GILES 29:12

Okay, keep in mind that an employee is not going to be privileged to any information other than what they need to know. As a company, the corporate heads deal with our highly trained people that will be doing some of these larger corporations and doing the contract for them. At that level, nobody's going to it's all going to be under a nondisclosure agreement and non circumvention agreement. There's all kinds of things that will be in place so that you, nobody's gonna know who you are. My mind is saying Why don't you learn the programs instead of going to this kind of thought processes, they are there and you can go them and it's just a mental exercise. But you're not catching the real vision of what's going to happen. It's like you say, well, there's a guy driving down the street and his name is so and so. Well, everybody's gonna know who he is. No, they're not. Why would they be interested in knowing they're not, that's not part of your life. So there's no way for people to know who these upper echelon people are going to be, who were doing the contracts, and the gym benefactors involved with those contracts. Now, you have to use it. And you can, you can be the representative for the trust or a trustee or whatever you want to use, as a result of your conversations with your alliance, agent, your your angel, you're going to have all of the help, you need to be sure that your anonymity is going to be maintained. And so will we, it's so important, but there are certain things you have to be able to do in a legal way. And your name is a legal entity that they're going to be doing business with. How can you stop that? I don't know. How could you sign a contract? If it's not you? How can a trustee sign a contract for the trust, unless they put the name of the trust down? And his name as the trustee, you got to be practical. And it's going to be practical. And we're not going to have opposition to what we're doing. Over the transition, we might have a little bit concerned. But once it's in place, then it's there's we're not going to have people that are going to cause us trouble. And that's one of the problems that people have, in our questioning, they think that what is happening now is going to be in the future. It is not these people going to be gone. They're not going to be here to cause us problems, we will not have resistance to what we're trying to accomplish. This is a golden age of mankind, at those kinds of people will not be participating with us. Unless they're of a higher vibration period, exclamation point, they will be excluded. How that happens is none of my business. I'm not their Creator, I'm not their soul. They account to other people than me. Next question.

T Tracee 32:33

I would love to come up with a different name than upline, because that just sounds like it's an MLM or something. You know?

R Ron Giles 32:42

Yeah, it's, it's the beginning of the chain of beneficiaries. The way that I call it,

T Tracee 32:50

right, but we just it would be great.

R Ron Giles 32:54

It'd be great if there wasn't any network marketing. iaron around. but most people are able to

understand things because if even if you don't like it, you understand the jargon.

T

Tracee 33:07

Okay, next question. If we humanitarians and love won society are able to spread the incredible wealth around this world. How is this not going to create inflation, more demand and less products in the economy?

R

Ron Giles 33:20

The secret is in the ESS. You go read that and then come back and ask that same question. And answers it right there. We are in control of the economy. We are in control of the prices. And we don't have to get paid for anything we do. In fact, we're not going to. So free. So if I buy something and resell it, do I determine the price of it? Yes. Love won society is doing the ESS program, we buy everything. And then we can control the price of it. Where's the inflation? Inflation is part of the central banking system, where you make money out of thin air, and then charge interest on it. That's called inflation. What we're doing is we're building an economy that works for every person in the economy. Every person is financially viable the way that we do this. And if you look at the programs and understand them, you will you will have an aha moment I see what he's talking about. Every person in the world should have an employment contract. Everything that we buy, we will be in control of the price of that as it goes to the consumer. It's gonna take time, but it's the way it's gonna happen. Next question.

T

Tracee 34:59

I think you answered This question before, but I cannot find it. So I must ask it again, does a person have to be back in their homeland, their legal place of living to register as a beneficiary?

R

Ron Giles 35:12

It's a good question. And right now, it's, I'm going to say that's what we want. And, but how to enforce that I'm not sure. If somebody comes here illegally into the United States, and wants to be as in benefit, or wants to be a beneficiary, excuse me. They can sign up if they have a, an account, or some other legal way to indicate whether where they're from. Keep in mind also, that if you lie on this, you that will that will mean that the alliance won't allow you to have money. You cannot lie. You cannot do something illegal. If we set up our own rules, and this is where it's going to be, then the alliance will say that's the rules. That's the law. And if you're not in your own home country want to be a beneficiary. Why don't you go back home? Why do you build up America when you can go back to your own homes, and build up your country, with your family, with your friends with the traditions that you grew up with? Is that Is there not an incentive for you to go back home? You know, maybe there, you know, I've talked to people who want to stay here, been here for generations. And I think that's okay. I have no problems with it. But I want to be sure that the cream of the country's crop has not been taken out of their country, and leaving the country to try and find somebody who can lead. Let's be sure

that we're taking care of our own homelands. That's all I'm trying to say. I'd love to do it in a way that's accommodating everybody. And we'll see how that all folds out. Right now, it's my intention to do that. How to do it. I'm not sure yet. Next question.

T Tracee 37:20

I have a question regarding the NDA at this time. I do not have the funding to talk about our humanitarian projects, with those close to me, and this is okay, divine timing. I do understand. My question is if after my appointment, I am under NDA. Should I be talking to educating and recruiting people now, while not under an NDA, however, I do not have funding to back what up what my plans are, I guess I am unsure what I can speak about and what I can't my intention is always what is best for humanity.

R Ron Giles 37:54

The best thing for you, as far as the NDA is concerned, is carry on your life. You're not under an NDA. Carry on. If you feel inclined to fight to talk to people, then do so. Personally, I don't talk to a lot of people about what we're doing. Why? Well, there's no basis for them to understand it. They don't know about quintillions that we're getting they have no concept of a billion yet alone, a quadrillion or a quintillion. So we just we have to share appropriately. And if we don't share appropriately, meaning that we're not talking about quintillions when they don't even know what a million is. If if we share inappropriately then those people will have the the deer in the headlight look on themselves. And eventually if we persist with it, they will think we're stupid, will crazy. And we've lost our credibility. Why share inappropriately. There'll be a time when money talks, and let's let that money talk. It will not only talk it will scream that this is the way to do things. And those people who doubt us now or would doubt us now. They're going to come to the party, because there's money in it. And money is power. And we're using the power for righteous purposes. We're building a new economy for and bringing in the golden age of mankind. So we're on solid foundation solid ground. Let's not start giving that ground away to other people have no idea what's going on. It's very difficult, difficult for them to understand. It's difficult to us to explain it because there's no common words that we can use to really explain it to them. period is, if you're in training now to be as in benefactor, talk to me about terms. Talk to me about the things that are so exclusive of our programs. That is very difficult for us to even know what's going on, trying to explain that to somebody who has no basis and understanding, there's no reason to do that. It's just going to cause problems. So we let things wait till the time comes. We show our money, and we let them show show them how they can have part of it, share it with us. And then things move along very nicely, because the proof is there. Next question,

T Tracee 40:48

I understand is benefactors how money comes into our account quarterly or even yearly if we so choose? My question concerns the unused portion of the downloads, can that money ever be freely spent in the future? Is it combined with everyone else's unused portions into one colossal fund to be used in some way? Is it kept frozen with each individual benefactor strictly as a bond, a guarantee or as collateral? Is this money put back into circulation in the unlikely case, that giving gets the Benefactor in over his head?

R

Ron Giles 41:22

It's a concern that I can see that says kind of weighing in your mind, there's a certain amount of money that you can deal with in your mind. Beyond that, it's very difficult. We're learning how to think bigger than what is presently available to us to think about. So when you're talking about quintillions, of dollars, and you say, well, we're withholding that out of the out of the economy. We have 10,000 people right now that are in training, if all of them become Zim benefactors, with at least one Zim one 100 Tino, just that's 10,000 People with 1.25 quintillion quarter per year, or per month, per quarter 1.25 quintillion per quarter 10,000 of us, we're going to get the job done. And we're going to do it on an individual basis. But collectively it will come about because there's that much money that's flowing. And we don't have to have, we don't make money on our system. So we can go to Africa and drill 10,000 wells in their aquifer, and bring that water up and the farmers get it for free. We do the engineering and do the canals and the pumps and all that sort of get it to where they can use it. We don't have to get paid for that. They don't have to go without because we come along and we make their we create their breadbasket to feed the world, we do that in every location that we go into. That's where the money will be spent. If you put money into an account, it's not going to hurt anything to just leave it there. It's used as a bond. That's something and it creates credibility in the whole program, and all we're trying to accomplish. So let it just be that it will work itself out. And know that the alliance is behind it. And stop this thing out thoroughly. And it will be for the best good of all, not just one or two individuals. It'll be the best good for all of us, as a collective. And as a species. We're going into the golden age of mankind. Isn't that exciting? If you understand that, it's exciting. But if you don't then think about it. Think about no opposition to what we're doing no bad guys doing this, that the other. We're rising up into higher dimension where we learn how to create from our thought we might not make money after that. How long is that going to take? 25 years, 10 years 50 We got 100 to work with. And then we got 1000s of years after that. So things are going to change. So let's not project our problems into the future. Let's just allow the future to take care of itself. Because we're under God's direction under it. We're working in harmony with the Alliance. So it's going to work out really good. Next question.

T

Tracee 44:46

I am at a complete loss of even what to ask I have Zim do I take it to the redemption center wherever that may be, then do I let them know what humanitarian project I want to use it for clean water and feeding the population is the number one things that are the most important. Would that be on the list for humanitarian projects?

R

Ron Giles 45:06

Sure. I think that's just a great thing. Yeah. You take your Zim into your redemption, you have your, you know that you have this him, you've got rate for the Zim in your heart, you've got your projects you've thought it through, and you go in and present this to them. And they'll say, well done. Thank you, you've done a really good job made it easier, easy for us to give you the money you will or asking for the rates you're asking for, for the Zim that you have. There on our side, they're rooting for us. They've sent a counselor to help us. So things are gonna work out just fine. Redemption center, the Alliance, probably will not be using redemption centers, they

may I don't know, haven't said, they will contact us. And they will do things that are appropriately done a time when it's safe for us to have our money and safe for us to our money to be safe. So won't get in the wrong hands. Let's let's just allow this to take place, do what you can do, being led by your heart, by your by your mind, to some degree, but your heart to a greater degree, and not think this thing through to don't project our our minds are going to project into the future because we don't know what's going on there. And we're taking what we have now and projecting into the future, which may or may not have any relevancy. So let's just learn how to trust in the goodness of God and what's going to take place and will be tucked right in there underneath the arm and umbrella of the alliance and everything will work out for our best good. That's my belief. And if you've heard me say it once you've heard me say it 1000 Times have total faith in the Alliance to do the right thing. And love won society will always be in harmony with the with the Alliance, Always. Always. It hurts not to be there. It's painful. So we're coming into our own. Next question.

T

Tracee 47:32

Do I cash my Zim in and have it go to a humanitarian project? Do I set up a trust the question Do you want to be as in benefactor? I do not know how to answer that. Can we have our humanitarian project, the benefactor,

R

Ron Giles 47:48

if humanitarian your humanitarian work is is the work of a benefactor benefactors, a tool that you use, and the love won society is the tools that you will use to do the things that you're going to do as a humanitarian? My question, and this sounds like you haven't been around the block very many times with love won society stuff. So just get into it. And pretend like you are the one that's in charge of the love won society. Meaning that it rests squarely on your shoulders, because that's where you as a humanitarian, that's where the responsibility lies. Love won society is just there to support you. We hope that it's of great value to, you're the one that's in charge. And so you have to catch the vision of what this is all about. And my suggestion is to go into the website, read it first. List as you're listening, you're going to you're going to be listening to the website, or excuse me, to the videos and things that are emailed to you, but for your own personal thing, you need to read those documents. I I've only had two or three people who have said to me, Well, you've you've already published those documents on your website. Well, that's true. They're already there. And yeah, like I publish them, and send them out an email, and it's brand new for people and I'm thinking, like, I better be doing more of that. Because people aren't reading. They're not understanding what's going on. They want to be spoon fed as babies, and that's okay, as babies, but you need to grow up now. Take your responsibility in hand to do the education for yourself because this is what my suggestion first of all, the priority is to learn how to prepare yourself for the appointment once you have the money in hand, because you've done a good job with preparation and you've got your rates in All this source stuff, you go into appointment, you'll get the money, all of a sudden, there's nothing else that's more important than for you to learn how to use that money in the programs. Bye implement into programs for your and you'll have the money to do it. So money talks and now it's going to cap your your attention. What else have you got better to do? You don't have to go to work anymore. You don't have to spend your time on other things. Now you can spend your time on how am I going to implement my programs or implement the program so that I can do my humanitarian project? It's going to be fun. But prioritize yourself as

preparation for the importance of the appointment, because that's where you'll get your big funds to do the work that you're going to do. And the rest of it can come as it will. Next question.

T Tracee 51:00

Many of us hold foreign currencies other than Zim? The latest news as of today, January 14, is that the exchange redemption process could or should begin very soon, something by early next week, we should not miss out on the opportunity to exchange our currencies? Not all Zim holders will be chosen to be Zim benefactors. As you have stated, when will the Alliance begin their redemption appointments? And how will we know if we are not selected to be Zim benefactors life must go on

R Ron Giles 51:30

most of your all concerns, and you're just stating to me something that's that's true. We don't know. I don't know when it's going to be, I don't know how the alliance is going to contact us. Just know that it will be perfect when it happens. You have foreign currencies. Go ahead and exchange them if you want. Take them to your appointment and exchange him. It's just chump change, like picking a penny up off the ground. But if that's what you want to do, then that's fine. And yes, not all Zim holders will be chosen, as in benefactors. A lot of people out there that think they're humanitarian. So we'll have the range pull in on them when they go to their appointment and find out that they're just greedy and only concerned about the money. And we need to focus on money when we're lacking money. And I understand that. But your heart is what's going to be showing. And it's a heart that will tell them who you are as a humanitarian. And then you'll be adjusted as Yes, and life must go on. Those who don't get, I look at it as a point of the spear, the point of the spear penetrates into the darkness. The point of the spear in this case are those who will get the money. But without the rest of the spear, the shank and all of the energy that's created with that. That's where the work is done. And those who don't get the who are not part of the point of the spear will get to have the funds available to them. And they can be involved in all the kinds of projects that they would like they can do that. Be fun to be as director in the CAC program. I think you don't have to be involved in the money and being overly concerned about that. So when they say involved in the money, you don't have to be the boss of the money. Major responsibility. So there's a place for all humanitarians, not just as Zim benefactors, or Zim holders for that matter. Next question.

T Tracee 53:52

I'm curious about funding the health care that you mentioned in some of the videos if we offer free health care along with ECS contracts. Could you explain exactly how this might work as far as facilitating doctor bills, etc? Will we need to have a division of our CAC dedicated to collecting and paying these bills?

R Ron Giles 54:11

That's a good question. And I don't know how it's going to happen right now. We might have just be associated with clinics all over the place. So So chambers is my choice of med beds. I

just be associated with empires all over the place. So so chambers is my choice of meta beads. I like that program and the way that Jared is setting it up it might be that after the prototype is done, then they'll use Mata replicators and replicate them so that they can be done. Take one into another over there in a different country or something then start manufacturing them by just matter replicators we'll see all of what happens as far as that's concerned. But there's things that we cannot know about now, that will come in into play as they are manifest as we get into the new technologies and so forth, if we have to collect if we have to have a place that you send your bills or something like that for your doctor bills, and we'll do that. Insurance companies have that already, we can do that we can associate ourselves with that sort of system, but I want to get away from it. But we'll do what's necessary to get us to where we want to go. Next question.

T

Tracee 55:34

I got some Zim from the place you told me. And what they send me does not look like them. I have they are silver. Well, we'd be able to redeem them.

R

Ron Giles 55:47

Okay, that's a really, really, really good question. And there are probably a large percentage of people who still have not got the memo. I would never, and I'll tell you this, for sure, I would never send you to a place to buy Zim art of artificial Zim fake whatever you want to call them. That will not be done, taken care of by the Alliance. eBay has a requirement to tell you that these are not actual currencies. There's no commercial value to them, except for what you want to sell them for what they're trying to sell them for. Well, I can't tell you that, that the alliance is going to redeem them, because they don't know they have no idea what we're going to do with them. You got the silver, you got gold, he got the actual paper bonds that they have printed. The Alliance does not care. They're not interested in the bonds. They're interested in getting money to you. The bonds are just the vehicle that they're allowing to take place to do that. I would never send you something to buy something that was not, I have not checked out with the Alliance to be sure that they will redeem it. And that includes Yodalillian or any of the higher face value bonds as well. I would never leave you or lead you astray. The only condition is if you are humanitarian. If you're not, you will not get a dime. So how can eBay be telling you all this, they'll tell you it's a it's not a good currency. It's not poor currency, all about the serial number. They don't put serial numbers like a bunch of zeros on their nines or whatever they are, to indicate that they're fake. They're each one does not have a serial number on it. They put them on there. But that's to show that there's something there has no value whatsoever. I even get authentications from these people. I got five or six of right here. They can't authenticate anything except their their their facsimiles, they're similar to what was supposed to what is real. Are they given up in? What do you author giving authentication for authentication for? You just have to shake your head is these guys who are dumber and a stick, in my opinion, mentioned the Chinese printing all these things in us taking and getting all this money for it. And they're the ones that are responsible for that. I hope we give the idea on these question and answers that the questions are valid questions, and I don't want to diminish them as far as questioning. But I there's a thought process behind all of this. And the major thought process that needs to be conveyed, I can give you an answer for every question. At least I feel I can. From my projects for from my perspective with level and society. If it's involved in that, then I can however, the questions that I'm answering and the questions that are being asked are all answered in the documentation that we have on QFS or on to

QFS202.com. If they're all there, is everything's there. So one of the problems I have with pikiell ad and projecting into the future things that are in the past or that we have right now, those are invalid. Those what if questions are invalid in my opinion. So bless you all. Thank you for Your help in answering questions and let's get this education going to the point where we can start looking back on it say, Oh, I already know that. And those who go through the question and answer periods and say, we've already asked that question once you say yes. How would you ask her? And then we'll go from there. Sending blessings and love to everybody. And thank you, Tracee for your help, and you're inserting things that are very valuable for all of us to learn. I appreciate it. Welcome, blessing. Blessings to everybody and we'll say goodbye for now. Bye
