question, zim, people, humanitarian, money, currency, beneficiary, global currency reset, contract, trust, program, gold, find, person, understand, projects, benefactor, sign, quantum, funds

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians. This is Ron Giles, and I'm here with Tracee, we're going to do a short question and answer period. Today is January 24 2022. Got another weekend this month to get a lot stuff done. And then right. With that, let's go ahead, Tracee, and begin our q&a. Number one.

T Tracee 00:25

Okay, I'd like to follow the telegram channel without downloading the app, some channels are open, is it possible that yours could be?

R Ron Giles 00:34

No, we're not going to open the channel to to the public. So let me ask you, Tracee, do they have to download the app to get to our channel, Telegram channel?

T Tracee 00:45

You know, I think you can put it on your computer and not your phone, if that's the problem. Um, you can download it because I have it on my phone and my computer anyway. So maybe that would be an option if their phone, some people's phone is like filled, you know, with like, memory and stuff. So maybe that's the hesitation?

R Ron Giles 01:10

Well, yeah, I don't know a different way to do things. So I hope that you can work it out. The only thing I can own comment about them. Next question.

T

Tracee 01:24

Will there be training videos and or seminars for directors and assistant directors,

R

Ron Giles 01:31

we will do some videos as much as we can. When the fans come, it's going to be very difficult for us to do a whole whole lot, well, I shouldn't say an hour, when the fans come, we're going to be doing thing, we're going to be very busy on our projects, like the RSS programs, and the other things. So we're anticipating that we've already done one for the, for the directors, you can go back and look at that. But the assistant directors, I don't know that this needs to be anything more than what we said on the directors. But you're going to have to watch everything you're going to have to really get in to the programs and get educated. And I've said this before, humanitarian projects, and the LWS programs are not a part time job, you're going to have to be full time. In other words, you're preparing for your next career as a humanitarian. And you can't just kind of haphazardly Go about your training, if you're going to use our programs, you got to really get in and understand them. As if you're the only one that is carrying the weight of the whole world on your shoulders. Waiting for you to do your humanitarian work with Lavonne society. So it's a responsibility. It's a stewardship responsibility. This is what's given to you to do your humanitarian work. And what you do is, is what you take back and put on the table says this is what I have done with my stewardship. And you might get another two talents or 10 talents, who knows, using the talents as a parable, whatever. But anyway, so are we going to we'll do what we can, we'll feel the need. And, but don't depend on us to train your directors. We've given you the video, learn all about it, figure out what you want to do, because the director is going to be under your control. So I think there's a lot in the video this worthwhile that's into can even if you haven't already. Next question.

T

Tracee 04:06

Who is the financial source?

R

Ron Giles 04:10

The Alliance? That's an interesting question. And I feel that you need to get into the programs and find out what's going on. Because that is totally in there. I would take a look at the Alliance, I'd take a look at the actual programs in house. And the overviews obviously is good, but learning how to prepare yourself for the appointment is what you need to really focus on. What is the financial sources. Financial source is the gold that's backing the currencies and that gold has been given to us by the Chinese elders, as well as a historical amount of gold from the Saint Germain His number of beers as an alchemist that he lives on here, we have so much gold you wouldn't imagine, you can't imagine how much we have this small portion 150 miles in the tunnel from the Vatican to Israel 250 miles of gold stack tie is probably just a pinpoint out of what's available. There's no in our minds, our finite minds, it's an infinite amount. There is a finite amount, obviously. But what we're looking at is everything prove the all of the quantum financial system, all the financial transactions for the next galaxy, for us, and for our world,

earth and the galaxy, and perhaps other galaxies to the long enjoy. Planning the gold to back the currency. So what is the final financial source? It's so quantum financial system and the gold certificates, that's a good one for you to understand is quantum financial system. You got a lot of work to do to come up to speed. So appreciate the fact that you're wanting to know just really quick what it is, but there it is, and and dig back into the books. Next question.

T

Tracee 06:27

Who must control the financial stream that will pass through the beneficiary?

R

Ron Giles 06:34

The financial stream is from your benefactor accounts? If you don't know that means? Find out? Let's go ahead to the next question.

T

Tracee 06:43

Must be to return a certain percentage of the proceeds to the source of financing?

R

Ron Giles 06:51

Absolutely incorrect. No, that's there's no financial return. Money has been a source for the money, the people that made the money. And therein lies the whole demise of their financial system. They make money on money, they make money making money. That system is going away. So don't even confuse it. There's no return on anything that is part of the quantum financial system. In fact, we are not allowed to make a profit and neither are they. Money you leave in an account will never be used for making money in the quantum financial system, period, exclamation point. So these are the kinds of questions that cuz they're glaringly right in your face, if you will get in and start learning what's going on. And how did it happen. Some people asked me other day, an email, you start with reading from the menu items. Now, she couldn't figure out where the menu items, there's a black list of words, or I call them that they are menus on the top of the homepage, you'll go up there and click on it. And then then the drop down menu will come and show you all of the different articles and things that we have written. I suggest that you read through all of those first, you're getting into the videos for the question and answers and the other videos that we have. And that's good. But if you do that and not read, you're not going to get the information, you got to go from both sources. That would be my suggestion, if you're really and truly interested in finding out what this is about. Start reading, listening to the videos, I'd pay attention to the overall overview of the of our five programs, I'd suggest that you look into and understand the structured payout system. There is so much in there. It's going to take you a long time to do it. So it's not a slam dunk two points. And away, you go off down to the rest of the court. Now you got to focus on this and make it your if not your primary job. If you've got one, you're going to be a humanitarian. And that is your job. And you've got to show up to the point where you can say I'm ready to do this. And then you take your zoom in and I asked you asked for a particular rate because you prepared yourself for them. So again, these three questions just sound like it was somebody And I'm not trying to, to diminish their questions or demean their questions, because they're good

questions. But I'm telling you that those are the kinds of questions that show that you have not gotten into the program. So start reading first, then do the videos, answer the questions, the questions and answers and become familiar with it. And the questions are there just to find out what we think is important. So, go for the gold, and that gold is in getting the funds that you need to do your humanitarian work. Next question.

T

Tracee 10:37

How will combined currency system and QFS? I guess how will the currency and the QFS be combined maybe?

R

Ron Giles 10:50

Well, it's it's a difficult question. And I can see that was done through a translator. I'm just going to take a stab at what you want to know, each currency that's represented by a particular country or group of countries. Some in saying that the Middle Eastern countries, we're going to use the dinar, all of them, if that's the case, and that's the case. But all of the currencies in the world will be on par value with one another. Right now, it's not the truth is right now, some countries are higher rate than other countries. So instead of getting a one to one exchange, you get, there's a factor involved that one country's worth more than another, the quantum financial system will not do that. All currencies have to be the same value. So that's why we're going through a Global Currency Reset GCR. Now, there are many people who don't know what the GCR really stands for. And they think it's part of the revaluation of currencies. To some extent it is but the Global Currency Reset has to happen before the quantum financial system is up and running. So when somebody tells you that the quantum financial system is up and running, I say, well, where's the Global Currency Reset? How come I can go to Canada and get 1.2 or 3% of the value of my currency, and they're so ours is, is worth more than theirs. That means that the quantum, or the excuse me, the Global Currency Reset has not happened, it also means that the quantum financial system is not actively involved. And in the exchange of funds, or using funds to buy things, period. So if the if the garbage guru, Intel starts telling you that the QFS is up and running, that's not true. It can't until a Global Currency Reset takes place. Maybe that's why it hasn't been. We haven't had the RV, I don't know. But the Global Currency Reset is a major thing. And you're going to see that in public. They're not going to hide that. So combining currencies, it's all there. I hope that that helps you as far as the question is concerned. Again, just get involved and learn what it's all about as best you can. Oh, and another thing, all of our videos, our training videos, all of them are on YouTube. And there is we're sending out occasionally send out a list of the links for each of those YouTube videos. They are not open to the public, you have to have a link to watch them. But in that, YouTube, those YouTube links, you can adjust for the I call them subscribers. And I'm having a hard time understanding the word subtitles, there's subtitles is this good? The subtitles, and then you can do them in in your own language. That's why we put them there. So those who are having trouble with language barriers and listening to those, go to YouTube, take the we send these links out, go to the links. Click on that and then you have a chance to change the subtitles and into the language that you want. So that's why we did it. So there's no problems with, with people, at least we're on the same translations. Let's put it that way. And hopefully, there's good as you can get. Next question.

T Tracee 15:16

As a benefactor, we need to be careful, and should not let people know that we have all this money. What I am not sure how to solve is this, when a director signs a contract, he'd probably want to know who the other party is, as I am working for the owner, he would really not know who he is signing the contract with another example. I as the Benefactor buys a building to use as a Community Assistance Center, I guess the seller would like to know who he sells it to, not only who was signing on behalf of the owner, I tried to put myself in the other person's place, I would have wanted to know, to be able to make up a story about all this wealth, it would be great to know your thoughts about this. Anyway, I do not worry, as I know, my angel will be able to help me with this. I just wanted to be a little prepared with my story, train on it. Guess maybe a trust is the answer.

R Ron Giles 16:09

That last statement is, is true. There are people who buy stuff and each item that they buy, put it in a trust, like a car, something that this nature, any large purchases of property so that the trust is the name and then the trustee. Trustee is not the owner of the trustees, just the one who does. Who manages the Trust for the beneficiary. So there's in that is your anonymity that you're looking for. So it's each of the zero or the CAC areas that you set up can be a trust. I'm just gonna name them Glendale CAC and have that on the door, but then below the smaller words, understand the answer Community Assistance Centers. That's who do you work for I work for the Community Assistance Centers? Well, who the who owns that? I don't know. That they're the ones who provide the funds for us. So that I'm under an NDA, I won't know that. I have no need to know. And there is no need for them to know where the funds come from. Except that the money is clean, clear and non terroristic. And that there's somebody that puts up the stuff about that. Talk to your angel and see what kind of documentation you can provide for them to placate or so they don't have such a big hiccup about it. Because we're not under any taxable authority with this program, and with our money. So you're not going to have IRS type people looking into this and trying to figure out who's making the profit on it, because obviously, you can see we're giving money later, it's no profit, idiot, IRS people. Are they anyway, I shouldn't have said that. It's inappropriate. My real feelings came out. So we're not having to deal with those kinds of people anymore. They're gone, they will be gone. All they're doing is snooping around trying to find more money, who made the money so they can tax you? All of that's going away? So we don't have to we don't overly concern ourselves with have at all. So how do you do it? I think that I think that trusts are a good way. But you always say I'm under an you can say it this way and put all your people under an NDA, if that's what you feel you need to do. So they can don't have to lie. an NDA doesn't have to be in writing written, it can be just a, an idea. I'm sure that Simon and Charlie don't have a written NDA or just say don't talk about it. So they don't. If they did, then they get cut off. It's my thinking. I don't know that they physically have signed an NDA. Maybe they have they haven't said that. So an NDA can just be verbal. So put your people under an NDA. Somebody ask them where's my income from? I don't know, I work. This is this. I work for these people. And this is what I do. And we're distributing their funds and whoever has those funds. I don't know. Would you tell everybody if you had the fence? No, you wouldn't do it. So don't expect them to do it either this stuff like that. So I, it's an important question. And I don't want to diminish it. But you're going to come up with some really clever ways of putting things out to the public where they can't find out where the money comes from. It's already in place, those kinds of things. That's why they have the Cabal created the corporations and all that sort of stuff. So I call them legal fictions. Anyway, we're going to have trusts or whatever other vehicle survives into the Nisar and just

our compliant governments. So it'll all just be working perfectly for us use those views, those kinds of things. As long as you keep yourself, in your mind, away from this, telling stuff that need not be told anybody, you'd be in good shape. Next question.

T

Tracee 21:02

Well, let me add to that. And, you know, I just thought of something when you were talking is that I'm gonna say something like, well, if they ask that type of a question, you work for me. And if they dig deeper, I work for a humanitarian organization. But period's buck stops here, just I'm going to say that you work for me. And that way, you know, we don't have to worry

R

Ron Giles 21:29

to do overdoing and fulfilling that contract is my job. Yeah, yeah. Simple. It's not so simple. But it there's a simple solution to it. And you just have to come up with it to be sure that this is why an NDA that you sign up the redemption appointment, maybe only good for 90 days, it's only to give you a chance to set some habits about the way that you talk to people. So that you're not disclosing information without as a knee jerk reaction when you're talking to people, so you're going to have to learn how to have a little spiel, no elevator spiel, or well, you know, what do you do for a living, I do this, and then the door opens and everybody goes out of the elevator. That's all it has to be something very short like that. So learn those things, do them, take the time, make some new habits, and about the way that you talk about, especially about this money, and then you can be able to maintain your anonymity. Next question.

T

Tracee 22:46

Please clarify generation bonuses, who is first, second and third generation that is registered under a beneficiary's ID, are these people in the same family registered under one beneficiary's ID, I would assume these details will be built into the platform for everyone.

R

Ron Giles 23:05

Okay, first of all, the beneficiary program is a referral program. And let's say Tracee, referred me and I signed up as a beneficiary. That would make me her first generation. If I save up somebody else, which I plan to do, because there's bonuses there, then I get to, then I'm her first generation, I get to have my first generation of people that I sign up, which would then be her second generation. And then to go down one step further. And that's the third generation. The reason we did three generations deep is because you as an individual might go to a pastor of a congregation, and the pastor, and you want them to sign up? Well, it means could mean that the pastor signs up to be on the first generation. And then the pastor might have a group of people that are in charge of the church, they may be the second generation. And then whoever signs up from the congregation is the third generation. So if you as the individual that was introducing this to the, to the church, to the congregation, you would get paid in the file. Generations, one cent per every 10 people to join. So it makes it worthwhile for you to do that without the generational bonuses. You wouldn't make that you wouldn't make any money there'd be no incentive to do that sort of thing. And so we built into that a promotion for the

way that we want to open up for and and what isn't that a great thing for a church to have? income that's coming in, they don't have to pass the hat. They don't have to worry about all of the budgets and everything because they know how much money is coming in every year. And if they need new roofing on the chapel or something like that, or on their place of worship, then they, they can do that. They'll have plenty of money. And if they want to do humanitarian work, there it is. Right there in the community. It's a great thing. So that's why the generational bonuses were made. I hope that helps. When it says, seeing family, registered under one beneficiary, ID, yeah. If Tracee would sign up her family, and she would be the number one person and then those she signed up would be her first generation. I hope that helps. A little bit like network marketing, but obviously there you're in it for profit, we're not. It makes us difference. Next question. Go ahead. What were you saying, Tracee?

T Tracee 26:12

Oh, I was going to say it doesn't just have to be a family, it could be friends, you know, or anybody in your community.

R Ron Giles 26:21

It's not going to create a cohesive group. Unless you say this is my person, this is my second, this is my third bigger third generation you probably never know about. Because it's a referral system. And it's so far away from you, two or three generations, that this is going to go like wildfire, wildfire, and you're seeing one or being in one. And it's frightening, because it goes so fast, when whipped along faster than you can run. But the point is, is that it will go so far, so fast that you will, there's no way to control it. It'll you thought you started in America, or in particular city, in a state in a county and so forth. You thought you got there. And then all of a sudden, you find if you were to find out, your referral system has gone into other states into other countries and is all over the world now. And that Zim benefactor is the one that's financing all of that. And that's the way it's set up. So you have no idea where it's going to go. And it can go really fast in all kinds of different directions. Next question.

T Tracee 27:38

If a person is a beneficiary, which they have to be before getting an employment contract, why would they sign an employment contract when they can make endless money signing up beneficiaries?

R Ron Giles 27:54

What you're asking is, why can't the person have a job? In their own mind signing up beneficiaries? Well, it's not going to be a contractual who's going to give them a contract to do that. Maybe the gym benefactor would do that. I don't know. However, it leaves it open for that. So I am, okay, here's a statement, I'm having problems with which they have to be before getting an employment contract. Now, that means that they already have to have one before they can get an employment contract. Well, the person who's introducing the boss at their work, he'll, he can introduce you or refer you to the RSS program, and you get your RSS

program up and running from there, your, your your ID number, and then that's so when you say you have to come before that the employment Yeah, it comes concurrent. i You can't have a contract. Because there's nothing there. There's no place to put it unless you have a beneficiary account. So to some degree, that is true. But it almost sounds like you have to be just sitting around waiting for somebody come and give you a contract. And you sign up a beneficiary before as a beneficiary before that. We want them to be pretty much the same time if possible, because if they if they learn how they can make \$28,000 a month with six trusts and the beneficiary account, they could they may not want to do work. As in working for somebody else, they probably start their own business because they can have they have the money to do it or something that they're interested in doing. And we certainly encourage that. Everybody gets a chance to be who they want to be in this program. So you can either work for somebody else serve, start your own business, we would like you to be productive in society and carry your weight, bring to society, your uniqueness, the things that you'd like to do. And then that can be your job. And as somebody making a job out of going to different organizations and doing the generational bonuses, I think that's a great thing. There's so many different ways that this can be worked. So we'll find, I'm sure there will have some that I've never thought about. Next question.

T

Tracee 30:39

Serving others is the privilege of my life, I must use the brain that God has given me in addition to prayer, in every contract I've signed, or my children have signed, it is my intent to honor God throughout this training, I have felt the kindness and love in your voice. Oh, and I anticipate this a straightforward contract. But I kindly request that you could please confirm that the contract that I may be asked to sign is completely God honoring, please understand that I'm just seeking information and feel that I know the answer. I just have not heard any details about the contract.

R

Ron Giles 31:14

Well, there's no details yet, because we don't have it yet. And so what's going to happen when we start doing the contracts, we'll get the input from the Alliance. There, my my guide is going to suggest attorneys and so forth that we can line up that are have been retrained, either been retrained or are in harmony with a new way of doing things. So that the contracts, they're not going to be intense. A lot of legalese and all that sort of stuff. Straight forward. But they will always be honoring God and in harmony, rather than honoring God, it will be in harmony with the Alliance, which is an extension of God into our program. So as long as we're in harmony with them, then then we're on the right track. So different word but honoring, yes. In harmony, yes. We're seeking harmony. I don't, I don't seek to honor God. Everything in life honors God. And it doesn't need me out there promoting him. Or whatever it is. Source. There's no need to promote, honor God in you're promoting things that it's an idea. honor and respect and love and so forth. We put a deity, we make a deity, something that gets all the glory and all that sort of stuff. They don't want the glory. They don't want anything they just want in harmony. So I'll get down off my little pedestal here and pedestal off my podium. But everything we do will be in complete harmony with the Alliance, or we will not do it. Period. So that's my commitment to my source. And it's love won society really is does not belong to me. I'm the overseer, not the owner. My job is to run it. I don't own it. Next question.

T Tracee 33:55

I have over 100 deaths a million deaths Cillian. Zim is that trillion specific for the humanitarian program or am I okay to redeem whatever amount I have.

R Ron Giles 34:08

You're okay to redeem whatever man you have. The Cillian is a goes up from a quintillion to a sextillion to a septillion to an octillion to unknown alien. And finally to this zillion. If you have 100 million Zim, that's quite a bit of money. And my hat's off to you for preparing yourself to do all that's possible. In your 100 year experience as a humanitarian give money away, isn't going to be that long. I don't know. We might be finished with money in a couple of three years. Who knows? We're just preparing for whatever needs to take place over the next 100 years or so. At least that's my thought and the amount of money that you have will never be wasted setting in an account somewhere in a bond account that used as a performance bond. Even if, if that's all that it's done, it's just perfect. And the Alliance does not care. If you have money into your account that you're not using. Keep that in mind. Don't do this person, I, my I raised my hand, good job well done. Go for the higher amounts. It's good idea. And ask for the higher rates while you're doing it. Don't give into the rate. Don't give into the rate game. Oh, I've only got 100 T Notes So I have to ask, Well, would you get 10? More? You can ask the same? Yes, you do. Because that makes it you're 10 times more valuable as a humanitarian. Next question.

T Tracee 36:01

Will there be a download of all the videos?

R Ron Giles 36:06

Well, we've got the videos, was this our conversation? Or was in answer to a question before today. The videos are on YouTube. Now if you're having problems listening to them, on bitchute, they're going to be on YouTube. But they're they'll have their own link, and we have those links available. And we oftentimes send out a whole list of the links that the love won society uses. And our mailing program doesn't do it every time. But it's when it's there, then you have all of the links to wherever you want. And you can go out there to bid shoot or into YouTube or, or, but you have to have lengths to do so. And you can use your language tools that they have there. So you can watch it in a different than have the subscripits in different languages. Will there be a download of all videos? Where would we keep them? I don't know, we'll see. We'll be big enough so we can have our own? Whatever it is that we'll see.

T Tracee 37:22

Well, I'm not understanding why they need a download of the videos, we have them on that shooting YouTube, what more can they want? I don't get it.

R Ron Giles 37:31

R Ron Giles 37:51

I suppose they they think that if we embed them in the, into a site that can play them that that was so nobody else can mess around with us. Or have causes problems, we're going to find that a lot of the problems that we have with YouTube, and with any other source of playing videos, things are changing. And those people who cause problems with that will be going away. And their programs perhaps will be going away or taken over so that they're under the control of the white hands. Because we're not going to have to put up with this garbage anymore. We got a if you got a problem with what I say then you go talk to your Reverend or whatever, but you're not going to stop me from doing it. That's I have a free agency to do that. And although and I'm not going to hurt somebody, or whatever, I could be a challenge. But that's my right to do that it's your right to do the same thing. If you're being honest and so forth and not lying to people then your fraud if you're not so there's gonna be some some changes. And what those changes will be will always be for the better because God is moving on the earth cleansing out of all of the garbage can't let can't the garbage can exist in the higher dimensions. And the people in those ideas can't be there either. So let's go to the next question.

T Tracee 39:21

Okay, um, how do I get a referral? I don't know anyone who knows anything about this shy just asked on the forum or telegram. Also, I was looking at zooms on eBay. They're not like 13 bucks more. Over 100 Where did you find them for that amount? I see a lot of fake zooms non currency at reasonable prices. But real zooms are like 10 for \$1,000.

R Ron Giles 39:47

Yes, it's kind of an interesting question. RSS program is not up and running. So you're not going to get a referral from anybody. Because there's nothing to report You too. Now for those who want to pay \$10, to be Zim benefactor or anything of that sort, that is not what the \$10 as far as a as a person and you want to sign up as a beneficiary, your fee is \$10 for the account, period Azim benefactor would not be signing up as a beneficiary paying \$10 to do so they're the ones that are going to be paying the money not receiving it. benefactor has the money and giving away beneficiary receives money. Look at the definitions on the glossary that we've presented. It's all there. So you got you can understand very quickly. Okay. Now, when I say that there is a link on eBay for in and now it's gone up from \$13, up to 15. And there's another silver ones at 17. These are things that I have been able to find. If you ask me where they are, I will send you a link. Just do a return email on one of the emails and I will get it and I will send you a link. Not a lot to do about saying things in this I'll just say here's a bay link. Now, when you talk about fake Zim, who gives an I'm going to say this very rudely, who gives a damn about the Zim? We want the Zim now to get funds from the Alliance. What do you think they're going to do with the Zim? Tell it back to Zimbabwe. It's a defunct currency. All of them are defunct currency, non currency. They use those words because they are not a present currency for any country. They have to do that as a disclosure so that they don't come back. You don't come back to them and say, Well, I I bought a Santeria Centralian. Zim. And, and I took it over there to Zimbabwe and they won't redeem it. You know, we've got to be smart about this. So they're there if you want to look for him. Anytime there is a gold or silver, or a pat paper bond from Zimbabwe, they will tell you it's non currency. So which ones are currency? That's what I say to you. The Alliance doesn't care about the Zim. They care about you as a humanitarian and your Zim is only a vehicle to get you the funds you want for your humanitarian efforts. So

please, please don't call and complain, Oh, I've got these gold buzzes as their own currency. And I can't, I can't, and get into a tizzy about that. Those are the ones that are really inexpensive now. And those are the ones we should be going after they go over a paper bomb that cost you 250 or whatever dollars when you can get the same thing. 10 of them for \$15. That's a disparity. That's a difference. Unless because the Guru said they won't accept that for the unless it's used to be they won't accept it unless it's 100 trillion. Well, what about the 15 to 20 to 10s and all the ones under the trillions? They'll accept anything that you present them, a Zim for redemption purposes. And I talked to you about the aliens. What about the the sent aliens? Are the 303 zeros? Another 2100 zeros. How many summer 3000 zeros. Yeah, but the alliance will accept them all. Next question.

T

Tracee 44:42

What happens in the event a benefactor begins his or her stewardship as a benefactor and later finds out that it is too much to deal with can he or she transfer the stewardship responsibility to another person he or she deems is a humanitarian

R

Ron Giles 45:00

Okay, you know, I it's a question. Are you not sure? I'm going to put it, I'm going to personalize it, instead of making it into a blanket statement. If you're not a humanitarian, or don't think that this is for you, why do you want to get involved? What is the attraction to be a humanitarian? If it doesn't come from your heart? Think about that. Why would you ever give up wanting to be a humanitarian? What is it in there, that's too difficult to do? What is there, it's not like digging a ditch. You're giving money away, you don't have to be profitable. You can make many mistakes and still get by mistakes, I don't know what a mistake would be. giving somebody a contract that they shouldn't have had or something that, I don't know. But see, we're not the place, we just go ahead and do what we're supposed to do and feel in our heart to do. If we're coming from our heart, then where's the swamp? It's not gonna come, it's not gonna happen, those people are going to be eliminated before they get the money, the lions can see down the road. And you might get all upset because they didn't think your humanitarian to give you the rate you want or something of that nature. Because you didn't qualify. They look down the road and your heart's not in it. Your heart's in it, you'll never give it up. So there's a lot of these what if questions? No, you're gonna pay you're, you're gonna do everybody that's involved. A great deal of L of camaraderie. If you stop thinking about these kinds of what if questions? What if questions are not valid questions, when there is no answer to it. It's only subjection on your part that you're projecting into the future, some of your doubts and fears. Why would you want to do that? And why would you want to present those doubts and fears to other people to germinate in their minds? Well, if I don't want to be humanity, what if I wanted to shut love won society down? Because I got mad because people were asking too many questions. asked me that. Tell me where the where's the answer to that? Now, these are the kinds of questions that we just need to stay away from. And I understand that they're there, but let's not give them in the energy. Let's not even verbalize them or vocalize them as yet alone, write down and send them in. That would, that's a service that all of us need to understand. We're creating a whole bunch of problems by projecting things into the future that come the projection of which comes from your lack of, of faith or whatever, in the future. faith in yourself, whatever. There's no reason to verbalize those things. I know that there. I'm not stupid. I know we have doubts, and we have fears. But the more you focus on those doubts and

fears, the more that you're going to present them in your life somewhere. So let's just clean up our act a little bit. It's not scolding you. On a personal basis for this question. I'm not doing that. I don't do that sort of thing. I shouldn't do it. I don't like to do it. If I do. However, we need to clean things up about that. It starts with those who are built to come in and ask proper questions about love won society. And not about what's going to happen in the future or whatever, whatever. Just let it go. You humanitarian now in five years, you tired of it, then check with your counselor and see what you should do. I have no answer to that question. Sure. Next question.

T

Tracee 49:59

Okay, have to change the wording on this for it to make sense. Okay, so a beneficiary, so they're trying to see if they have this right. So a beneficiary, they get an employment contract, they can build or buy a home with a real estate. And then they can have six trusts. So say one of them's for a child, and the child becomes a team. Trust still continues, buying a home after payments still continues, changing from one job to another still continues projects plus upkeep of projects, years down the road, bonus and generation program are all of the ways a person can benefit from your platform, is this right?

R

Ron Giles 50:43

Yes, trust out lives the child and they get their own beneficiary programs.

T

Tracee 50:49

So what happens to that money, so say, for instance, you have a child, and they're say 17 years old, and they've accumulated wealth for a year for that child, does the child just cash out on the trust and the trust starts over for the parent,

R

Ron Giles 51:05

it doesn't start over. The parents are the trustees all this time, and using the funds to help the children, that's just another resource for that child, further growing up expenses, you might give them a lump sum when, when it's over, and, and wish them well, you know, a child having two or \$300,000, when they turn 18 gives life they've got life on an equal playing field, then they can become beneficiary and start receiving and then still have employment, they might want to be some kind of an engineer or a rocket scientist or something like that. They'll have the money to do whatever they darn well, please. And that's what it's for. But it's always determined on what it is in the trust documents what it says in the trusts, documents that the trustee must, must abide by. And the parents you're writing it, so you've got to do what you say you're going to do. Be sure that the trust documents, tell what you want, and and doesn't hamstring you, so you can't do stuff. But it's a bit you are the trustee for the and you're working the Trust for the beneficiary of the person who is the beneficiary of that trust, when they turn \$18 yours. But that in the trust document. Next question.

T

Tracee 52:43

Okay, last question. Hi, I'm a spiritual person, and would like to help humanity by building a huge Healing Center in my country. Also, I would like to help with a project for free energy, there is a mine which is closed in my country that has tallied them, they said apart from the sun has crushed their tally, um, you can find only in my country, maybe Sri Lanka, this mineral can give free energy as I have read on the internet. Now, my question is, if I don't know anything about mining, I don't know people who know about it, how can I find the right people who want to give free energy to the world?

R

Ron Giles 53:22

Well, you're taking it upon yourself as the only possible solution to the problem. Keep in mind that we're having when when things happen, and we get our funds, we'll have open communications with two, it's a transitional thing with the ET'S, and new technologies and so on and so forth. I don't know damn thing about anti gravity machines. But when they come out, I can find people who I can. I might turn Ford Motor Company into a manufacturer of anti gravity machines. There's all kinds of things that are going to change. So I don't know all that. I don't know anything about the engineering and so forth. There are those who will and those who do and will find those if indeed, that's what we're, we want to pull our money. You're going to have a counselor who's good. And you say, where can I find these people? Well, they'll just simply say to you, if you want it, ask for it. And the heavens will provide that information for you unless you don't have any faith that it will happen so don't ask him to say I'm not good enough for that so it's not going to happen because it won't I asked for this and you know, I right on spot with my asking and this is really going to be a benefit to me. And I'm I'm sure that I can see how that can be useful for me. In my life's experience right now, and you just keep those positive self talk if you want to do, and that would be fine too. But the people will come around, you just have to ask for your projects can be what, whatever you want. But don't think that you're the only one that's interested in Help Center for the world, and free energy, and free food for all. Because a lot of people want that same thing. And that's why we come with reach humanitarians will come to our work with a counselor, so that we can fine tune what we want and put some substance under our projects, and the reality of what's going to take place, combine them together to move forward into a brand new economic system. So with that, we'll that's our last question Tracee. So we'll, we'll go ahead and, and there. And, again, this is January the 24th 2022. Thank you for the questions, and we'll talk again when we have some more. Thank you Tracee as for your great input and for your work. And we'll with that, we'll say goodbye.
