SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracee, we are planning a question and answer period. Today is January, the 27th 2022. So with that, let's start with the first question.

T Tracee 00:17

How will I be contacted?

R Ron Giles 00:20

The alliance is in charge of that, and they have not conveyed that to me at all. Other than I know that they will contact you on a personal basis. And you will be able to pick your time for your appointment. And then they'll coordinate it from there. If you have any, any questions as that person who calls you or gets a hold of you if you can. But they're going to get a hold of us. We don't need to worry about it. They know who we are. Next question.

T Tracee 00:53

Is it a requirement to listen to the q&a postings, I get more out of understanding, reading and watching the QFS 2022 website.

R Ron Giles 01:05

I appreciate the fact that there are differences in the way people learn some learn. By listening, some people learn by reading. And I suppose others think they can do it by osmosis, and fall asleep reading their books. At any rate, there's there's no requirement, I just want you to be

ready to become a humanitarian benefactor. And if, however you do that will determine how much you really understand about the programs as you try to implement them when we get our money. But there's no requirements No, not at all. Next question.

T Tracee 01:44

Through what legal figure do I receive the Zim redemption contribution?

R Ron Giles 01:51

We're gonna have to think about that question. Because you're talking about the structured payout. That system is, is administered by the the alliance. And my suggestion should go to the website and read up on the structured payout. It's a drop down menu, or we have videos for the structured payout, as well. So there's a good opportunity for you to go ahead, and and I'm coordinating to you to where the answer to your question is. And hopefully you can understand it from there. Next question.

T Tracee 02:31

When I organize the folders for the employment, should I list all the projects I've organized to support the people I'm going to benefit with the redemption money.

R Ron Giles 02:39

I've said this before. And I'll say it again at the Alliance's if they want to know that you're been thinking about projects. And what you want to do is just preparation, thought processes. Engaging in the process is what you're doing by creating that your pet project. However, they know that the projects are not going to last her long. They're not interested in projects so much they're interested in you and you were the one that they are funding. And with the funds, you as a humanitarian will do the work of humanitarian. So don't worry so much about projects, they're wanting you to see evidence that you have been thinking about it engaged in it. And from there, you'll have a nice conversation and tell them what you have and what you want as far as her rate is concerned and and see how that goes. So it'll work out just perfect for humanitarians. So next question.

T Tracee 03:45

Bought Zim replicas on eBay only to realize it was from a Chinese company, what do I do now?

R Ron Giles 03:54

There's no problems. If you've got them, then they're good. When I talked about was discussing this with my source in the Alliance, I was told that is probably not the best thing to be doing business with China. However, if you've already done so then, you know, the cows are out the

gate, so don't worry about it. You'll just have to deal with things as they are. So what can you do? Just press on? You've got your zoom. And even though they're Zim replicas, you're going to be fine. The Alliance has said that they will redeem them so not to worry liance is taking care of the humanitarian so you're going to be okay. Next question.

T

Tracee 04:49

Why is everyone trying to order a Starlink hub? Is it the Alliance?

R

Ron Giles 04:56

You know, I wish I knew more about the Starlink or any of those things concerning the Starlink. They're coordinating with the Alliance. Keep in mind that a Starlink is a third dimensional creation and construct. The quantum consciousness has a whole different operating system a way to operate. And they don't need satellites. So eventually, the Starlink is a transitional tool that people on the earth can see and or hear about and say, Oh, that's great, that's gonna work. And it's just the next step. But eventually, that will be taken care of, because the quantum financial system, the quantum voli, system, all of those things are in the quantum consciousness that very few of us have a clue about, that's the thing that's going to survive. Not so much the Starlink hub or the Starlink, whatever, we'll have the next generation, which will be so much better. Next question.

T

Tracee 06:14

How to proceed to transfer funds from the platform to my bank account, I would need clarification about how to set it up and the process to do it. Also, how to proceed to help others sign up to?

R

Ron Giles 06:28

I suggest you go to the video about the it's it's the RSS platform, not the RSS program, but the RSS platform, I think it's the fifth one that we did. I suggest you go and listen to that. And then if you still have more questions and come back, because all of that information is there. So I will go over it here now. Next question.

T

Tracee 06:59

Would it be a good idea to hire a PA as soon as we receive our funds? Or will our angel counselor be enough?

R

Ron Giles 07:08

I think a personal assistants would be a good thing to have. You're the one that's the boss, so you get a personal assistant, then you can be fine, your counselor will be sufficient for your

needs. Their job is to help us to become good humanitarians. How that's all going to work out is still kind of foggy in my mind. But I know that it'll just be perfect. And each one will be perfect. Each humanitarian will be personalized, who will be their counselor. And it might be that we're really surprised at what's going on. So you're asking a question now that will be solved at a point in time in the future, to your greatest desire. Next question.

T Tracee 07:58

I've deleted a couple of hellos from someone I don't know, on my telegram I ws channel. And now wondering if it was my angel having previously been stalked in this 3D world. I'm a bit suspicious of any male who had approached me online and I auto delete, I realized that the members on your channel are probably all humanitarians. And so I will respond next time.

R Ron Giles 08:22

To an interesting question, I don't believe that your angels are going to be the person who you're going to have your appointment with is going to be trying to contact you prior to the appointment. So I would put that out of your mind, I would, by the same token, don't come from fear. If you're fearing things, then it could be a problem for you. That said, we're still in 3D, and there still are some bad characters around. So you have to take care of yourself. Go into your heart instead of your mind where there's a lot of fear and, and judgment and so forth, going into your heart to determine if that hello is somebody that you should, should talk to. With that. That's about all I can say, I doubt very much that it is your angel or the person who's going to be doing your interviews and become your counselor. That's not the way they will contact you, in my opinion. Next question.

T Tracee 09:29

When you speak of setting up a trust, and you say just make it legal, what do you mean?

R Ron Giles 09:38

A trust is a document. And when I say just make it legal, you put in that document what you want to deal with the trust. It outlines who the who the trust store, which is a person creating the trust, the trust or the benefit beneficiary of the trust. With could be a minor child or something of that nature or somebody else. And Trustee the the information you have in the body of the trust document will be will instruct the people who are the trustee and so forth, how to go about managing the Trust for the beneficiary, M that in the document itself, you have to just put things in there that is your intentions of creating that trust. So, if it's for a minor child, say the trust funds are to be used for this and this and this, or at the discretion of the trustee. Now, you've made it legal so that the trustee can do the things that they want to do for the minor child. That's all I'm trying to say, just make it legal. It's a legal document. And don't just write things down on a piece of paper and think that that's going to do that's why there will be trust documents available for you. And then you just fill in the blanks at the appointment that that'll be the case. And then we'll do trust document, a trust document that you can do for the six trusts for the beneficiary accounts. And you just fill in the blank. And it'll be, it'll be just

really easy to do. Just make it legal. That's exactly what it means. And we're going to do that. And then you as a trustee will have to perform according to what you have written down in that trust, or you could be held liable. You can be sued by your minor child when they need to, because you screwed up and took all of his money. If it's not in the trust, don't do it. If it is in the trust, then you're free to do what you want. Next question, please.

T Tracee 12:04

What is meant by public advertising is illegal? Can I paint my project name on my truck?

R Ron Giles 12:14

Public advertising is billboards, newspapers, that sort of thing, where you're paying to advertise to the public. The problem with advertising to the public. Number one, you're going to have to put information on there concerning you. And you have to be the refer, somebody has to refer another individual into the the beneficiary program. As with all things, if you publicly advertise, you're trying to get ahead of somebody else don't do that. That's all I'm trying to say with that idea. Don't public advertise, because it doesn't help you. And the reason it doesn't help you, you have thinking in terms of selling a product. And you want to get your product out there so everybody can buy it from you. The referral program, the RSS program for the beneficiaries will go like like wildfire, you might put a fancy sign on your truck. And then everybody in your town is already signed up. It I don't don't do things like that. Don't paint your project name on a truck or something that puts the CAC or part of the program then go ahead. But be very careful about that. Because we don't want complaints about people who are advertising publicly. And I believe that truck, have penny in your truck would be publicly advertising. So don't do those kinds of things. Put your cards out there, put your cards out, use your cards, gas station, in line at the grocery store, whatever. Just pass them out, say here's, I'm making \$144 a day and I paid \$10 to do it. Here's my card, here's a card, go to the website that's on there. Take a look at it yourself. If you like it, then sign up if you don't, and there's nothing but you you don't have, the person will not you will not have to sit there and sell it to somebody. The card will send them to the place where there's definitive information from videos and things like this that they can gain the information they need to make a decision. Get them to the to the website, the RSS website and let them go let that do the trick. You don't have to can. It's irritating when you try and get somebody in they think Well, the more you try the worse it? It is no, you're trying to sell them something they don't like that. So you're sharing with them. Next question.

T Tracee 15:11

When I hire a director, what is the process to get them the funds they require upfront, for example, to buy a computer or rent the office space, etc?

R Ron Giles 15:21

Well, how would you normally do that if somebody was you hire somebody to do it, you start paying them. Now, if the RSS program is up, you can you can give them a employment contract. they've got a beneficiary account. you would have them under a beneficiary account

contract, they've got a beneficiary account, you would have them under a beneficiary account. Put the money in an account, and then they're in charge of it. They spend it as they feel that they'd like to for their office, it's not like you're just going to pop money down and then go away somewhere, you're going to manage it. Or somebody designated to manage it will. The director program has different layers, he got the community, the city, the state, the county, and so forth. And use those different levels of management so that people get to have an idea what you want them to do. But let's just set up account and let them spend it. I don't know what else to say it's nothing really whiz bang, same way we do things now. So next question.

T

Tracee 16:31

I like that word whiz bang. How do we access cash? Where are the financial service centers?

R

Ron Giles 16:40

You know, this is this is the kind of question that is totally answered in all of the stuff that we have. How do we access cash? How do you go to? Can you go to the bank, physically go to a bank and take money out of the account? That's physically doing it as accessing your cash. It's not like we'll have a quantum financial system city near available for us. That's why we will set up financial service centers. Where are they? Oh, hi. Oh, no. What country do you live? In? What city? Do you live? In? What state? What neighborhood? I would go through the you've heard about it. So why don't you go and read up about it? And answer these kinds of questions yourself. It's so easy to do. You just have to take the time and the effort to do it. You need to self educate yourself. And questions and questions and questions will come up. But all of the information is there, you just need to access it in these to research it. When you do that you are engaging your mind fully in your projects, in the things that you're going to do as a humanitarian. If you don't do it now, when are you going to do it? Are you going to wait till the money comes? And then try and figure out how in the hell you're going to implement these programs? Or are you going to learn how it is now learn what to do now. And be fully involved in it. And in the thought processes, and the things that you want to do and how you're going to do it. If you don't get in and understand what it is that you're going to be doing. You will have very difficult time have very difficult time with your ability to be self confident as you go into your redemption appointment. So it's not a part time jobs full time job, you're going to be doing it for the next 100 years. Get yourself involved. That's the best thing I can say. Get yourself fully engaged in your educational process, because you're going to need it. If you don't guess who's going to be knowing that you're not there yet. Guess who says Well, you haven't prepared yourself enough? In their minds, they'll say that maybe I don't know. But this is a job interview. Don't think it's a slam dunk two points because just who you think you are. You're gonna have to prove yourself mostly to yourself, not to other people. Next question, please.

T

Tracee 19:46

LCC is not listed in the terms of reference. What does it mean?

R

Ron Giles 19:52

LCC? It's not listed because I don't know what that term means.

T Tracee 19:58
Maybe they're thinking about LLC.

R Ron Giles 20:02
Possibly. I was thinking the same thing. LLC is a limited liability corporation. LCC, I don't know, I don't know what that means.

T Tracee 20:13
What information do people need to give to register to become a beneficiary? They just register online as if they're registering for anything else their name, their phone number, their email, just the typical stuff that you would do if you needed to receive money. Is that okay?

R Ron Giles 20:28
That's that's nicely said. Yeah.

T Tracee 20:32
Okay. Next question.

R Ron Giles 20:33
You know, here I hear I jumped to a conclusion, and it wasn't accurate. What do people need to give to their name and email address? And their state or the country? Whatever? And that's their private information they will give.

T Tracee 20:52
Yeah, phone number.

R Ron Giles 20:54
We are not going in? Well, not even the phone number.

T Tracee 20:59
Well, I do have

R

Ron Giles 21:02

That's a private information.

T

Tracee 21:03

Yeah, but they're getting money. If they're a beneficiary, and they're getting all this money, they should register, in my opinion, they should give all their contact info just in case we need it for something, just in case we don't know. And that's the best way to contact somebody is through their phone.

R

Ron Giles 21:21

Or through their email, crush it two ways to get a hold of him was good idea. But I'll think of that and inquire about that. But so far, I haven't felt the need for a phone number.

T

Tracee 21:33

Would it be a good idea that when you register with the RSS program, you will get the 10 cents and later, for example, after three months, you can have your first trust three months later, the second trust and further with the three months gap, it would be one and a half years to fully enroll the income. So the working people in the beginning will not be so eager to stop working. At the moment they will consider this opportunity. The CAC and ECS may already be there or soon to be what are your thoughts about this idea?

R

Ron Giles 22:04

Well, the practicalities of monitoring that. My ideas, their grown up people, why are we trying to treat them as if we know more about their circumstances than they do? If they want to get the six, the six trust up and going in a week? It doesn't matter to me. It really doesn't. Why would you need to wait. There's there's the this prevailing thought that if people get money, they won't work, or won't want to work. And I don't agree with that. Because I think that they'll find very shortly that with this money, they can do a lot more things that can educate themselves, they can start their own business. There's so many things that they can do now that they couldn't do before. It creates a different process, a thought process. They're different now. And the longer it's around the the more that that will be prevalent. In as you watch people and see the economy grow and see everything working together, synergistically, then there's things that are going to take place that we just have no idea about now, because it's never been this way before. I just simply have to have faith and trust that the alliance will take care of things on an individual basis for the people that get the money. And it will always be in their best good for the purposes that they came to this earth. Let's let God do his stuff. And I don't want to have to worry about monitoring when the trust and all that sort of stuff or even build it into the

system. There's no reason for that, from my perspective. There's a fear associated with it, that they'll do something wrong. But I'm not worried about that. Because you give people the means to do things that are right, and they'll do it the right way. So next question.

T Tracee 24:15

I know we were told to write up an action plan for our humanitarian project however, is there anything else that we will need besides having our Zims for our appointment?

R Ron Giles 24:26

told to write up an action plan Yeah, also your project. Okay, and now you want to do, I can't see that there's anything else? If you have the binder and everything that we've asked you or suggested on aspects suggested that you do and it is only a suggestion you go out there, go in there with just a notepad and a piece of paper and a pencil and take notes or do whatever you feel you need to do. The more you're prepared, the more you'll come across as a competent person. to brand new thing, nobody's been doing that before. So I think you'll, you'll be fine. But I don't see anything other than those that you've mentioned that are necessary. Next question,

T Tracee 25:13

please clarify the generational bonuses, so I can be sure I inform others correctly. Whenever these bonuses are mentioned, it seems to be in relation to churches, or other organizations, please confirm these bonuses. Also how they apply to enrolling generations of individuals who are not members of any group.

R Ron Giles 25:33

The examples of the church is to give you an idea of how this is set up for generation bonus. There are those who will want to go out and talk to churches, or other clubs or organizations and get the people to sign up, get the leaders to sign up, then they can have their member sign up under the the group's name so that the group doesn't have to pass around or pay dues or anything of this nature. So the three, the three generations of Tracy, signs me up, I'm on the first generation, if I sign up my son, he's on my I, he's on my first generator, but also on Tracee second generation doesn't matter who signing up, wherever. It's a generational thing. So somebody is really out there and active and gets a lot of people and you're the one that was responsible for them, then they, those new people will come under your generational bonuses. Other than larger organizations, I'm not sure how beneficial that will be. But it's designed to encourage people to get out and, and they can make a lot of money doing it this way. And not only make them a lot of money themselves, but the program goes out faster. So I think that I think it's set up just perfect. As far as I can see. Just understand that the first second or third generation they get paid all the same. One cent for every 10 People that are signed up under that generational. So I'm not sure what else to say that. There it is. Next question.

T Tracee 27:31

I would like to know if some humanitarian projects that I have are going to be done by our older brothers like cleaning the ocean rivers, reforestation, cleaning, clean drinking water, etc.

R

Ron Giles 27:43

It's a good question. Most everything as far as the Earth is concerned, there's technology that will be applied. Some of this technology is from ET'S or whatever. But it's going to take people on the earth to do it, they got it, we got to do the work. Now there's certain technology that maybe we can't be involved with, because we don't have the technology or the things that are necessary to get it done. You might need to ship that can go under the water or something of this nature. We we don't have that yet. But we can help pay for him. We can help assist in anything that we can do, which is our responsibility. The earth is ours. We have a stewardship over the earth. We have been given dominion over the earth, as humanity humans are so the Earth is our responsibility, not somebody else's. They can assist with us. And we will just really love and appreciate their technology. But we'll be doing the things we'll be doing the work, like cleaning the oceans, rivers, reforestation, clean drinking water, etc. Let's all be involved in that, to what extent we can. And if there's some outside at technologies, let's let's use it and apply it. But let's take responsibility ourselves to be able to take care of your next question.

T

Tracee 29:26

How does the QFS know if one of our downline benefactors does something out of line? Example buy some illegal drugs for recreational use?

R

Ron Giles 29:37

Okay, well, you use the word benefactor. And that's not the right word, it's beneficiary. We don't have to worry about that. What happens if it does? How does that affect you? Are you going to be punished for it? If a beneficiary is given money, and it's theirs to do with what they want Then they back up for us is a quantum financial system that was shut down the transfers are any things that are illegal or immoral or causing problems for people. So we don't have to buy, we don't have to worry about that. It's not our job. We're not the police. Were out there getting people to involve getting involved in the RSS program, or the other projects that we're doing. What people do with their money is none of our, I'll say it this way. It's none of our damn business. And we better not be getting to other people's business, over violating universal laws. And if you want to start getting going down that track, then you're going to have some problems that you're not aware of yet. Just let people do what they're going to do is their life. God is their father. Whatever justification you want, you're not the one in charge of their life, you're not the one to manipulate them, and try and make them do things that you want them to do. Because you think this is a better way to do things. That's your business, you leave your business to yourself, and you leave other people's businesses to themselves, and let their personal guidance system that they came with, take care of what they need to do, and to get them to the right place at the right time. They may need to go through the dark night of the soul on drugs and everything before they'll come out the other end and say, I don't want any more of this in my life. For the price deprive them of that opportunity, well guess who gets the karma for that. So we let people do what they're going to do. And let God take care of things. And I'll tell you, somebody who's having problems with drugs, they get a lot more money, and

they start buying more drugs, they'll go down to the point where they'll say this, I don't like to say it's not useless for them. It's not hopeless, they got money coming in, they can change. And it's just a matter of making up their minds to change. So we let them do things that are in their best interest, as directed by their souls and by their spiritual guidance system to get them to the right place at the right time, I'm going to leave everything up to them because I don't have to do. And I'm certainly not going to get involved in dictating to them or whatever they do with their money. Nobody's going to do it to me, I'll tell you that for sure. I won't let anybody get into my bread basket, or my cherry bowl or whatever you want to call it. It's mine, it's my responsibility. Level and society is my responsibility. I'll take suggestions, but I'm the one that's responsible to God for that whole program. And I take it very seriously. So we have to allow other people to do what they're going to do. And just be sure that we're in are we're taking care of our own cash, register our own store, we're taking care of our own stuff. You don't have time to run over this, cross the street and get involved with other people's cash register. It's none of our business. So next question, please.

T

Tracee 33:45

Please explain the form of account a benefactor will use for their own benefits like a similar beneficiary account? Will we be able to have a trickle down system as well? Or do we just simply make a separate account just for our uses, like car, truck, house, vacations, etc, and fill it with whatever we figure we will need to do our personal things.

R

Ron Giles 34:09

How you want to do that it's up to you. Personally, I'm going to have my benefactor account that I will set up for myself with downloads and then I get a chance to see how much money I'm spending and, and so on for larger things. I want to buy a car I'll get money out of the account. It's your money you can do with it what you want. I'd love somebody on telegram was saying that. It's your money. Do what you want with it. You as the humanitarian were given that money because they know that you'll use it for the right purposes. That's what humanitarians do and that's why we got the money. I love that when he said that it's your money. As if it's your money. You want to buy a car buy a car You want to take a trip, take the trip. So, we we are in charge of our funds because they are ours. And, and then that's our stewardship, we get accountable for our stewardship. And if you don't gain the, the abundant mentality, and they're trying to get other people to, to become abundant in their mentality, we've lost, we've lost our job. Because our job is to become an example to other people, abundant mentality. There's plenty for everybody. That if we go about our activities and saying, Well, I can't do that, because that's not the best use of them. Use the money. And the reason I say that is because you'll have more money. If you take a billion dollars out of your hands and say, this is going to be mine. Do you think that billion dollars is robbing somebody else of an opportunity to have some humanitarian activity? I'll say, No, you'll have so much that you will never be robbing from other people to pay for yourself. That's a concept that people will need to learn. But it is true to true concept. Because there's so much money, you're never going to be using money for yourself that should have been used for somebody else. So next question,

T

Tracee 36:30

When will the process for Zim benefactors really begin?

R

Ron Giles 36:39

The process for sim benefactors, we're in training now. When we receive the funds, the RSS platform will be built. And then those who have received their referral from their appointment from their redemption appointment to become zim benefactors, then we get out the contracts and we start doing that and we assign the benefactors, their ID, and that master ID numbers, they set up a master account with a bond account that will secure any possibility of that account, getting below what is needed. There's all kinds of things that we're going to do but that all comes when they're when we get our phones. And at a point in time, there'll be the trigger for Zim benefactors, when they sign the contract to receive their master ID number, then they get get to work. So

T

Tracee 37:39

hope that helps.

R

Ron Giles 37:42

That's it for the day. So thank you to everybody. And we'll see you again next time. We have enough questions for question and answer period. Thank you again, Tracee for your help. And we will see you again soon.
