## SUMMARY KEYWORDS

people, question, humanitarian, money, rss, projects, home, cac, problems, zim, buy, program, funds, kinds, benefactor, years, telegram, account, idea, humanitarian projects

## SPEAKERS

Ron Giles, Tracee

---

**R** Ron Giles 00:00

Hello humanitarians is Ron Giles. I'm here with Tracee. We're going to do a q&a. Today is the last day of January, January 31 2022. So let's go ahead and start with the first question Tracee.

**T** Tracee 00:19

The privacy concern relative to the RSS program has been addressed several times, I understand that we can use the cards, nine billionaires sharing their wealth and just say that we are blessed to work for an organization that redistributes wealth. However, once the RSS platform is activated, I suppose lots of people will go to the internet and find the QFS 2020 website that explains it all, some digging, and they will quickly understand the whole process and the story behind the funds, people will quickly understand that even the cards have been created, but are not the real story. And info will spread rapidly on the internet these days. How do you think we should approach that as a Zim benefactor community?

**R** Ron Giles 01:02

You've manufactured a problem, and then asked for a solution. I don't believe people, there's going to be people who go to the qf s website, perhaps. But the RSS program will just go ahead and we're worried about it and think that, you know, there's going to be some problem, just let it go. Sign up of the first person from your master ID, and let that person just start referring people, and then it will grow and grow and grow and grow that way. It's going to happen, so we just let it happen, and know that the best things will happen for us as far as the community. Next question.

**T** Tracee 01:52

My humanitarian projects are to create an organization which finds and embeds positive nonprofits in all areas of life, they're already set up and doing amazing work and fund them to

help them expand. I also want to participate in the love won society programs as as in benefactor, I intend to integrate my project into the CAC program and would see it as a priority. Can we have our CAC program focus on that first? Or should we work primarily on local economies with small businesses first, and she means focus on her nonprofit idea?

R

Ron Giles 02:30

Okay, well, thank you for that clarification. You're asking some personal me a personal opinion about what you should do. And I'm not sure that it's your program. And I think that you're you have the freedom to do which ever one you want first. So I don't know that there one has to come before the other or you might be working a little bit on on one aspect of it. And then at the same time, be working on another aspect of it. But giving it a priority. Finding nonprofits and vetting them as as good organizations is a good thing. I think you'll find it, most of them, you have to have some ideas of the criteria before you investigate them. Because what is it that you want charity or something that gives 90% to what they're doing instead of giving, keeping 90% and then only using 10% for the things that you're trying to accomplish? Going to be interesting because charities have been used for money laundering free by the elite for eons of time. So it's it's an Esteve, that could be really good. And other times it could be really bad, but figure out the criteria you want and then go try and find those particular ones as far as your nonprofit idea. The CAC program, I believe is probably the better place to go. Having, you know, thinking through but that's just an opinion. And, and you get to do what you'd like to your program your money. Your stewardship responsibility. Next, question.

T

Tracee 04:19

I understand that the RSS cards on the website are models we can use, we can distribute them so people can go on the RSS website and register as a beneficiary. I would like to know what are your thoughts on the following ideas, adding a note on the card stating that funds cannot be used for nefarious purposes. Adding a note that mentions that people can make more money through an ECS by joining positive local nonprofits or doing positive community work if they wish to leave their job and then need to contact the CAC center to find opportunities to make a difference in their local area and make more money.

R

Ron Giles 04:55

The concept and the idea of this money cannot be used for nefarious purposes. Do we need really need to advertise that the cure Fest will just simply take care of it, they won't be able to do it. And I don't know if we need to be advertising that sort of thing, or even concern ourselves about it. We do. But I'm not sure that that's really where our focus should be, or care and concern. Let's work on the programs and get them going. And let the people do what they're going to do with their money. Because it's their stewardship, it's their lives. It's not ours, this money is not ours to distribute with conditions. Because we it's not, it's not our job to create conditions for the RSS program, and the use of the money. And we'll find over time, that the right things will happen for people, if they get the right reached resources, a lot of time hopelessness, and a lack of a future in their, in their thoughts in their minds, the reason why people go to drugs. But if they have the, the substantial income that they can get from here, they can get their drugs, yes. And then they can say, no, this doesn't have any energy for me

anymore. I don't, this isn't the way I want to live. I can change because look at this money coming in. And there's a thought process there that I believe many, many people who have problems with drugs, will find out that there's, there's a life worth living now. They don't have to go to drugs, it'd be wrong. But I think that there's a different energy that's going to prevail over the world that is changing. And in that change, is the healing aspect of what the money can do for them. I'm not saying the money is going to heal them, I'm going to say the opportunities will heal them because they can come from their creativity. And when you are involved in creating, creating things, there's a different way of approaching life. And so creating, being a creator of things is one of the modalities, if you want to call it that, one of the things that is very effective in helping people to heal, get them involved in something creative. And let them use their creativity for the things that they'd like. We are going to find changes, you're going to find that the old stuff doesn't have that energy that draw, because we're moving into a different way of life. And it's been supported by the heavens, and there's going to be many things that we don't have a clue about. Now, that will happen. As a result of that. My suggestion is don't worry about things like that, and just get out there and get the job done. And let the chips fall where they may. And we're not I'm not in charge of people's lives. That's we already have a Savior sort of thing. So there's no reason for us to have to be worried about that. That's gonna do our job. Next question.

T

Tracee 08:35

Do I understand this, this secondary account is the account with 500 quintillion. In your examples? The mother lode account or operations account is the RSS account that deposits quarterly gold back dollars into the Benefactor account. The master account is the account that gold back dollars transfers into the beneficiary's account. Is this correct?

R

Ron Giles 09:01

Yes. The five the 500 quintillion is a result of your wanting 100 years and of five quintillion per year. So that's 500 years is 500 quintillion per year. That's that's the secondary account. And then you get you ask for a percentage. And that percentage is 10%. Then they multiply that all out by the number of years for the term that you want. I'm asking proud and encouraging others to do the same thing. So instead of five quintillion per year, that will last for 10 years. You're getting five quintillion per year that will last for 100 years. There in lies the magic of what that whole structured pay Out is about. But it's taking care of at the appointment, all of the money for that account is put into your structured payout account that is administered by the Alliance and distributed to you. And five quintillion per year. Over the course of the 50 years, if you want to quarterly get a quarterly if you wanted to annually or BI annually, that's up to you. And the amount that you can get 10 I'm saying 10% Why would you ask for 5% When you get him? So you're you're right on, it's coming. Next question.

T

Tracee 10:41

I'm already you learning about love won society, I already had a basic structure for my international humanitarian and environmental project set to be further developed a specialist. Though I have no doubt that the love won society is something I want to partake in. I am not sure if it is fully compatible with all aspects of my own plan. The RSS and CA programs will

likely fit pretty well. However, the ESS, NRELS and ICCH programs may require certain changes to integral aspects of my plans or may not be applicable in the geographical location or jurisdiction of my projects. Therefore, is it permitted to partake and love won society, even if the RSS and CAC programs may prove to be the only programs that fit within our alongside of my own business structure?

R

Ron Giles 11:30

That's a good question. And the answer is, you have the flexibility of becoming a Zim benefactor. And with that you can start the RSS program. What you do from then on with the other programs is up to you. It's all optional, voluntary. So you may do the RSS and a CAC programs. And you'll feel that that's pretty much what you want to do. Your there's no obligation whatsoever to do anything more than that. Just do a good job with them. Now, the other structures, there are those who will do the other structures. And there's enough of us involved so that they will all get done perfectly well. So no obligation for the rest of it, do what you'd like. Next question.

T

Tracee 12:20

And wondering how those who are disabled elderly and those who are meagerly, retired with no savings and really very poor? How are they going to be treated by the RSS and other Alliance programs? What about those who have been disabled by severe autism? I know a 45 year old nonverbal woman who has not cared for properly at her group home? How are we going to address these types of things? Or is it that we have to create solutions still?

R

Ron Giles 12:50

You've left med beds, celestial chambers, whatever we know, completely out of that equation. It might take a little while before we get to the med beds. But my understanding is that certain med beds are already being created and prepared for us. And when the RV takes place in a way it goes. So the problems, and this is a good thing to think about. You're not the only one who has these kinds of concerns. The Alliance is thought this thing through perfectly, and they know where the problems are. And they can look and down the road and see where the problems and how it's going to affect what we're trying to accomplish. You don't have a counselor who can see down the road and will give you the good advice that you need. So a 45 year old person, non verbal woman who has not cared for properly at a group home, those are the kinds of things that eventually will be taken care of. If you know of them, then you can do something. But if you don't know about it, you can't. You just have to let the program work its way through and accomplish what is perfect for each individual on the earth. Who's has their own guidance system and has their own reason for being here. We don't know any of that. So we just go about doing our job and let each individual life is in the control of their of their soul. And we just we have to let that we just have to let that go. We see things and we will have problems. But if there's a problem for us to solve, then we solve the problem. Otherwise, we just let God take care of things. So don't over concern yourself with things. The Alliance knows what's going on. And that's why the programs have been set up the way that they are to accomplish the greatest good for the greatest number of people can't save everybody. But we'll do what we can when we can. Next question.

T

Tracee 15:09

Would there be any way for businesses to pay youth under 18 years old for working part time at a business through the love won Society Program? Same question goes for farming families, many youth start working on the farm by the time they are nine or 10 years old.

R

Ron Giles 15:25

I don't I don't know if there's any limit for children on the farm. I think that the director who's in charge are going through and doing whatever for that farmer and setting up their program that he has has programmed can do. If a child is gainfully employed by their parents on the farm, I worked on a farm one time and there was an 11 year old kid that drove the tractor and I, I was doing the slip with Nicola slip, and the bales come out, and I'd stack them and then and then we'd have them all, and then there'd be large stack would throw it off. That's called the slip Well, 11 year old and I was 14 at 15 at the time. So that's the way farming is done. And they're good people, and they're young. But they're they're capable of really doing things. So the parents are the ones in charge, and can ask for a contract, if you want to call it that a download for their children. And, but that's all that's all between the parents, and those who were doing the job. Let it be flexible guidelines, perhaps you have to be 18 year old to have an ESS or excuse me a beneficiary account. But there are ways that we can set it up for the children as well. Or young people that are doing the farming work. If it hasn't already been worked out, we will change it to make it work out that way. So that I'm with you on that. And we can take care of those things. Next question.

T

Tracee 17:22

How will this be paid by the non custodial parent, especially in the case where one parent is withholding the kids for no other reason than control? I know my son went through this like 1000s More with no history of violence, drugs or alcohol? Will the new consciousness take care of these issues?

R

Ron Giles 17:40

Yeah, I think you're projecting what is now into what's going to be. And it's very difficult to be accurate in that projection, because things are changed, the whole brand new energy is prevailing over the world, over the earth. So as we move into that, and start functioning within that, we'll find that things change. So yes, there are problems. If the money can solve the problems, and there's the money to solve the problems, if money can't solve the problems, then it's not our job. Our job is to distribute the funds. If you take upon yourself, the worrying concern of everything and every person and ruminate over that, so that you have stay up at night, and my mother loved to worry. And you know, there was no reason to worry, period, worrying all the time does not have any effect on what's going to happen except for the way that you deal with it. So you'd need to worry about those things and worried but I'm saying to you, and the person who did this, come from your heart, do what you can, and let God be in charge. And you'll find out that he does a really good job, or she or creator, whatever you want to call it. I have perfect faith in that process of the Creator taking care of his creations. And

there's all kinds of things that we don't know anything about, of why that person chose that particular life. So we just let God take care of things. We'll do our job. Let him do his next question.

T

Tracee 19:25

I was wondering if a professional Realtor in South Africa for 38 years, the program listing service we call multi listing. We have a lot of elderly people who to sell because they go into retirement homes and need their money. I don't foresee them problem. Ron, can you please tell me how much is 11 and how trillion and 11 Quintillion. I have no idea how much that will be.

R

Ron Giles 19:57

Okay, No, I understand. I understand. I mean, we've only we heard of a million. But very few of us have had opportunity to have a million dollars. So we don't even have the idea of a million yet loan the quadrillion. And yet loan of a quintillion. It doesn't, it's just math, it's just zeros, it doesn't matter to us. In our mind, we look at it's foreign. We just know that we can use that all of the zeros are is opportunities for service. So you go for the higher rates, you go for the bigger amounts? Do we comprehend that? No, we don't, there's no way to comprehend it until you are trying to work with it. So don't even concern yourself about how big it is just simply say I have plenty for everything I need to do. I don't have to watch. And be sure that I'm in my budget or something of this nature is because you're going to have a very difficult time. That way trying to get rid of all your money, because there's no way to do it. And that's why we have a certain amount after the end of the quarter that you put into your bond account. That bond account is going to be really big. Because it's going to take many, many years before you even get close to doing 1.25 quintillion per quarter of getting rid of it when I say really putting it to work in society. So we're okay. We all will have it in our accounts, and it can just sit there, there's no harm, absolutely no harm. And when it comes time that the alliance needs some extra money, I'll find the people stop putting that money in projects. So let's be flexible and not be rigid in our thinking. Older people, yeah, any people. There's this kind of money nobody has is not leaving the elite have a real good idea of a quintillion dollars or even a quadrillion. So we're plowing new ground, we get to go out there and see what it's like. And I think it's gonna be great because we'll have all the opportunities in the world to do what we're trying to accomplish. Next question.

T

Tracee 22:32

The NRELS program, would it be better wait, hold on, I got to brighten my screen. Would it be better to offer these homes to first time buyers first, I bought a home 25 years ago, and it was so difficult because we were low income. Only the people with money could buy homes. And that wasn't fair, we found a program that helped us pay our mortgage. If not for this program, we would not have been able to afford it. People with low incomes and bad credit scores, scores have been left out. Also, if someone has a nice home, will they sign up with NRELS to get a better home and sell theirs to gain a huge profit, especially since our mortgages will be forgiven? Because mortgages are illegal? I feel they should give the current home to a family member or a friend in need.

R

Ron Giles 23:18

Well, I think that your opinion is your opinion. And you know, you can honor that. But don't be projecting it onto other people. Again, we're not here to manipulate. Now if there's a problem with what you're saying, then that solve the problem. But I see that you're presenting a problem here and projecting it into the future. And I'm saying why do that. When we actually get into the NRELS program, the listing service itself, with the buying of properties, and fixing them up and then putting for resale, you're going to find that there are more buyers than there are people are homes. And so there's going to be ways that people work it out so that they can get into a home. If I was sitting around waiting for this to happen for a home and wait until it came up on the listing service, I would probably be there a long time. But if I saw a home for sale, and I would like to buy that house, I will go and talk to the real estate people who are involved and say this is a home that I would like and I'm I'm bird dogging it for you. So I want to be the first one to get a chance to buy it. That can work out. It just works out. Same way with condominiums and things of this nature as we take the apartment buildings and turn them into condominiums that can happen in any location Some people sometimes the, the, the rules or laws of where we are have jurisdiction, all those kinds of things and don't want them to happen. But we'll work through those problems because those are really viable ways. So having getting people into new homes, tell the people who want to be ingenious, they're gonna find ways to work the system. And as long as it's not illegal, it's going to happen. And, and let's let's just let it happen, get people in their homes, to their new homes. My biggest concern about a new homebuyer is how do they how do they learn how to live in that home? What about plumbers? What about electricians? What about those small things? They're not used to that because they just call it the supervisor and they have them send over somebody to do the maintenance for you. We know that you're going to it's going to be your job to get the people that do that. How do you know how to do that? Well, I'm in my ideas of addressing that is to do a video for homeowners, new homeowners, new homebuyers. And let's put in that video some of the problems that they can expect to find and and work through them now so that you have a solution. So you have a list of plumbers, you have a list of electricians, you have a list of people can cut lawns for the older people, or snow areas, shoveled sidewalks, all those things can be can be done. So it's an educational process to get to people into people into a be a new homebuyer, new home, meaning they've not had been before. But they're buying a home now for the rest of their life. We don't we don't care. If a person who's selling their home makes a huge profit, we don't care. Let them have their profits, what they've been working that home for. So that's none of our business. The property will sell at the market price, we buy it at the market price market means they do an appraisal for the homes have been sold or similar to ours in that area. That establishes the price that we pay for it. And then we buy the house put it into the NR ELLs let go through the system with the refurbishing and fixing up and all that sort of stuff. And then it and then the new people buy it and move in then we start then it's a good thing. So our program, the NRELS is much better than the USDA or rural development or any of those kinds of programs. And if you look into it, you can see the magic of what I'm trying to say where people are going to buy a house for a 15 year mortgage, but who's paying for that? Not mortgage, but 15 year lien on the home, who's paying for the home with our increase in the download, we're paying for the home for them. There's no organization that's going to be doing that. So it's a brand new way of doing and let's just go and have some fun with that if you want to get involved in the NRA pls program, then it's a good thing. But it's again, it's all voluntary, and some people that's all and I'll do won't spend much time with how this thing's been.

T

Tracee 28:43

So the people they are the first time homebuyers assume presumably they live in an apartment building and so what we can do is buy the apartment complex and then resell each individual unit to the occupier

R

Ron Giles 29:02

absolutely true. And you get into the inner cities perhaps in some of these so let's go in and part of the fixing up the the neighborhoods and so forth is buying those buildings. People are already living in them so let's buy the buildings turned into condominiums and the people can you know, work out the way to remodel the place and so forth. But the people who are living there now are the prime targets to sell it to. They love to stay in their neighborhood they've got their friends they know where to shop, they knew this this them and but there's other areas that they want to move out of because the kids are getting involved in drugs or gangs and that sort of stuff. Everybody has a reason for doing what they're going to do but let's just accommodate the the best way that we can the desires of the people. But I feel like we were going to have our eyes opened and opportunities, we'll see opportunities to serve in ways that we never thought possible before, because why we have the money to help it. And before that we didn't. So we're going to change the way things making things happen. And it's really kind of exciting. Does that answer the question?

T

Tracee 30:23

I think so. Okay. Okay. Next question.

R

Ron Giles 30:27

Move on to the next.

T

Tracee 30:28

Since I work a lot, I was worried about how long do we have to make an appointment for the redemption center? I know so far, it'd be better if I pick out an already approved humanitarian project, I presume you are from the love won society, do you have a list of approved humanitarian projects for us to pick from?

R

Ron Giles 30:48

That is the old way of cabal control, you have to pick from our list of humanitarian projects, whoever is doing that, is trying to maintain a degree of control over you. Those are the kinds of things that you get rid of in the society that we're building. A humanitarian will have their own projects. That's, that's how they know that their humanitarians are configured out, is because they've got ideas of how they can help other people and serve other people. If the Cabal created a list of humanitarian project for us, who do you think is going to benefit society or the Cabal? Stay away from anybody who's telling you that here's the approved humanitarian

project, the alliance will approve humanitarian projects, not just because they're a project, but because you as a humanitarian are going to do those things. When you go in for your for your, you have to have thought of project, you have to think of a way that can come from your heart and service. And then you write those ideas down. And that's how the person sitting opposite you at the appointment can determine if you're prepared as a humanitarian to go out and do humanitarian work. If you've thought about it, if you've engaged the thought processes that will accomplish what you're trying to accomplish, that's where they're going to be looking for, they're not going to be looking for specific projects that come from a list there. Again, as always, they are funding you as the humanitarian, not your projects. They're funding you for as a humanitarian for the next 100 years, your pet project can be done, perhaps within six months. And if it's something that's ongoing, then you set it up, and then move on to your next project. So they're funding you, not your projects. And there's going to be major duplications of what people want to do. Everybody wants to build homes for the homeless, there's going to be so many homes built for the homeless that you didn't even have to drive through neighborhoods and see if you can find a homeless person to offer the home to and fight over. Because there are so many opportunities to be wise in what you do. Get out there, see it needs fulfill it. If there's projects, pet projects that you want to do, many people are going to set up clinics and things like this, or healing centers. And others are going to want to do something different along the same lines. However you want to do it, you set it up in your local area, do the CAC and and if it works there, then do it, spread it to other locations. And eventually we're going to cover the whole hour. So be flexible and realize what's going on. Realize that we as humanitarians are showing up for a job. And we're getting our funds, we're getting our tools to do the job. And those are the that means we get the funds we get a project or probe or structure and so forth love won society structure that doesn't have to be reinvented. If I've had one person, I've had 1000s, who have said, this is a structure I've been looking for. I was so concerned about how do I do all this? And now you've thought this thing through and here it is, and I don't have to reinvent that wheel. I say to him, Well, God knows what he's doing. He's doing, he's doing great or does Divine Consciousness knows what's going on. And we'll produce things in a way that will be just perfect for us. And our job is to just come from the heart and way we go. Zooming right on down the road to helping all of the people that we can. Next question.

T

Tracee 35:17

I understand grants as a one time payment. But if a captain of a firehouse is a trust to the firehouse, what would that look like? I'm assuming the fire captain already has an RSS along with six of his own trust with the firehouse trust look like its own trust?

R

Ron Giles 35:34

Yeah, it would, it would be similar. If that's the way that the manufacturer wants to go. It can be it can be a trust, or it can be a benefactor account. Which means that you just you control how much money that that goes into that crash. In this case, it's a fire station. The captain is the RSS is the trustee in charge of the funds. And it does things for the benefit of the fire house. So fire station, so be flexible. But the I think the the idea of the Benefactor account is probably one of the best things we've come up with recently. Because it allows you the flexibility that you want, instead of 10 cents a minute or whatever. Trust that you're setting up for people, it gives you the flexibility to make changes and do and work it out so that it works into the system, or

the situation that you're trying to solve a problem for a grant. I think, you know, I think every cop car ought to have bulletproof windows and the lar things in the doors. So to protect them, that's a grant, every time they buy a house or buy a new car, for their squad, car, whatever, then you have them go through the change of windows and so forth. That can be a grant or it can be set up so that it can happen time and time again, when they buy new things. See, you still have the flexibility of having this director in the CAC in that local area. So if they buy another house, or if they buy five more squad cars, and they don't have the money, and you know, the money's been spent on the others for fixing up their bulletproof in their cars, then you come up with another grant. So grants are a one time Yes, a continuing source of income for equipment, things, fire station, they eat there. So give them a budget for food. And they, they're there all the time. So if they want some workout equipment or something of this nature, then you can do that too. With the money, you're going to make it much easier, much more desirable for people to work and to enjoy what they're doing, and do what they enjoy doing. Because there's money in it that they can have a life with. Some, some men really love teaching, but they can't make enough money to really take care of a family. Well, let's get those people enough money that they can take care of their family and enjoy doing what they're doing. That's how flexible we can become the idea of helping fire stations and so forth. I think a really good, really good. And that's in the community. And that's the CAC program. So we're taking care of our communities. Next question.

T

Tracee 38:59

If the house is paid off, and we have essentially paid for it when they go to sell it back to us, I reckon, do they get paid for the sale of the house? Again, just wondering fine with me. I'm asking for enough funds for 100 years and to help galactic after helping the earth all I can. If I'm asked.

R

Ron Giles 39:20

I love your idea that helping the galactic Yes. You know, we're hoping that they can use our help and we're here to help them but when your house is paid off, then the lien on the home is paid off. And the title is already in your name. So the home is title, you have the title and it's lien pre. So that means you it's your home. Now if you want to put it back into the end RTLs and sell it back to them and buy a new home in a different location. After the five years and if the loans paid off, then you have the flexibility of doing that. So it's no question I think, I think that's what you're asking is as far as that's concerned, but you don't have to sell a home back to the NRELS. Live in it, enjoy it, unless you want to go into another home, that's up to you. And we don't care if you make some money with your home. It's why we give you a 20% discount so that you'll have equity in your home already. We're just helping out the bottom line of your household budgets and so forth. is going to be a really wonderful thing to get people into homes, I believe there could be some problems, collateral problems that we'll solve, with education on how to fix this and that and the other. It can happen and we will do all that. So we're moving forward solving problems, money can solve problems. And those problems that come that money consult, then it's just time before we get it done. Next week question.

T

Tracee 41:15

I have a question regarding the seven year employment contracts, that I haven't yet found the

answer to myself during the training. To become the creators we are meant to be it's extremely important to act on our highest excitement on a moment to moment basis. Doing so is an all in one toolkit for manifestation. One of the universal laws is change. Everything is always changing and evolving, including people in their passions. So how does this seven year commitment to a specific job fit into this? If after say three years someone loses their passion for the work they're doing because their heart is leading them towards something new, it would be a disservice to the whole to continue doing the work they don't fully enjoy anymore, just because of a contract. How does love won society deal with this?

R

Ron Giles 42:00

Well, I asked you as as in benefactor, how would you deal with that ours is a structure you use to structure the way that you feel is appropriate. I feel like if somebody signs a seven year commitment, or, and starts receiving benefits from that, it's hard to know seven years ahead of time, whether you're going to be an older person and adult want to work past that. If you work the seven years, then the benefits remain as your income and everything remains the same. The only thing you don't get after the seven years is the increase if you quit your job, but seven years, you could stay on the job for 1520 30 years, it doesn't matter dress, you start use every quarter, you get the \$100 increase, and and then when you retire, then all of those benefits come to you continue to come to you that you've accumulated over that period of time. There's, there's reasons for the contact. And I'll be honest with you, why seven years? Well, there's some kind of magic about that. I don't know what it is. But when seven years comes along, then we'll find that there's that there's a seven in there for some reason. I don't I questioned it, in my mind, when it came through is seven years. Why is that? So magic? I don't know that you asked me that question. I don't know. I really don't. It's just seven years. So but I understand, can we be flexible. Now we can be flexible. These this program, this part of the program will be run by people who let me put it this way. The seven year contract was designed for the ESS program so that when a large corporation comes along, and we buy all of their stuff, and we pay the the labor costs, and that's where the seven year labor contract comes. And that's what it was designed for. It's in it's to augment what the company is doing and help them to have a stable workforce. And most people who are working at a skilled job, enjoy what they're doing. So there's not everybody will, I don't know. Let's be flexible. Let's serve the needs of our people of humanity. Let's serve our community. I don't see any value in holding somebody to a contract in something that they don't enjoy doing. But it's going into the contact that concerns me if they are already doing something that they love. And then all of a sudden they say I don't like it anymore. There's going to be flaky people you have to deal with it. They say flaky people who have a hard time making up their mind. And yet we can deal with that. We can deal with it if there's reasons, people aren't going to manufacture reasons, or maybe they will to get out of a contract. But it's gonna be a problem for them after that. Alright, let's go ahead with the next question.

T

Tracee 45:27

I have purchased 10 T zimm plus three times five octillion notes and wonder if it is okay to pass one of these on to someone else. So they can also be a benefactor? Or will I leave myself short on Zim when it comes to the redemption meeting? Also, will if I gift a Zim? No, will they be recognized by the Alliance?

R

Ron Giles 45:50

The answer to that question, if you give that to somebody, so that they will have money, which is oftentimes the reason I want to share, I've got this big thing, I want this, I want to share this. Do they know what they're getting into? Do they know what is cms? Have they got, they already got projects and ideas of things that they want to accomplish? We don't know those kinds of things. In the benevolence of our heart benevolent see of our hearts, we want to share. But you can share inappropriately with somebody, you can set them up to think that they're going to get this money and their heart's not in it. What do you think the alliance is going to do? Give them money? I don't know. It's not our call. But I think you might be setting yourself up for a problem. I have been very relaxed, reluctant to give Zim to people unless I know that I'm going to be working with them on a joint venture sort of basis. And they need to be autonomous from me in terms of their money. So we join together on a project, but we don't join together with the money, we each contribute what we're going to contribute for the project. But that is a choice that each of us gets to retain, and how we use our money. I was read there was a person today who was asked this similar question. And I said, are you aware that that person may not be a humanitarian, and you're going to give them a Santeria note, or octillion. Note, and, and it's just going to be wasteful for them because their heart's not in it. They're not humanitarian, maybe we don't know those kinds of things. I always say if you have bought your exam, you go through the redemption appointment. And then you look for the people, you'll not afterwards, but you'll do a concurrent but you'll get your money. And then you will engage people in the works that you're trying to accomplish, as far as your projects are concerned, is that not a better time to start sharing. So you put them on an employment contract and give them 50 cents an hour or a minute. You know, you can give them a whole lot of money in a very short period of time. So they can't they can't go out and find those kinds of jobs, other places. So you can give the money, you can share the money. But my idea is that you go through the redemption appointment, knowing that you're the humanitarian. And then you have the flexibility of dealing with those people that you want to give money to in any way that you possibly want to. And it doesn't matter if they're humanitarians or not. Because you're the humanitarian, it's your money. You're the one that's in charge. I had a person who wants to give \$20 million to all of his buddies. And he was arguing for that. I said, Well, are they? Is that the way you want to do humanitarian work? Well, I have to guess you do. And with those kinds of ideas and understandings, the Alliance knows what you're going to do. You think you're going to get the larger rates and start giving legacies to all your buddies. heart's not in the right place. My opinion. That could be wrong. Maybe that's just fine. But I have a question about it. So as you humanitarian We go in and we get our gym, we go in and get our funds, and then we do our work. Not all people will have the money in the beginning, who are humanitarians? Keep that in mind. They may not be the ones to receive the money, the point of the spear gets the money penetrating into the darkness. Okay, then we get the money, what do we do with it? Well, if there's nothing behind that, if there are no humanitarians left to do the work, then the work doesn't get done. It's the point of the spear that pierces into the darkness, the rest of the shaft and everything is the energy that's going to accomplish what's happening, what's going to happen as a result of that. We're going to want to find those kinds of people. So if we make him Zim benefactors in the beginning, are we doing a disservice to them, let's let them be where they are, as long as you are sharing appropriately with people that can be guided by their inner guidance system to buy them or to get it themselves. Keep in mind that if you give something to somebody, they may or may not have the same feeling of value that in that, that you've just given them to give to them for free, then they don't value it as if they had to go out and work for it. Keep that in mind. So we have a little bit of psychology to learn, we have a way of doing things that we feel is the right way from our hearts. How many times have people said

well, I'm going to do all of this, I'm going to do this, I'm going to do this and it's all going to be free. Oh, okay. So you're changing the way people think. And give them put them on the dole. People want to be able to work for the things that they get so that they know they put in the energy to get what they wanted. And it's important for you to not take that away from them, because that's very important. Free, anything has little, oftentimes has little value. This certainly doesn't have the same value you put on it when you bought it and then give it away. That there's times when it's good to give things free and other times when it's going to be detrimental to the people you want to serve. So there's these are just thought. And let's let's work with the thoughts and figure out the best way to go about what we're trying to accomplish. Next question.

T

Tracee 52:53

As a benefactor can I support university research groups for the development of declassified patents?

R

Ron Giles 53:01

That's an interesting question. Do you think that's a good idea to use your money? If you do, then go ahead. Those are good people. They're looking for things. I suppose they're good people, the projects are good, and so forth. That's up to you. You're going to find things that you want to put your money into the categories and the way that's found is up to you. You're the humanitarian, so you feel good about it, then your heart then go ahead. Next question.

T

Tracee 53:38

If I'm a benefactor, can I organize an educational institution to teach new knowledge and transform the mentality of humanity?

R

Ron Giles 53:49

If that's what you have in mind, then go ahead. Who's to say you can't? Next question.

T

Tracee 53:56

Can replicators replace a food with all of the nutritional power for us humans?

R

Ron Giles 54:04

Well, we we don't know a lot right now about that. But in the replication of things, it's recreating that on a different basis where they don't have the food doesn't have to grow. I suppose in my mind, that carrot that has good nutritional value is a perfected blueprint that the matter replicator will do. So I have no reason to believe that that care won't have all of the nutrition of a carrot that has gone through the growing process, with growing nutrients from

the earth and so forth. So I believe that the matter replicators will have all of the nutritional value of the food that is in the Perfected blueprint of that particular item. potato, carrot, whatever you're talking about. So that's my belief now, and I'm certainly open to other things, you may not have enough salt in it. Or it may need some space or something of this nature. I don't know those kinds of things. So what comes with the manner? Replicated? We don't know yet. But I've heard some really good things about metareplicators being used for med beds and things of that nature, whether that's going to happen or not that way? I don't know. I'm open for it. I'm looking for great things to happen that way. So it's new technology. Questions will be answered as we get into it. Next question.

T

Tracee 55:49

My question is regarding the real estate loan interest rate of 2%. Can you clarify how the 2% Interest is calculated? Is it a 15 year amortized loan? Or is it straight interest calculated on daily monthly or yearly basis? Or is it just calculated as the total of the overall loan,

R

Ron Giles 56:07

the 2% interest, it's called an interest because that's the best way for people to understand that there's 2%, going towards something every month, whatever the idea of the 2% was, so that you have a chance to build up a nest egg of funds that will be used in support of your home, a new house or a new roof, you have a spring leak in your plumbing and causes damage, you'll have the funds to fix that all up. We don't, we're not going to be involved in insurance, because we have all the money that we need to have not have insurance. So we work all those kinds of those things out on our own. But the 2% was designed to be put into an escrow account. Meaning that there's somebody who's controlling that and there's the escrow instructions are out there of the way that people can apply for the money. It might be that you'd need a new roof. That might be you've had some damage from a storm or something this this, you go get your praises are your estimates of how how much it's going to cost. And print in your your estimates. And this is the one that I've chosen. And you know, this might not be the lowest one, this is one that I know somebody is really good rather than somebody that I have worked with before. So there's all kinds of things that go into play. But you're working with an escrow account that has escrow instructions to release the funds for certain things in a certain way. You just follow through with that. And there's the funds to put on a new roof to treat fell over in a storm and damaged your roof or whatever, you got the funds to take care of that sort of thing does away with insurance. And it also gives you the peace of knowing that something comes up. You've got a nest egg that you can fall back on. That is that is well, it's for all of this other stuff about 2% and 15 year mortgage and all that sort of stuff. We'll work out the parameters on that and make sure that it's understandable and set down in in writing. But the whole concept of the 2% we don't we're not going to make money on our money at the end of the third 15 years and the money that's in that account will go back to the owner. Oh, there's still some things that we need to iron out some decisions that need to be made, but we won't know what those all are until we start implementing it. And we find the things oh, let's do it this way. Well, that sounds like a much better way. And that's the way we will solve the problems. Next question.

T

Tracee 59:06

Concerning telegram training many older people like me do not own an iPhone but still have a basic flip phone to get proper training and seems everyone is forced to get one to receive LWS telegram training I assume that the initial LWS discussion forum was to be used for our training but proper training can only be accessed by iPhone. Can you tell me how I can get trained online on my desktop.

R

Ron Giles 59:33

The training is from the computer if you have an iPhone that works and you don't have to use a computer. Some people don't have a computer and only having a phone so they have to access the best way that they can for the purpose with what they have. So this whole idea of you got to have a phone to do your thing know if you have a computer Think you have the best of all worlds, for me is a small phone trying to read things is very difficult. My eyes don't see that well, unless a big words and then you're scrolling back and forth, or pushing the little slider back and forth. So that you can read a sentence, that computer would just all be there together. I find the phones difficult for me, but other people are really good with it, and that's fine. However, we can only set it up the way that it is now. And so if people can't access it, then I'm sorry about that. The QFS2020.com is our location where we have posted all this, if you have a computer, then you can watch the videos, you can go to a bit shoot and if they have no problem getting them there, then you can go to YouTube and and get the links that we send out very carefully or not carefully. Oftentimes, the whole list of them. And it's good idea to put that somewhere and so that you can have the list of them. Because you can only get into YouTube with a link. It's a private channel. It's not, you can't go there, YouTube and put in a search and there it is. No, it's a private channel. So you have to have the link. And that's what we've done that for. And specifically that the YouTube channels were chosen so that people stick in a different languages have language subscripts that they can watch as a as they're going through the read, excuse me as they're going through the videos. And that was a reason for YouTube. And I think it's a wonderful idea. Whoever came up with that was brilliant. You say you Tracee? Yeah, probably so. Yeah. Brilliant, brilliant idea. So it solves a lot of problems for people. And it is a real problem for people who don't speak English to be able to understand these things. It's opened up a great opportunity for everybody to have that language in their, the information in their own language. So that's what it's for. So, Telegram training, na Telegram, it was not designed for training, it's a support. But it's it's not the end all people who want to learn things so it's there for your use if you can use it, but it's, you know, the chat room is more of a social thing rather than a trainee. Although in the training, or in a social that's you ask people what do you what do you think about this? What do you think about that, then then you can start sharing some ideas into the project, only telegram then you have a better opportunity to, to share your, your projects and some of the details about it and other people who want to read all those projects, those details can get there and, and it's a good learning but the telegram is only a support system. The real training is done by the website and the videos. So I hope that helps. Okay, so well. With that then. Tracee, thank you for your help. And we'll go ahead and and and that's it for January 31. We'll see you again. Probably next day. Shall we get some more questions.
