SPEAKERS

Ron Giles, Tracee

Ron Giles 00:00

Hello precious humanitarians. This is Ron Giles. I'm here with Tracee and we're going to do another question and answer session. Today is January the third 2022. To zero to two, a lot of twos. That's good. So with that, let's go ahead and go for question number one. Do I see?

Tracee 00:22

Okay, can managing directors work with existing Native organizations or perhaps bypass them, and help the native population to have homes to be proud of?

Ron Giles 00:35

It's a question that I'm referring back to you. When you say can you do what you feel is appropriate. That's where you come from your heart. Don't be dependent on other people to make decisions for you. Because that's inappropriate. They give you the money, come from your heart and make the right decision. Of course, you always have somebody who can you can counsel with. So this is a question you just talk to some of the native population have organizations in ways? Is it wise to be involved with that? Or do you bypass all of that and create the wheel? Again? I don't know. Those are good questions. But the answers to them then come from me, you have to be there on the spot making your decisions, and feeling the right answer in your heart. Next question.

Tracee 01:27

I can't find the payment instructions for activating an account for Zim holder, I believe it was \$10.

Ron Giles 01:37

Well, the reason you can't do that is because you don't know what you're talking about. And I'm sorry to be that blunt with you. But people would talk to me about \$10 and want to be part of that project, just interested in the money. And I can understand that. But the that part of the program is not up and running, nor will it be until we have the funds. So those are kind of questions that I can help you with it, because it's not here yet. Next question.

Tracee 02:07

Regarding persons who are uneducated with literacy problems, and no PC skills, how will they be processed into the RSS program if they live alone in remote areas, presuming they are only used to having cash?

Ron Giles 02:21

Well, those are questions that I have no answer about. Yeah, lights knows who they are to take care of them. Just trust the process. The only thing I can say trust the process, it'll take care of these people have an

Tracee 02:37

idea? Well, let me answer I have an idea. So open up a CAC in those remote areas, and then they can do everything within your office.

Ron Giles 02:48

There you go. Tacs is the answer to a lot of problems, especially those times.

Tracee 02:53

Yeah, you can have like a little computer room that people can come in and borrow the computers until they have enough saved up to buy their own.

Ron Giles 03:03

That's true. Okay, and you can you can do the teaching, you can do all kinds of stuff, the education is not going to be a problem, you're going to get all the opportunities to educate people. It'll be good. Good, good,

Tracee 03:20

good comment. And with the med beds, I hear that they even you can even learn another language. So the literacy problems cleaned up with the med beds. So okay. Some credit unions

have bank status in Ireland, I imagine these credit union managers and staff would be perfect for the RSS and CAC platforms. They are humanitarian in nature. I have been a supervisor and credit unions and see them as a perfect vehicle for RSS, etc. Any views on this?

Ron Giles 03:50

I think that credit unions are very similar to banks, in terms of they make money on other people's money that's going away. So there's going to be a lot of credit unions that either go out of business or get repurposed into the financial service centers. I think credit unions are a real prime target for us on a smaller basis and some of these national banks. Another idea is that the small credit unions, their branches and so forth are usually out in the inner communities. They may they would just be perfect to dual purpose, the CAC and the financial service centers all together. There's a lot of benefits with that, but you just have to go with what's presented to you. Next question.

Tracee 04:44

I have 27 bonds from eBay will I be able to use all of these to redeem for a higher rate because I plan to help my family relatives and friends and family in the Philippines, but I live here in the US. I also heard that on December 4, the St. Germain trust was released with four Three zeros and the rods, Regus trust with even more zeros. Is the RSS program already been funded to?

Ron Giles 05:08

No. And these funding you know you maybe it did happen been sold that for years now the Rodriguez trust and the St Germain trust the world trust and all of these have been funded. Yeah. Okay. Proof is in, in the actual cash flow starting to move when that happens and it happens but as far as our humanitarian love won society humanitarian activities they have not started yet. And no RSS program has not been funded. Next question.

Tracee 05:47

Can you please describe the difference between the redemption rate and the primary principle, they seem the same to me.

Ron Giles 05:55

Redemption rate is the amount of money you get for each of your gym. You multiply that by the rate times the number of Zim that you have, then that equals your primary principle. Now, from the primary principle, that's what do you do with that? Well, you figure out the percentage of what you want on a structured payout, I'm going to ask for 10%. So I'm asking for 10% of the primary principle. And let's go through our one 100 keynote at \$500,000 That's going to give me five or give me 50 quintillion dollars as my primary principle, I asked for 10% of that on a annual basis, which would be five quintillion. And then I get that I'm asking the five quintillion for 100 years, you multiply that out, and that's 500 quintillion dollars, not just 50. To the

structured payout has the ability to to give you money over time. And that's why it's been set up this way. So they seem the same to me, they're not the same, but have a different rate times the number of gym you have equals the primary principle. But what you use the primary principle for in a structured path is, is different. So then the secondary principle, so I would suggest to go to the website and look up the structured payout. And it'll give you the good information that you need. Think it through, don't just read it, think it through, take your your gym times a rate that you have in your heart, take them through, you can figure out what you're going to get on a quarterly basis. So it's available to you just just take, take the time to go through it. Next question.

Tracee 08:08

Once our QFS account is set up at the redemption appointment, how do we fund certain humanitarian groups or organizations anonymously? electronic transfer? Or do I write checks? Same goes for the Managing Directors and other help how do I pay them out of my QFS account?

Ron Giles 08:27

Well, when you ask that kind of question, it doesn't sound like you're going to be part of the revenue sharing solutions program. And you're you're in training to become a benefactor, which is solving those kinds of problems. If you don't do the RSS program and become a beneficiary or a benefactor, then you're on your own as far as how do you pay people, you do an account to account transfer in a quantum financial system. You need to know their account, their name, and so forth. And you make you initiate the transfer to their account. If if it's inappropriate, if if somebody doesn't know you're giving them money, then it's inappropriate for you to be using their account. So you have to get the permission and so forth. So, but if you're not part of the RSS program, then you're on your own and do whatever you need to do.

Tracee 09:24

Yeah, she said the word managing directors, which tells me she wants to be part of our program. And the answer to that question would be that you would increase their download in the RSS system for whatever you want to pay them for their role as a managing director.

Ron Giles 09:46

Well, the managing director would be doing that. Yes. When you say a man is saying, See there's there's confusion there because managing directors a benefactor. So how are you paying your managing director vectors. This this is this is not this question has not been thought out very well, because you're asking a question and but you don't know what the different positions are. And you're using those positions and then trying to figure out, give me a way to figure out what's in your mind. Those are the kinds of things that I say, you don't know what you're talking about yet. So continue to do this study, managing directors is in benefactor. That's the That's the new name. So if you put benefactor in there, then how do you pay your pay another benefactor? You know, they get their own money, and they set up their own

account within master account and so forth when the RSS program. So that's the way I'm going to be paying people. Oh, if I misunderstood, I'm sorry, if I didn't misunderstand. And then I'm saying that you need to go back to the books. When you're when you're asked to read a chapter over the night, and that's your homework, and you don't read it. And you come back to school the next day and start asking questions as teacher says, Did you read the chapter? Rule? Yeah. No, you didn't you skimmed it, maybe, but you didn't read it. This is being sharp is no part time job. And being a humanitarian, you have to be the sharpest you can possibly get, you're going to have to fine tune your learning skills. And this is going to be a little bit difficult for people because especially the old people who haven't got that same zeal for life that they did when they were younger, and learning things and curious about things, and so forth. Now, I'm not saying that older people are stupid, no, I'm not saying that at all. But you need to apply yourself apply. You need to be aware of what you're trying to do. And there's nothing in our program that you if you're going to implement the program, there's nothing in there that you don't need to know. So you need to know it all. You need to know you need to be a know it all. Now as as much as we don't like those people with you still need to be a no law. So just you can function at a high level as humanitarian. With this thought in mind. I'm just going to say now, the for those who have not been involved with love won society for a while and are brand new, or even fairly new. The most important thing you can do right now is to prepare yourself for your appointment. That means you need to get your whatever presentation vehicle you want, could be a three ring binder, or just a folder. I don't it doesn't matter to me, and I don't think it matters to them. But you need to be thoughtful and prepare for that presentation. All of the other stuff can take its time. But if you don't have the money in the beginning, and have positioned yourself to do it properly, then you've missed out. So be sure that the you put the priority as preparing for the redemption appointment. That's your priority. Once you've got that, then you can move on to get more information from the other things from the other programs. But right now, we're in a critical stage. And I believe that it's it's worthy of you to focus on the presentation, because it's coming when it comes. And if you're not prepared, then you're going to miss out. So prepare for it, get ready for it. And and do your due diligence to for the redemption appointment, figure out what your rates gonna be. If you don't feel you got enough Zim and don't feel comfortable in asking for five or \$10 million rate, when you only got a 100, maybe a 10 T note or something like this or even some of the billions of Zim notes. If you don't have enough to get you up to the quintillions, then maybe you want to consider buying some more zim. Anyway. But the point that I'm trying to say is prepare yourself to become the humanitarian. And you do that by getting the right rates and the right amount of money so that you can become a zoom benefactor. And keep in mind that the agent who you're going to be redeeming with, you'll need to ask them if they will give you a referral to get into the revenue sharing solutions program. That's where where you can do your due diligence and have it shown to us then I don't have to ask you if you have sufficient funds. And you tell me and and you know I do well, maybe you don't know what the sufficient funds is but the Alliance does so Ask them for a referral, because you have the money. And that's the way for me to understand that you have the money to take care of the responsibility and liability that you have as as in benefactor. So that's just an added point right now. But the point that I'm trying to say is get ready for your appointment. That is your job right now get ready for the appointment. And do everything that you need to do so that you feel comfortable going into that appointment, and getting the funds that you need. Hope that helps. Next question.

Tracee 15:39

Okay, I was listening to your q&a for 1227. And you mentioned a map of where some humanitarians would like to start their CAC, I looked on the website and did not find a map, I'd

be very interested in seeing this map, as I would like to do my humanitarian work in the state of Montana, please add me to the math and provide me with a copy or tell me where I can see the map.

Ron Giles 16:01

The map is being done voluntarily. by individuals, they have jobs, they have a life. But it's all volunteer. As it's going to be as accurate as enough people volunteer to put their name, not name, but to show on a map where they are doing their THC programs. It'll fine tune itself. But don't worry about that. You just set up where you want to go. If you're in Montana, then Montana is a good place to start. And I recommend to all people, everywhere every country, start where you are. That way you can oversee the progress that you're making. If you start in another state or another country, you've got have boots on the ground, they're telling you or reporting back to you what taking place, and it's very difficult. So start in your own areas, get yourself used to what's going on and how you want to and figure out how you want to present your CAC program. How do you use your directors? What is the advice that you give to them? And how did they proceed with doing the business owned? Contract accounts BOCA How are you going to have to do that? What are the parameters of that? Are you going to double the business owner's income and then pay for all of his his labor costs. There's all kinds of different ways that you can think this thing through. But you can do that on your own in your own backyard first, and then spread out from there. As you become more and more successful and know more and more what you're doing. But start in your own areas first. By success, and that's what I'm gonna do. Right here, my city. Next question.

Tracee 18:06

Let me comment on this. I saw some chatter in one of the telegram groups that they're worried about too many benefactors in one city or town. And I would like to just say, why does that matter? I mean, it doesn't matter. Many hands, make light work, and work together. If you have the situation, and then you guys can once you get your your community set up, then you can kind of go from there, where there's empty places. And also, it's my understanding that two gentlemen are working on the map. And apparently, it's going to be uploaded in the forum. So stay tuned. And when it's there and live, we will let you know.

- Ron Giles 18:47
 - Thank you for that. Additional information. Tracee. That's really good. I like that. Thank you. Okay.
- Tracee 18:55
 Is it possible for the Philippines to be a part of this?
- Ron Giles 19:00

I certainly hone so. If there's any reason for them not to I haven't heard of it. They're just like

any other country. They will be taken care of. They will be taken care of. For sure. We have a lot of people from the Philippines that are benefactors. Okay.

Tracee 19:18

Okay, I'll answer this question. It says Do I need job forms? What are they used for? You don't need to worry about getting a job form. We use them for our own purposes, but you don't need to have one. Okay, next question. I heard you mentioned the forum. Could you please send me the link? Can I answer this one?

Ron Giles 19:41 Yes, um,

Tracee 19:44

There is a document that is awesome. It is called important links for LW s and you would have received it in the email thread. We will send it out more regularly but in this in this link, you can get everything you need. So We have our forum, we have all of our different Facebook groups, the YouTube links, our bid shoot channel, everything. It's called important links for LWS. So we'll make sure that we send that out again, but we've sent it out several times already. Okay, now this is one for you. I have bought 150 T Zim notes made up of 510. And one 100 T, can I give away 10? T each to five of my siblings who want to be Zim benefactors?

R Ron Giles 20:33

It's a quandary. And I understand where you're coming from each of those people who want to be as in benefactor, have they made the efforts to become a gym benefactor themselves? Or are they waiting for you to do it for them? Now there's a there's a certain amount of I want to be as in benefactor, because it's going to help me to, to do a better job in my humanitarian work. And there's also those who like the idea that I can be in charge of all of these people, and, and pay for them. You're not talking about a lot of Zim here, you start spreading the small amount that you have, over your siblings and other people who have not been trained. If they've expressed the idea that they would like to become Zim benefactors, encourage them to go and get the Zim themselves. That way, they have some skin in the game. That's their way of saying yes, I am prepared, I want to do this. But they're not willing to pay for \$15 for 100 per 10 100, Pinot and, and yet, go through the processes of getting that taken care of. Then I questioned whether they really want to be here. It's just kind of a nice thing to do. This weekend, we're going to be coming in benefactor. Okay. However, that's not the way this works. Being sharp is no part time job, I'm gonna say that a lot from now on. Being the best humanitarian you can be is going to take every thing that you have applied to your understanding to your education, the thought processes have to be there for you to accomplish what you want to do. Now, keep in mind that only those who are humanitarians from the perspective of the Alliance, will receive redemption funds. So you could be giving them Zim but they won't qualify as a humanitarian. And they won't be getting anything for the Zim that you just gave them. There's a lot to play a lot at play. In giving Zim away. And I, I'm not a

proponent of that. Giving something to somebody, you don't give Grandma four wheel drive trucks so she can drive to to church on Sunday. Why would you give her a four wheel drive truck when she just couldn't have a car. There are there are things that are inappropriate to give, because there's no knowledge about what it is that you're giving. And in this particular case, becoming a benefactor, a human humanitarian and a benefactor are something that is, it's not just a casual stroll down to the grocery store, you've got to prepare for this. And I see a lot of this idea of, oh, I want to share and I want my children to be what is the value in them being a benefactor? Why don't you become the benefactor and put them to work with employment contracts, it will solve all of the problems that you're trying to solve, without creating a whole bunch of other problems that your people are not ready to deal with. Joe, I'm not a proponent to giving Jim to other people. They don't know what it is. They don't know what to do with it. And it's, it's almost like, what's a nice idea, dog to do this? Well, then you maybe have not thought this thing through as well. That's that's the way that I feel. Next question.

Tracee 24:28

How does the Benefactor decide what amount of money a beneficiary gets when neither the Benefactor nor the beneficiary used to thinking in quantum terms, nor know what all their needs are yet can you please give a figure as an example?

Ron Giles 24:44

I can give you a real strong example. The RSS beneficiary program gets 10 cents per minute, depending on and that's dependent in the future on what country they're in. The Benefactor has no other ability to change what the Benefactor beneficiary gets a beneficiary signs up for the account and it's up to them to do everything else. If they don't want to share with others, and starting on the bonus program, they don't, they don't want to get the trust and they don't. It's their responsibility. Don't be as a benefactor Don't be taking upon yourself, the responsibility of your beneficiaries. It's their job to take the ball and run with it. And what they get as part of the bonus program, you're going to be funding that anyway. So I'm, you know, I'm going to say right now, a benefactor does not have any control over the beneficiary. Who they are, where they are, how much they're going to get. You want to put up, you know who they are and put them on a on a contract. And that's a different basis. But don't confuse the fact that the beneficiary has a program all of their own, that the Benefactor has nothing to do with other than to fund it. So the beneficiary program is has the RSS BASIC program. It's not going to be changed by a benefactor, get the input to level on society, but we're the ones that make the decision on the beneficiaries. Next question,

Tracee 26:30

Does the initial beneficiary RSS amount paid into their account then get divided between six different beneficiary accounts? Which they can have? Or is the initial amount that was decided upon then get multiplied times six, and paid into their six trust accounts if they have them? So it sounds like this is the same person? So it's option B, right?

Ron Giles 26:58

A trust is 10 cents. Yes. I don't know where they talk about the there's a certain amount decided upon who what is the amount and who's deciding yet, the beneficiary is going to set up a trust to get 10 cents a minute for that trust, they also get 50 cent \$50 on the thank you bonus. It has to be a legal document has to have its own account as a trustee is the one in charge. Who's the trustee? Those are questions when you get into it. You need to think this thing through better because the beneficiary is the one. Now, I've said this in the previous question. So I won't belabor this any further. But you let the beneficiaries learn how to be beneficiaries in our program. And don't think that you need to train them, it's going to be they get a referral, they sign up, and then they start getting their money. There will be documentation, there will be videos, and the things that they need to know will be on that revenue sharing solutions platform. The website, all of the information they'll need to do everything, don't as a benefactor. Think that you have to train these people or to be involved with them. Once you start one person, you'll refer one person with your master ID number. And this has been a question that master ID number begins the chain of beneficiaries. Now you can start as many of those chains as you want, you can go in any country, any state or wherever you want to start. And the master ID numbers the number that you refer them to the RSS program. Now the that referring ID number has absolutely no meaning to them as a master ID. It doesn't matter to them. It should not matter to them. They should not even be aware that there is a master ID number that are starting these this kinds of information does not get out. So are you going to you're going to give your your ID number to people Yes. That's how they start. It's a referral. It doesn't give them any inside track or information on who signed them up. Except for you give them their name or wherever you want to get them it doesn't matter that the I their referral ID ID number is the thing that they will use to start their program or their RSS experience. My mind is going real fast here. I'm trying to think of all of the different things that could be involved in that, but I'm not getting much.

Tracee 30:19

Next question, does the Benefactor have to be trust or to all beneficiary counts in their immediate first generation? downline if the beneficiary sets up a trust? Or is the Benefactor only liable or responsible to pay for their own first generation of beneficiaries in their own immediate downline?

Ron Giles 30:40

I just wonder where these kinds of questions come from. And I apologize if I'm being a little bit concerned about this. A benefactor has no association with a beneficiary. So why would the Benefactor be a trust store over a beneficiary trust account, that trust accounts are set up by the beneficiary, the beneficiary chooses who they want to be the trustee, or the trust or or the beneficiary of that trust? The Benefactor has nothing to do with it. Let me say that, again, the Benefactor has nothing to do with a trust set up by a beneficiary. They will not be the trust stores, because you won't know who they are. And you're making if you have a million people in your chain of beneficiaries, and you're the trustee for all of those millions, that that make 6 million trust that you're going to be the benefactor is going to be the trust store, or trustee for they have what are they going to do for the for their own projects. They're not doing this to cause a job for themselves. They set it up beneficiary does what they want. They don't want the six trust, they don't have to have that if they do they get 10 cents a minute more. It's that simple. Don't make it harder than it is. That's why I see. Next question,

Tracee 32:24

how often does the beneficiary receive their RSS funds?

Ron Giles 32:30

whenever they want, they just make a request in this in their back office in their personal office and the money just dropped down into their account. And the account in the QFS

Tracee 32:43

or the beneficiary accounts paid the RSS amount as initially leave that out, start over, or the beneficiary accounts paid the RSS amount on a set basis of a payout schedule for the rest of their life.

Ron Giles 32:57

Yes, rest of their life.

Tracee 32:59

Can the beneficiary Come on? Sorry, go ahead.

R Ron Giles 33:04

I was gonna say if somebody dies, and you just somebody takes over their state, and that's just have to work on that be sure that there's somebody else has their ability to get into their account and change what they need to change to get the money into the right place into the right accounts. But it's something that has to be done. But it will just continue. Just continue. As long as we have money, it'll continue. Next question.

Tracee 33:36

And the beneficiary come back to the benefactor and ask for more money if they realize they need more later.

R Ron Giles 33:44

I'm not only saying no, but I'm saying hello. beneficiary has no idea who the benefactor is. Do you understand this person? Can you understand what the beneficiary is? And the Benefactor The Benefactor can have a million beneficiaries underneath them, underneath their chain of, of

beneficiaries. May million or more. Maybe 100 million? Who knows? Well, it's going to be there's no association between a beneficiary and a benefactor except the Benefactor has the responsibility to pay their RSS program, beneficiary account. Next question.

Tracee 34:37

I'm skipping out on I want to support the scientists who live in Japan who are based on love. They have the technology to revive the environment. Furthermore, they can develop free energy devices. Is it possible for me to support these scientists financially?

Ron Giles 34:53

Yes. Why would you ask me if you can do something. It's your money. Do it. Next question.

Tracee 35:06

Once our appointments are complete, we are past our NDA and the LWS platform is up and running. Will there be any changes to the LWS website regarding the appointment rate request information portion of the LWS site, I plan to use my trust name to represent my efforts but wish to use the program names Ron has in place RSS and NRELS and CAC. I think what they're worried about, because I've seen a lot of chatter about this is they don't want anybody to be able to go and Google these terms, and then find your blog or your website. And, you know, put two and two together and figure out what's going on.

R Ron Giles 35:48

The RSS program will be there. I don't know how you can go and because it's on the on the web. The NRELS will have its own computer system, a CAC, you're going to want to name your CAC program like Glendale CAC Community Assistance Centers, or Kearns. CAC is a description of a certain location, and that's their Community Assistance Center. So name it with if there's a name for the geologic geographical area, you know, a suburban suburb of someone's home, then call it that that's your CAC. There's a fear in this question, false evidence appearing real. Now fear is it will decimate the humanitarians who hold on to it. We're cleaning up the earth, from the kinds of characters who would go to Google and start causing problems for other people, they're not going to be involved with us as we move forward in this timeline, they will stay on the present timeline that will take them to the Armageddon experience. I'm not on that timeline. I won't tolerate that kind of behavior in what I am creating in my life. I am the creator of the reality of my experience. And I'm not going to include those who would destroy or cause problems with it. By eliminate that possibility. Because I'm creating in harmony with the Alliance, the golden age of mankind, that does not include these kinds of people. Maybe this is news to you, I don't know, it's just common knowledge to me. So I come from that I come from the reality that the that we are creating the golden age of mankind, that will not include any dark entities. Or any entity that is not vibrating at the same or higher rate than what we are creating. It's all brand new. I have no fear about some idiot going on Google and trying to get into our program, because they are going to be taken off the Earth. If that is their propensity. There was a place for them somewhere else. But not in my creation. Next question.

Tracee 38:51

Is in benefactors receive funding or downloads for their personal or familial use.

Ron Giles 39:01

How to zoom back, you just do it. You're the Benefactor set it up the way you want to do it. Learn to program, set it up, take care of your family, take care of them very nicely. You know, don't give them \$20 million and say here, you're finished. That's I've heard some people want to do that to all of their friends. They say that's not humanitarian approach. That's why we got the RSS program set him up on that. It makes it legal and makes it work really, really good. In my opinion. Next question.

Tracee 39:41

As to the beneficiary creates six trusts including a trust for a child when the child turns 18 and becomes a new beneficiary. Can the parent create a new trust replace this child's original trust?

Ron Giles 39:54

No, it just continues on and that's nice to be in the documentation when the child turns 18 They get their own beneficiary account, but the trust still continues on because the trust was not you may have created it to as a trust for your trial. And the money is going to be used for the growing up expenses, and so on and so forth. Once they turn 18, then the trust is yours completely. Do what you want with it. It's still coming for you. You still got six trustee there. That's a don't stop. I guess that's the best way to say

Tracee 40:29

the answer is yes. Right? The answer is yes, you can do something different with it. Okay. If someone becomes a beneficiary of the artist program, and also benefits from the employment contract, as an employee of a business, is this double dipping? No,

Ron Giles 40:45

no, it's absolutely essential that this take place? Yes. Everybody should have a contract and employment contracts. And everybody should have a beneficiary account, no double dipping? It's not. We don't consider it. And they shouldn't either. Next question.

Tracee 41:02

I presume LWS encourages all individuals to sign up for the RSS program. However, how could we prevent many low wage workers from quitting? After becoming beneficiaries of the RSS

program?

Ron Giles 41:18

We are not the place. We set up things and we do things appropriately so that there are certain circumstances, if a person breaks their employment contract, then there's things that that need to be addressed. And was it were they trying to get out of it, just getting the benefits and trying to and then trying to get out of it by quitting and all that sort of stuff. There's consequences for everything that you do. If somebody signed and this is a contract, this is a contract that has remedies. The remedies are that they can be taken out of their present employment if they don't meet the qualifications, and, and so on, and so forth, depending on what's in the contract. Now, if it's a business owners contract account, then he's the one that's in charge. And if he says, I don't like the way you're doing things, then and fires them, then they're finished, we'll give them 30 days. And then they will, that will terminate the director that's in charge of that area will terminate that account, terminate the employment account. But we'll give them a little time so that it's not so devastating. But they're going to have to go get another job somewhere else. If they want to have that extra income. We're not going to fine tune everything, we got to do it for the 90%. And the 10% are always going to cause problems, we'll let them cause problems and let them cause them on their own. We don't have to place it and we don't have to take care of ours. Our job is the higher percentage. And we take care of them and do things appropriately. And they will do things and do things appropriately so that they can maintain and have a life that's moving forward in the direction that they would like. We're not the place. Next question.

Tracee 43:20

Okay, this is a good one. Ron, why do I want to purchase them? Would I not be able to redeem my US dollar at my appointment? Is there a specific reason as needed?

Ron Giles 43:33

When you say redeem your US dollar, I didn't know you could redeem dollars. Zim is a bond, you can redeem a bond but you can't redeem \$1. The dollar will buy what \$1 will buy. The Zim is designed to give money to you. The Zim bonds, the 100 trillion, the trillion dollar series is high face value so you can get the money that you need as a benefactor or a humanitarian, wherever you want to call to do your humanitarian work. But if you're not a humanitarian, Zim won't do you any good because you're not going to get any money from it. Oh, person who asked this question needs to find out what's going on. Because you're probably out of your league by asking this kind of question. And it's indicative. It's just that you're just dabbling with this not becoming a Zen benefactor. To me, it's a question from somebody who is just dabbling. spend any more time on it? Next question.

Tracee 44:50

Regarding a new health care system and QFS is wondering if services such as massage therapy, personal training, acupuncture, healing, arts and wellness videos, could be offered to

the past. Look as a free service. Are the clients and patients be covered under a new health care insurance? or would there be any charges to the clients?

Ron Giles 45:10

Each gym benefactor each humanitarian sets up what they want to do? They want to charge for it, that's good. Keep in mind that if things are free, people have have no place no value on it. It'll change over a period of time. But you have people giving away your you're giving away your health care for free. You're going to be so inundated with things that you'll say, Why did I do this? I'm getting all kinds of hundreds and hundreds of people when I'm the only designer for five or 10. You need to be careful giving anything away for free. Now, actually, what the healthcare system is going to turn out to be is that there are people who are on contract employment contracts who are doing these things for people, whether they can pay for or whether they have to pay for it or not, is up to whoever sets it up my way of doing things, but I would I would charge just a little bit. If it was in in America, maybe a \$5 charge. But I would never just simply give it away because they don't, they don't value something that's free. If you don't believe me, just ask anybody who's been involved in that you don't have some skin in the game, you're not in the game. A freebie is something that most people will consider dole we charge \$10 for the RSS program, because that is the way that they qualify for those funds. That is the way the system is they don't pay the \$10, they don't get to be a part of it. And there are those benefactors who will be giving away the \$10, you're not charging the \$10. And I'm saying well be very careful. You're creating an adult situation, that \$10 is just a simple way of changing the entire outlook of what you're doing. That's why we charge the \$10. And we say to the benefactors or beneficiaries, you're receiving this because there are those in there benevolent See, want to call it that wherever you want to call it, they would like to give back to society. Now this is a concept. But the reality is, is this is a way for us to give money into the hands of people to change the economy, you can change the economy by giving people free money, and then they get to spend it and then you don't have anything to spend it on. Or you can create an economic system where people work because they want to give service to people. This is what we're creating. And it's different. It's a different way, instead of a profit margin at the bottom of the page. It's how much how many hours of service or what did how many lives did you change by the service that you're giving? Are you serving or taking from the economy, if you're taking then you're a cabal. If you're serving, then you're just getting paid for your service remuneration for money, you're getting paid to do things for other people. It's a good way it's a good job to do. It's a subtle difference, but it is a real difference. It's the way that you look at it, giving things away free does not work in any society. So I'll get off of that little podium. Yeah, people do what they feel is right.

Tracee 49:23

And you did say one thing and we have givers and takers but some people they they would be quote unquote takers but they're doing caregiving like maybe it's a mom with small children or somebody's taking care of their aging parents or things like that. And so and then when people do have the money, they can choose what to spend it on and and if this is a priority to them, it's good. I know for a fact because with my clients when I've given away programs to friends, they don't even do it. And but if somebody pays me for my services, they take it more seriously. So I know that for a Fat, Okay, this looks like a continuation. Many people cannot

afford these much needed services in the old fiat system. And we would love it if we could make this available to everyone under a health care within a simplified solution. Any ideas how wellness studios would work under the QFS?

Ron Giles 50:20

Well, when we're giving people like beneficiaries \$28,000 a month, do you think they can pay for stuff? Yep. We're not talking about people not having funds to be able to take care of their health care. Now we're changing. But keep in mind that the people are going to start having money, why? Why not? See, we can give money to people and they can, they can create what they're going to create. But if you were to take the government now their whole program, the Cabal governments are, we are responsible for building the roads, bridges, airports we're doing, we're responsible to do that. Who gave them the responsibility to do that? All that's the Cabal taking away from what society needs to be doing themselves. So they tax you and pay for the things that you would be able to do, if they didn't tax you. All we're doing is we're coming in with money, we're going to be bank paying for the roads, the bridges, the airports, we're going to be paying a lot of the government expenses, because the government is going to be on a very, very slim budget. They can only work on what they get from sales tax, things are changing. So the whole system is changing, the whole way of governing is changing 1/10 Or maybe even 5% of the government employees are going to stick around and do stuff that the others that the others were so overloaded that they you know, they, they just check in and go to lunch with each other and then go home. That's basically the adult system. And that's the way that the old government has been working. You just cut them back to all they get, and they can't borrow money, okay, they can't borrow money. If they have budget, then they can go to war. But if they don't have a budget to go to war, then they can't borrow it to go towards or nobody goes to war, because they're not going to have enough money to do it. system, this whole government system is changing. It will work for everybody, not just the upper 1% than the upper 1%. We know what they're trying to do to us, like cattle. Next question.

Tracee 53:03

Last question, do you have direct contact with the Alliance? Did they choose you and help you to design this project? It seems to be a master plan.

Ron Giles 53:13

It's a sensitive issue. I believe that I was involved in creating this spiritually before it was manifest here on the earth. And then I came in, but through my life experience, and I found it. And it's it's in my heart, it's in who I am. This is my calling. This is my purpose. I have other people, perhaps hundreds by now, who have told me that this resonates with them, that love won solution programs resonates with them. I say Well, that's because before you were born, we created this. So we would have this to us when we got here to do our humanitarian work. They're just becoming involved because that's who they are. And I'm no different than they are we created before we came here just so I was chosen to bring it forth. I do have direct contact with the allies. And they did help me to do this. It is inspired of God because it's God's plan. That is my belief. So we're here, supporting and working with the Alliance in total harmony with them. That's why they want us to succeed and are doing all the things that they need to do.

Including giving us people and agents from the angelic realms to be our counselors and advisors. We have the best of all worlds. And I'm grateful. Total gratitude for what the Lord has given us To work with during this particular period of time, and a massive responsibility, we have to help create the golden age of mankind. And we're going to do it. Because that's what we do. We're creators and we're having a lot of fun doing we're going to have a lot of fun, especially when we get the money and feel this is fun and helping people solving problems. So, with that, let's go ahead and close today then Tracy, thank you for your good work and your comments. Very appropriate and much appreciated. Thank you for all of the questions and again, if people would would just listen to the old stuff and get involved. You know, don't just dip your dip your toe in and see what how warm water is. If you're going to be part of it, then get in and swim around. waters warm, it's very inviting. So like a hot springs. So thank you for your participation with that. Tracee again, thank you and we will do this another time.
