

Q and A - June 27th

Tue, 7/5 6:05PM 59:06

SUMMARY KEYWORDS

zim, question, humanitarians, benefactor, people, money, beneficiary, funds, receive, project, account, dinar, buy, rss, contract, zeros, alliance, program, cac, paid

SPEAKERS

Ron Giles, Tracee

- R** Ron Giles 00:00
Hello humanitarians. This is Ron Giles. I'm here with Tracee. We're going to do a Q and A today. And it is June 27 2022. So with that, let's go ahead and start, Tracee.
- T** Tracee 00:15
Okay, how will the CAC directors access and amend the downloads of an employee if they were originally referred to RSS by someone else? Well, the CAC directors have problems offering them a contract if their RSS tracks back to a different benefactor.
- R** Ron Giles 00:33
We've discussed this before, when you go into the RSS platform, everybody is there, to all of the limb benefactors and their master accounts, are there, everything is there. So when somebody else offers Zim beneficiary a contract, then the funds to do that contract will come out of the the directors Zim benefactor. Does that make sense? So the Benefactor set up the CAC and has a director if you bet Whoppers enough, then it will go back to that zim benefactor. It's all it's all within the, the program or the platform. So no, problem. Number two,
- T** Tracee 01:24
when can we review the patents that are being released?
- R** Ron Giles 01:30
I have no idea. Next question.

T

Tracee 01:35

My question is about the ear. I'll actually want to tell you something really super quick on this. I was with a friend at a friend's house on Friday night for dinner. And she's like, I think Star Trek was real. And she's clueless about most things. But I'm like, oh, yeah, I think it might be. Anyway. My question, I know, right, I'm like, Oh, you're more aware than I thought because she's pretty sleepy. Okay, my question is about the ESS. I'm unclear about the transaction, when the manufacturers product already paid for purchase by a benefactor is sold to the next link in the distribution center or a system, for example, when Ford Motor Company's cars are sold to the dealerships? Does the money paid for those cars go to Ford Motor Company? Or does it go back to the benefactor of course, it doesn't matter to me either way, just wanting to clarify.

R

Ron Giles 02:31

Once we have paid for the cars, then they're ours. We sell it to the dealers at a price that is consistent. And that's where the economic stabilization concept comes in place. And so we don't we just sell it on through to the distributors, distributors. And the funds to come back to we'll come back to the benefactor. Yes, they do come back to the benefactor. So we're putting our money out and buying things and then we're reselling it through the distribution system. And that's how we flow. We are the buffer, so we can sell it at a price that we want to. And that's why it is controlled by love won industry so that we have a consistent stabilization of all of the products that go through from our contracts. Hope that helps. Next question.

T

Tracee 03:35

When it is time to redeem our zim, is it necessary to bring a finished complete project or an outline of the humanitarian activity to be carried out?

R

Ron Giles 03:46

The answer is really no. But when you go in there, pre be prepared to talk about something that you have done, or wanting to do as a project. It starts the conversation that gives the person the Alliance agent a chance to discuss with you and kinda have your field have a feel for what you're trying to accomplish. It'll just help the process. And they've told me that they want to have evidence that people are doing the thought processes for projects. You don't have to have a project you don't have one then just add like to you to do love won society is my project, and that's the RSS program in the CAC programs. Next question,

T

Tracee 04:35

even though this won't affect me, how will the RSS and the employee contracts affect child support? Some might not want to sign up for the RSS and especially an employee contract knowing they will be paying way more in child support than they currently are. I hope this won't be allowed especially if the person receiving child support is on the RSS and or employee contract.

R

Ron Giles 04:58

I don't think you need to get it involved in that we're not love won society is not involved in that at all. So I, I really don't have a an answer to give you on that. Each authority in or government agent or whatever is will have its it's going to be part of massages are. So everything is going to be changing around. And with RSS, the RSS program and the RSS contracts program that nobody knows about him except for the people involved in less. It's a larger corporation that has management, the department that's in charge of employees. That's the only time when you a small business person, there's not going to have anybody involved in that knows anything about what he's receiving. So most of what you're concerned with has to do with income tax, and all of the laws that are set up for that, that all goes away. So nobody's going to be chasing around and nobody will have any idea. Any government agency have any idea because we're taking and making contracts for the people and paying for their wages and their labor costs. Other than that, I don't know what to tell you. We don't we're not going to get involved in that. Let's go to the next question.

T

Tracee 06:36

Last question regarding church IDs had me a little confused. So in this example, the church is a beneficiary. Please explain further because I thought beneficiaries could only have six trust. So how exactly just one beneficiary have hundreds of Sinese, if you will,

R

Ron Giles 06:54

well, you need to understand the program, the beneficiary can go out and sign up more people. And that's the bonus program, every two people a sign up get they get a point, or one cent increase in their download. The six contracts have absolutely nothing else to do with anything that the beneficiary is doing. They can have six trusts and each one will give them 110 cents per per download or per minute download. And that's the package there shall you go to a church and you have an ID, the church has a has a an ID number, and each of the people in their organization sign up under that ID number that makes the church eligible to count them as one person they get. And if they get the second person, then they get one cent that goes to the it's a bonus system that goes to the churches. So I hope that helps out has nothing to do with a trust. Each individual has his own beneficiary, and the carriage can have six trusts as well. So there's no there's no limitations on that. Next question.

T

Tracee 08:15

I am presently living in Jamaica. And I would love to know if my country is just Psara compliant.

R

Ron Giles 08:22

I have no idea that information is is not given to me. It's it's not relevant for me when it happens, and then they are and there'll be part of GSR excuse me part of GESARA compliance. And with that country if that company is just are compliant they're part of the quantum

and with that country, if that company is just one company, they're part of the quantum financial system. But these are things that we have no idea about until that happens. I'm not I don't have an inside track on that, because it's none of my business. If I did, then I'm getting into somebody else's stuff and it's not appropriate. Next question.

T Tracee 09:03

If the 800 numbers and safe, Link, safe, whatever that is safe web link comes out before our appointment with the Alliance. And I attend and exchange currency leaving at least one Zim bond in case the Alliance calls later. Would that disqualify me from the RSS program?

R Ron Giles 09:24

It doesn't disqualify you, but you're missing a whole bunch of stuff. Number one, nobody's going to redeem before we do. Period, exclamation point. Understand. Our funds are only given the funds for the redemption of Zim bonds, is only given to those who have a calling from God to be humanitarians. They're not necessarily in love won society, they don't have to be. But if they're humanitarians and they get their funds, and that's fine, but you're talking about About 800 numbers and, and then and all of the garbage that goes along with revaluation of currencies. Let's not get involved in that let's not get ourselves activated in that. If you want to go to them and get your your dong in your dinar or whatever activated, or exchange, then you're giving away the opportunity to get the highest rate of exchange that will be given by the Alliance agent at your redemption appointment. Don't confuse the things and don't project out to other stuff that you think might happen as a result of Guru garbage work, they're not going to go before we are, we'll probably be ahead of them and they won't know a thing about it. That's just my feeling. That's not my predictions or I have not been told that but I feel like we're gonna go first and then the others will get to do what they get to do and they get to do it. Next question, please.

T Tracee 11:10

So I am clear a beneficiary has the potential of receiving up to \$350 in Thank you bonuses a \$50 Thank you bonus upon registering a new beneficiary and then an additional 50 Thank you bonus for each trust up to six max that the new beneficiary creates Is this correct?

R Ron Giles 11:29

Yes. Well let's let's go back receiving up to \$350 in Thank you bonuses you'll get \$50 for each one of the six so six is \$300 So I'm not sure where you get the extra \$50 on that. You don't get it yourself because the person who signed you up gets a thank you bonus for you as a beneficiary. Next question,

T Tracee 11:58

I live in the nether lens and write and wrote a plan for ESS and so I will fund government police fire sports and business sector of farmers and citizens of my city and I will realize a

humanitarian project local and spread that concept around the world in more places to change humanity and life in a good way. Do I have enough Zim to realize that I bought I have no idea something Q this is a weird number DC serial number of some sort yeah so we don't really know how much you bought and tomorrow I will get some more dinar Can you let me know because if it's possible and enough I will think bigger and start funding other cities government please around the world

R

Ron Giles 12:46

I don't know what that means and that those set of numbers it looks to me like it's a serial number of some sort. Now when you talk about them that's the money that's going to do your funding projects. I have no concern about quiet about dinar Dong and the dinar if you want to do that then go ahead but I do not suggest you buy Dong and dinar Why spend your money on Zim you're gonna get a thimble of money compared to the ocean when you buy Dong and dinar and try and get money for it. But you go in there with a large face value know from Zim, which is costing you going to you didn't get them for less than four or five \$6 delivered to you to get one of those and that makes your dinar, dinar virtually gone. They're no, they're of no value to us, because their value in the exchange is so insignificant. I'm not going to say don't buy Dong and dinar if that's what your favorite flavor is, but I questioned why you would do that. Because there's no value in comparison to buying gym. Now we'll go from there. Next question.

T

Tracee 14:23

Are the beneficiaries able to use their funds with a card? And if so, does LWS send it to them? And are the ECS people paid the same way?

R

Ron Giles 14:34

I'm not sure what you mean with a car. The funds are put into the funds are in the RSS platform and tell you request them. And then what when you request them then they're deposited into the account that you have established on the platform. If it's a QFS account, it'll go into there. If it's a bank that's been qualified, and then it'll go into there. But I would never have a bank or a financial service center receive funds from me or for my by my redemption process. I put it all in the quantum financial system, and then I transfer as I need to. And it's only transition because we'll have a card, and everybody, there's no charges. So manufacturers or excuse me, merchants don't want to pay the two or 3% that is charged by Visa are those kinds of cards will have a card that doesn't charge anything. So I'm not sure where you're coming from and why you want to, we're concerned about that. But eventually, you'll you'll get the card from the qf s and that may come with when you're finished at their appointment, they may give you a card for your account. I don't know that you can use it to merchants until the merchants get cluey get enough clue on what the quantum financial says and then start setting up their own business accounts with a quantum financial system. It's a transition period. So we just have to adjust to it. But we'll eventually get cards for our own accounts in the quantum financial system. That's down, I don't know, it could be that the financial service centers have a place for you to go in there and get a card for your account. It's there's a whole bunch of different ways to do it, it will be the most convenient way for us. Because they're doing everything for us as humanitarians and for the population. And that's why the whole financial system is changing.

So look forward to some really good things that have been well thought out and made available for us. It'll be just perfect. That's the Alliance. That's God. Do they do things secondhand are causing us problems? No, they don't. They're on our side. Finally, we have somebody on our side. That's helping us with our financial situations. Let's go with the next question.

T

Tracee 17:26

And I roll out GESARA in Kenya as being as in benefactor, living somewhere else.

R

Ron Giles 17:36

What do you have to do with GESARA? You're not the government, you're not anything like that as a zim benefactor, just because you have money doesn't mean you're in charge of a country. So get down from that pedestal to put yourself on. We're going into places and doing our zim benefit our benefactor programs, love won societies programs, and you'll be able to go in and do it in Kenya. I think that can be Kenya Why say and capital letter? Any country? Will that is disarmed compliant? Our funds will go into because we have Zim benefactors that want to do things all over the world. But we're looking for people in Africa to be Zim benefactors? Absolutely. But they're nothing did they have nothing to do with just our compliance? Next question.

T

Tracee 18:39

I understand the structured payout and have figured out my redemptions in value. Do we need to figure this out? Exactly. And know the actual value? As when presenting bison tilian and Yoda Lillian, it'll get pretty tricky at that level. How many zeros in a yodel? Yeah, and I can't even find the exact name for the answer. But I could technically figure out the number of zeros. How much is really needed to know about that exact number when redeeming?

R

Ron Giles 19:07

You don't need to know anything about it. You get into your Lillian's and there aren't too many computers that will handle a yo Lillian's put in the number of zeros. That septillion septillion zeros. So you'd come back one point, and you got 300 and the Isay instead of septillion said six millions. So you have 300 sextillion zeros. And you're trying to figure that out, but you know how many trillions are there and then sextillion? Well, you can figure that out and then you can say there's are assist many trillions, sex aliens are zeros, but you take 300 And you called them 360 Millions. That's how many zeros there are in a Yo, Lillian. And Zedilillian is 300 less than that, when you get into talking about buying Centennials, there 600 zeros as compared with millions of zeros or separate aliens of zeros, phenomenal in our minds, because we can't understand that we can't understand it. So don't worry about that. They, the Alliance agents, this is like the sands of the sea to them, they know how to count there, it's not a big deal at all. I keep saying to him, Well, I hope you bring a big calculator, they giggle. And but the point is, is that they know all about this. They're familiar with the sands of the sea, they're familiar with the money and the zeros that we're gonna get. And again, the number of zeros is an indication of the amount of work you're able to accomplish. So when you go in there with your yodalillion,

are you going to be asking for a one to one, or you're going to ask for 500 to one per presume, even if you have a yoga, Lilian. And some people are asking millions for that. So you're going to have to expand your mind it is there to expand. And I don't think you're going to have the ability to expand it as far as you need to to understand this thing. They know that. So we don't have to go in there already knowing all this stuff. So next question.

T Tracee 21:45

I was talking to a friend about manifesting thoughts and how it comes true. I was explaining how when looking for locations for my CAC, I manifested a certain property, and a month later and went on the market, then he let me know that he knows people who could be interested in investing, and he would want me to enlighten him on the project. After thinking about the opportunity, I assume it's better for me to buy it outright, when I received the funds, as I will then have full sovereign humanitarian control, and the funds to start all projects at that time, what are your thoughts?

R Ron Giles 22:17

Well, I'm not really sure what the question is, what you're doing, it's just business, you're buying something so that you have full authority to do what you're going to do, the funds are going to be yours. So when you're talking about individuals that you want to come and work for you, don't get too technical. And don't be talking too much about money. Because your directors don't need to know how much funds you have. Of course, that's going to be part of your NDA. So be careful about that. But find the right people and dial up some projects and what you wanted to do, but I've set up stuff that I wanted to buy, and three or four years later, that's been sold for two or three years. So it's, it's a brand new start when you start now it's not as if you can just all of a sudden go if your things there that you want, then they may get sold out before the RV takes place before the redemption takes place. If so, then keep looking and keep looking and wanting to have particular pieces of property that will suit you. If you got that wanting and that desire that asking out into the universal, then that's still there unless you cancel it out. A specific property may not fit that bill. But you're giving you're wanting a particular property for your CAC are well other project you're going to do. Just leave that asking out there and let the universe get you the best one, because you may have thought you had the best one and there's a better one, right? Down the street. You don't know that. So be flexible in your asking. And all that if you're asking you will receive unless you in your mind, cancel it. And don't be specific. It's like I'm God, I want a wife and it's got to be this one over here. And he says that's not one for you. Oh, dang. What's wrong with asking and receiving? Well, there's, there's dominion over there as well. They haven't chosen us. So just ask for what is the best for you? And that's the asking, that can give you the answer. It all has to be part of their dominion and yours in order for you To find the relationship that you're looking for. Next question.

T Tracee 25:07

How old does the youngest benefactor have to be? Are there any different rules or standards for them? Can they as well become Zim benefactors, and also help others become benefactors?

R

Ron Giles 25:22

They have to be 18 years of age. Now, if a farmer has children that he wants to, to have work for him, then they can set up a beneficiary type of account for that, for those younger children. When I was working on a farm, they had 11 year olds that were driving the tractor. At some point, he's not qualified to have a baby be a beneficiary. But they can set up a can that count for him in a different sort of way. Yep, benefactor account. That's the way to do it. And then there's no problems when he gets 18 becomes a Zim benefactor gets his six trust in the way he goes. Next question.

T

Tracee 26:11

Since my husband and I are both humanitarians, and will be benefactors, as we have planned along with LWS, can our child be able to be a beneficiary for him and me, since we will be going in separately in our humanitarian ventures, for example, to trust?

R

Ron Giles 26:31

Well, you're asking me permission to do things that you've already set up, you're going to need to think it through, put yourself in that situation, think it through, I recommend that each husband and wife have their own zim, go in for their appointment, and receive their funds, that they are held accountable for what they do with those funds as in, well, we're going to work on this project together. I think that's a great thing, after you have the money. If you go in together, then who's the boss. And those are the kinds of things that can change. Relationships can change. As long as you've got your own money and want to do projects together, then you'll see you go in and get your own money. And there you go. And you can join together with whomever you want. Because you are in charge of your money, and not some buddy outs. And most relationships, marriage relationships, have a dominant person. And I'm saying that dominant person will dominate over you, if you don't do it yourself. could dominate not necessarily will. And so you need to go in for your own appointment. Have your own counselor and get your funds and then join with your husband or family members, whatever you want to do in a family member be a beneficiary from a zim benefactors. Organization. Yes, absolutely. How do you want to do that? Well do it the way that it's supposed to be done as his zim beneficiary, pay the \$10. And there it is, if they are 18 or over. If there's not, then you don't worry about the beneficiary program. You weren't you just as a benefactor, you establish a benefactor account. Give the person as much money as you want to give them that's up to you. It's very similar to a contract, but it's not called the contract. Call a beneficiary account, or excuse me, as zim benefactor account, and they can set them up for whomever they want. Next question.

T

Tracee 29:07

This is a long question that I believe that needs to be addressed. At first, I wanted to start a program that brings visits to people in nursing homes, veteran centers, assisted living hospitals, etc. Using music, skits, Bible studies, etc. But I was brainstorming so many projects. Shouldn't benefactors prioritize which projects to do first, second, etc as to who needs help the most, like celestial chambers need to be completed and distributed worldwide to heal children

military, chronically ill, etc. Healthy food and pure water followed by getting farmers to grow foods and hemp excetera enrich organic land and made a list of 13 general areas to tackle so all benefactors are just doing any project willy nilly, or is the Alliance guiding benefactors on what is needed for second third?

R

Ron Giles 29:58

Well, it's an interesting one. Question. Because there's things that you're leaving out that come to play with it, there's going to be a blast of light, that's going to change our DNA change, like as in activating it, where we only have two out of 12. Active now, some have more. But the fully functioning 12 strands of DNA gives you your god consciousness. Activate your God conscious know you're God's spark within your body. That's the way it was supposed to be before the Cabal changed us and messed us up. Okay, so understand that things have to change. So when you're talking about celestial chambers, and you think that the alliance is sitting around waiting, we're to help children and military, chronically ill kids, or people. The technology is already there, those children are being taken care of. What would they do just put them in an orphanage somewhere, when they can take them off world and to mother ships that take care of children. Now, we got to think this thing through. And it's not that you're bad thinking that's not what I'm saying. You need to broaden yourself to the realization that there are things that we as the ones who have money can do, and things that we are having the Alliance complete, because they're not sitting around and waiting for us to get our money. The same way with projects. So you think things through, and then come back and see how that should be? Done benefactors prioritize which projects to do first, you have a counselor, who can see the whole playing field. That is a resource that you need to marry yourself to, if you want to call it that. Have been working with my counselor on most every decision that I have to make. There's and I can go ahead and make it without him. That he's going to just sit there and say, Okay, that's up to you. Because he's not going to get in involved in my stewardship responsibilities. And unless I asked him, so I asked him, What about this? It's not ask once and it's all done. What do I need on this? Can? This is what I'm feeling is right? Can you give me confirmation on that? And then he says, or she says, Well, let's talk about it. That means there's other opportunities to look at things different in a different sort of way. That's including the celestial relevance of our putting that celestial element into our planning. That's how it's done. It's a brand new system. And what's your cockpit about here is all third dimension, and it doesn't include that. And so I'm saying introduce new ideas to your stuff. When are we going to have hospitals again? Or still have them? Are we going to have nursing homes or veterans centers, assisted living all of these things, they may or may not be around? Because they'll be taken care of through the process of transition? Let's, when we get our money, then let's, let's make our plans. We plan as much as we can until we have the all of the information to implement it. So spend a little extra time on that because it's important that you understand. So next question.

T

Tracee 34:20

Okay, and one of the q&a sessions benefactor training, we seem to recall a conversation regarding a person's wish to retire either during or upon completion of an ECA. If that person retires, while underneath da do they continue to receive a pension? Quote, unquote, that is equal to the amount they were receiving when they retired? If they wait until the end of their ECA, do they receive any pension? Or do we answer these questions in the terms and conditions of their ECAs?

R

Ron Giles 34:52

The ECA has a time period it's a contract if you don't complete your contract, then that's breaking the contract. There are consequences. If you sign for a seven year contract and you break your contract, the punishment for that is to go back into your own beneficiary accounts, that you may lose everything that you've got, you're going to go through an arbitration. If you've if you sign a contract, and you break it, there are consequences. Now, if you go through the seven years, or whatever it's going to be, and that's still flexible. And I've just put down seven, because that's a good number. If they go through the seven years of their contract, and they decide they want to keep working, then the one penny per quarter raise, continues to raise. If they don't, if they don't, if they want to retire, they retire with all of the full benefits that they had, except the one cent per minute or per per minute, download every quarter. It's an automatic benefit for the rest of their life. I think that's pretty good too. Why can we do it the rest of our lives because we get paid every the rest of our lives. There's never a deficiency until all of the money or whatever it is, we get into the fifth dimension. And we don't know what money's going to be like up there in the fifth dimension. It could be viable, but it may not be. It may be usable for certain things. And it may not be we don't know until we get there. But I look forward to the opportunity to be enthralled in the fifth dimension. And create by thought, that's who we are as children of God will create. We are creators. dislike our father, you can't be anything else. If your father is a creator than you're a creator. In create what you want, and you will believe it or not, you will be doing that sort of thing worlds without ends. Who is the end? Where's the ending of the world? Not when God's creating children that go out there and create on their own. Just expand your thinking of God's in embryo, we're going to grow up. And we're going to be like God with creating things of our own. If that doesn't make sense to you, then I I'm sorry. It doesn't make sense if you follow the curveballs gospel teachings, because that's excluded from anything that they want to have happen to us. And that's why they left it out. And that's why it's coming back in because we are children of God raising ourselves up to be God. Okay, so let's go back. Let's go on to the next question.

T

Tracee 38:30

The updates are helping with a clarity around several of the programs and the strategies for each. I do want to know why there is a difference in the Dong dinar in the Zim bonds, please explain the strategy for the other currencies and why someone would put their Zim bonds in one account and the other currencies into a separate account. My thought my normal thought process is accounting mind says I should not mix the three. Is this a correct assumption? And if so, why?

R

Ron Giles 39:00

It's only what you want. There's no reason to do it, except for whatever reason you create, and that's what you want to do. I've got I've got dinar over here and I got some DOM over here in this account. Okay. So go down to the store, what account should I take it out? That can take It's my money, I can do what I want when there's reasons that people can dream up for having separate accounts. It's nothing, it's up to you. It's what you desire. Now I'm saying do not buy Dong and dinar. Now when you have money that you can buy more Zim. Zim is going to give you more zeros and the more zeros you have you have more opportunities to serve. So, in my

mind, dinar and dinar are almost useless, have very little money involved with them. That turns my head because when I'm talking about a yodalillion that has 300 Septillions are sextillion zeros. You understand what that means? 300 sextillion zeros, not a million zeros, three hundreds sextillion zeros. How are you going to work with that? And you can buy one of those for \$3.50. So, where is the value of \$100? For 1.7 million or 1.8 or 9 million Dong? Get \$100. And you buy zoom with that? And you say to yourself, why in the hell did I buy that dog? When I could have bought this? Well, we bought the dog before when we didn't know about this. And yet, here we are, why buy more don't buy more zim. That's why I say next question.

T

Tracee 41:20

There's still remains a great many questions about the particulars of each LWS project, ie legal obstacles, congressional hurdles, for which I imagine have not been thoroughly vetted at this point. What are your ideas on how these issues will be addressed?

R

Ron Giles 41:36

The issues will be addressed by the government, we don't get involved in that stuff. The laws, most of the laws that restrict our activities are as a result of income tax. They don't want us to avoid paying income tax. So they put all of these laws and then the businesses have to do this, that and the other they have to collect and they got to do all of that garbage goes away. There's only one tax for the government and that sales tax on on certain items. And if it's brand new, then you get taxed on it. If you don't if it's not brand new, you won't know there's other stuff that is brand new, and you won't get taxed anyway. So there's a flexibility there. But the reality is, is that there's no income tax, and so there's no restrictions on this stuff that they've always had in place so that they can collect our income tax. So let's get rid of this in our minds. Let's get rid of all that. And then what are we praying for this to happen by the end of the month are banned by the end of the year, so I have to pay taxes. I don't really know if the IRS is still available. And it may be a taxing organization in Canada, or Australia or wherever in your country. I don't know. But just Sharia compliant, does not allow taxing like that. Only sales tax, that is a tax that is limiting the government's to becoming big. If they don't get you can't just make money out of thin air like they have in Star Wars and, and go and attack somebody which a cabal did all the time so that they could control people. That's all gone. There is no budget in governments. There's no money in the government's budget for war. So you don't go to war. Dishonored, compliance means you can't anyway, you break those laws and you're out financially, you're out of business country, they're just, it's just not going to happen. Because the area intelligence of governments is going to increase to the point where they are of service to mankind, period. If they're serving themselves, they will be gone. We won't let them if we know about it. So we just stop that from happening. And we're the ones in charge of that. Things are changing. Next question.

T

Tracee 44:29

Can someone please explain what is a token with regards to revaluation of currency? And how this would relate to the currencies exchange one to one

R

Ron Giles 44:40

I don't know what you're talking about, as far as your token is concerned? I really don't I don't understand it. So I don't know how to comment on that. Yeah, maybe I should ask somebody the same question. The token is, yeah, I don't know. Okay, thanks.

T

Tracee 44:59

I understand having a special needs family member registered for a trust. If someone has an elderly parent, or elderly family member, like a grandparent who is mentally unable to make decisions, do you add a trust for them under your name?

R

Ron Giles 45:15

Well, you can do it that way. And yet, you know, as I've said, the mentally challenged set up a trust for them. I'm changing my mind a little bit saying Why don't you just set up a beneficiary account? And and you be the one in charge of it? How do you do that? Well, you're the one that sets up the pin. And the person God wants, God knows who you are and what you're doing. So you set one up for somebody and start, and they can function that way. We don't bite no reason for leaving these people behind. And you've also got a beneficiary account, or excuse me, Zim benefactor account that you can set up for them as well. And give them as much money as you want. Versus if you're not as in benefactor, then you have to go through the program. So those people will be wise and how they set things up. Directors are going to be in a local community, they have the ability to do those things. Or they should have had their gym benefactors. Running things. Next question.

T

Tracee 46:38

Regarding the RSS program and employment contracts, I'm interested in doing the NRELS program as well, do I have to do the CAC to have directors to help me with these programs?

R

Ron Giles 46:50

Well, it's none of my business. That's a question that you should ask yourself. And you say, Well, I would like to have this and I'd like to have that set up. You're asking me for something that you want to do. I'm saying, do what you want to do. Work it out, work out the details. Do it yourself, it's all there for you to make up your mind. The char program at your money, we set it up. Again, NRELS will have a computer program that is running the whole thing. You want to be a part of that, then you sign up and why you go get benefits or get to real estate people involved, then we're talking about all different countries. Your NRELS is an idea that has to be implemented in each country according to the laws of that country, on how they exchange or they buy and sell properties, how they register the owners. So we can do what we possibly can. But we always have those kinds of government ways of doing things of exchanging properties and registering the owners. You'll see how that's gonna work out because just are compliant means that you actually become the owner of the property. When you have the Cabal, they

own the property and you rent it from them. And if you don't pay your taxes, they'll kick you out. Things are changing. And the laws are changing. And cabal laws are not going to penetrate into the new financial services nor for Nisar and just are compliant countries. Next question.

T Tracee 48:57

Because I am a psychologist, I have a large audience, can I talk about LWS or just give a link? Or is it better to speak personally, with those who inspire confidence? I'm worried that I no longer receive your newsletter at this address.

R Ron Giles 49:13

Well give us your new address. Well a newsletter. We don't have newsletters. We have email addresses that we send our stuff out there. So I'm not sure how that's going to work. I have a large audience that's great. Can I talk about LWS? Well, how are you going to do that? You know, you can't advertise but you can put on a seminar and have all the people come in and you talk to them about an opportunity of having funds that are yours. And it's not a doll. You have to be a part of the organization and that part of the organization will cost you \$10 Once you have purchased your account for \$10, then the money just as don't download it into that account. And that's yours to use for whatever you want in your life experience. But there's a lot of ways that that can happen. And I think that don't put yourself restricted in what you can do. All I'm saying is, as far as the beneficiary program, don't publicly advertise. Because that's not appropriate. It's not fair. But your ID number down on a public thing, and then you're fighting with everybody else's, has an opportunity to and that's not, that's not going to happen. It's against the rules. And if you get caught doing that sort of thing, there's a chance you'll be excommunicated, I didn't mean to say they were terminated from the program. So be wise, it's a great way to do things. And you got some people that you can talk to on a personal basis. Don't talk so much about LWS talk about the RSS program. And if you have people that you want to have directors, then you need to start talking about the programs instead of just the beneficiary program. Next question, this is a final question, is it?

T Tracee 51:29

Yeah, we've heard that you have a private telegram channel for humanitarians is any chance to be a part of your participants there to follow all updates and news?

R Ron Giles 51:43

Well, we have the channel, a telegram channel, chat rooms and so forth. And occasionally we send out a important links in the mail. And in those important links, everything is all there that you can look at want to go through. So yes, and especially there's a lot of new people. And I understand that we do have the channel, they chat channel and then on telegram so that you can go in there and talk with other people. It's not a place to promote your own stuff. We don't like that. We're there to it's the channel is there for people to come together and have some fun. Talk about ask questions. And if you ask questions, there's a lot of people in there that know the answers to them. So and if one person answers, you know, look around still because

there's others that might have a little bit different approach to the answering of that question. But it's all there to share with become a home that you can feel comfortable, and it's very loving. I mean, you have a few weirdos, but you have to put up with that because publicly they have to do that, you know, it's a private channel. It's not publicly, but there's 14,000 15,000, close to 15 How many IDs are now do you know,

T

Tracee 53:20

15 14.9k 14 point

R

Ron Giles 53:24

now we're just getting up there to 15,000 people. And we have 3000 in the chat room. So not everybody's there. But it doesn't take the place of QFS202.com. You have to do your own research, you have to do your own investigation and your own education of the programs. And as you new people as you get into it. We recommend that you focus on preparing for your appointment for your redemption appointment. The other stuff can come after you've got your money, but if you don't prepare for that, you won't go in there to your appointment and get what you need. So, and always remember that the appointments are to be given for those who have a calling from God to receive their funds to do the humanitarian work from the redemption of these bonds. And it's not just in bonds if you have other bonds, and that's part of the program as well. We don't talk much about them, but their historic bonds and they're there and they can be redeemed. How much should you wonder, didn't I? I'm redeeming the ones that I have. For the same amount I'm redeeming for the gym. And I'm not holding back. Don't do that. Well, Tracee, we did the end of it. Yeah, we did it in time. So the old guy can carry on or he can shorten things up about, oh, we get what we get on a moment to moment basis in the in the Q and A. Thank you, sweet lady for all your words of advice and help that you do. People just love you, and, and I so appreciate you and who you are and, and the calmness that you bring to our program. You're just very good. And thank you so much for your volunteering for our work. With that, you're certainly welcome. So let's have a good day today. I hope that question and answers came through for you in a way that's helpful. We love and appreciate you and, and give you honor for being here with us. And you're the cream of the crop. You're the ones who the Alliance is working towards getting us our money. So Oh, and by the way, we're going to start some new things. It's a different approach. I've received a lot of donations of bonds myself. And those bonds are going to be available for people to use. And it's a whole different story. These are 100 quintillion notes. And there's 1000s of them. So we'll have a lot of fun with it. And it opens up for us to do a lot of different things. So the problem is, is it costs money to do it. When I'm saying this, I'm saying some countries, you can only get them their Zim by FedEx, or DHL or some other or organized organized carrier system, because their countries don't have an emails, or excuse me a mail system of postal system. So it's only the carriers that are getting to people their bonds. And so it's costing us and it could cost some to South Africa, it costs us \$190. So it depends on what it is obviously. But if you have a chance to open up your your checkbooks and so forth, it's going to take a lot of money to get that done. No, one person can be \$100. So if we're gonna get down to them, which they need to have, as far as humanitarians are concerned, we need to get the funds. So open up your hearts and and to make some donations, we certainly appreciate it and give you thanks, we don't, we don't send back we're trying to catch up. But in the event into the very beginning, there was so many 25 that Dane tan or whatever, it kind of overloaded our system. So if it's if it's more than 100,

we're going to try and if it's 100 or less, we will probably won't hear from us as far as having received your donations. But it's more than that. It's your target for us to give our thanks and appreciation within an email or a letter or some other way. So having said that, let's go ahead and have a beautiful day today. Here in America, the sun is shining is it's summer and it's getting hot. So for those who are a little colder down south, and our blessings go with you and keep pouring your hearts you're gonna week keep pouring to thanks again. We'll say goodbye for now. Bye bye
