

Q and A - June 6th

Wed, 6/8 10:15PM 52:09

SUMMARY KEYWORDS

question, people, beneficiary, contract, humanitarians, rss, create, money, qf, quantum, financial system, pay, account, download, counselor, funds, alliance, charge, quarterly, benefactor

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

like to welcome all of you wonderful humanitarians. This is Ron Giles. I'm here with Tracee. We're going to do another question and answer period. Today is June the sixth 2022. So let's go ahead and start with question number one.

T Tracee 00:18

Okay, in the October 29 Part One video you answered a question about how to know if someone is working. Your response was a three D industry standard of delegate. On about the third time I listened that video I had an idea is it possible to create an interface for employees and the QFS LWS download system, where the person receiving the download checks are blocked to certify that they have used best efforts to meet the prerequisites to earn the download. If the QFS is conscious, then it should be able to detect if the person certified truthfully, if so they are given access to their extra download earnings are any other download above the basic RSS download. If not, they're denied access, this would alleviate the need to chase people around to get them to do what they agreed to do. Supervision can be a huge waste of resources. This would require that the employment contract be very clear in what is required.

R Ron Giles 01:11

It's good thinking but we really don't have much to do with the quantum financial system it will function regardless of us. Now, our job is to get the money out there. That's what love won society is about. We're where we've created the program's to accomplish the work that needs to be done by the by humanitarians in coordination with the Alliance tell each of the individuals who are in charge, we're calling them Zim benefactors. At area, we're creating you and you are the ones who will be doing all of the work as the Zim benefactors. So are you going to have somebody over you to follow up on your work? And the answer is no, there are bad people perhaps out there, or people who do things that are not right, and we were going to get our money before all of those people are gone. But the quantum financial system will take care

of it. And I've heard people say, if you're all of the money is not going to go into the quantum financial system, or be exchanged into the financial system, all fiat currencies. And I say, No, that's not true. All currencies will be exchanged into the quantum financial system. However, once it's exchanged, if you're a bad person, you're not going to get to use it. Now, if we don't allow people to put their fiat currency into the quantum financial system, and they're bad people, well, it's going to create a whole black market. And that's not what the intent is. So you'll want all those people come in and then be deprived of their funds, it may be that they're not going to be deprived, they just won't be around to effectively use it. Those are the that's the cleansing process is going to take place. How do we get involved with that with with things that we're doing? I don't think that there's very much space in there for us to go through some of the things that you're doing, or concern ourselves about. Our job is to get out there and get the money out and get the quantum or get the contracts up and do things. Let people do what they're going to do. And then they have the experiences that third dimension is going to do for them. If you break the law, there's a consequence. Let them have the consequences or outsell never understand that that's not a good thing to do. I mean, they'll hear it, but they don't do it until they find out for themselves. People are like that. But our job is not to control not to corral people into doing certain things. It just is not our job. They came here for their own experiences and they create their own reality that's crossing over dominions. I'm not going to force anybody to do that. I'm not going to participate in that. I want to ascend. And if I get into somebody else's business, then who's taking care of my business, if I'm taking care of their or area and I'm out there stretched around 27,000 people trying to corral them into No, that's not the way things work. We provide them the opportunities and they have the chance to do whatever they're going to do. And those that's the basis of on which we get to function into the golden age of mankind. And we're recreating that, or creating one of the two. I didn't focus on everything that Tracee says she was reading that, but that's just my response to that question. Then we move on to the next one, please.

T

Tracee 05:21

Yeah, this right, we're not going to finish. Okay, do you have to give up your Zim bonds at your redemption appointment? Should you have them with you? So you can show them to your agent at the meeting?

R

Ron Giles 05:33

Yes. Now, if you want to keep some to frame and that's Hasker. Counselor, if you can keep some of them and that they, there, there'll be just destroyed. So if you have recently keep them, then they might let you have some. But if you don't take your Jim bonds to your redemption appointment, where are you going to show that's, that's your ticket into the and that's your exchange for the money that you get. And that money goes into the quantum financial system actually goes into the structured payout system. And then as it goes through that process, and then you'll get your monthly or quarterly or quarterly or annual payments for the next 100 years, or however long you want to. Next question.

T

Tracee 06:28

Well, the managing directors, aka benefactors be able to pull money from the Benefactor bond account also, or is this a once deposited, can't touch type of account.

R

Ron Giles 06:41

There's nothing structured about that, at the present time, when you do a contract, you're going to have a certain amount of each person that joins love won societies of beneficiary, will, will come under that bond account, you just need to be sure you keep enough in there so that you can take care of things. I don't see any of us fully using up our our quarterly allotment of money to where we need to go and dip into the bond account. And so we'll find out a little bit better as we move into it. And and then that kind of a question. We'll say, Well, why don't we would never need that. I'm putting quintillion in there every quarter or whatever. Next question,

T

Tracee 07:27

in order to pay through the RSS, are these salaries a permanent download? Is there? Or will there be a built in calculation feature in the RSS system? Or will we have to constantly be converting yearly, or monthly or weekly or whatever salaries to per minute payments for download purposes? Most these calculations result in large numbers of decimal places, it would be very beneficial if the system calculated these for us if possible. If there isn't one, could this be added an added feature?

R

Ron Giles 08:01

I'm not sure I understand what that question is. I don't understand what you're talking about salaries. Please explain that to me. Well, this

T

Tracee 08:09

is what I feel like it is. So it's basically like, you know how they get these pay increases. So she's wondering if all of this will be built into the system, which I think that's

R

Ron Giles 08:26

part of the contract. It's part of the contract portion of it. So if you get a contract that it will trigger, unless you change it, you'll get a one cent increase every quarter in your contract. And that's part of the parameters of the contract. So how we're going to deal with that right now? I don't know. We'll see how the alliance has set it up. But we're not going to be in charge of that. that'll all be automatic. Cool.

T

Tracee 09:01

Okay, next question. In general, a permanent download converter tool would be highly beneficial to many participants, in addition to the CAC staff and ourselves How about the employers that want to give their employees raises? No, this is more on the small business,

employer contract side CAC and ECAs and not the Ford Corporation sized companies. Surely they aren't going to have to call into a CAC every time they want to give a raise, do they? Can one of the CAC documents it reads the business owner is the boss and can pay his employees as he wishes through the RSS download program? Will they have a tool to implement their management of their employees pay or salaries? This would require they have access or at least a limited access to their employees RSS accounts in some fashion or do we pay the owners and it is up to them to pay their employees from that payment.

R

Ron Giles 09:58

The way that's going to work is So the director is in charge of that program. And so the, if the boss wants a raise, he just calls and wants to get one of his salaries, or his employees raised. If I mean that can also be included in a one cent per minute, download every quarter, if that's the way that the boss wants to do it. You kind of have people who are real stalwarts in your business, and others who have not been proven commodity so that you want to have them permanent, showed the boss that needs to be in charge, but he works with a director and the director will make all those changes.

T

Tracee 10:46

If he thinks that's a good idea, and maybe like the ones that are already built into the system can be automated, but if they want to do anything over and above, then that would be contacting the director. Yes. Okay, next question. It would be appreciated if we could revisit the idea of benefactors having beneficiary accounts in an effort to help us blend in and retain anonymity, as well as for the show me? And are you in IT people. It would also allow us to have another level of separation from our master account when we enroll our first participants, which would aid in helping our anonymity.

R

Ron Giles 11:27

Okay, there's some misunderstanding here, the director or excuse me, the zim benefactor. So while in charge, now, if you want to establish yourself as a beneficiary, you can do that. And maybe that's a good way for you to budget, the amount of money that you spent, and then only keep some of the take from some of the, if I'm gonna buy at 10 million barrel home, I don't want to have to go through that. If you want to have a beneficiary account, you send it up, doesn't matter. And you can do that just perfectly. Because you're the one in charge. It's your money, do what you want. So we'll support that if that's what you want to do.

T

Tracee 12:15

I'm from Russia, and we want to hire several people in India, Iraq Valley, Thailand, we can organize groups from LWS will you help us out and maybe someone from other countries will join us,

R

Ron Giles 12:29

RON GILES 14:29

I want you to understand you're from Russia, it doesn't matter where you are. Love won society as a structure. Now, when you go through your redemption appointment, as a humanitarian, you will get the funds that you need to do your work, your work. Love won, society is not going to be involved in anything because we're involved in love won society ourselves, administering it, not only administrative, but doing it, just like anybody else will be doing it. So don't be looking towards us. You'll find your own spirit will help you in anything that you're trying to accomplish. You also have a counselor who's there to help you. And as you start to expand and move into different countries, there's there are certain steps that you need to take. And those are the things that you need to be discussing with your counselor. That's why your counselor will help you to become the greatest humanitarian that you can become. So that's your shores. So, but don't look towards love won society, look towards your counselor for your home. Next question.

T

Tracee 13:48

What happens when two or more humanitarians have projects that conflict with each other, for example, one wants to buy land to build housing and other wants to buy land to preserve nature, and animal habitats? How are conflicts resolved?

R

Ron Giles 14:04

Well, there's zoning and that sort of thing involved. I'm not going to concern myself with that, because you have counselors, if there's a problem, you'll resolve it. And, and I expect you to solve those kinds of problems without conflict. So I don't believe there should be a conflict. So if you have a conflict with somebody, that's your, you're going to have to work through that. Not all pieces of ground are going to be available for building houses. And not every piece of ground is going to be available for you to have nature reserve or whatever. So you work those things through and I'm not gonna get me involved with any of that. Next question.

T

Tracee 14:54

Why the \$10 or 10? Is that a pound payments? Are the RSS beneficiary count cannot be programmed in the RSS computer program to be automatically paid out from the downloads after signing up in the RSS, the same way as the bonus system is, I think in this way that people won't think that the RSS is a pyramid scam and won't oppose it.

R

Ron Giles 15:18

You know, what people want to think about us and a pyramid scam is their problem, not ours. And I'm not even going to address that \$10 is what it takes to get into the program. If you don't pay you don't get into the program. You got to understand that that payment means that they have there is a contractual obligation from us to them. If they don't pay the \$10, then why do we have a contractual obligation to give them money \$10 buys them a ticket into the program from there on the program is theirs. I understand this is important for everybody to understand.

Because we've dealt with this problem or this question before this program is presented by the Alliance, we're not going to change. Why would we change anything? That's perfect as far as the alliance is concerned? If I'm told that we got to change, then we will. That's the question.

T Tracee 16:29

Well, the RSS program on a quarterly payout? Is it recommended to move everything you don't use that first quarter while you're ramping up into another account? Or will the mother lode account continue to build up past the quarterly deposit?

R Ron Giles 16:47

Every quarter, your mother lode account will be downloaded the payments for that quarter. I'm suggesting that you take all of the rest of the money and put it in the bond account. So that's the answer to that question. If you haven't used it, put it in the bond account. And you can do that a day after you get your your payment quarterly payment. These are just little things that you can have to work out yourself. But the bank account is designed to as a repository for the money that's left over from your from your mother lode account, and you're gonna get it just deposited the next day or the same day or whatever. I hope that answers that question.

T Tracee 17:33

I'm not sure I retain everything I needed to, but my heart is in the right place, I would love the opportunity to spend my life in service to others. What do I need to do help, Mike Good to go.

R Ron Giles 17:46

You're good to go. You let spirit you let your heart guide you and direct you. And you if you what I'm sensing here is that you don't have trust in your own self. And what needs to happen is that you need to turn your cellphone's and all of these questions and doubts and so forth. You need to turn them over to the Spirit. And they'll get rid of them for you. Because they're a plague. And you're allowing them to control your life. So you're fine. If you're a humanitarian, you'll be just doing fine, especially after you get your money because you'll have a counselor to be there with you. So you are good to go. Next question,

T Tracee 18:35

is there anything I could do at this stage in order to be proactive, for example, a pre emptive vetting process to sign up for? If this question has been asked before I apologize for having missed that part?

R Ron Giles 18:47

For example, a pre emptive vetting process, you know, sign up for anything like that. Who

would you sign that lab where it's not me. There's nothing out there that I'm aware of that you can even sign up for it. A vetting process comes from the Alliance. Now I'm going to just say this part to you. If you feel you're in harmony with love won society, and it resonates in your heart, then you are one of those people who is already having gone through the vetting process. We say the vetting process and third dimension. But those who are humanitarians are called of God from the beginning. And those are the only ones who will be receiving money, large sums of money from the redemption appointment. Other people might get a little bit of money, but it's the significant amount to do the real work is only for those who are humanitarians. Next question

T

Tracee 20:00

Do you recommend that we get a security guard as soon as we leave the RV? Some Intel folks are suggesting it?

R

Ron Giles 20:07

Who are the Intel folks? Talk to me about it? Are you talking to gerbers? The people who don't talk to the alliance? You when you finish with your, your appointment, and you have your money, talk to your counselor ask him, her, whatever it is, what you should do to places it might be good to have a security guard? I don't know. I can't tell you that. But your counselor will. Next question.

T

Tracee 20:45

Will the website be revenue sharing dot solutions? For sure? Yes. Well, the referred by questions still be needed? And if so as the Benefactor Can I use my company name as Phil filed with LWS? Or do I use my personal name?

R

Ron Giles 21:05

Whatever you want to do is up to you. As long as you have the contract and it's in place. Next question.

T

Tracee 21:16

Just wanted to get your opinion on some things that a lot of scientists that Kerry Cassidy with Camelot bread broadcasting is interviewing, that are now leaning to a world upheaval of our tonic plates within the earth and causing a lot of volcanoes and disasters coming in around March or April of 2024. That is supposed to kill a lot of people on Earth. Is that part of the cleansing and bad people? What would that do for are trying to give money to everyone in spreading love? Or is our redemption after all that? Have you heard anything about it?

R

Ron Giles 21:49

RON GILES 22:15

Well, let's talk about timelines. If you don't understand what timelines are, then it's very difficult for me to answer that question. If you're in the right timeline, you're not going to go through all that. I don't care who's talking about it. If you're not in the timeline that that's associated with, you're not going to have that we're getting deep into the quantum or we're getting into the the fifth dimensional timeline, all those who are going to into the fifth dimension, or will have the opportunities to do so. You are the one reality. What you create for yourself is your creation energy, that is your reality. If you want to stay with the timeline where all that's happening, then you can have that if that's what you want. If you focus on it, that's what you're going to get. That is not happening in my timeline, I will not permit it, period, exclamation point, I am the sole person in charge of my reality. And I will not pretend to participate in that kind of stuff. Period. I don't focus on it. So I'm not going to create it. I focus on the the golden age of mankind, the the ascension to the fifth dimension. And that's where I'm going. God's in charge of everything else. And I'm just in harmony with God. So if it happens, cool. I don't have any questions about her that I don't really have an answer to your question. But that's my position. Next question.

T

Tracee 23:48

Okay, my question concerns a potential beneficiary who has no credit nor Debit Card to pay the \$10 registration fee? How can he or she pay using an alternate method? And associated question Is this where will he or she be able to access funds? If he or she becomes a beneficiary? Their own QFS account?

R

Ron Giles 24:09

Yes. And there's all kinds of different ways to pay the \$10. For the person who's referring, you could pay the \$10, he's gonna get 50 out of it. I think that every person that has the ability to pay the \$10 should pay the \$10 instead of other people paying for them. They will always feel that somebody else is responsible for their success. But if they pay for it, then they are the ones who are entitled to it, and they will get it. It's designed for psychological reasons. And the alliance has done that for a purpose. So let's just stick with it. Next question.

T

Tracee 24:54

I was wondering how they were going to teach everyone to be abundant. The RSS program is such Great start before I found you, I was going to name my project families first foundation, I to think everything starts with the family, especially taking care of our children in a stable environment. Question one, do we need some kind of company name? Question to when beneficiaries set up six trusts, you mentioned that they can use them for anything, let's say one for medical one for each of their three children, one for vacation and one for entertainment. How precise is it need to be? And final question, do you think our angel would be mad if we hired a bodyguard,

R

Ron Giles 25:33

your angels not gonna be upset with you for anything, no work things out with. Angels don't get

upset and use your angel, your counsel will never be upset with you, they'll counsel with you. Do you need the name of the company No. To when beneficiary setup trust, one trust can be the same verbiage. What you use the money for is your business. Put it in the document of the trust what you want to do with the money. But as a trustee, you're the one in charge. And so leave things a little bit vague so that you don't get to the point where you can be liable for breaking the trust and, and depriving the beneficiary of their what the trust is allowing for them. There's nothing really about those trusts that need to be fine tuned to the every little degree, leave it very general. And if you have three children, then one trust can be good for all of them. They're not going to spend \$1,000 or \$7,000 a week, or \$1,000 a week. You don't don't line yourself up with problems. Oh, and don't make this six trusts a problem for you. It's not, it's just giving you extra funds. for whatever purpose you want. We just say it has to be an address for next question.

T

Tracee 27:16

Regarding work contracts, how do we deal with unions where the workers are unionized?

R

Ron Giles 27:22

We'll find out by no idea. Next question.

T

Tracee 27:28

With respect to grants, are they the normal method for assisting with municipal government issues such as an upgraded sewer system, for instance?

R

Ron Giles 27:38

Yes, great. And so there's a way to do it. In my opinion, when you give a grant to municipal governments create a contract of some sort or an agreement. This is this is what the funds are going to be used for my going to get the grant all of a sudden, am I going to give a billion dollars to somebody to build a road or to do whatever they're going to do, or a couple of million or 10 million or 15 for a bridge or whatever it is. Do it in increments, because they're not going to it's just like a contract, you give so much in the beginning and so much after a certain amount of work is done in so much. And then you find the end you give them to the end, give them money upfront to buy the equipment that they need to do the work. You kind of work those things out. That's logical. And and you'll get involved in that and there'll be people to help you. They'll just be part of they'll always have your counselor will be a helpful for that too. Next question.

T

Tracee 28:48

On page 12 of the PDF funding, the RSS action plan is this for the beneficiary or benefactor to fill out explain example, what to put on these lines, your user ID number PIN number payment information programming.

R

Ron Giles 29:06

When a beneficiary signs up, there are two places for ID number. First of all, you have the referring ID number, the person the name and the person who is referring you, that's the ID number that qualifies you for or giving you the permission to fill out this form. You create your own user ID as as beneficiary, you create your own ID, your name might be so well your ID number might be Sue. You know, after a while there won't be very many opportunities if you'll have to do soon. 27 or so who 396 or whatever it is. Your PIN numbers, your own personal number. That's how you get into your account. I'm Not sure what else you need to know about that. We're not talking about the benefactor, we're talking about the beneficiary who is registering for the beneficiary account. benefactor has nothing to do with that. They will not be around when most of their people sign up, well, one person signs up, and then it goes to whoever is referred from then on, and it could be in a different country. So yeah, next question.

T

Tracee 30:31

What can you advise to people who have doubts in their mind regarding the QFS that are keeping their faith even though they are not sure whether it would really take place, since none of the criteria before the activation of the QFS have not been met, for example, currencies at par with each other, although they may have questions and doubts in their minds, they do have the faith that it will take place, what can you advise them,

R

Ron Giles 30:57

I advise you to just simply have faith. All of the details will be worked out when we're notified about those details. par value means that the Global Currency Reset has taken place. If it hasn't taken place, then you're not going to get a quantum financial system, period, exclamation point and of discussion. Anybody who says that's going to happen and that the funds are already in the quantum financial system. They don't know what they're talking about. That's where the problem is. If you get caught up in all of that kind of talk and discussion with people who don't know what they're talking about, you're going to be confused. My suggestion is you don't listen to those people. And I certainly don't want you to call or write me an email and say, well, so and so said this, what do you think about that? I don't have time for that. You want my opinion about something, then go as the Alliance? That's where I get my information from? And if you're not getting the information from people who are getting it from the Alliance? What the hell are you doing there then? Except for maybe to see what the other side is doing? It's hard for me to answer those kinds of questions. Because it's going to take place. And we'll know about it before it takes place or as it's taking place, or event has taken place. And all of the things that are necessary for the quantum financial system to take place. And to come into fruition means that we get to go to our appointment, we redeem that is the transaction that activates the quantum financial system. And till that time, there is no money in the quantum financial system. I don't care who they are. There is no money in the quantum financial system. And till we as humanitarians redeem our Zim, and we get funded, then it's done. Spend your money and enjoy your life. Do your sanitarian activities. Next question.

T Tracee 33:31

I've heard Ron say a few times that as a Zen benefactor, we are creating a liability. I know what the word liability means. But we'd like clarity as to what specific ways we are liable. Are we liable for what our beneficiaries do? Or do you really mean that as a benefactor, we have an obligation to distribute funds in a fiduciary manner to beneficiaries for humanitarian purposes?

R Ron Giles 33:55

The latter ladder, we are liable to the beneficiaries and anybody that we work with as far as contracts and so on and so forth. Those are liabilities. Okay, so we become, we are creating liabilities just through our, our programs that we're participating in. That's all I'm trying to say. Next question. We don't care about what the beneficiaries do. And those who continue to wonder, well, that what are they going to do with the money? It's none of our damn business. It's their money. You've given it to them. We're giving it to them. The Alliance has given it to him and they know what they're doing and it's none of our business what they do with that money. Get it out of your mind. Period.

T Tracee 34:46

Okay, ready question. If ever we received a huge amount, do we have an immunity to receive? I don't understand that question at all.

R Ron Giles 34:57

I don't understand that at all.

T Tracee 34:59

Okay, heck, please reward whoever submitted you're not

R Ron Giles 35:02

you're not talking to this, this question is not talking about anything that we have to do with period.

T Tracee 35:09

Okay, with respect to funds for CDCs, can I contribute to many existing nonprofit organizations helping veterans, seniors, homeless folks, by contacting directors of these organizations, many 501 C three nonprofit organizations are multifaceted and have sub classifications for helping in numerous different ways, depending on the needs of folks needing financial assistance, perhaps they need to expand their facilities by adding on structures and hiring additional personnel. I would like to make those funds available to them, or do I need to create my own company slash companies,

R

Ron Giles 35:45

there's some reason for creating your own company to do that. If you want to call it a company, you can call it a, you know your council up people who make up their mind about those kinds of things. And that's just a smart way of doing things. So as you're moving into this council with your counselor, talk to him figure out things. They're, they really know what they're talking about. So they'll help you with all of these kinds of questions. And you may have your own company to do it or organization or whatever to assess the situation and make recommendations. It doesn't matter whether a 501 C three or not. It doesn't matter to us. Next question.

T

Tracee 36:38

If a beneficiary wants to create a trust, one out of six as fun money for himself, no money list as grantor, and trustee, I assume he would list himself as the beneficiary,

R

Ron Giles 36:49

the grantor if there are certain trusts that the grantor, the trustee, and the beneficiary can be the same person? That sounds a little bit weird, but I understand that's true. But fundamentally for yourself, just put funding money down and have your wife be the beneficiary or somebody and you be the trustee and you're the grantor. And then you do boom, one to the other. So if you're married, you have trustee that's over there, and your beneficiary is over there. And you're going to give her some money to go out to dinner with you, William, next question.

T

Tracee 37:37

Should I send this video to the ones who will be beneficiaries? What video? Okay, wait, when do we start talking to possible beneficiaries?

R

Ron Giles 37:53

Why would you ever talk to beneficiaries? That tell me Well, tell me what as a benefactor would you do by talking to beneficiaries? That's a good question. And you need to answer that question. Because this is not what you're looking for. You're not involved in beneficiary's life unless it's part of your own family. So if it's your own family, then have a discussion about it. But I wouldn't talk I wouldn't start talking to anybody that I in my family until I have the money until we start doing whatever we're going to do for beneficiaries of our family. And then then you invite them to the idea that they're going to get a lot of money. \$26,000 a month is something that they've never had before. Maybe \$1,000 a week, or some people make \$2,000 a week. That's over \$100,000. So those are the kinds of things you just have to work out with your families. But you don't you don't you won't be talking to beneficiaries. Next question.

T

Tracee 39:19

Could you please tell us what is the role or involvement of the DOD and DOJ in the rollout of the QFS? Some people keep mentioning these two agencies and from them, it sounded like they are the ones authorizing projects and making the QFS go live. They also said that their projects had been approved by the DOD or DOJ but they are under an NDA. That's why they can't discuss it. If they're under an NDA. Why are these people keep mentioning these agencies?

R

Ron Giles 39:48

There's a there's a girl road network, a girl route news network. That is not part of the The Alliance you are listening to people who are not of the Alliance. Okay? That's a simple thing. These people have got all kinds of stuff going on, that they're trying to get you to do and think that they're in charge. They are not in charge. You don't have a when you become a Zim benefactor, you are the one in charge. Nobody else is in charge of you. So why do you allow people to be in charge of you now? I mean, they're gonna have you send in your, your project. And if it gets approved, then you get funded. You know what the word BS means? That's not a real word is it? It's all garbage. It's all pretend stuff. What is an NDA? To them. It's just something that they've been told they can't tell anybody about. And they can make it as legal as they want. I am under no NDA, and I work for the Alliance. If they don't want me to say something, I don't say anything about it. That's only happened a time or two. And that's for timing purposes. But I'm not under an NDA, I they just asked me Don't talk about this to people. And they say, Well, why did you tell me about it? Well, you need to understand some of the things that are going on. Okay, that's good enough for me. Why do I have to signed a nondisclosure agreement means you have to sign things. It's an agreement, it's a contract. It's no, it's worthless, unless it has the ability to have consequences for giving out your information. There will be conference there consequences when you go out of when you sign your NDA as your appointment. I don't understand why these people and they're very well intended people. But they don't have the information from the Alliance. So they got to go through these pretend people who think that they're in charge of the quantum financial system, and that they're going in and appointing people to be the spokesperson for the financial system, all that sort of stuff. Well, yeah, they should have MBAs not tell them, buddy, what's going on? I'm sorry, but I do not believe in any of that. The DoD or DOJ, none of those people have anything to do with the quantum financial system, period, exclamation point, anybody that says that they are. I have say T liars. Because liar means you intend to do something that I hope that's not the case. But the DOD and j or j that have nothing to do with the quantum financial system. The government's have nothing to do with a quantum financial system. They have to be compliant to just Shara they'll even be involved in the quantum financial system. Are they now? Is America either? Are there Joe Biden? Are we under GESARA Law? No. Nobody is very few people are very few countries are Russia saying that they're part of it. Yeah. Okay. I'll go along with that. And other countries like tennis. So next question.

T

Tracee 44:05

If we benefactors are buying all inventory every year from say, Ford, GM, Chrysler at wholesale for resale? How do we ensure they are being innovative with every increasing innovation quality and safety standards? In other words, what's the OEM's incentive to create innovative products for the consumer when they are assured that all the produce is going to be purchased by us for resale?

R

Ron Giles 44:35

Well, you need to understand that there will be contracts for that sort of thing is going to be covered to be taken care of as part of the contract. We're not going to pay him for being stupid and creating junk. Now we're going to be sure that they are doing their research and development that they have a whole bunch of people that are involved a whole Uh, whatever in their company that's in charge of that sort of stuff. Wouldn't you do that? You brought up a good coin? Wouldn't you be the one who insisted that all of those things take place in your contracts with Word or any other country company? Absolutely. It's part of the contracts. And those contracts will be the suits will get together and they'll talk about how that infinitum and tell you say, that's where it's going to be where we're going, we're moving on, we're going to sign the contracts and get on with business. Your legal team that you're going to create to do that, it's part of the ESS economic stabilization system. That's going to be done by love won industries to be a part of that. You'll become part of the love won industries by contract, because we're not gonna allow people to be out there doing things for love won Society, who are not part at that level, that are not part of a love won industries. There's too much at stake. There, there's too much that is going to happen to end love won. And in the ESS program, as far as, as well as the international body clearing houses. We're moving into the Galactic commerce, the International come on commodity clearing houses will be established in the different countries or states, Star nations, whatever they're called up there will be part of that organization. So that's all going to go beyond anything we have any idea of. That's what the lines kind of stuff does. So we're going to be better than we think we are. But we'll go with the next question.

T

Tracee 47:10

I think this is a continuation the products they produced today a built in failure modes to assure future sales OEMs use many substandard components, ie steel, plastic, electronics, etc. I'd like to hear your viewpoint on how we can drive them to innovation. This is a new business concept. And I'm on board for change.

R

Ron Giles 47:31

Okay. You're saying what am I going to do? What are you going to do? It's just same the question before. Those are concerns to you. Are you not going to put those in the contracts? The answer is yes, you're going to do that. Because it's wise. It's a way of doing business with business people who are going to be producing products that we own and resell to people. We're going to have the highest qualities available. We're going to use the new inventions, we're going to use the 6000 patents or whatever how many they are, how many patents are going to earn. We don't have patents that how many technical devices are we then going to get from the ET's that we can put into our cars? And how long are we going to predate create cars when we can have antigravity machines, there's a transition will take place. We're not going to be stupid. And I hope that you don't plan on us on your shells who are doing that to be stupid as well, you'll you'll find that this this will work out just perfectly. Don't fear anything. Because it will be resolved all problems will be if money can solve the problem, we will solve the problem. If it can't, then we'll ask God to take care of it. Next question.

T

Tracee 49:07

If someone is in the ECS and receiving the maximum download of \$2 a minute, does that mean they will not receive quarterly bonuses for the remainder of their contract?

R

Ron Giles 49:19

I never said anything that you didn't say a maximum either. You're in charge of wages or whatever is going to happen for your people. \$2 is, you know 10 for somebody that's the head of an organization that has a contract, I don't know. But don't put words in my mouth because I've never said maximum. Please, please don't put words in my mouth. You may understand that that way. But that's not the words that I say. So you'll be in charge of that and the contracts will mean why would you ever take something out of a car contract that we're talking about as a quarterly increase in their download. I've never said anything about that. Why do you assume that they got to bid dollars a minute that they wouldn't qualify for those loans, or for those bonuses or increases? These are the kinds of things that I have a hard time with, because I don't say those things and people will invent them, and then they ask questions about it. And when there's plenty of questions on the test stuff that we have, instead of inventing stuff that I hadn't even discussed, so please be sure that you've thought this through before you ask these kinds of questions. And don't assume that you have got all of the words right when you haven't. So be sure that you do have the words that are correct. Then we can be at peace with one another. I'm sorry. Next question.

T

Tracee 50:57

Okay, this is the last question. Can I as a managing director, creative Pay It Forward code, and the RSS for the \$10 entry fee is paid by the person recommending them for the program, which effectively lowers their \$50 signup bonus to \$40? If that's possible, I'd like to do this for every one that I sponsor or support and RSS program. Is this acceptable?

R

Ron Giles 51:20

Absolutely not that last question. You have talked about it earlier. And that's why I'm being so dismissive of it. So that's the end of our question and answer for today. Thank you, Tracee, for all your help. And for me, being able to discuss things with you and coming to a better understanding of things. Your input is viable and important. And thank you, everybody, for being with us. I send my love and appreciation for all of you that are doing the things that you want to do as a humanitarian, in preparing for your work that's coming for you. With that, we'll say goodbye for now.
