

# Q and A - March 28th

Wed, 4/13 11:51PM 1:20:18

## SUMMARY KEYWORDS

question, humanitarian, people, account, beneficiary, benefactor, redemption, employment contracts, contract, money, appointment, set, quantum, rss, funds, home, lw, mind, cac, alliance

## SPEAKERS

Ron Giles, Tracee, Tracee Gluhaich

---

**R** Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracy and we're going to do another question and answer. This is March 28 2022. So with that, let's go ahead and start.

**T** Tracee Gluhaich 00:13

Okay, is there anything I can help you with our work like translating the most important facts into German? I have a lot of time because of the deep state situation here in Austria. I want to use this time wisely until we upgrade to the QFS way.

**R** Ron Giles 00:31

Well, that's a kind offer. And let me put you on the list of people who are offering to volunteer and we'll come back to if we can. Thank you very much for your help.

**T** Tracee Gluhaich 00:45

Okay, next question. Well, common, I'm guessing it might say law will common law for all countries natural law be used on all Earth lands and other grounds like sea beds.

**R** Ron Giles 01:01

Looks like it. Yeah, you're you're asking a question. That's beyond my scope of knowledge. So that but I'm assuming that that would be the case as well. Law is land, air and water. And so I'm assuming it'll be a seabed as well.

T

Tracee 01:23

Okay, the next question, says, Will the enslaving via admiralty law be abolished?

R

Ron Giles 01:32

Yes. admiralty law goes away. Next question.

T

Tracee Gluhaich 01:37

What law will be used above the ground while goods or people are an inter planetary transit? I don't know. I feel like there's just going to be one last one law period. That's it.

R

Ron Giles 01:55

You know, God's law, I believe that God's law, that's the man I'm I'm voting for. So I really don't know what I don't know. What are the options? Do we have options? I don't know if we have options. It's going to be God's way of doing things. So I guess that's our options to accept or reject God's way of doing things? Yeah. Yeah. No more of these games. Next, Next question, please.

T

Tracee 02:29

Okay, regarding account coding in the LWS program, will I be able to structure my chart of accounts to meet my needs and ways of managing accounts?

R

Ron Giles 02:39

Well, I, you have given me no information about how you're going to do that. So I don't know. I just know that when you say will I be able to structure my chart of accounts? What accounts are you trying to talk about? Yeah,

T

Tracee Gluhaich 02:57

I think she's referring to like a chart like a QuickBooks type program.

R

Ron Giles 03:06

That's possible that you can set it up that way. I suppose there'll be a lot of new stuff coming around. One of the points that I wanted was thinking about this, and you bring it up in accounts. The accounts here when Charlie Ward and others talk about the CIPS as the transfer system in the quantum financial system. I want you to be aware of the words in CIPS. C stands for cross border. I stands for interbank payment. P stands for payments, and S stands for

system. So CIPS is an interbank payment system. Now, for those who think that the banks are going to stay active in the quantum financial system is going to be very, very difficult for them because there are no banks to cross borders or two interbank payment system. It's a transfer. It's a simple account to account transfer within the same financial system. That's why you need no CIPS. CIPS is for the BRICS countries to transfer money between their banking system, it's not going to happen and the quantum financial system so please, people, get that out of your mind. Please, it's an account to account transfer within the financial system. That is the only financial system that this earth will be using so we can get off of that. And that's my bandwagon for today. Maybe they'll find others say so. I'm not sure how to manage how to manage your account. out, you can create a chart of your own accounts within the quantum financial system. There's no problems with that.

T

Tracee 05:08

But basically the LWS platform is not going to have like income and expense charts for you to run your business. It's is it?

R

Ron Giles 05:19

No. Okay, regarding account coding in the LWS program you're not you as a Zim benefactor will not have access to people's accounts who are established in the beneficiary program. Period. That's It's none of your business. This is their business. And you're going to be paying for it. Yes. And then they mean, none of your business is a pretty severe way of saying that, but you have no interest in what their user ID number and your account number, it's private. So you won't have any of that information. What is done in the platform? Well, the I the person's ID number is going to be the thing that determines everything that goes on in your personal office in the LWS, or in the RSS platform, I don't have enough information to really give you a good answer to that question. So if you want to ask it again, that would be good. But please clarify what accounts are you talking about how to manage accounts, you're going to set up your own for your own bookkeeping system in an international from my perspective, from an international accounting firm, like KPMG. And that's what I'm going to use because I've inquired, and it says that that's a good one. So that's why I'm using it. And there might be others that are just as good, or an accounting system that is local. But it's something that you can work out yourself. Love won society, and the platforms that we create will not have those kinds of will not keep track of those kinds of accounts, because that's something that you can do on your own for with an accounting firm. Maybe that's helpful, but I'm just trying to surmise what the question is in trying to give an answer. That's not the best way to do things. So thanks. Wow.

T

Tracee Gluhaich 07:24

Yeah, I think it's she's asking about like a QuickBooks type function, which she can do with something else like QuickBooks, I use QuickBooks Online. So perhaps that would be a good solution. Okay, I still believe that Australia is not just are compliant. And I wonder if much is being pushed upon these politicians here to blend in. I had another look at the card front and back, as was sent earlier to me that once the printer can make them, I'll get numerous ones printed, is there an attachment of the card via email, which would be better to send to the

printer. So that means I will be a humanitarian, if I understand how much I paid a new people, still, I wait to see if there's a redemption center here soon. When you say the highest rate, what is an example of a rate? And how high I am in a hurry to pay my \$10 and get myself established?

R

Ron Giles 08:19

Okay, I appreciate what you're trying to ask and do. But first of all, and this is perhaps something a little bit new to people. It is my opinion that and I got confirmation on this. The white hats have taken basically taken over every country, every government and are they are becoming just Sharia compliant. So when you're talking about problems that you see in mainstream media, and it's all show, just simply a show, because all of it has been taken care of by the white hands. Now, just Sharia compliant for Australia? I don't know. They haven't said that. But they're going to become GESRA compliant when the arrest and everything are finished. And that's going to be a very big event all over the world. Maybe it's already starting, yes, probably has already starting now. But it's going to happen and tell it's going to continue the way it is until there's a general awakening of the population. This may be in a bunch of different types of ways, including the emergency broadcast system. So we don't know yet. It's a war. We don't have privileged information that if God out, put out to the public that there'll be problems. I'm just saying this for your own satisfaction and for your owns getting into peace. This is already a done deal. They're just cleaning up pile three, they're not redoing the whole building. They already been done. So the cleanup is in different locations, and those people who still need to be arrested will be. And the one, when the time comes for GESARA compliant, is when we get our money. It's got a company or excuse me, a government and they're in their countries have to be just too hard compliant in order to participate in the quantum financial system. Now, keep in mind that every, the Global Currency Reset has to happen before the QFS can be activated because all currencies have to be reset to a par value one with another. So the pound will be equal to the dollar and the dollar to the Australian dollar and the Canadian dollar. And so far, all of that takes place before because it's, there's there's a step by step. And I don't know what that was step by steps up. But I just know that that has to happen. Global Currency Reset has to happen before the RV can take place or the redemption. I suggested the person who wrote this, all of your information that you're asking here, is dealt with within the doc in the documents that we have on our website, or they're also involved in the videos. I'm in a hurry to pay my \$10. Where do you want? What do you want to be? Are you a beneficiary? Or are you a benefactor? That's a good question for you to answer to yourself. If you don't have an understanding of the difference between the two, then I suggest you go to the glossary and look and see what's going on. There's a lot of information here. And I want you to get yourself established, but you don't pay \$10 To become a zoom benefactor. And the the \$10 is not available until the the platform the RSF platform is up and running. And we have, we have already done the programming and so and all of that that's necessary for us to do thing at \$10 is a is a beneficiary program within the RSS platform has nothing to do with becoming a zoom benefactor. So please, in your mind, understand the difference. As far as your printers and that sort of thing. I don't know really what the question is, you deal with whoever you want, they can be done on the back can be done on the internet, there's a bunch of places where you can get cards printed Vistaprint Insta print, and there's a bunch of others. And you just get on there and find the one that will eventually get to the point where they have the different card opportunities that they have already set in place. And you just order to click on this and order it and then pay your you know, put your information in the blank and then they'll print the cards out for you. At this point in time that hasn't been set up. Because we have a number of different cards, and some of them are coming out and being really good. So there's a lot to to

pick up on, I suggest not taking a shortcut, you're going to have to know everything. When I was in pilot training, there was not one bit of information that I did need to know how to fly. So I couldn't skip over anything. Wanted to do that in high school all the time. But because I was busy playing basketball or whatever. So this is something that you have to know everything. You cannot skip it. You've got to be able to understand it to the point that you can teach it to somebody else. And when you get to that point, you'll feel really relieved knowing that you have a handle on what you're going to be doing as a humanitarian. But right now, it's a big uphill climb. And it's a steep learning curve. And that's why I say to people, concentrate on your appointment presentation first. Because that's the first thing that you're going to encounter is the appointment. So you do your preparations for that. And then when you get your funds in place, you can fine tune what you want to do with it. I hope that makes sense. Are we in a tech critical time? I don't really know, what is the RV happened next week, are you ready? They will not be and you you, this is one of the indications where there's not going to be a redemption center. Here, anywhere, you'll have a personal opportunity to redeem your Zim through an alliance agent, not through a redemption center. So you're you're behind in your information, and you need to catch up. And I hope that you can do take it upon yourself. This is a self education course. There's 11,000 people that we've got learning everything, and I have not the time, nor the inclination to tell everybody how to do things. So these question and answers is as close as I can get on a personal basis to answer your question. So it has to be for everybody and sort of on a one to one basis. I just be on the computer day in day out. And I don't, I don't want to do that. I did do this for a job. So we we put everything out there. We got it on the website and the videos, those who are learning tools, and we hope that you will use them and enjoy the experience. Next question, please.

T

Tracee Gluhaich 16:41

What happens if a beneficiary breaches their employment contract? Are they're saying are the sanctions permanent?

R

Ron Giles 16:53

Well, have you read about that? Here's another question. I've I've dealt with that very well, to the ESS I know, because the employment contracts are in there. But there's different contracts. So the employment contract for a corporation or something of this nature is different than the one for the personal or the business owner, and what's going on there. So if it's a larger corporation, then there's a whole series of levels of supervision. And each one of those has to be honored and respected by the the company's human resources. And if you break one of the rules, then you'll go through the the employment, the resolution for problems. And that's where arbitration of the arbitration board will have the ability to penetrate deep into a person's beneficiary account. And they can take away there's opportunities to take away in this. This is all mod said, it's not set in stone yet. So you're asking a question before all of the answers are made up. But the arbitration board can go in and take away everything you have in your beneficiary account, except for the original beneficiary account. That means the first 10 cents per minute to get that if you've got some, some trust and so forth, that you've set up, and you've gone out and done a real good job, again, a lot of people all of that goes away, if you breach that contract, now, a contract is a legal document. If you don't know that you're signing a legal document, then don't accept an employment contract. Because there is teeth in it. It's your word, and we're going to keep your to your word. Or the the human resource department

will keep you to their word. Now, I don't know if we're assigning contracts to a larger corporation. We're signing up people as a contract with us and we're giving them this download. But your that employment is going to be employment contract will be assigned to the company that's in charge. And they have to be in charge of their employees. We're not getting in the way of that we're just paying them and paying in a different way. By contract, you break the contract, you have problems. So don't be planning on breaking contracts. Because there's going to be teeth in those contracts. Not so much so with the CAC program, but when we get them the ESS it's gonna be very hard to get out of a contract. So

T

Tracee 19:56

okay, so you just clarify. Let's talk about this. So you said, so let's let's delve into this question because this is confusing. So with the ESS which of the larger corporations, you're saying it's harder to get out of that contract. But with the CAC employment contracts, it's going to be a little different. But also we spoke about on a previous video that renegotiating a contract is acceptable. Yeah, for only the CACs, or is that for the ESS as well?

R

Ron Giles 20:35

Well, to what degree is it negotiable with a corporation, they have human resources that are administering these, this whole program. In the CAC program, the directors are administering it. So if you needed if a business owners had a heart attack or something like that, and wants to get out of business, we're not going to require them to stay in there, at least, my directors won't be doing that. We're not being cruel and unusual and a punishment sort of way. So we're going to be working with the people, Human Resources has a different way of dealing with things. And you know, I've been a supervisor over 40 or 50 different individuals. And if they don't follow the rules, they get a warning if they if they don't follow the rules. So again, second warning. And when they get a third warning, that's when they're terminated. So that's got to be available for people. So things are different.

T

Tracee 21:45

But every negotiation is acceptable. It's just you can't like just just completely like flake on your contract, break your contract. But if you there's a reason that you need to renegotiate your contract, that is a possibility. Yeah, right. Okay, good. Okay. Got it. Okay. Ready for the next one? Yeah. All right. In order not to mix private funds with humanitarian funds. Can I have nonprofit Zimri deemed account and private after our V Dong account? Hmm. Well, the separation of those two different sources be a good solution, or is there an option? Okay,

R

Ron Giles 22:31

I don't I don't think that, you know, a solution is something that you apply to a problem. And I don't think that there's a problem here, you get it, you're not going to have separate accounts unless, unless you do it that way. For your, your zim. You go into your appointment, and they will have what is the Total Gym that you have. And you tell them and this is a rate that I'd like. And then they set it up on the structured payout payment system. There's not a little bit over

here and a little bit over there. It's all one lump sum. If you want to include your funds from the exchange of currencies, the Dong and the dinar, so forth, that's up to you, it's not required for you to put that in the structured pay out, that can be set up as an account all by itself. And you can use that for your own purposes. Because we have no control, really, you don't have to be a humanitarian to exchange. It's just when you're associated with the Alliance, they will when you go into redeem Museum, they will, they will because of your the humanitarian that they want, they will help you in exchange in your currencies. And if you want, I'm going to put money in a different account. And, and that's just my personal idea, the circumstances that you're gonna have. When you go into that appointment, you will need to sit down with your counselor and work out the best way to do things. They're the resource. We're asking questions now, because we don't have the resources available. But those are the kinds of things that you discussed with your counselor. And they're very open for that sort of thing. You know, it's not that on their redemption appointment, and you want to keep them there for a couple of three or four hours as you're asking all of these in depth questions about how you become let a little bit of the time happen. Talk to him working out. Most important thing you do at that appointment is that you work out your relationship. How do I talk to you? How do I sum it? knew for a question that I have will you be available for you do have hours, you know, all of those kinds of things. You work out that relationship with your counselor. And it could be very personal for your shred of circumstances. So okay, set up whatever accounts you feel you need. But do your counseling with them. They'll help you. Next question.

T

Tracee Gluhaich 25:27

In the last live chat, Ron mentioned that we can determine with a business owner what the quarterly raise will be. So will there be a separate field on the east see a page of the RSS platform that will allow us to specify the quarterly raise?

R

Ron Giles 25:45

Yes, yes, you will. It'll be user friendly. It might be that there's a question and answers and setting it up and you just fill in the blank. Will there be a raises quarterly raises? See the quarterly concept was in the ESS employment contracts. That's not so much in the CAC type contracts, unless you put it in there, but it'll it'll all be the same. What you put in there will be the thing, what your directors put in, there will be the thing that will happen on the platform. And it'll be user friendly for you don't want to make it difficult for for directors or for anybody else, for that matter. So it'll be user friendly for for all of us. Next question.

T

Tracee Gluhaich 26:33

Since ECA contracts will most likely be signed in the middle of a month, will the quarterly raise kick in 90 days after that signing date, as opposed to a calendar three months?

R

Ron Giles 26:47

Whenever you want?

T Tracee Gluhaich 26:50  
Where's the boss?

R Ron Giles 26:54  
Yeah, you're the boss. You know, I'm not telling you what to do. You can have the three months studying on that particular day of the month could be the 15th of March, who get a raise every every quarter or the 15th. So that each the three months after that. So, you know, you'll set it up properly. We're trying to see down the road ways and all of the decisions have not been made that way. But we're getting there. Next question.

T Tracee Gluhaich 27:28  
What are your thoughts on adding a field on the ECA page of the RSS platform for an annual raise? Is that a possibility? That's the same question. Well, no one's quarterly one's annual.

R Ron Giles 27:46  
Oh, I'm sorry. If you're going to set up an annual then that's set it up annually or quarterly, it's up to you. Okay,

T Tracee Gluhaich 28:01  
sorry. Well, there'll be a nondisclosure list available to benefactors only of the amount of benefactors in each state or territory, not for personal information, but just as a guide to areas that are in need of help that are not receiving attention. I remember you saying that love won society had 11,000 members, the United States alone has over 3000 counties, if we need to spread out directors. That's what we're doing the map for, isn't it?

R Ron Giles 28:33  
Yeah, the concept of the map is that it's on a voluntary basis. And the only value that has is if people respond to it, when they want to go into an area. Let's say there's, you look on a map and spring, Springville, Arizona doesn't have anybody in that location. Because nobody's put their flag or whatever for that location. So you volunteer, you say, I'd like to go to that area. And then you put, they'll go ahead and the map, person, people will go ahead and put that on the map. But it's a voluntary basis. And we hope that you don't just go out there and put your your point on a lot of different areas that you have no real intention of going into specifically until such time as you actually go in there. And maybe that's the way to do it. So when you go in the end, you report back to that you're there and it's on the map. And that's really the only way that we won't keep that that's something that love won society will facilitate but we're not in charge of that's just the way it's gonna be for us. Next question.

**T** Tracee Gluhaich 29:55

Since I work six days a week I will be picking out an already done on humanitarian project that is set in place, what do I need to bring to the redemption center?

**R** Ron Giles 30:06

Oh, that's, I gotta read that question. I'll be picking out an already humanitarian project that is set in place. Really? What do you bring the table? If it's already there? The funding is something this is something new. It sounds

**T** Tracee Gluhaich 30:25

like they're trying to just fund somebody else's project.

**R** Ron Giles 30:29

Oh, I will be very careful about somebody else's project. You go into your appointment, say, Oh, well, I'm going to come to you and I'm going to find Red Cross, I'm gonna send all this money over to the different organizations that take donations and serve the public. If you're gonna do that, then why don't why doesn't the Alliance just give them money? Why do they need you, this is not a part time job. If you haven't got time now, then you will when you get your funds. But you need to be sure that your thinking is appropriate, because if you're planning on using let me put that up, they call it NGOs, non government organizations, non government organization is generally those that are associated with charities, setting up a school for kids in Africa, something of this size, an NGO, non government organization, you want to do that. And that's what you go ahead and do. But if you have humanitarian projects in mind, and you're local, and that's what you want to do, then go ahead and do that. And if you have that, then why are you asking me? What do I need to bring to the redemption center? Gosh, it's all in the stuff that you need to have been reading. In order for these kinds of questions to be answered. There's 1000s of these kinds of questions. But they're all answered in the documents. What do I need to bring? When have I talked about the redemption center lately? You're combining our information with other people's, I'm not talking about redemption centers anymore, have not done so for a long time. Redemption centers all that. We're going to put this and we're going to have the military common and guard it and redemption employees who go in there and did all of that has gone away with the reality that the alliance will he will call us and our somehow communicate with us. And let us know and you'll arrange your appointment. And they will tell you where to have that appointment. There will not be a formal redemption center. Each individual humanitarian will have their own set of circumstances that will be provided by the Alliance and their agent that's going to be your new counselor. Oh, hope that helps. Next question. Okay,

**T** Tracee 33:21

if a wife intends to be as in benefactor, but a husband is not interested nor wants to even know anything about it, what kinds of protections are in place to ensure the wife can keep her

income and dealings separate from the husband, say an extreme case of divorce the current legal system and sits on insists on splitting assets? What will that mean in the QFS? or LWS?

R

Ron Giles 33:48

Well, the QFS does not honor. Splitting up people's ownership. There's not a court order that can split up when a benefactor receives their funds from the alliance is because of their qualifications. It is only for them and that will be put into the quantum financial system. And nobody. I'm saying nobody has the ability or the legality of going into your account as a spouse, and take money and split it up with a husband. It's humanitarian money, and he's not a humanitarian. He's not going to get it. Period exclamation point. Now, this is one of the reasons why I talk about husband and wife each having their own redemption appointments. And then if you want to do things together afterwards, which is your intention, and that's fine. But that money is given to you as the humanitarian and not to your husband. And so when you get together, your husband and wife team gets together to do marvelous things, I'm sure that's going to happen. But each one should have their own say over their own money. And oftentimes, there's a certain amount of coercion that's implied by husband and wife team, that husband needs to be the boss, or the wife is the more money minded so she gets to be the boss. That all goes away when you each have your own stewardship responsibility for the money. And one cannot be the boss over the other, or they've given up their stewardship responsibility. And I think that there's going to be some really tough times if you think that might be if you allow for one thing, and then something else happens. We don't know what's going to happen in 50 years. So set the stage now to be independent, and sovereign. And then that's the way you live your life a different way of living than it has been in the past. Now, we're humanitarians were they the point of the spear that's going to get the funds. And so there's a different calling from us for us, then there may be for those who are not going to get the money and will come afterwards and be the humanitarians that we use to take over the work. So I'm hoping that helpful. But no, there is no legal way to get into your account is protected. And so are you. And then you have another plan to or

T

Tracee Gluhaich 36:59

another one, sorry. It feels like we are moving towards sovereignty for each individual. But this will be a new concept for most people in the world. While I don't anticipate a divorce, I do anticipate confrontation and frustration with me not sharing more details of my work, and not sharing financial details. Any comments or suggestions regarding this? May I comment? So I'm in I'm in the same way, my husband does not know anything really about this. And when I first approached him, he like dismissed it right away and said, Oh, that sounds like a scam. It's too good to be true. Bla bla bla. So secretly, I've been doing all of this stuff without him really knowing. But after the redemption, I am going to schedule a fancy dinner and give him a card. That is happy retirement, he's going to be on my NDA exemption list. So I can tell him the truth. And I do not think he's going to be upset about it. I mean, come on, I'm just gonna say, Well, you know, that little gamble I made or whatever, I'll just be joking around about it. And I'll say, well, it looks like it paid off pretty well. And let it go at that. I mean, I know. He's gonna be so excited. He's gonna be like, Whoa, right on, you know, so anyway, that's my answer.

R

Ron Giles 38:28

Yeah, well, it's an it's a good answer. And I was gonna say something similar to that. Money, not only talks, money screams, and it's like, on the decibels when money screams at you, it gets your attention. When you come home with all this money, and he has no idea how much it is, it's okay. But just say I've gotten enough to support us for anything we want to do for the rest of our lives. And I anticipate living in you might introduce in that bed beds, it doesn't matter. All of this new technology is going to be coming out. And we don't know when it's going to be a battle. We're at war. So we don't have a lot of really good understanding about everything. But when the the money comes, the war will be over. And we can start doing things in a different sort of way. And I rather suspect that your husband will come to an attention that he's got to pay some attention to you because you're the one who's got the money and if he wants to be part of what's going on and a part of your life and He better get off his little high horse and start believing in things that are true. And, and so there's a screaming and it's, it's gonna be hard for him to live with unless he capitulated The idea, you don't want to change his personality, you don't want to change his his values, you're just adding value to his life by sharing the phones and you'll have opportunities for doing all kinds of different things. Okay, we get our money now a year down the road, is it going to be the same way down the road a year, and he's looking at farms and so forth that he wants to buy and, and start farming again, instead of the rat race of buildings and all that sort of thing. And his his life is going to change. And let me tell you that the circumstances are going to be different. And it will always be that much better. Because we're getting the funds that we need to do things we've never been able to do before. So it'll scream at you and to get your point of attention. And then once it's there, then you work out the details. And you'll find a lot of joy and happiness in that.

T

Tracee 41:04

And you know what else you can do, you can start an LLC, because it only requires one person to form an LLC, and you can put everything in your name, if you're concerned about it. I didn't I formed an LLC that I did 50-50 with me and my husband, because I'm not concerned about it. But if you are that is a way to protect yourself as well.

R

Ron Giles 41:26

Or a trust corporations, we don't know if that will survive, but trash will. So be will be wise and the way you set that up. But new things are coming for us to do it that way. So we're going to have a lot of fun.

T

Tracee Gluhaich 41:46

Next question. Okay, is there any chance that the amounts may be adjusted to fit the new financial picture once inflation has been taken out of everything? How soon can we sign up? And how soon? Can we sign others up? Are you putting together a team? And is that already in place?

R

Ron Giles 42:07

Okay, is there a chance that the amounts may be adjusted to fit new financial picture? Are you talking about things that you pay for by? Yes, to a degree? Once inflation has been taken out of

talking about things that you pay for by: Yes, to a degree! Once inflation has been taken out of everything? Yes, that's going to be a factor. How soon can we sign up? And how soon? Can we sign others up? The answer to that is not known. When is the RV going to take place? When is nisarg going to be implemented? When is this? All of that are things that we have no idea about? Yeah. So we just, we just Okay, now, are you putting together a team? And is that already in place? The answer's no. I'm not already putting together a team for the actual implementation of, of my RSS and CAC and the other programs that I'm going to do? No, I have not put the team together yet. Although there are those individuals that I have shared with it will be a part of it. But as far as forming a team, yet, a cohesive team that can work together, I have not done that. So that's attached here to that question.

T

Tracee 43:34

Regarding the NRELS, there's two questions the additional download to assist beneficiaries to purchase a home will be set off against the monthly installment for the down payment of the loan. If the beneficiary spend the proceeds of the additional download before the due date of the installment which would result in a non payment situation. Have countermeasures been put in place in the RSS platform to avoid this situation?

R

Ron Giles 44:03

I anticipate doing that yes, the reason I do is because you know, as you're as you're taking money out of your account, it may be that we'll set a limit so that the funds are there, stay in the account until that money is accumulated and paid for that month. That's just wise on our part to do that. So it's not like freezing your account but not letting the total amounts be available until that's paid. There'll be some kind of a logarithm of some sort. It'll be part of the part of the accounting situation. But that's an obligation that you have to have. And if you disregard it, and just pretend like it doesn't matter. You're gonna have some problems. So we're going to be sure that there's no problems like that and work out the situation and everybody will know about it. It's not like his prayers gonna be all Well, you got to do this as a second thought, no, it's going to be a previous thought that's going to have a solution so that those kinds of problems don't arise. That's the Alliance's responsibility to create that set of circumstances as they are helping us to. Program Yeah, the blah, blah, society, the RSS programs, and so forth. So Okay. Ready? Next question.

T

Tracee Gluhaich 45:45

In the context of a husband and wife, both would be able to acquire a home simultaneously, for example, a house in the city and another house at the coast during the country for weekends. Is this statement, correct?

R

Ron Giles 45:58

It is correct. And I was thinking about that. The other night as I was going to bed, and I thought to myself, Should we do something about that? And the answer is no. People are gonna have a hard time getting homes. But I say getting homes, there's not that many that will be there'll be snapped up as they come on the market. And those who have set up a business does real

estate people, they may have some problems, because we will find that people are going to they know about the our NRA listing service, then they will possibly be going out and finding homes themselves and bringing it to the brokers associated in that area with the love won society pro the listing service and say buy this house because I'd like to have it. Well, isn't that a good way to do it? I think it is. So the bird dog will have homes will not just be the real estate people. But it will be each individual who wants to buy a home. If you think that you want to spend all your time in buying one house and then turning around and buying a vacation house. That might not be a real good idea. But there's nothing stopping you from doing that. We're looking for everybody to have home ownership, the second home is not as important. And yet, you have to have that available. Because some people may need that or want that. You might have a home here at home where you have your work, and then you come home to your other home. And the weekends are something that are in the summer or the winter. Those are practical things could have solution. However, keep in mind that there's only a finite number of homes going to be available. And we're putting 1000s and 1000s of New Home Buyers into the marketplace. So is there going to be a glutton of homes available? No. We're going to be building as fast as we possibly can. And hoping that we have some technology from the 80s that will help us to accommodate things and make it easier for us to build homes. subdivisions, the whole nine yards, we'll see how that goes. It's going to be interesting to see how this problems are solved. And how do you solve them. You look what the problem is, and find a solution. And we'll find those solutions because they're their problems come with solutions. You get a problem. There's a solution already done that will take care of that. And it's just your responsibility to come into that knowledge and understanding because it's always there. It's always there. Solution is always there. If you're just asking a child be given seeking peace of mind, those are the kinds of things that are promised to us. Oh, there is no problem that doesn't have a solution. Especially now that we have the funds to do it. Really hard statement to make but I do. I do believe that very sincerely. Next, yes, you can buy each other you can buy your own, your own home if that's what you feel you need to do. But you know, your home is the sacred place to raise your children. And if you have a smaller home for vacations, I suppose that's okay, whatever.

T

Tracee Gluhaich 49:54

Next question, the Benefactor creates directors and beneficiaries and Eggs, them account. I'm asking does the beneficiary have to be owners have to make projects to have employees? Or can they be a beneficiary and can work something that they like to work and just will receive their downloads? So, you know, Ron, we are translating this from Russian or another language. So the translation isn't always as clear.

R

Ron Giles 50:31

And let's get that and let me address that because it's, it's a good question. Keep in mind that the beneficiary program has no conditions on the use of the funds. Except you can't spend money on things that are illegal or immoral. Or I don't know what other reasons, the Alliance won't let you do that. So other than that, you are in charge of your own money. You don't have to spend anything on it. With it, you don't have to give it away for certain things or conditions, there's no conditions to Germany. Now, the Benefactor creates a director and the director. The director is not involved in the beneficiary, specifically, when they when a director find somebody that is not part of the RSS program, then they can, in their course of doing their

business, taking registers anybody that they'd like or want to, as part of their program as part of their pay. As a director, it's a very important position. And we want them to be sure that they understand and can do things differently, differently. But they they in the course of what they're wanting to do, and putting up contracts, they can, they can go in and sign up the business owner to an RSS program. How do they do a contract with them if they don't. So they're out there doing that the directors are not going to be involved in beneficiaries beyond that, because the beneficiaries are out spreading the Good News by themselves. So directors not involved in that the Benefactor beneficiaries are going to be the ones that are referring people so that they can qualify for the bonuses. So that's important to understand. Directors are not in charge of beneficiaries, they can sign people up into the beneficiary program, if they come in contact with them, they can do that that's free for them to do. However, they are not involved in the beneficiary, except to the extent that they want to be doing contracts, employment contracts, or business owner contract accounts, or the employees for the smaller business owners. Just a small correction, but it needs to be corrected, because the directors are not going to be the ones involved in the benefit. Once a once a benefactor gives out one ID number to somebody and they sign up, then it has a life of its own from then on, and will just continue and continue and continue. If a benefactor wants to go into another location and start another Yeah, another chain of benefactor or beneficiaries, and that's great that, but they have no real responsibility to do that, because in my opinion, it will go like wildfire, to the point where you're setting up a big organization to get beneficiaries involved. And once they're all involved, then what are you going to do? You need to get the beneficiary program up and running, and then let it have a life of its own and then you go do your own projects, the CAC and all that sort of stuff. That's what I envisioned for benefactors to do. I don't envision them to set up a big organization that's going to bring in all these people because once somebody signed up for who's the next one, you got to find the next one. And then and that's the way it's going to work. It'll work on its own, but you'll have you won't even have to do that. So Okay. Next question, please.

T

Tracee 54:51

Okay, this is the last one. If a small business wants to sign up for an employer contract, but there is no community as Assistance Center near them, will there be a way that they can contact LWS for assistance?

R

Ron Giles 55:09

Okay, if a small business wants to sign up for the employer contract the question I would have is, how would they know about that? How would they even know that that's available? And if they learned about it from somebody, then somebody's can help them become to have a contract. LWS will not be involved in in bird dogging and finding people or director for people to sign up with no, we can't do that. We won't be involved in that at all. There's no vehicle to do it.

T

Tracee Gluhaich 55:50

Yeah, and how would they even know? Okay, let's let's expand upon this, what if they have an RSS account, because somebody from California went to Timbuktu and sign them up for an RSS account, and maybe that person found out about the employment contracts, then what?

R

Ron Giles 56:12

Then they need to seek out and find that person who had the costume, the director that's involved in that contract? Okay, the director has his own little area of focus. But that person can go and do benefactor business owner accounts, wherever they want to sign up. And they're not going to get the support, you know, like a local CAC would support them. But that may be the beginning of a new CAC program in that area and finding a new director, and so on and so forth. So it's, it will naturally grow by solving problems, and we'll get to the people, nobody's going to be left out for a very long time. It's just a matter of it's getting to the people that want to become involved. But Law Society will not be doing anything like that. That's not our business. We're a structure. Okay. Thank you, Tracy, for all of your input and your comments. So we're very apropos. And I appreciate them very much. Your work? I love the feminine aspect. It's good.

T

Tracee Gluhaich 57:32

Is there a form or questions we need to answer about our project prior to our appointment?

R

Ron Giles 57:38

No, the form is just bullet points in your presentation. Somebody asked me what are the bullet points? Well, they're just small little indications of something that could jog your memory so that you don't have so that you can start speaking about it and, and having everything available in just a short form. So you can read, but that's what the bullet points are. But yes, prior to project, that's what you want to your presentation how you want to present station is something that you need to do before the appointment.

T

Tracee Gluhaich 58:14

Next question, and I am going to resend out the appointment prep video today with the new RSS edited document. So I will make sure everybody gets that. And I'll say to re review that. Okay. Do all of them benefactors get contracted persons as juniors and have them as humanitarians to cover the Benefactor signing up of others while away.

R

Ron Giles 58:46

Okay, so what you're asking is do you delegate your responsibilities as a benefactor to other people. And while you go on vacation or something, and I'm not sure, if you are setting up the CAC, then you've delegated the responsibilities to your directors to be able to get into the RSS platform and set up employment contracts. So in effect, you're already doing that. And if you did that, and want to take a little couple of weeks off, then you know, don't be an absent benefactor. Be available for even in your vacations time be be available for people to contact you. That's the way I would think could be best way to to do it. Or have somebody that said you have delegated responsibilities or one of your directors to take over that position and be wise in doing that. But the idea of you being responsible, leaving your responsibilities to others going

away for a little while. I have some problems with that in my own mind. But yeah, the practicalities are that you are going to do that. So just make up what's necessary to some action plan so that the things that you need to make decisions on can be made by other people that you have delegated that responsibility to. Next question.

T Tracee 1:00:24

Okay, this is an interesting question. Upon starting out and hearing about the qf s, I was convinced that they have all the banking details of the world 213 countries on huge computers, which all will be triggered by the code put in by Mr. C, after the blackout, which is after the EBS, and then firstly, the Queen's death announcement. Zim benefactor won't have as many dollars personally compared to being a beneficiary. That's a question. Well, there's two questions.

R Ron Giles 1:01:02

But I'm gonna have to have you ask that again, who's Mr. C? Oh,

T Tracee 1:01:08

he is on those Mark Z things sometimes? I don't really know. But I think that's our car, not our V.

R Ron Giles 1:01:18

There's a structure, Michael.

T Tracee 1:01:23

Trial. It's Michael.

R Ron Giles 1:01:27

Okay, now, I don't know what Michael Catrail is doing. I understand that he's not a bad person. They don't. And he's well I listened to him from time to time or have done in the past, is his is pretty spot on. Mark Z, on the other hand, is, is a little different. But what you're getting here is into somebody else's business. And the way that they're setting themselves up to do business love won society is entirely different. Now there isn't one person and I'll say this with authority, there isn't one person out there that knows as much about the quantum financial system than I do. And because of that, I do not trust anybody else, to come up with the right answers. So when you're, I was convinced that they have banking details of the world. The Quantum financial system that is embedded in the quantum consciousness has moved into every bank, and every account in every bank. And they have given a digital footprint for every dollar that's in those accounts. This has been going on for years. So when the bad guys transfer money from one bank account to another, to another, to another to another, the quantum consciousness is

totally aware of where those funds came from and where they are presently. The normal person, the normal banker, the normal people have no clue about that. If they do have a clue, then they have been given that information from the Alliance. That's my understand that would not understand that would be my thinking that they have that information. They'll get it from the Alliance, who will be in charge. It's just like the bank employee, the Vice President of Wells Fargo, been in training for the financial service centers for the last six months. The financial service centers, nobody talks about that. Because nobody really knows about it. Unless they're under an NDA, or unless in this case, it's a personal friend that said something. So when you talk about these other people and what they're doing, I don't know that they have any idea of what the quantum financial system is Bicocca trail head can have his whole program does not mean that he knows about the quantum financial system. And that's why I say I'm not trying to be the one that know it all. I don't care to be the no I wish somebody else knew about the quantum financial system. So that I was not the only one out there in the dark, telling everybody what's been going on or what's going on with QFS. One guy came real close. And then he started talking about the CIP the transfer system for the qf s, that is not true. It's an account to account within the financial system. And there's no banks involved in the financial system. So when you start talking about triggered by code put in by Mr. Cadell, after the blackout, which is after the EBS, and finally, the Queen's death announcement and Zim ban factor won't have any, as many dollar personally compared to being a beneficiary. That is totally, totally inaccurate, totally inaccurate. And when you come to me with these questions, I send you back to Michael Cottrell, I send you back to to somebody else who you believe in because you're not believing in our stock. Because if you did, you wouldn't come and ask this kind of a question. We're way beyond this kind of thing. Their redemption appointment, there isn't one person out there that even perhaps even knows these gurus and so forth, about the fact that the redemption appointment will be a personal thing with you and the Alliance, they will contact you. And you will have an alliance agent who is going to be your counselor, you will never hear that from anybody else. Unless you're copying my stuff. So I'm gonna let this go for now. But I don't like people coming in to love won society and talking about other people's way of doing things and then asking questions about it. Because that's totally inappropriate. Our people know what's going on. And this is just confusing. And so I wish people wouldn't do that bringing in other people's ideas, and then asking questions about it. And having me comment, as if they are part of love won society, and I should know everything that's going on with him. I know what we're doing. I don't have a clue what those people are doing. And I don't care. Michael Cottrell might be a good person. But the point is, is that he's not love won society. He's not quantum financial services, quantum financial service. So you'll have to go and talk to those people for those kinds of answers to those kinds of questions. Next question.

**T** Tracee Gluhaich 1:07:48

Okay, here we go. A contract, can they be short and long term and then expire?

**R** Ron Giles 1:07:53

Can you come back to the page? Oh, there you go.

**T** Tracee Gluhaich 1:07:58

Do you see where I'm at a contract right here?

R

Ron Giles 1:08:00

Yes, yes. Thank you.

T

Tracee Gluhaich 1:08:03

Contract, can they be short and long term and then expire? Is there plenty of bookkeeping that needs to be recorded in a three ring binder to be provided to the alliance? My projects are extra delivery buildings for church seniors to get new staff to help people with drugs, learning skills, say no to drugs for all major cities across Australia. Answers are available to these now signing a contract to be as in benefactor is a serious commitment. Plus, do we do it full time?

R

Ron Giles 1:08:42

I'm not really sure what your question is. You're combining some projects that you would use the money for? And I don't comment on those things. I think that's probably a really good idea. That's my comment. But I don't really get involved in other people's projects. Because that's, in my opinion, it's a sacred thing between you and father in heaven as far as what your humanitarian activities are going to be. Now when you talk can have short Yeah, the context of the short, they can be long they can be whatever you want to do. And can they expire? And, you know, we've, we've thought these things through I just hope you use this as a pattern for what, what takes place? Because it's been thought through extensively for the last four or five years. Do I know everything? No, about a contract? No. Do I know how it's going to happen? We'll have the people who do those things for live. engaged in that process of creating the contracts But yes, the the signing of the contract presumed benefactor is a serious commitment. We do it full time. Yeah. If the Alliance knows that you're not going to do this full time, do you think you're gonna get the full bundle of money? Knowing that you've got it for the next 100 years? And you're not even going to use it? And there's your there's your scenario. If you're not going to be full time, then really, what do you do the rest of the time? If you're not a full time humanitarian? What is it that you're doing the rest of the time? Are you fishing on things? Or you're trying to put it in a pigeon hole where pigeons go and you deal with it? In some other way? I don't I'm not sure how to answer that question.

T

Tracee Gluhaich 1:10:52

I add to that, full time is going to be changing, you know, in Silicon Valley full time is like 60 hours a week. But full time is going to be changing so that you have an life in addition to your work. But once you get on a roll, I mean, with, you know, giving away money to people essentially, like why would you not want to do that. That sounds like fun, you know, so you play and work at the same time.

R

Ron Giles 1:11:22

That's true. If you go on a vacation, take a loan, your cards your your how the cards are used to

register people, stop passing them out. And put somebody else's name down. If you don't want to have their name and their ID number. Maybe you can help somebody else out to build up their business. Because we benefactors if you're not getting sufficient amount of. If you're not getting 1.25 quintillion, then I say that you're haven't. You're leaving money on the table. That could be your way I think. Next question,

**T** Tracee Gluhaich 1:12:08

do the med beds increase one's longevity for living? That's what we hear.

**R** Ron Giles 1:12:18

That's what we hear

**T** Tracee Gluhaich 1:12:20

that's good. I need to take 20 years off. Okay. Okay. Should I just ask, should I just ask and stay on a \$1 million per the startup rate and believe that as the highest rate?

**R** Ron Giles 1:12:42

Well, while you're giving your power to me to answer that question, and I'm saying, whatever is in your heart. When you say startup, you got your jam, let's let's you prepared your your three ring binder, and you've your presentation and you go in and this is what I have. And this is the rate that I'm going to ask. Well, that's if you're calling that a startup ring. Because that will not change over the entirety of the term that you have asked for, for the structured pay out money to come to you. It will it will be there for 100 years. So you're gonna get the all of it in the beginning. In the beginning, is when you set it all up so that it will last for 100 years, at the terms and the conditions that you want. Go through the structured payout, go through the other documentation about your your plans and the way that you want it to work out, go through those and become very, very familiar with that. And people say, Well, I've just done that. And then that will let me ask you some questions about oh, I didn't think about that. These are the kinds of this is a time when you think about things like that. That's what the preparation means. And go to your heart and your heart will help you to find those right answers. How do you go to your heart? Will you ask first of all, I'd like to come from my heart, activate and talk to your heart activate please. I need some help from you. You have the ability to tune into the quantum field of understanding and I don't so I need you to help me with this looking down the road because my mind cannot look down the route and I need you to help me I need this because this is part of my life. And if you ask and it well I'm not I'm not worthy. Some people can come from their hearts but I can't. That cancels out your heart out of the equation. So you got to be believing. You have to doubt not fear not, but be believing in all things shall work out for your best good. That is what you need to learn to live by. Your heart will do it. It's just a matter of you being able to put your mind at ease so that your heart can take place. Because your heart will come up with something and your mind unless you pre work unless you help that out to understand these things, your mind will cancel it out. Your mind has no concept of a trillion dollars yet alone. quintillion. Let me say that again. Your mind has no idea how to

comprehend a quintillion dollars a year to get five those little bellies for in one year. That's just a one Zim one 100 keynote. Imagine if you have more. Your mind cannot conceive this at the present time. So you've got to bypass your mind, use your heart to see down the road. This is what I'm going to be needing down the road. And this is what I'm going to ask for. And when you come to that conclusion, the only other questions you're going to have, I think you may have is this enough? And let your mind go over there and eat grass for a while while you consider what your heart is trying to ask you to do. Because it's it's up to you. This is this is going to last for the next 100 years. So be sure that you get it right. How's that for pressure? 100 1 billion per zoom startup. I think it's wonderful. Thank you for being willing to go that way. Next question, please.

T

Tracee 1:16:54

Last question. I am from Macedonia, a small country, I would like to ask you because I like to be a benefactor and I am interested in the rejection appointment. Does the redemption appointment will be called humanitarians from small and undeveloped countries first, or from big and developed countries first?

R

Ron Giles 1:17:20

There's no large country humanitarians and small countries, humanitarians, humanitarian is a humanitarian, and you live in Macedonia, does not does God not have things for you to do in Macedonia? If you're a humanitarian, the prize possession of God, who are the front of the head of the spear going to get the money. If you're that type of person, you take second place to no one in any location in the world. The Alliance doesn't give anybody else any priorities over you. You are the priority in your life, you will be fully engaged as if you're the only humanitarian on the earth. Nothing will be held withheld from you. And nothing is given to other people that would not be available for you to different calling, yes. But you need to understand how wonderful and how perfect you are, as a humanitarian, as a human who is becoming a humanitarian, to do the work of the Father, and bringing forth the golden age of mankind. That's how important you are. They're not just going to leave your site. They're gonna send you a, an angel, they're going to send you a counselor, from the throne of God, whatever you want to say it however you want to say it, say it in your own way. That's how important you are. And I'd really like to make that emphasize, though, just because you're from Macedonia, you are not a second rate humanitarian, by any means. Don't put a cloud over yourself. I think you're you're not as good as somebody else because you are and you will be treated equally. Okay, cut up, cut. That's gonna be a wrap for today. And thank you, Tracee, for as usual for all of your input and your valuable comments. I appreciate them. And everybody, thank you for your questions. And we're getting through this all together then love and appreciation for all of you and what you're responding to is the call from your father and that's what we're engaged in the work of God so thank you for your time and your patience today we'll call it a wrap
