

# Q and A - March 7th

Wed, 4/6 7:03PM 1:03:30

## SUMMARY KEYWORDS

question, people, money, beneficiary, set, cabal, banks, alliance, quantum, humanitarian, directors, child, financial system, rss, zim, trust, benefactors, appointment, person, care

## SPEAKERS

Ron Giles, Tracee

---

**R** Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with the lovely Tracee and we're going to do a q&a today. Today is March 7 2022. So that let's go ahead and start.

**T** Tracee 00:16

Okay, number one. My question has to do with the employment contracts, have you given thought to the possibility of workers having to work overtime, and how we might compensate them? I would also like to send you and the team much love and gratitude. Thank you.

**R** Ron Giles 00:32

It's kind of Yeah. I haven't given much thought overtime. Overtime is something that the boss can work out with them. But as far as bonuses and things of this nature, they get \$100. Well, another penny per after three months or something like this, then that's part of their contract. And I don't know if it's Overtime. If they're paid by the hour, well, they're not getting paid by the hour, they're getting paid by the contract. So I'm not sure that it's appropriate. But it's something that can be addressed at a later time when we want to make some changes. So we'll put that on the backburner and see what what comes up that a contract is a contract and it's not. Did you know you might put you might only put in 20 hours a week? I don't know. It's up to the boss. But over time, haven't thought about that? No. Next question.

**T** Tracee 01:37

On wealth series number three, at 639. You have two slides that speak about the opportunity to gain more wealth by utilizing our beneficiary account to get the bonuses by enrolling others. But we do not have a beneficiary account. We are benefactors, you have said in another q&a, that we have enough money and suggested that we give our directors this opportunity to gain

this extra wealth as they promote the program and sign up beneficiaries. I misunderstand you, do we? Or do we have a beneficiary count? Come to think about it. This might be a way to secure our autonomy as benefactors.

R

Ron Giles 02:15

The beneficiary count is for other people not? I mean, you're paying yourself. So how do you want to pay yourself? If you want to put set up a beneficiary account, I'm not sure that that's the best way to do it, I would just assume, like I'm going to do that you will do a benefactor account. And you can set one of those up for whomever you want or for whatever you want. And that's an easier way for for you to be paying yourself. And that's up to you, though, that a benefactor does not normally would not normally have a beneficiary account. You're the one that's giving the money out. Why would you want to do it that way? And yes, as far as directors are concerned, I think that the directors is part of their job is to be able to sign people up as a as them being a beneficiary as well as a contract, but letting them have the extra beneficiary bonuses for their own personal beneficiary account, they get paid twice, and that's no problem for us. We want our directors to be paid a lot of money. They're gonna do a lot of work. So let them enjoy that little perk for themselves. Next question.

T

Tracee 03:35

And also the well series is directed for the beneficiaries, not the benefactors, you guys just have the opportunity to watch with the benefit what the beneficiary trainings going to look like. That's true. Okay, I was wondering if the eighth module for the wealth management training is available yet?

R

Ron Giles 03:55

No, it's not. Or we're still working on that there's some things that need to be revealed before we can set that in motion. Excellent question.

T

Tracee 04:10

I've intentionally purchased a handful of the higher values in bonds to ensure the funding for humanity is available continuously for as long as it takes. I plan to be around for a few 100 years to see my storage ship through. Will the Alliance take the nature of my stewardship into consideration? Or will I need to make some major tweaks to the plans?

R

Ron Giles 04:34

Your counselor the the agent from the alliance is on your side you counsel with them to and they they have a feel for what you're trying to accomplish? If you have a lot of large a lot are some large face value, Zim bonds, made sure that you don't say oh, I've got all these large ones. I'm not gonna ask for the higher rates. Just ask for the right rate for the amount of them that you have come from your heart and, and that will get you the funds that you need. And

that's from your side of the equation, the agent, angelic agent, whatever you want to call them would have a different point of view, perhaps, maybe around the same sheet of music, maybe they'll have a little different point of view. And, and so you counsel with them. And you come up to a conclusion that would be the best one for both of you for what they see in your future and for what you want to get accomplished. And you saying 200 years? Well, 200 years is, is good? If indeed, we we are using money that long? I don't know. Those are the kinds of things that there's a lot of speculation out, are we really going to not need money in the future. I don't know. And neither does anybody else. If they say they do, then I'd like to check out where they're getting their information from. Because I don't get that we're going to be not needing money in the future, or setting up a whole quantum financial system for the galaxy as well as the Earth. And it might extend on into the universe, we don't know, we just simply don't know that I've been told at least the galaxy, they're going to all of the efforts to do that, then there's something different than then the people who are on the earth have any clue about so if they're not getting the information from the Alliance, I would suggest that they just not talk about not needing money in the future, and plan on it needing being needed. And we'll be getting that the structured payout will last for as long as you want. And, and those funds are put in your account now for the full amount of time that you want it. So counsel with your people, your with your agent, and come to the right conclusion, and everything will be just working out great for you. Next question.

T

Tracee 07:14

What is the difference between a med bed and a celestial chamber? And are you able to give any more info on the possible cosmic flash that may upgrade us automatically.

R

Ron Giles 07:27

You've got all the information that I have the difference between a med bed in the celestial chambers. Mr. Rand has used Jared has used the word celestial chambers for his project, and others are using med beds. But I don't know, I really don't. And I'd like to see something like Jarrods workout. But then if there's something else afoot, let's go for the flash. I don't know, if we're going to it's going to happen somehow for us to renew our bodies to deliver 1000s of years, 1000 years or more. So it's going to happen. So just get used to it. Let it happen as it's supposed to and, and don't fret about it or don't even overly concern yourself. Yeah, if you're focusing on that, then you're recreating things that are existing right now. And that's not really what you want to do. The things you focus on the things you manifest. So manifest a very healthy body one way or the other, and just allow that to be true in your life and let it let it work itself out. Have faith in it. That's the only thing I can do. So appreciate the the question. But we've got pretty much all that we're going to get until things start happening along the that sort of med bed sort of healing our body. There may be other modalities until things happen. Two or three or four years from now, we just don't know. We'll just let it happen as it should. Next question.

T

Tracee 09:15

Do you have any association with Doug Giles?

R

Ron Giles 09:19

Doug Giles?

T

Tracee 09:20

Yeah, that's my man. Sorry. Okay, now a person named Doug. Yeah, your last name?

R

Ron Giles 09:30

I don't.

T

Tracee 09:32

Okay. A while back, I asked for your definition. A while back, ask for your definition of humanitarian. You said that you would address this later. I have seen the definition in the glossary on your website. Would you give a more comprehensive definition?

R

Ron Giles 09:47

Well, I'll give you a definition of some other things that I have heard that do not apply to my use of the term humanitarian. One dictionary saw said that a humanitarian is a purpose who a person who denies the divinity of Christ. And calcium is just a person. Well, that's not my definition. There's other definitions that others have used that are worse than that. So that's why I have the argument and I'll call it an argument if you want to call it a discussion, call it a, a setting up, what we're what I'm doing as a humanitarian. And and then you apply your own definition to it the way that you apply that definition. If you think it's a bad word, then you're bringing forth bad stuff. And if that's what you're trying to create, then I welcome you to that, and to the consequences that will come as a result of that. So a word to the wise should be sufficient. You're you're you're making a definition that is negative of something that's very positive. And that's not acting in harmony with the Alliance. Period, the alliance has said, if you're not a humanitarian, you're not going to get the money. Okay, well, how, what definition are they using the good one or the bad one? We are in harmony with the Alliance. And that's why I gave the definition and why I'm making a big to do about those who think that this, the word humanitarian is bad. I hope we can get this behind us and not worry about it anymore. Next question.

T

Tracee 11:47

A condition in which an individual's life savings has been recognized or secured during the transfer to Massara. Number two, the situation in which an individual receives financial assistance, or recompense as seen fit these definitions would help to clarify my understanding surrounding questions where people are trying to determine where they stand financially, you know, the oxygen mask on yourself before trying to help others scenario?

R

Ron Giles 12:16

it's hard to it's hard to know what the question you're asking you set up your preparations to get the larger amounts of money. I'm not sure what you're saying, as far as you're receiving money is concerned? Yes, you do have to take care of yourself first. And I think that is why for people that some are saying, I'm going to take a couple of weeks off, and I'm going to enjoy myself. Well, I think that that's a wise thing to do. As far as love won society is concerned. When the money comes, that's when I punch in the clock I'm on I'm on call, I'm on duty. And we'll get that love won society, the RSS program up and running. So people can do what they'd like to do. But I have my task at hand once we get some money. So that's where I need to be spending my time. But that's what you're talking about. You need to gain the abundance mentality yourself. And to do that, you need to be sure that you're getting your cup full, even overflowing, and then you'll have plenty to share. And you'll see that there is plenty to share. And if you have a sip out of that cup yourself, you're not taking away from other people because it's overflowing was plenty for everybody. Next question.

T

Tracee 13:42

I have Zim and plan on asking for the high amount that I don't have 400 trillion. Will I be okay with two as I can purchase more? When I was looking back through the RSS nodes? Did I read that even beneficiaries can have trust accounts? Also, I know only God knows. But do you feel we are very close? I haven't feeling possibly this month?

R

Ron Giles 14:07

Well, there's so sort of saying this month, there's those who are not in the know that are also saying things this month. Of course, they said things last month and the month before that, and the month before that. So the Alliance doesn't give us much to go by when the wars ended. Let's take a look at that and see when it's time for us to have our money. There's a lot of things that are going on the Ukraine situation that's got to be completed so that the Ukrainian government is instead of cabal just or Kazarian mobster government that needs to be changed. Taiwan is the same way. She is working for the Alliance and and the Taiwanese government is is cabal oriented. And then the last One would be Israel, from my understanding. And it may be that the United States can take care of Israel, I don't know. But those are three potential things right there, though, are going to take take some time, they'll done by the end of March, then I think that's a good thing. It's, but I think it's pretty aggressive, and may not happen the way that it needs to happen for it to get done by the end of this month. We have to be safe and secure in ourselves and in our money in order for the quantum financial system to be up and running. Now, I've heard some, some talk that was supposed to happen this month, or this weekend, and that the the quantum financial system is up and the banks are already connected to it. And if they bank stock, you know, they go rogue, and they're not going to be a part of it. Well, brothers and sisters, ladies and gentlemen, the bank have no way of making money. How long do you think they're going to last? What is their way of making money? They can't do the bank trading anymore. They can't charge interest. They can't charge fees. They have a horrendous overhead. The the biggest buildings in those cities are the bank buildings. And they got a tremendous amount of labor costs and things of this nature that they have to pay their people. Now, it's just economics. How are you going to do that? Don't be telling me

that the banks are going to be part of the program. The banks are going out of business, they will be repurposed and become financial service centers. So those people who tell me about banks, and even the the cross border, interbank payment system CIPS which the brits countries company or countries have created for their transfer system. There's people are saying that that's part of the quantum financial system. And I say, you don't know what the hell you're talking about. CIPS is a cross border, interbank payment system, that means bundles through that they know everything that's going on, as far as everybody's financial activities are concerned you, you differentiate that with the quantum financial system was safe and secure, and nobody knows anything about your, your stuff. And in the quantum financial system, it's a bank to or account to account transfer system, you initiate the transfer, and the person on the other side gets the funds, there's no third person involved. There is no bank involved. If you want to have use a bank in the transition, because you've got your bank cell set up with automatic payments, and that sort of thing will use the bank's put some money in the bank and, and take care of your needs. It's all for your convenience. But it's certainly not the place to be putting your money. And you'll find that out really, really quick. And those people who dream about the banks being part of the quantum financial system, it's an it's a real, it's not they think it might be a real nice dream. But it would be a nightmare for them to be a part of it. Because they can't function. They have no way of knowing what to do. The financial services centers, that's where the banks are going to end up all of the credit unions and all of the bank branches and everything will be financial service centers. Paying paid for by benefactors, or people like that, who have the larger amounts of money. At can you understand why I'm saying you need larger amounts of money. We got a lot of work to do. And it isn't just feeding the hungry and clothing the naked and finding a home for people. We've got a whole financial system to change. We've got a whole economy to change. If you can think you can get that for 100 Excuse me, 100 trillion T note at \$11 million. I say good luck to you. You can go over there and drink with the other guys. You can go over there and drink mythical ball and have lunch with them all day. But it's not the work is not going to get done for that kind of money. For the same that we have. Our job is bigger and better than anything that anybody could could could imagine. That's why I have been pestering People with getting the higher rate. Because I have, I don't really know what's coming, I just sense that something is coming beyond our ability to understand now that's going to require the larger amounts of funds. And if you don't have it, then that you then you as a humanitarian have failed in your job, That's putting it mildly, you haven't prepared, you haven't gone into your heart to find out the rates, you got a lot of things that you need to take care of. So if you take yourself into with the Alliance, and do it the Alliance way, you're going to be really good. If you don't go on your own, that's okay. You're on your own. And there's consequences for that. Tighten up your ship. And don't be silly about some of these people are saying, Well, looks like it's gonna happen this weekend. And they're talking about the banks all set up with a quantum financial system. And they're going to be punished if they don't, it's just garbage, just so much garbage, because they have no idea what's coming. So I'll say that now. And we'll move on to the next question.

T

Tracee 21:23

Ron, would you please give an example of the best way to set up a church under the RSS for the church and the pastor received the most benefits. This has been covered in past Q and A's. But there are a lot of new people in the chat that are asking similar questions. I had a private chat with a member that was confused and then realized, the way her church was set up, she wasn't distinguishing between the church and the pastor, she was encouraging them as the same. The pastor had probably founded her church, I explained how she could set up the

church in current laws, which might change religious charity at the top and have the pastor signed up under the church, I believe it would be beneficial for you to make a suggestion again on how you would go in and set up a church under the RSS for maximum benefit to all parties.

R

Ron Giles 22:11

Well, I can do that. And the way that I'd like to set it up is the way that I'll say it, let's say a beneficiary, and it could be either me or a director or somebody else goes into a pastor, and say, This is our revenue sharing solutions program. I'm suggesting that you sign up and you as an individual, and that way your pay your, you're going to get paid. And then you set up the church underneath you, and then have all of the congregation in the church sign up under the church, the church's ID number, and then the church doesn't have to pass the hat anymore. There's no collections, because they've got a tremendous could potentially have a tremendous amount of money to do all kinds of humanitarian activities that they want to do as a church as an organization. But you've already you're already getting the the pastor paid. So you're going to be in really good shape. And the pastor will have the overrides on the second and third generations. So the pastor's are in a real good position, you don't have to worry about paying him anymore. You know, obviously allows the pastor then you have other activities that you can do. But this is the best way to set it up. As far as I'm concerned. You might have a board of directors that are in charge of the church, and then the pastor gets hired by them and all of that structures. That's why it goes three levels deep. So you could have the pastor, or the Board of Directors, the pastor and in the church congregation do that. And and then they that takes care of the generational bonuses, and but to somehow wipe out the guy that introduced it to you. So you want to be sure you don't wipe out the guy and loose incentive for moving into other locations. So set it up in a way that will benefit everybody. So that's but that's the way that I look at it. Some problems with that could arise. Yes, there could be. But you do things that solve problems don't create problems. So that's the best way to do it. Because I can think next question.

T

Tracee 24:32

As I'm looking at different locations for the CAC What are your thoughts, city centers or possibly in places just on the edge of town?

R

Ron Giles 24:46

Well, I think it's a community and a commodity is whatever you want to determine it to be but I think it as is geographical, oftentimes in suburban where there's smaller towns associated with the larger Urban Development's and things that are going on there. It each individual benefactor would set it up in a different way that they want to, they can go into a town and say I'd like to, to do the CAC here, and it's a, maybe a 30 or 40,000 people, and there might be some smaller geographical areas that you can set up for each individual CAC program and then one for the whole city, and then maybe one for the county, and, and so on and so forth. It, it's not going to be a real easy thing to do and tell you sitting there looking at it and say, How's the best solution for this city? What is? Is it large? Is it small? Is a geographic? How many do I need? Can I have one CAC and a city and have a whole bunch of different system directors to, to carry out all of the different responsibilities that we're putting on their directors to do? Or do

you want to have a number of directors, with fewer assistant directors and cover individual areas, it is only it's going to be up to the way that you want to develop it, it's available for you to use the structure so that it can be best suited for everything you get out in a rural community. And, and that that's a bigger community, travel wise. And so one or two directors, maybe three, I don't know, too, but you're not going to have the same problems as you do on an inner city. So it's going to be different rural is might be farming. So your directors might need to be somebody that can organize farmers into ways of communicating that some people have a better way of repairing the soil than others. All of these things are available for us as directors to to help. But don't think that the farmers don't know what they're doing. Because they do. And they have really good ideas. And if they have money, they can implement those ideas. And that's what the the CAC and the communities in the farming communities can do as well. So there's, there's a lot of discussion about that. But you cannot, it's not one size fits all. Because you have too many different, you have very large cities, 8 million people in in New York, or however many in Los Angeles. And those, they're very large. So how are you going to set it up for the whole city. Maybe there's 20, or 30. Gym benefactors that can be setting up their CAC programs in that area. Especially not to step over each other. But if you do, it doesn't matter. Give it a lot of thought and then go where you want to go. And right in front of the view is the first step could be on the edge of town, it could be in the center of town, find a place that works. I like the central location rather than in outside of the town. But then the outside of the town, you can turn it into a rec center and have your Community Assistance Centers and your financial services centers, co located in the same building, or in the same area. There's a lot of different ways that things are gonna happen. And be flexible and inventive. And use your own imagination and the best way that you feel the seller, spirit will help you and as well as your agent, Alliance agent that will counsel with you and coordinate he whatever it is can coordinate with others and and make the thing work. And then getting the job done this what we're trying to accomplish. Next question.

T

Tracee 29:10

And I go to the meeting without my wife and still get her on the account.

R

Ron Giles 29:16

When you say the account would mean the account. I don't understand that. When you say get her on the account. It all depends on the relationship with your wife. If you're the boss, and need to continue to be the boss, then you have her and boss her around and have her do the things you wanted to do. Or you could be equal with it. And the best way to be equal is to let her have her Zim you have yours and you each go into the appointment. And now you have two Alliance agents that you can communicate with instead of just one for the two of you. Set it up in the best way possible. I really don't like the idea of two people going together, because who gets to be the boss, it's usually the more powerful one, or the one who has more assertive in their nature, but you're going to have to work with that person for a long, long period of time, you want to be under somebody's thumb. And they may not know what they're doing, and may not have any greater affinity towards humanitarian work than you do. So if you get your own funds, and you've got, you can be autonomous. And you can work together on an equal basis. Nobody's in charge of the other, you come together as equal partners. And you work on unanimous decision, you don't do anything unless it's unanimous, or you don't work together. So, spirit will help you to get together and unanimously. And if you strive for that, and that's the

best way to be. Don't move until you both feel comfortable with it. That way, not one person has been overcharging or overdoing or over stressing or being the boss. I don't like the idea of a boss. I like people as he humanitarians to be sovereign, each one is a sovereign unto themselves, with their own stewardship responsibility for the funds. You know, reason with me on this? Can, can you find fault with that kind of thought process? If you can, I haven't heard of it. But so that's what I feel. And that's what I talk about, as the better way to go. And then again, everybody works out what they want to do their stewardship. Next question.

T

Tracee 32:01

you casually mentioned that you are collecting personal information for the IRS is an unlawful cabal corporation. So why are you in bed with them? Are you a US citizen? If so, why don't you sign up with an american journal assembly and get untangled from the Cabal? .

R

Ron Giles 32:25

You think I'm collecting information for the IRS? You know, I say round the corner enough your block and just down the end of that block is hell just go to hell. I don't. And that's not me. It's never been me. I will never be a part of that kind of stuff. Whoever told you that. You need to go back and listen to what I say. Because I've never said anything that I'm getting the information for the IRS or imply that that I was giving that kind of stuff. make that very clear. I'm not interested in getting out of entanglement with a cabal. They say I'm under contract with them. I'm not under contract with any cabal or anybody else. without my consent, broad Vitiare a contract, period, exclamation point. The cabal is total fraud and everything they've been doing with us is fraud. And any contract that they think they have over us is fraud and that contract is null and void in the beginning. If you don't think I'm really exercised about this, then I'll say that all again. I don't think it's appropriate for you to be spending time getting out from underneath the Cabal when the system is already in place than the Saara where the cabal is being taken care of. And you're not going to have contracts with a cabal that move into any other place than dropping off right there at the end of the Cabal. They're gone. We're not how, what have you done to get rid of the Cabal? And then the Cabal goes away anyway. And you fretted about this and become a postmaster general and all this sort of stuff. Well, go ahead and do it. If that's your that turned your turning signals on? I don't I don't care that all that stuff. I've gone through it. I have gone through that before. It's a dead end. I have one of my best friends that ended up in jail doing all that crap. That was Anna bond, right stuff. Is she part of the Alliance? She part of the light can't see it. Can't see anybody getting involved with that as part of the light to get to where we're at Going NESARA does that the alliance has already taken care of it? Why do we have to reinvent a wheel that's not even going to be used in the future? We've got everything we need just tucked in right with the Alliance. Let's just let that manifest. And we don't have to get involved in that. Yeah, I wonder if this person has a good feeling about me? Because that just really hurt.

T

Tracee 35:31

I think they've got to be confused.

R

Ron Giles 35:35

Oh, yeah. Maybe they're hoping to get them confused, because that's not going to work.

T

Tracee 35:41

Okay, next question. A suggestion from more than one chat participant is to put something like revised 030420 on the bottom of the tech manual portions that are updated on your website, would you please consider that it would probably be helpful going forward, when changes come about after the system is active too.

R

Ron Giles 36:07

So explain to me, Tracee, they're, they're wanting to put the date on the bottom of the tech manuals as a date that it's effective.

T

Tracee 36:15

Now that it's revised. So you know how just the other day we revised the RSS. They want us to add that it was revised on such and such date, so that they got a reasonable request

R

Ron Giles 36:27

That's a reasonable request, we can do that.

T

Tracee 36:32

Okay, I will do it. All right. Next question. Let's say beneficiary, you're welcome. Let's say a beneficiary has one of the six trust set up for little Sally, she's seven years old and 11 years, her trust would have built up to approximately \$550,000. The beneficiary only uses about 50,000 in her 11 years before she turns 18 to Sally, get the 500,000 swap into her account, and then begin her own RSS. Let's answer one of these at a time. So there's three different questions. Okay, so the first one is the Sally now that she's 18, get the 500,000?

R

Ron Giles 37:14

How do you set it up as a parent? That's the question. If you set it up that way, then that's fine. You set up a trust, and say this is for my minor child. I've always said it's for growing up expenses. You don't have to just, this is hers. And this is whatever. If you want to put money away for your minor child, for when they get older, and they'll have a lot of money, then that's a really good idea. I have no problem with that either. But the parent is the one that's in charge. All I'm saying is just at 18 years of age, that child is can sign up for her own beneficiary, she can set up her her own or his own trust accounts, six trust accounts for any reason they want. But the trust that the parent sets up will continue on way past the child's 18th birthday.

Got another 80 years for 100 years. So the point that I'm trying to say is, you as the parent, are getting this extra income for whatever you want to use it for. Set up your trust, be wise in setting it up so that you can have the flexibility that you need as a parent, it might be that you raise a real wrong kid. You don't want to give them anything. Where's there? Is there an obligation to do that? I don't think there is. I think that there's a way of raising children that will be beneficial. But one of the biggest problems is that they don't have the parents don't have money for band music instruments or band dress or cheerleading uniforms or, or donations for the football team to have the the latest up to date equipment so that they don't hurt themselves so much. There's all kinds of growing up expenses, what about teeth, straightening teeth and that sort of thing. That's always an expense. And there's all kinds of different expenses that can be involved. Camps shouldn't send them off to camps or go to camps or, or go to if they are interested in learning how to ski they can, they can go to a ski place and learn how to do downhill. All of those things were available to the parent that has set up the Trust for a child. And it's designed for the child's use when they're growing up that when they're growing up. They'll get their own. Oh, that's kind of my philosophy. And the way that it's set up it's very flexible. But saying I'd set up a trust for a child. And I can't, I can't use the money for anything else. I'm not sure that that's not the reason for the trust being set up that way. Again, I, that's just me and everybody gets to do what they want to do. That's, that's the sovereignty nature of each individual, the alliance and love won society, it's not going to get in the way of things. But all I'm saying is set it up in the beginning and then be legal with it, do what you say you're going to do. Variance is your integrity there in is the value of what's going to take place. money, this money is coming. And it can be used for joy and happiness, or it can be used as a manipulation to cause problems within a family. Do not fall into that trap. This simply don't fall into the trap of using money to manipulate other people is specially your children. If you do that, you're going to be unhappy with the use of your money. The consequences of that will not produce what you're trying to accomplish. So be wise, if you're not wise enough, then learn things get involved in teachings and other things or classes of some short universities and parenting and all kinds of things. You're going to have the money to solve a lot of problems that pop up without the money he had, you still have problems. With money, you still have problems, but you can solve them. If it's money that can solve the problems. So be flexible with the trust that you set up. That's all I say. But do it appropriately and do it correctly within your integrity and within your belief systems. So that you can function in a way that you'd like to. Next question.

T

Tracee 42:13

Okay, so the other part of this question, you pretty much already answered, she gave two other options, but you already said you can do whatever you want. Okay, then the next question is, my wife and I are 61 and 62. This year, and we have an 11 year old adopted daughter, my intention is to bring the girls with me to the appointment. In addition to my projects, my wife has project ideas for children and elders, to questions, since I will be the Benefactor I'm hoping to set up my wife as a beneficiary so she can create her own projects. Does this make sense?

R

Ron Giles 42:49

Well, if you if that's the way you set up your relationship with your wife, and then that can work the minor child, there was something there that I wanted to say about that, but I'm forgetting what it was for now. But you're setting these trusts up and you're working with them. And then

you say, I'll give, I'll make my wife a beneficiary. And so she can have money of her own. Well, that sounds like it's power over people. Hope that isn't and indicative of the feeling that you have towards your wife, and towards your daughter. If indeed that is the case, and I could be wrong with that. Because that's manipulating, you've got the money, so you can do they go do what you ask them to do sort of thing. And I don't believe that that's appropriate unless you're running a business. And even at that, I still don't know how appropriate it is to try and have control over other people. Except with love. Love doesn't control. Love stimulates growth and development, and opportunities to use their own power and their own brain to create things in their life. So if I was your wife, if I were you, I would preserve that relationship with your wife by letting her have some Zim and have her in charge of her own money. And then you're not in charge of her and the giving her her stewardship. And that also gives her and we've said it before, gives her a an agent from the angelic realms that would be a counselor for her. Now if that's a challenge to you, then I would check in that challenge concept or understanding of the gate before you go into your appointment because it's not going to suit you. Well. That's my opinion. Next question.

T

Tracee 44:56

And this question I have connected with Phil Johnson. About trusted and filled out on Word documents everything needed for 10 trusts in which I will submit after the redemption if I so choose, these trusts would be used for personal possessions and small projects. My question is for my daughter's trust as a beneficiary with hopes she will grow into humanitarian, would she be best placed in our personal trust? Or one of the six trust made available at the appointment? Or is this a question for my counselor,

R

Ron Giles 45:27

There's an error in your thinking with setting up trusts at the appointment. Six trust for the beneficiary doesn't matter when you set those up, in fact that you don't take any beneficiaries to your appointment. So how do you set up process the appointment for a beneficiary if the beneficiary is not there? Okay, well, you're going to use your wife as a beneficiary. But you don't set up the trust at the the appointment. Regardless, that's something that comes later. Unless you want to take the six trusts and start doing stuff there, then you got to have the name and the beneficiaries and trustees and all that sort of stuff, where you may want to think it through a little bit better get used to having the money first. But the younger the young child, whatever 11 year old, it's, it's best to see what they'll turn out like, but guide them and direct them and help them to make proper decisions in their life and prepare them to become a humanitarian. But they're never going to be as in benefactor, they'll be a beneficiary. And they'll be able to do things that they want to do with the money. That means they're their life's activities, you might find that they'd like to be dancers, dancing, then they want to set up a dance studio or something like that. They'll have the money to do that. Allow people the chance to be who they want to be. I'm an athlete, and my son's are athletes, to a degree. I've encouraged them, and they do what they'd like to do. But I was a coach for them quite a few years. But I didn't make them do anything if they didn't want to do it. If they didn't want to play soccer, if they didn't want to play baseball, or if they didn't want to play football, I didn't make them do that. They did it on their own. Because that's their lives and the things that they like to

do. So you just have to allow children and there'll be they'll grow up much happier. They said to so it's a thought. Mine didn't come with manuals. Neither did I come with a manual for my parents. I'm sure they wish I did and didn't. Next question.

T

Tracee 47:58

As we are heading to this new paradigm shift, and the rollout of QFS. At the same time, we will be witnessing the freefall of all legal fictions and all government entities all over the world. What do you think will happen to all public servants who work on some parts or structures of the government, ie public assistance, social development assistance or social insurance? Will they be completely eliminated? or repurposed?

R

Ron Giles 48:27

I think that there's going to be a movement, I'll call it a movement towards individual growth and development, if a person's job and what they've been planning on as part of being part of the government, if their job ends. Well, we as benefactors can take a look at that. And in our community assistance centers and our directors who have liaisons with the local jurisdiction, people. If there's things that need to be that we can carry on, then let's carry it on if it's good, if it's a waste of time, and some people are just sitting kicked up on their legs up kicked up on their desk, and, oh, gee, I guess it's 430 it's time for me to go home. Those kinds of people, you want to give them a leg up on something that's going to be lazy for them in the future? I don't know. I don't think so. Everybody needs to be gainfully employed and doing something that's when I say employed gainfully involved in something that they feel they can give to the community. And, and this is part of the the eighth Wealth Management System is preparing yourself to live with in a community where everybody's working together and everybody's growing together, and everybody serving one another. And if you're just a taker, kick back up on your legs. Take back up on the desk, and that's your nature. Well, if that's what you really want to do with your money, then it's not going to bring you any joy and happiness because you're going to be soured out. After a short period of time, when you see everybody on now getting out and having a lot of fun, doing things that they've always wanted to do with the money, getting the going to school and learning how to do this learning how to sculptor, or whatever they have dreamed of doing. There's all kinds of different things that can happen when you have funds to do it. And then yet, that means you're getting get to come from your heart, and there's nobody is going to try and control us anymore. We don't have Big Brother looking over our shoulder anymore. We don't have somebody telling us what to do, or what not to do, that we want to do. That's appropriate for our communities. So things are really going to change. And we're going to have a lot of fun with this. So that up for the fun. That's what I think. And that's the way I'd like to do it. I hope that answers your question on there. Thank you. Next question.

T

Tracee 51:15

What do you think would be the first marker for us to see that the QFS has started to roll out in the public?

R

Ron Giles 51:21

Your appointment. reason I say that people are saying, well, the QFS is already placed tell me it's already in place. Tell me where they got their money. Come on, tell me where they got their money. Well, I've got all of these, this gold was gold. The certificates are not the gold certificates that are going to be used as money are not activated and tell there is a transaction. When they sell, we sell our Zim or our exchange our currency to the to the the alliance that activates our accounts, we get an account, they act, they we sell it and the money bits could get put in the account, the quantum financial system is not working with money, it doesn't have money. It only works after a transaction is made that puts money into an account. So these bird brains that are talking about the quantum financial system is already in place, and working, and so on so forth, will tell me where they got the money from. Because I know how to get the money into the quantum financial system. That's what we're doing with exchanging and redeeming, the exchanging of currencies and redeeming are him at the appointment at the appointment. It's not going to happen until then. Reason I'm exorcised about this is because just this last weekend, they said the quantum financial system is already up and running. And the banks have all set themselves up with it. And if they screw up, then they're going to get kicked out. The Quantum the alliance has got teeth in this and you guys don't know what the hell you're talking about. The Quantum financial system does not have money in it. A quantum computer, or quantum consciousness is already active and has been doing stuff within the banking system for many, many, many years. And it's been filtrated into the SWIFT system and destroyed 86% of the money that banks made by disabling that quote, the SWIFT system. Oh, isn't that fun? Well, then how are the banks gonna make money after this? So don't talk to me about banks, because there's no profit in it in banking anymore. And the banks will go, they'll just go out of business. There's no money in banking anymore. Banks will not be a part of it, because they can't sustain themselves. It's just money is finances. That will do that is the designs of the banks that can't make money out of thin air. So they don't have money. They can't do it anymore. There's a whole way of doing things that are coming. I mean to say this, if you call or email me and say quantum financial system is up and running, what do you think we should do about this? I'm going to say, well, if I respond, I'll just simply say, quantum financial system is not up and running yet. So what do you think that's my opinion. In, not my just my opinion, the quantum financial system will start when we get our money, period. And until then it's not active. It's not there's nothing about it. So don't ask me about the quantum financial system. And what do I think about this and that, and the other that talk about it. Because there's not been one person has given me some information. There's one, there's one particular one that came through that that half of it was just perfect, as far as the quantum financial system is concerned. And then they went off on a tangent about the 1 billion coins. And they're going to do the CIPS and all this other stuff, and it just destroyed what they were talking about. So inconsistent with the quantum financial system. And if you know about the quantum financial system, you can see the inconsistencies in that stuff. And they don't know about the quantum financial system. In its reality. I wish people did I wish I was not the only one that's talking about this. I wish there were other people that I could rely on to be making the right decisions about the quantum financial system, but I can see where it is inappropriate for them to be talking about certain thing. Banks especially. So there's, there's the quantum financial system is coming. We are the ones that started with our redemption appointment, then it's not active. Until then everything else is fiat currency. You hear about exchanges and that sort of thing. It's all fiat currencies. Nothing has to do with a quantum financial system at this point in time. Next question, please.

T

Tracee 57:00

Can people who were incarcerated or ex convicts in the past be allowed to have a second chance to be a humanitarian?

R

Ron Giles 57:09

Yes, God doesn't give up on people.

T

Tracee 57:12

The RSS benefits adults quickly then it can pass to those within the care of these adults through trusts. But what about children who have no parents what can be done for the most vulnerable for the innocent children who deserve the RSS has the Alliance ever spoken about this subject?

R

Ron Giles 57:29

Now, they've not really discussed that with me. There's hundreds of Zim benefactors that will get involved with orphanages and with children and, and work out some details. So that each child is taken care of. There are people who love to take care of these children, they love them and, and wants to serve them and want to help them and we find those people and let them take charge of the the orphanages instead of the Cabal types that are using the children for other things, and they get a chance to have a real good life will seek out and find those kinds of situations and be sure that the children are taken care of. Especially in orphanages, and especially with children period. Let's do things for them. This have communities that that have rec centers, that kids can do all kinds of different things that they want to. can open that up for sure. Next question.

T

Tracee 58:43

Will my interviewer from the angelic realm Alliance be able to guide me in securing a CAC director or will it become apparent once I begin the RSS program? I have my binders ready and plans in place that I have no close contacts to implement the community outreach.

R

Ron Giles 59:02

Okay, let's, let's just kind of back up just a little bit. When you said Will my agent will my director or counselor helped me to get the right one. There there is an assistant assistant to you. You're the boss. They are a wise assistant and he'll give you some good counsel and some good advice but they will not do the work for you. If you've saying I'm looking for a director, well ask and it shall be Kevin. How do you identify as a better question about the director? How do I identify people who will be good directors? Well, that's open for discussion is you might want a person who's assertive one that is lovely to be around and Somebody that seems to be quite competent and unsure of themselves and has a good way with people. All kinds of different ways. But the the Alliance agent will not be bird dogging for you. So you ask and it shall be given if, and I've been told that these people, they're humanitarians, they're just not

get, they just didn't get the money in the beginning. They're the ones that will be doing the work. They're the ones that will be accomplishing what we as an individual with money cannot do, because we're just one person when there needs to be 20, or 30, or 40, or 100, or 1000 people doing the work. And so we have the funds to do that. And so we get a chance to be involved, and they get a chance to be involved. It goes back to those who have incarcerated, if you robbed the bank, because you your child is starving to death. What are you going to do? Is there a justification for that? Are you a bad person trying to take care of your child? Those are the kinds of heart wrenching decisions that some people or some parents are required to make, and they end up in going to jail. And that makes a child worse. But sometimes there's things that happen, that are not their fault, or perhaps or circumstances that played on them. And they they gave way to it. So God does not. Let's use God as an example, he doesn't give up on people. So you have a director that you think is kind of messing up and not doing the right thing. You give up on them? Or do you give them counsel and advice to help them? Where's the problem? What what is, you know, I've seen that you got mad at this person, what was the problem? Tell me about it. Let's talk about if there's a problem here, in you perceiving things and getting angry, do you have your need an anger management course or something of this nature, you shouldn't ever give up on people just no need to give up on people. And those people are the ones that get that extra little help. They're the ones that will turn out to be the best that you have. Possibly, because you've given them what they need to make the make the changes and they're nice. So God doesn't give up on people that's not give up on people to just be sure that they that when they came to us for a reason, let's be sure that we are reciprocating and using them for the right things and, and work with people and the angelic realms. That's, that's what they'll do with us. I'll ever give up on us. Well, thank you for the questions. And thank you for the opportunity to give my answers and hopefully they were of some assistance. That's what I hope. So with that in mind, we'll close now. Thank you, Tracee, as always for your good help. And next time, it'll be some more questions. And we'll enjoy that as well. Thanks for now.

T

Tracee 1:03:26

You're welcome. Okay,
