

Q and A - Sept 30

Thu, Oct 06, 2022 7:08PM 58:24

SUMMARY KEYWORDS

question, cac, people, money, beneficiaries, business, contracts, rss, program, person, redemption, employment contracts, white hats, cabal, problems, recreating, abortion clinics, broke, create, process

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracee and we're going to do a question and answer period. It's been a while, we have a few, a number of questions. So we're gonna dive into it today. Today is the last day of September, September 30. Friday, September 30 2022. Okay, let's go ahead.

T Tracee 00:24

Okay. When the time comes, and we need cash, well, we just go to financial service centers. And will ATMs be taking our cards? What if we misplaced a card or lost a card? How would we get another as a benefactor?

R Ron Giles 00:40

Those are processing concerns? And I don't know the answer to the second question. But yes, what do you want cash when you need cash is go to the financial centers. And they have now they'll turn some of your digital gold certificates into cash. And then you go make your sale and whoever gets the cash. Maybe if it goes back into the financial service centers, and gets deposited into your account, then it will it will revert back to QFS the digital gold certificates. And then the paper money will just be set aside until it's reactivated. Again, that's how it's gonna work. So banking cards and so forth, we'll see how that works out how it flows, they may even give you a spare card in the beginning, because you're not going to be if it's not you, you can't get the cash out of the ATM or anything else. It's a quantum financial system that won't allow it. So we'll have to see about that. I think it's a good idea to have more than one, then might be a suggestion that we give to. And yet, then they may tell me, well, we're not gonna be cards, which ATMs or whatever I don't know, I am right now. I don't know.

T Tracee 01:59

So basically, because there's a couple other questions here about the finances? Are you saying that you don't really know how the financial service centers are going to work just yet?

R

Ron Giles 02:09

Well, for cash, yes, there they are. As far as debit cards, and that sort of thing of concern. I'm not sure that I didn't, I don't have a real confirmation about that. Because there are decisions that are still being made, and how that's going to happen. My preference, and what I'm telling them is that we would like our card at the redemption appointment so that we don't have it. So maybe you can get three or four cards at the same time. And then each of the cards can be just kept in certain places. You're the only one that can use them, because the qf s won't honor them unless it's you. So that's kind of what I'm looking at.

T

Tracee 02:52

Huh. But questions? Yeah. Do you know what other services they're going to be providing?

R

Ron Giles 03:05

I'm not sure Well, other services there to banking service, yes, there's going to be reconvened refinance possibilities in there, they will be helping to refinance homes rather than going through real estate in the sale. And we're asking that the alliance start teaching them about the new process that we're going to do. Because we believe that there will be a long line, so people that are going in to refinance their homes, we'll see how that all works out. But it's our intention is to use them for our processes. So that's one of the things I think that the financial service centers are going to they're going to loom is really a one of the greater support systems for the financial for the quantum financial system. And that's their intention, test their design, that's what the best the intent of their being there is to assist people with the quantum financial system. So if there's, how much of that it'll expand as necessary, or stay the same? It all depends on how the Alliance wants to do things. Those are, are in process. Programs that we'll see when they've got everything set in place.

T

Tracee 04:26

Well, something must be going down because I heard that today was the last day. And let's talk about this quickly, if you have a minute is today was the last day for all the banks to return their money to the Vatican or something or is that just BS, you know,

R

Ron Giles 04:41

yeah, my BS meter went right to the end on that one. There's no reason for. There's no reason for the banks to do that. There's no reason for the Vatican to require that, that sort of thing. It's all part of the Cabal system. Those are the kinds of stuff that the cabal is Coming up with to terrorize mankind. And we're not going to, it's not going to happen. The the bottom line with the white hats is that they're not trying to hurt people. And they will not allow things to happen

that are going to hurt people. And less they are the elitist, and the globalist, and the people who are trying to kill us. Anything that we can do to cause problems for them, it's going to happen. But in the meantime, they're going to be very mindful of the problems. Now are we going to have is, are we going to sail through this without having some problems? No, I don't believe so. We're going to have some inconveniences like military law, we're going to have people rioting in the streets until the military either shuts him down or kills him. You throw a brick at a soldier and he's gonna shoot you. And that's not the way that the police have been handling it before. But when you're rioting, and you're writing for a treasonous purpose. There's this is military law, we're under military control. We don't have a functioning government here in the United States. And I don't know that others do as well. Other countries do as well. So there's, there's it's military law, military is in charge. And until they pull the plug on the existing system, like arresting Biden and so forth, it's going to keep be that way, so that people can see how bad these people are. And the sooner they wake up, and there's, there could be some major events that will wake them up. We'll see. But let's just know that we are in war. And we don't get to know anything. We're not we're not, we have no need to know what's going on. We're curious, and we think we do, but we do not have a need to know and until it's done, then we can get be told everything that's taking place. And I think that's part of the abs.

T Tracee 07:13

Okay, yeah, cuz yesterday a bunch of fear porn went around. For more, a lot more things. Yeah. Okay, so I'm gonna go here. So this person said, I would also like to use the NRELS programs for people who want to downsize many empty nesters or retirees might want to move to a more manageable sized home. But it would also actually cost them more in the current market will be just buy their home and give them money to buy the new home,

R Ron Giles 07:42

I'll just simply say this. There are things changing with the NRELS a what you want to do, we're looking at that very carefully. And being sure that that's in what the new program of home finances is going to be. And I've said on that.

T Tracee 08:02

Okay, then we'll just stay tuned. How's that? Okay, here's another one a hands on class to draw up work contracts would be very helpful. I'm assuming that means employer docs,

R Ron Giles 08:18

well, we're gonna have blanks and then you fill in the blanks as much as we can. The legal aspect of things in contracts, something that most people don't have a clue about. So we're going to be sure that there's enough sufficient information in how we outlay, this are how it lays out. So that people can have a real strong presence in the things that they're trying to accomplish. So if this causes a need to contract, we're trying to get that taken care of. We're presently working on the contract between the Managing Director and the directors. So that's, that's in process. So, you know, everybody wants everybody's gonna need one of those. So it

will be one that is universally used with some extra power paragraphs in there that you might want to choose for your particular stuff. And, and others, they don't want that so that we'll see how that goes. But it is our intention to be sure that you get what you need as far as contracts are concerned. But you're still going to have to find some people to help you with contracts in your own organization. Oh yeah. Well, other places. Yeah, we have to. Sometimes, you know, think about America, but because we live here. I apologize for that. But each country is going to have their own way of needing to, to deal with contracts. And so there's some international one. One of our members is an international attorney or attorney. Lawyer, oops, I gotta get used to that. And they can help with that. So there's, that's from Spain. But that's an example of what we want we need to do and want to do. So we're going to make this as easy as we can for grandma who who might be one of our better humanitarians. So she don't have to concern herself with these things. And she will be able to just point and find the right people to do the things she wants them to do. But we're going to take care of everybody, as best we possibly can. Next question,

T

Tracee 10:45

I plan to hire people to sit outside abortion clinics with giant posters of business cards for the RSS program, and also signing up primary caregivers for caregiver contracts. Do you think this is a good idea?

R

Ron Giles 11:02

A giant poster is public advertising, it's not authorized, you can't do that. You're you're trying to solve a specific problem. Using the RSS program when the RSS program is used for everybody. Even the people inside of the abortion clinics can be beneficiaries. There's no legal way to stop them. And we're not interested in stopping, they can change because they're getting money now they can change the way that they they may go to work and not want to do the things that they're doing at the abortion clinic. Because that's the only way they have to make money. So the RSS program is for them as well. Get them out of it, they don't have to be there anymore. So, but I understand your purpose for doing this. But you need to understand that this program is not for a political or protesting anything to do with that. And please don't get yourself all wound up. You're focusing on abortion. You're not focusing on the on what's coming. You have no idea what's coming. And if you don't focus on it, you won't know it. When it gets here. You've got to start working towards making different decisions on how you're creating in your life. You're creating, you're focusing on abortion clinics, ask just Can I keep abortion clinics around that What you resist persists? These are wisdom sayings. If you persist with your resistance to this, it will stay. So let's create something different. You know that the only thing that I have, other than that is that you're using the program for a political sort of thing. And I don't appreciate that, oh, you know, I would never do that. And I think that you're out of bounds spiritually by trying to do that. And if you're focusing on it, then I'm pretty sure you're out of bounds. Because that's what you're going to create. By, you know, saying this this way for a purpose. I want you to change your thinking it and are you the only one that's got these ideas? No, you're not. But let's get these ideas gone. Because we're moving into Nisar, we're moving into a brand new way of governance. And that's the that's going to be the joy and the happiness that we have. So don't drag abortion clinics, or anything like that into the future. Please don't focus on it. You won't recreate it in the future. That's wisdom. Let's move on to the next question.

T

Tracee 14:15

Same person I plan to go to every topless bar I can find and give all the women that work there a \$10 tip plus a business card inviting them to the RSS program. Do you think this is a good idea?

R

Ron Giles 14:30

You're seeing things that you're focusing on things that are wrong with our economy right now and creating recreating that into the future. So same argument I had before. Those Those girls the people that are running those clinic those places, they're going to be gym benefactors. So you're giving it to the girls but you're not giving it the are used in your mind's eye. Are you saying I don't want them to be poor? Part of my RSS program, and I'm saying do not do that kind of stuff. Don't go there with your thinking. You're only recreating all of that garbage to take into the future, and who is going to be the one that's having the problems? The person that's focusing on them. So you're just recreating problems for yourself that we're trying to get rid of. Please don't do that. Please don't do that kind of thing. The RSS program will spread like wildfire, you have nothing, you don't really have much to do just one or two people and it will take off, cleared for takeoff, or Launchpad, whatever you want to call it, it's going to happen that way. And us as managing directors, we don't have to worry about that. We certainly don't want to use that kind of thing. For our own political purposes and our own processes, life is going to things are going to start working differently. And making money when he \$6,000 a month, or some of these, they'll get out of those kinds of businesses because they won't need to be there. It will close itself. We'll see what happens. But gosh, my heart goes out to you because I feel like you're having some problems. And I want you to rethink these things through and see what Jesus do that, you know, that's it. Somebody says that's probably true. Well, it is what Jesus do that kind of thing. I don't know. I mean, he returned it the money changers in the temple, got a little bit upset about that. But let's not focus on those negative things. It's just let them be as they are that government, the government wouldn't do anything about it back in Jesus's time, because that was the government doing that kind of stuff. But now we've gotten a Shara coming. And so why do we have to do those kinds of things that we think are necessary, when GESARA will just simply take care of those things? largely made against it? I suppose. I don't know. Let's take a look at it and see. But let it happen to happen. Next question.

T

Tracee 17:31

Unemployment, employee work contracts. I have not seen this question before. What if a business has 1099 independent contractors and no employees, several businesses are set up this way. Independent contractors are independent and only occasionally come into the office, while an independent contractor work agreement also be designed. Some industries independent contractors are not made to have employees that come into an office. You know the difference between an independent contractor or an employee? Right?

R

Ron Giles 18:05

Yes, and an independent contractor is part of is a term for the IRS and has a different sort of

res, and an independent contractor is part of is a term for the IRS and has a different sort of structure to it. There's ways to get around all of these things. If they're independent contractors, would they not like to have an employment contract? That means that they get to continue doing what they're doing. And they get paid for the work that they're doing. And that's a service to mankind, that's a service to the communities. There's no reason to let's, let's say employment contracts are really good. So let's find out a way to use them. And if a company that you brought into the play, uses independent contractors Well, we're getting away from the IRS and all of those kinds of things. So let's start doing that. Now. Let's get ready. Let's do things that bring on Thisara. Instead of do things that keep it at bay, keep it away from us. Let's start doing things that will bring the Tsar together, we can do, we can bring in the Tsar a lot faster than the white hats are doing it. It will change our minds and embrace it and bring it on and take the responsibility to do things that will bring that will make it happen. And we can do that we get to do that. And that's that's part of what love wants his eyes about. Next question, please.

T

Tracee 19:44

When doubling or tripling an owner's best years profits, do we do it only for the seven or 15 year contract term? Or as long as he stays in business? And then they ask could that same dollar benefit be paid passed on to a relative or an outside person who is taking over that business? Or would it terminate when the original owner no longer owns the business?

R

Ron Giles 20:10

Well, those are good questions. And I'm wondering what you would like to do with? How would you work out? You're going in asking them an owner of a business? What's what's been your profit for the nonprofit but growth for the last five years? And what we got this moment, well double that. That's for the seven or 15, if they want the extra bonuses. So those are the things that you can work out yourself. So I'm asking you, what would you do? And you're asking me, What should I do? I'm asking you, what would you do to facilitate your position. And that's what you're trying to do to help them to get more money into their lives, each of them are going to get can get up to \$28,000. And if they got a spouse, and that's \$56,000 a month, the problem that you might have is that they don't want to work anymore. And that's why we give them as you know, sufficient to stay in business for seven or eight, or however many years you want to go, an older person might want seven years and then have all the benefits of retirement with all of those that money coming in. And we'll get the increases every quarter. But they can get all the benefits, including health care, and all that sort of stuff. So enhance it, we don't have to worry about funds, we really don't. We're going around with an X, another round of x, SKR on Sunday, that's that much more money that you're going to have. Most of that's probably just simply going to be put into your savings account. You'll have your budget from the structured payout program. And that's going to be on an annual basis paid out quarterly or whatever you'd like. But the savings is where you go for the things that you're saving up for the bigger stuff. Your income on a quarterly or monthly or annual basis is for your projects that you want to do. The savings account is for things that you didn't know about. So there it is. And and you'll say, Wow, I really love the Alliance, they prepared me so well. If we will only do what they've asked us to do. Next question.

T

Tracee 22:53

11:00 22:00

Okay, I've heard you say that the CAC will not be needing advertise. As it will be shared word of mouth, the nature of business is competitive. So I'm persuaded to say the businesses won't share the CAC information with each other, as each will use their financial benefits to be stronger over another CAC location may be on the website. But individual CAC advertising could be a way to control the flow of applications from businesses for financial support. My idea is to add genuine value to small businesses, which takes time and monitoring to make their business great. I'd prefer not to be rolling out the CAC support in an uncontrollable fashion and don't want to be inundated by hundreds of application. Usually words 30 applications to throw money at advertising can be a way to limit to a specific area that we wish to target, then move to the next area keeping things tight and in line with our own growth of the CAC small controlled steps to greatness seems more productive than opening the floodgates to chaos. Please give us your thoughts.

R

Ron Giles 24:00

Okay, okay, you're a business owner, at some guy from the CAC Oh, you've heard of the CAC It's over there. guy came to me and he offered me to double my income and to pay the profits or the wages of all of my employees. And so I did it. And this is really exciting. I get to stay in business, regardless of how well I do. I can stay in business because they're paying me to stay in business. Wow, that's interesting. Maybe I'll go over and take a look at that myself. And so he talks to his friends. He talks to their friends. Business owners have a way with them by themselves. So when you say I don't want to have chaos, with all of these people coming into my CAC, and I'm saying you're in the business To do that, if chaos happens is because we haven't controlled it. If chaos happens, then you haven't got the larger facilities that you need. I'm saying you're going to have a lot of people come in there. What What about the employees? Can you can you hire five or 10, or 15 or 20 employees and have them at computers, so they can do this thing? To good question in business, you cannot control what's coming. So work towards preparing for it. And if you gets overflowed, if you get over come by too many start working on. Appointments, too, you're working in us in a small community. Next door is another community. And next door to that is another until you have a whole city. So you can spread it out that way. Now, you can do multiple CAC's in one city, you can have that many. So the more you have, the more you're taking care of everything. So look at this, in the reality of what's going to happen, the people are going to want those contracts, how long does it take for you to do them? How if you work out the process that they can come in, they can fill out an application. And you might have a website to do that. They can fill out all the applications and the and answer all the questions and they come in and sit down with somebody that you've employed to look at that. And you've trained that this is a way to do it. And they look at it and say yes, yes, yes, yes. Okay. And how do you want to do your employees? What do you want? Well, I've got it right down here. Well, let's, let's get them signed up. And let's get them getting their money. Now, that's the directors, responsibility usually goes to the to the business to do that. But now the business is coming to you because you have what they want. So just to accommodate that guy can come in there. If you streamline it can come in there, it's been maybe a half hour and get everything done. Next, if you understand what I'm saying, prepare for the for what's coming, because it's going to be huge. Now in a small community maybes, you might take three or four or five, maybe a couple of months to get everybody under control under contract. And then they don't have to worry about it anymore. There's all kinds of things and ways of thinking about this, let's just be open to solving problems. And not be afraid of them. Don't be afraid of them, we can solve it. And if it takes if you come from fear about it, then your thinking process is on fear instead of on solutions. We might have some problems

every time a problem because our own there is a solution that comes with it. So instead of focusing on the problem, focus on the solution that's already there. And you're going to have some great success with that. That's the way that I plan on doing mine. Okay, where do we get all of the CAC up there to be? Yeah, we went into this.

T Tracee 28:55

Okay, now we finished. Okay. Okay. Next, I understand the rationale of why we were advised to put aside quarterly unused money from the previous quarter for the purpose of bonding, or the bond account, we were also advised to do the same, but to place it into a savings account are both bonding and savings one and the same? If not, does that mean there would be two accounts earmarked for those purposes? And if so, can you advise us as to how that money would be appropriately allocated to the bonding or the savings accounts.

R Ron Giles 29:31

Okay, first of all, the money that you get from the appointment, your redemption appointment. That's what you put into the savings account. There is no more money going in that account. It's just what you want to bring out of it. The overflow from your I'll call it annual payments from the structured payout program is what you use for your own stuff after the first quarter, okay, you're going to get the first payment, as you walk out the door from your, from your appointment. That the minimum, if you've asked done with that if you only got 100 T note, then you're going to have 1.25 quintillion, how soon are you going to even do the point two five quintillion. That's point two, five, that's 250 quadrillion, how fast you're going to spend that. So those are the monies, use what you need, and then put it over there in the bond account, not the savings account, you don't put anything in the savings account anymore. You put it in the bond account. And that accumulates so that you can do performance bonds for all of the stuff that you're coming in, you're going to do that performance bond is bonding and all beneficiary programs, all employment contracts. Those are the kinds of things that you're bonding for. And you confuse the fact that the savings account is the money that we get from the appointment and put it in there as a savings for the things that we want to really do when the time comes. And the Alliance needs some help. That's what it's for. And all along with that is the activation of the digital gold certificates. That means that the quantum financial system is distributing money to the communities and throughout the world. So let's just focus on that and allow that to be true. Now, we're going to go to another round of SKR, what is the rate you're going to ask? I'm saying the thing to do and what it was told telling people to don't change that came from your heart, it came from your heart because they know that they you know that you only have this but they probably it probably already knows that you're getting another round of SKRs are you going to change just because you're getting more bonds. Or you can go higher, but I wouldn't go any lower. Because that savings account over there is what you're doing, you are present with what you're trying to accomplish. And you've gone to your heart and you found out that you might be a million dollars. And then all of a sudden we get an fkr was still should be a million dollars because that came from your heart and your heart knows that that's coming. Those of the sky is coming. And also knows that the next fkr is coming to you ask the same million dollars, whatever. Because that's what came from your heart for your activities to for the redemption process. So that's what I'm trying to help with. Savings Account is not the same as a bonding Account No. X question.

T

Tracee 33:30

If I manifest my world and there is nothing outside the door till I open it, does my husband manifest the same world? He seems to be able to place a sprinkler in the perfect spot of the yard. Do we manifest everything together? If we have to be on matching frequencies to be on the same timeline? Am I just as bad as the Cabal? I am not perfect, but pray I am not that terrible.

R

Ron Giles 33:59

I love how you said each person has their own uniqueness. And two people getting together doubles the uniqueness of what they produce. Is one better than the other? Is my uniqueness better than somebody else's uniqueness. Not in God's eye. So you're there together to do specific things together. Don't be separate into he's good at this and I'm not into that. Now you're you've got things that you are. You are really good at whatever they are. You've you're manifesting your perfection and your uniqueness as you go through life. So stay out of judgment of yourself and others and just enjoy what's taking place. That's a simple solution. For this that concern that you have, in my opinion, it's going to be a little bit of work to get through the thought processes, do the work, get through the thought processes, because on the other side of that is where your joy and your happiness are going to be. Next question.

T

Tracee 35:20

Does just Saara or NESARA have to be in effect before we can attend the redemption meetings? Kind of? Did you cover that?

R

Ron Giles 35:32

I don't, I'll just simply say just sorry, GESARA is going to come after the redemption appointment. I have always thought that comes before. But it's going to come after the redemption appointment. And we'll come out with more things from love won society, but us being a conforming to, in our way to Nisar conforming to Nosara means that we're getting rid of all the Cabal stuff, not only in a legal sort of sense, but in our own mind, we're not going to follow the same things that the cabal has taught us to do. So we're not we're rejecting the Cabal. And you can do that when in the way that you think and in the way that you do things. If it's a cabal oriented process, avoid it, create something different. We'll see what happens. We're supposed to get rid of the mortgages, they are supposed to get rid of the mortgages. We don't have to worry about that. Because we know that NESARA will, will take care of it. And so we can, I'm not saying to people don't don't pay your don't not pay your mortgages, because then you'll have some problems, perhaps problems. But the people who have mortgages are going out of business. They're not going to get paid to go to work anymore. Though, we'll have to see what happens with that. But we're going to get our funds earlier and we're going to start doing the things that love won society is designed to do. with total disregard for the Cabal. You'll see what's coming out as we outline our our new programs that we are, we are in Asara we are going to create GESARA in in the things that we do with love won society, you'll see it is there going to be a big announcement? I'm not sure yet. He's to think so. But the way that I see things happening with the Cabal or excuse me with the white hat, we may have just a transition

borderless a seamless transition between the old and the new. How's that gonna look, I don't know yet. But we're gonna have some fun trying to make it work that way. The quant the financial service centers are taking the place of the banks, the banks are being turned into financial service centers. In a financial service industry, some banks are ready for it and some are have to topple the bad guys in the tops of their banks. And that's going to hurt the people below them who are honest and doing the things that they are getting paid to do. And so there's a lot of a lot of changes that are coming in the banking system. So we'll just let that the alliance is in charge. And people are already being trained in those banks to be certain financial service center. Let that ruminate on that one a bit. Think about that. How can I prepare myself to be a part of that sort of thing. Because you're going to be a lot of many, many gene directors, excuse me, managing directors all over the world, who will be dealing with that and in their own countries. And they will win. The Quantum financial system will be sure that they do win. And as long as we're conforming to the right things, but one society is getting the information that we need to prepare for this and is coming out and they'll be shared appropriately at the right time. Next question.

T Tracee 39:45

On the QFS would it be possible to have our directors accounts linked to our account with a standing order in place when their balance gets low? A bit like an automatic fill up where we could adjust the low of that account and also just the amount to fill it up. This would be helpful as our directors account would never run dry. And also, as they increase their workload through time, the fill up amount can be adjusted to suit.

R Ron Giles 40:12

Well, I love your thinking, I think it's a very good idea who's going to do that for you yet maybe that you'll have to do that yourself. Work out as some somebody that set up a program for you so that you can do that. And

T Tracee 40:26

then go from there. Have your accountant do?

R Ron Giles 40:30

Yeah, have your accountant do it. Hire somebody to monitor it. But if you can do it electronically, then you just have to have some believe monitor and not have to do anything. Just be sure it's getting taken care of I hope that helps. Next question.

T Tracee 40:51

Concerning lack mentality, I absolutely believe in the power of our thoughts and spoken words, but without said, instead of saying things like, we can't afford that, or we're broke, or I just can't get ahead financially, what do you suggest we say?

R

Ron Giles 41:12

Well, is this post RV or, or redemption? Or is this before, I think it's now it's right now, okay. In your mind, we have to do things, we have to deal with things the way they are now. But the simple thought, like, I can't afford it now. But just in two or three months, we might be able to be able to buy that for you. You have to work with the way things are now but with a hope. And in your words, you convey the hope that things are going to work out in the future in a different sort of way. Not hope for it. But it's going to happen in a different way. But the person you're talking to children don't know that. They don't know the difference between hope and perhaps unknowing that it's going to happen. Just work things out the best way that you can, but don't come from black mentality. The things like we haven't gotten enough money or we're broke and all that sort of stuff that just recreates a whole set of circumstances that you're in, we're going to be able to find a way to do that in the future. That's the abundance mentality. We can't do it right now. But we're going to find a way to do that in the future. And it may not be very long. And so you don't have to say the things I'm broke, why would you want to say ever say that? I'm broke? Well, you're the one that got yourself broke, because of your bad thinking you you recreated from the past the brokenness that you have now. Am I being silly? Am I being unreasonable in this? No, I am not. Because I understand the creation process. And my perfect edit? No, I'm not. And I'll be the first to answer that. I send out because we need some funds to pay the bills. That's, that's okay. But I say the bills will be paid, they're coming, the donation that every time we have the abundance of what we need, every single time. It's the creation process that's at play here. And when you say I am broke, you just created a future of being broke. So knock off all of that garbage. And start being positive in your abilities that are coming to you. We don't have to wait in our thinking and in our mind, and in the words that we use. We don't have to wait for the redemption appointment. We're just not going to feed ourselves that the consistent creation of what we've already had by using those kinds of words. You're broke now because you thought about being broke earlier. And that's the creation process manifest itself in your life. You never say I am broke. Because that means you're broke. And the universe will follow up on that. He's broke. So that's who he is. Because he said I am. So he's broke. So let's rearrange things so that he can be broke, because that's what he's asked for. That's what he's planning for. So let's just go ahead and give him broke some more. Eventually, he'll stop using those words and then we don't have to do it anymore, is what the universe is saying. There They love you and they want to do everything that you want to do. And if that you're using your creation process in a negative sort of way, they don't know the difference. You've asked for it, you'll get it, you're creating that you've created it. I hope that makes sense. Because this is the kind of stuff here that you're putting in a question and and recreating for the future. Next question, please.

T

Tracee 45:33

It is not yet clear to me about trust, could I as a benefactor make a trust to an NGO, which is the non governmental organization, I had to ask them that. So that later its partners are linked as beneficiaries to that trust and therefore to that NGO, or directly make the entity organization and beneficiary and that from there, the beneficiaries are made with an ID that went over my head? I'm sorry, I don't even get that question.

R

Ron Giles 46:05

R Ron Giles 40:05

Okay, good. I as a track, we're talking about trust, make trust to an NGO. Now, why would you make a trust to an NGO, if you wanted them to have money, use your managing director account, and just set one up for them. And then it feeds them. So that later its partners are linked as beneficiaries to that trust. And therefore, to the that NGO, now, why would you set it up in that way, where partners are linked as a beneficiary? The beneficiaries have nothing to do with the trust? Or the end? Do? They say pay their \$10. And they're they're a beneficiary. It's not linked to anything other than the fact that they signed up. So your trust for an NGO, non government organization? Is it a? Does it have an EIN number for the IRS? Is it A, is it sponsored by the state? Is it an organization that has ink behind it? Those are the kinds of questions you should really be asking. Now, the second, the last part of your questions has to do with organizations as a beneficiary. If the organization is a nonprofit, or is a person, then they can become beneficiaries. Or taking away trusts out of that, because we don't want trusts as beneficiaries. But the beneficiaries can create a trust for their own purposes. So as a managing director, there are other ways to do things. And a beneficiary signs up and he has his own ID already. There it is. There's your answer. Next question.

T Tracee 48:07

Well love won society have in person courses to help us understand the full programs after RV for those of us that need a little more clarity.

R Ron Giles 48:18

No, there's no in person, thing, who would we? Who would we get to be doing that? I don't know. None of our managing directors will do that.

T Tracee 48:33

What about actors Academy? They're working hard on that, by the way.

R Ron Giles 48:40

Yes, and the directors Academy is going to be an asset for you. But on a managing director, to sit down and have somebody to sit down with, you're going to have to create that yourself. Love won society's got other things to do besides that, now, your abilities are there. I'm just gonna say this. Because I believe it's true. If you're a humanitarian that has a calling from God, you have everything you need to be a humanitarian inside of you. Why aren't you just doing that? Why aren't you just using it? Because you don't believe in it? And I'm saying if you don't believe in it, then you really don't know that you're a humanitarian. Because if you are you have an entitlement from God to give you everything you need to perform your labors for God as a calling from him. So don't be playing dumb. Don't be playing. I don't know this and I need some help. I'm not I'm not saying that you're dumber I'm there are circumstances where you don't fully understand. My suggests As soon as you don't quit studying, everything you're going to need to know is in. I've heard that from the Alliance, you are finished trying to teach people question and answers is a fun thing. But the people have to stand up and read the stuff that we

prepared for them. If you don't understand it, read it again and let the Spirit tell you what it is supposed to what it is that you're supposed to receive from it. Ask and it shall be given. Don't wallow in the fact that you didn't understand something. If you didn't understand it, read it again and ask God at the same time, use a command I command Prime Creator to download to me the information that I need to know to be a good humanitarian. Say it three times. And do your 154321 now and see what takes place. We've got all of the tools in our toolbox who will just find them in there. The commands are one of the best things that we have ever received. So why not use it for yourself? You don't need somebody else to come and tell you things. You need the Spirit to tell you things is all inside of you. Go in and find it. You'll find it you'll love it. Next question.

T

Tracee 51:32

Okay, two more, for those of us that are already down in the trenches, serving the many in need while trying desperately to keep up with bills and inflation, the All Knowing spiritual beings, and the Alliance has to know that we're doing the very best we can. For example, on top of trying to make a living as an artist during these hard times, I am sponsoring 10 young men in AAA and taking them through the 12 steps and running my WW JD. What would Jesus do street people project is humanly impossible to do all of what I just said and have time to learn all the training videos, it says the impossible if I stopped serving my creator in these ways, I would have time to study and do all the training, but I am. And I don't. And I believe my service right now on the spiritual battlefield supersedes all else. Is this not correct? Is this not what I should be doing?

R

Ron Giles 52:29

It's a it's a really good question. But it has an answer. Well, within reason I say go within is the answer. If you go in, you will have an additional help in trying to understand what you should be doing. You will find that maybe some of the stuff and some of the people you're helping are enabling them to be needing help. I'm not saying that that's true. But that could be the truth. But what I am saying is what are you creating for yourself? You just told me you got all these things, and it's causing you major problems, and what should I do about it, and I'm saying you have created that problem. Now create the solution to the problem. go within and find where the solution is, it's there waiting for you to come in and talk to it. And then you'll be able to manifest it and away you go. And nothing can stop you. You're going to know if you need to keep doing the things you're doing or to spend a little bit more time. It might be that you need to sleep deeper and have fewer hours of sleep. And so you can spend on some of the things. There's a solution to your problem. Just don't create, recreate it for the next moment. From the last moment. I don't know how long it takes to recreate something that you're doing now and then having a manifest it but that's the creation process. And it sounds like you're putting a lot of effort into it. And if you don't get that solution, you're going to be resenting the fact that you've helped all these people and that you're waiting for the help for yourself. Go within and ask for the things. Use your commands. That's the way that I would work with it. I hope that helps.

T

Tracee 54:40

Let me add to that, please. This is that's actually our last question. But what I'd like to say to

you and the person who asked the question before that is when I first found Ron all he had was PDFs five PDFs one for each program. And since that time when I started helping him we've Chris In numerous training resources, so if those of you are having a hard time and feeling that overwhelmed, all you need to do is read the RSS PDF, the CAC PDF, and then the upcoming new replacement for the NRELS, which is not complete yet. So just start with those first two, just read those PDFs to not get overwhelmed. And then after reading them, if you have questions, just email me at info at qf s 20 twenty.com. And I am on the computer every day. So answering your questions. So there's if you need clarity, ask us, we're here to give you clarity. And there's a lot of resources. And so so many people get overwhelmed. And they think it's complicated. But it's really quite simple. And most of it's going to be automated by the time we kick it off. So you don't need to know how this and that and everything happens. You just need to study the program's tab. But if you want, and I just updated that this week to say, this is like you know, the top parts essential. And if you want more info, then it's all at the bottom. But that's not mandatory study. So please don't get overwhelmed. Just start with maybe the first video, and then ask questions so that we can kind of carry this out together.

R

Ron Giles 56:21

Okay, well, press you, you just, you just opened your heart to all of these people. And we're lucky as love won society, they have Tracee with us. She's taken over the responsibility of the emails and answering them. She's done a marvelous job. And I wouldn't have said that the way that she did, because she's the one that's doing it. And she said, come and ask me. Yes, do what you possibly can for yourself. And in that process, use your commands and do everything. And if there's additional questions and things that you can get from Tracee, she's more than willing to help you out. And so, but less, that's in our prayers. Thank God for the blessings that Tracee brings to us. I do every day.

T

Tracee 57:17

Thank you.

R

Ron Giles 57:19

Welcome. Well, that's the end of the questions. So I guess we'll close for now. I hope everything was only those who had the questions, I hope that there's some meaning that came out of them for them, especially. And for everybody else as well. We'll do another question and answer period when we get some more questions. So Tracee is emailing and getting a lot of the questions already answered that are not more of a universal This is more universal questions that everybody else can benefit from. That's why the q&a is still functionally love and appreciate everybody for being a part of us. There's some great things that are happening. We are in an accelerated state of existence. Things are changing, and they're changing really fast. And I hope we can all keep up. Then do my blessings and love and Thank you Tracee for all you do. And with that, we'll close for now. Thank you.

T

Tracee 58:21

Okay, thank you. Bye.

Okay, thank you. Bye
