money, zim, people, beneficiary, account, benefactor, humanitarian, appointment, quantum, question, trust, alliance, understand, bank, financial system, redemption, structured, system, set, payout

SPEAKERS

Tracy, RG

 RG 00:00

Hello, everyone, this is Ron Giles. And we're here with Tracy. It is Cobra the fourth. And we're going to do a question and answer period. So, with that introduction, let's begin and ask the first question, Tracy. Thank you.

 Tracy 00:20

Okay. I originally bought Zim for an investment security opportunity later, we began to find out that they will be used for humanitarian purposes only. I then began to get ready and study loved one society and learning how to become a humanitarian. Do I have what it takes to be a humanitarian?

 RG 00:40

Well, I'll have to turn that back to you. Do you have what it takes? Are you hate humanitarian? In your heart, and you can go into your heart and kind of get a feel for it? It's hard for me to say I don't know who you are. When you go into the appointment, you will be vetted by a representative of the Alliance. The Alliance agent, so I don't know how to answer that question. I refer it back to you.

 Tracy 01:11

Okay, I want to be a part of the RSS I have 200 trillion Zim? Will this be enough? If I can get 500,000? Per? Will the money in my queue Fs run out? What happens? If it does? I can't even fathom how much it will be. Am I going to work? On my presentation for my appointment?

 RG 01:34

You're asking some interesting questions here. Number one, if you're humanitarian, and you have 200 trillion Zim, that will be enough, if you get \$500,000 present. Keep in mind, you might need to go to the website and watch the structured payout. to really find out what or read their structured payout article to really understand your money is

goes into the structured payout program. And when you multiply your rate times the number of Zim or whatever bonds that you have, you come up with an amount. That amount, we call it a primary principle. From there, you determine on how many years you want to have it, and you want to have the pitch structured payout payments come to you and that's going to be on an annual basis. In the beginning, when they set you all up, they put enough money into your listen to this structured payout account, in the quantum financial system. That account is administered by the Alliance. At the redemption appointment, they put enough money into that structured payout account. So that you will be getting your payments annually, semi annually, whatever you want to set up annually. For the term that you want that to come, I'm suggesting 100 years. So let's just go back to our other figure that we have published before 100 t note 500,000 will give you 50 quintillion at 50 quintillion and you want 10% of that to be your structure payout payment will be 50. or excuse me five quintillion per year. Obviously, that would only last 10 years. If that was taken out from the primary principle, but it's not. They put enough in that structured Pal account on the Qf s for you to have your five quintillion payment every year for five for 100 years, which would be 500 quintillion. Now you double that with your two Zim, and you're going to be just fine. You'll never spend it all and it's okay. Why do you need that much. We don't know what we want to do five or 10 years down the line or even two or three years when these new technologies come out. If you haven't planned to manufacture and do all those and bring them to the marketplace, then you can't participate in that, but you'd like to but you can't, because you didn't ask for the higher rate. And that's all we're doing is we're preparing for things in the future that we do not know about. So We'll have money in my account ran out. No, it won't. If you do it right. It'll be there for the full 100 years. I hope that's helpful for you. But you do need to read the structured payout in order for you to understand what's going on. Okay, next question, Tracy.

 Tracy 05:17

I said previously that I gave 200 trillion Zim, but I also have 1 million dinar, what should I request for my Iraqi dinar, if I request the 500,000? For zoom?

 RG 05:34

I don't know, I would just simply ask them the highest amount that you have available for me. leave it at that.

 Tracy 05:42

I was listening to you. And you stated that we could request one to 2 million American money per Zim dollar that we have. Did I understand that correctly?

 RG 05:57

Yes, my, my process here is to go inside into your heart and kind of feel what you want to do for humanitarian work. And then ask the heavens yourself whatever you want to, for a number that you need for the rate. And I'm saying if you receive \$500,000, and that's a good, that's a good amount. In fact, I would say that's the beginning. But be available to go up to 2 million or 5 million or whatever that you have been given to, as the rate that you should ask for. It's all personal between you and the lions agent who is your representative from the Alliance there. And they will know who you are. And they can kind of tune into that sort of thing, but they're not going to tell you, you have to ask for it. They will never tell you what you're going to get or give you an idea of what you should cat. They'll counsel with you but it is your decision. You have to ask them. And when you do, you'll probably get 2 million, 3 million, 5 million whatever you want. Whenever you receive together,

T

Tracy 07:18

what is the trust in comparison to the mother lode and operations account? Is it an alternative to the mother lode account or the operations account,

R

RG 07:29

you're taking my words and then creating an account out of it like an operations account a mother lode account, it's it's my way of dealing with the things that I'm going to do an operation account is the one that will have to take all of them the money that I'm going to be dispersing, the motherlode account is the one that I is over there. And that's the mother lode account is the one that it receives in my way of working it is the the account that receives the the quarterly or annual payment from the structured payout account. I don't want anybody to know anything about that account. So I just called the operations account to transfer money over to the operations account. And that's the one that I use for my for the things that are going on on a daily basis.

T

Tracy 08:26

Okay, next question on legal websites I read or I read that the beneficiary is who the money actually belongs to. And the trust store is the person who manages it, would I put myself as the trust store as well as the beneficiary, then

R

RG 08:44

you're getting into some the legalities of trust that and I'm not an expert at it. I just know to start a trust, you have to be the trust store. Who we going to create the trust for is the beneficiary. whoever you want to manage the assets of the trust is a trust or a trustee. And you can have many trustees. So I'm not sure too if I understand fully what it is. Now, if I was a beneficiary, a person who had a beneficiary account to the platform, I would be asking, if I had a try, if I wanted to make trust, I can make six trust as a beneficiary. And they can be for whatever I want it to be. It just has to have the legalese in it. So that if I set up an account for a minor child, and then I go off and spend stuff over here for myself or the family, whatever is that that information in the trust is there the documents in the press documents are going to allow me to do that. If not, then you're breaking your trust and then you can be sued by your bank. fishery for doing spending their money. So you have to set it up properly so that you are within the bounds that you wanted work with. So be sure that it's got legalese should be sure that all of the stuff you want is in there and the way that you want to manage it or be the trustee for it. So you can be a trust or and a trustee. But you can't be a trust or the beneficiary and the trustee, you'd have to have separate people.

T

Tracy 10:37

And there are websites that you can go on to see examples of what a trust looks like. But please don't get confused between the beneficiary six trust that they can have within the Lw s system versus an individual or family trust that you are going to have prior to your redemption appointment. That is why I find is the is the biggest confusion is some of us are you are cashing in our Zim and currency in the name of a trust. And that is more for privacy purposes. The beneficiary trusts are essentially ways to give or save money for other things. And those are not for the benefactors as we are but they are for the beneficiaries that you sign up into the loved one society RSS platform.

R RG 11:34

Okay, nicely put dressy. Yes.

T Tracy 11:38

Thank you. And the question, why would beneficiaries need six trusts

R RG 11:46

more money for them?

T Tracy 11:48

Well, the download for beneficiaries trust follow the main download.

R RG 11:54

When you say the main download, it will be your main account and you're adding to it so that the trust number one will add 10 cents to your main download. So you'll be getting two cents, or 11 cents for your download. Excuse me, I'm not saying they're great. Instead of yours 10 cents for the first one. And then there's also 10 cents for the second or for the for the first trust. So you now you're a beneficiary having one trust, you're going to get 20 cent download. Yeah, another trust. That's another many misconceptions.

T Tracy 12:32

Two separate accounts, though, correct. So one, oh

R RG 12:37

isn't going to end? Okay, it's okay, I see it with the province. It's an accounting ledger. Everything that goes through there has to have an account. And that's forward, everything that goes through there has to have justification for it being there. So there will be as part on the website that you have you add your chest to, and that will show how much money is coming from that trust. Now, the collection of all of those money coming into the downloads is kept in one low one location. But there's entries in there that indicate where the money is coming from. But it goes into your cash report. And, and that's where you draw your money down from that you want to spend.

T Tracy 13:36

Okay. All right, moving on. Let's hope I am a bit unclear as to how the bond Dean works. Would you please explain using a numerical example of how much money the benefactor would transfer in the RSS program? If it's \$144 per day, how much would the benefactor put in?

R RG 13:59

Again, we're not clear on benefactor and beneficiary a year, you as a benefactor going to be receiving one hell of a lot of money, because on \$144 per day, so if you ask me a question on as a beneficiary for \$144 a day understand what you're talking about. If you talk to me about benefactor, receiving \$144 a day, then I know that you have some confusion about what's the difference. The \$144,000 or \$444 per day is an entry into your account from the platform. That money is paid by the benefactor benefactors master account. So that \$140 just accumulates in there. How many people you have in the air would determine how much money you have to have in your master account to cover anybody who wanted to draw their money down. Now, that's not a big thing to do, put in a quintillion dollars in there. If that's what you feel you'd need to do, or a quadrillion, or in the many in the beginning, some few billions, I don't know what you want to do. But I do know that you will have plenty of money to take care of it if you just manage it properly. But your management has to be looking into the future, to know when people are going to draw their money down to their account. And so you just have to be way ahead of that. So that you can take care of everybody that's involved, and have the money for them to draw down to their accounts. Show. I'm not sure if that's asking answering the right questions, because I'm confused when you talk about \$144 a day as a benefactor. If you can see what I'm trying to say that there's where your confusion is benefactor beneficiary, separate those two in your mind. You are a yxm benefactor, who has a master ID number in the revenue sharing solutions platform, you're not a beneficiary, your money comes from the Alliance, through their structured payout payment

T Tracy 16:39

is the key has to be the only system by which financial transactions can be carried out, or will there be an alternative system for purchasing goods and services.

R RG 16:50

It is the only financial service that will be in effect. Now, if people are still going to do Bitcoin and things of that nature, they can do that. But it's not part of the quantum financial system, please understand that. It's not going to be housed in the quantum financial system, it will be its own separate financial entity like it is now. When it if it's going to survive, if it's going to continue. That's has nothing to do with the quantum financial system. In the quantum financial system, we have gold backed currencies. And that's what we use for international commerce. And in her state or in her nation con commerce. That's the only system and that's why if you're not part of that, how do you trade with people, if I go into a merchant, I have my card, he has his account and the quantum financial system I have mine is just a simple account to account transferring the quantum financial system by initiate it don't need any third party to do that, for me, fully capable of myself. And I go in and make the changes and I've transferred the money over to made the purchase it's complete. If you have something else like Bitcoin, and that's a whole different system.

T Tracy 18:18

Okay, do you know when and where the appointment will take place? And when we will be able to start?

R RG 18:26

No, that's just the answer to that question. No, I don't know. We're gonna be contacted when it happens. And there will be no prior telling that it's going to happen, it will happen and it'll be a big surprise. Make your appointment, go into your appointment. There you go. Keep in mind, you're going to get your first structured payout at the

appointment.

T

Tracy 18:55

I am from South Africa and need help on two things, please, where and how can I buy zoom. I also don't know the account details to pay the \$10 joining fee.

R

RG 19:06

Again, you're confusing benefactors, and beneficiaries. The \$10 fee is registration on the platform that makes you a beneficiary. And that's not available yet. So that's not going to happen. And we don't know when the when the appointment is going to happen either. Just like that.

T

Tracy 19:32

And where did they buy Zim in South Africa?

R

RG 19:37

Well, the only place I know to buys him is on the internet, eBay. A base got some good places. If you were to email and say I'd like to buy them that I can email back a link. But I can't say it out loud or he'd have 1000s of people or whoever's how many buying them from me, and just overloading. So there's three or four places on the on eBay where you can buy 100 t notes for just under \$4. It cost you a couple of dollars to send it. I don't know what they'll charge to go from. These are here in America, I don't have much to charge to send it to Africa. But that's a good place, but just got it eBay and see, check it all out.

T

Tracy 20:32

And I saw something fantastic that South Africa is, there's a court thing about getting rid of the central bank, I think it started yesterday. So that was pretty cool. Okay, I am trying to understand how the golden age of man fits into what I read in Scripture. And your opinion, is this golden age, what is written about in Revelation 21 through three where the devil is chained for 1000 years.

R

RG 20:59

It's similar, if it's not the same, I don't know how to interpret those things. And as we come through our lives, and all of a sudden, there's this golden age, if that's part of a prophecy and Revelation, and that's fine. They're just telling us something was coming. And I believe that that the golden age of mankind is where we say don't be bound for 100,000 years, but you got into the 1000 years and then there's a midnight and Okay, now Satan is bound, what's going to come out and do your that at that level, you're in the fifth dimension, he's bound down there in the third dimension and bound in the third dimension. And I'll just throw a few lightning bolts out him and and get rid of me. I don't understand all of that.

T

Tracy 21:52

Okay, I am trying to you mentioned that you thought everyone should have newer cars no more than five years old. I'm thinking of all the mechanics who would make a living fixing older cars plus parts manufacturers also have new technologies? What would these people do?

R

RG 22:10

What is McDonald's going to do when there's nobody that wants to flip their hamburgers? Because they can make \$28,000 a month?

T

Tracy 22:23

Hey, Mcdo? Ron, that no, it's not gonna be

R

RG 22:27

that's absolutely what I'm saying. Yeah, I think as going to be the same as it was before, you don't put baby parts in your meat and then expect people to eat it. As the same way with many of those larger organizations, those larger ones, I would never put any money in any of them. I wouldn't support them in any way, until I knew for sure through the Alliance and the connection there, that they are not part of the pedophilia rings. And those who are involved in destroying 90% of the population. We've got our own due diligence to do when we get our money and not be irresponsible with it and start supporting things with people that are really bad. We're going to get some help doing that through the agents from the Alliance. And we're also not going to be able to transfer money to places that are using it for bad stuff. And that's the quantum financial system. So things are going to change, and new technologies are coming are all kinds of things. So as as you go along. You don't have to be making a living doing something that's not going to make you a living anymore, then you change and you go somewhere else. Is that a problem? I don't think it is. I think it's just a way that people are resisting to some degree, the new changes are coming. Just swing with it. This gives me an opportunity to, to, to sculptor things in this element to establish an arts place. There's all kinds of things that can happen. You don't have to be worried about a job. There's hundreds of things that are 1000s of things that you can do.

T

Tracy 24:24

I am listening to your training on the international commodity clearing houses talking about helping farmers, I want to encourage new people to become farmers. This doesn't fit with how you take the records of what a farmer has produced in the last five years to predict what they will produce. A new farmer doesn't have the records. So how can we utilize the programs to encourage and include new farmers?

R

RG 24:48

Well, I'm not going to be able to solve all of those kinds of problems. You are the Zim benefactor, you are the sovereign who is taking upon yourself The responsibility of this money, how would you do it? Can you figure out a way to help new farmers? Or are you going to stand by and say, Oh, I can't do that, because it's not in the program. You are the Zim benefactor, you are the sovereign humanitarian, solve the problem, it's your money. We're just a structure. You've got to use your own intuition, your own ways of doing things in harmony with the

platform's and with what other people are doing. But these are the kinds of if I had a farmer, a person who wanted to be a farmer, I'd sit him up on the land, I'd give him an income that, you know, down with the fiscal year sign an employment contract with me, amid an employment contract, he's going to have somewhere around \$500,000 a month that he can do anything you want with has nothing to do with his income. from the far It'll all work out. Don't worry about that, you'll you'll figure out the best ways and we will figure out as loved ones decided the best ways to do it as well.

 Tracy 26:18

Okay, I love this question. When you miss the call of the Alliance, will they contact you again? I never answered the phone. If I don't recognize the number.

 RG 26:28

Look at the caller ID it might have a reliance on it. I don't know what to tell you. Of course, they will. They'll get ahold of you some way, one way or another. You know, people could come through your walls, who knows? You're not answering your phone. I've been trying to call you for two days now. You know, oh, gee, didn't know. Let's make your appointment so we can get this taken care of. They're they're there to help us. It's not a now or never, you are the humanitarian is going to be doing the work. They need you just as much if not more than you need them.

 Tracy 27:15

After the redemption interview, and the RSS is online, when referring potential shareholders or beneficiaries, rather, can I just put the user ID on my referral card and not a name?

 RG 27:30

It's your card, you can do what you want with it should put the name on that you're using for the master ID account. Or your ID, your beneficiary account. username that's that you're using is to be consistent.

 Tracy 27:52

Do I correspond via this email as to whether I have properly signed up to be a benefactor? If I don't qualify to be a benefactor? Can we become a beneficiary?

 RG 28:05

Well, the answer is to become a benefactor you need to have him and go through the appointment and ask for the higher rates, otherwise, you don't have enough money to participate. Now, that's the only qualification to become a benefactor unless you're not a humanitarian or unless there's other things that the Alliance knows about that would disqualify. But anybody can become a beneficiary. It doesn't matter if you're humanitarian or not. Anybody can become a beneficiary and have a beneficiary account was Express. We're not going to police it. If there's a problem with that particular individual. It will be handled by the Alliance and the quantum financial system, that using money for the wrong things I've just blocked her account or blocked to transfer.

T

Tracy 29:01

My question is mainly about the micro economic parts of the economy, especially as benefactor services become known. I am particularly concerned whether new inventions or innovative solutions will be able to attract funding away from existing solutions.

R

RG 29:18

I'm not really sure what the question is to attract funding away from existing solutions. If we have the best solution, would people not want to come with us? What is the solution that they want? They're looking for money to do a project. There's normal sources now are going to want a piece of the action. We don't make money. We don't invest in people to make money ourselves. We invest in people to help them to fulfill their, their desires, their wishes. We get our money from the other side. We're getting 101.25 quintillion. Every, every quarter, do we care about money, banking money, let's let's be realistic. If I have somebody that wants to an invention, he gets all of the money. But I just don't want him to be squandering it off and doing things that are working to gaming the system sort of thing. So he said that episode that he has certain partners that are represented from you in the program. So you can set that up the way you want. But be sure that you do so appropriately. I'm hoping that you understand that. We don't have any competition. We got all the money that they need. And we don't need a return on that. That's the bottom line. Go ahead.

T

Tracy 30:57

Okay, if a plumber decides to go out on his own, he might not be able to match the proposed fees of other plumbers on our ECS. I assume he would need to approach one of our benefactors or their public organizations and ask to be put on an ACS unless there was something on their office site, How else will he know who to contact if there are 10 benefactors looking after the area? Well, there needs to be 10 contact centers, wouldn't that create a possible demand for dodgy centers or even for benefactors to create a downward spiral for the cost of plumbing services so they can attract them? So these are so I'm

R

RG 31:34

not sure that you're? Yeah, I'm not sure that your your assumptions or your conclusions are accurate. We're here to help people not create competition. Everybody's gonna make all the money they want. We just need plumbing. We just need electricians electric King, whatever you want to call it. We just need people to continue to work. Is there a problem with that? I don't think so. We'll solve those kinds of problems. Next.

T

Tracy 32:09

Thank you. What is your opinion about the last post of Simon Parkes and Charlie Ward about their concerns regarding greed respectively, is the RV really in danger, as they told us,

R

RG 32:20

Charlie and Simon are not talking to the real world looking at for the humanitarians that are serious about not only feeding the hungry, and in clothing, the naked and giving homes for the homeless, we're changing the entire

economy of the world, we're getting tremendous amounts of money. That if we all if we put it all into feeding the hungry and clothing, the naked and giving homes, or we're going to be out of business in a very short period of time. So what we're doing is changing the way the economy works. And you can see the programs, they are graduating into a new economic system. So some of these things that you're concerned about, are, are not going to be relevant. As we move forward, we get our money and move forward. You'll see that as as a truism when we get our money and the magic of the Spirit moving upon people, changes the way that they think changes the way they live, they live. We're going into the golden age of mankind, we're going in, we're ascending into the fifth dimension, where we create by thought, there's a lot of things that are going to happen in that transition. Nobody's going to be left behind. It should be sure we understand that. We're in good hands.

T

Tracy 34:00

I will need to have some funds to take care of some immediate personal things when the currencies are v. Would it be a good idea to exchange a little bit of my Dong and our dinar to take care of some of these immediate personal means before my Zim redemption appointment?

R

RG 34:16

There's no difference between your Dong and dinar and your Zim redemption appointment. You do it all at all at the same time. Yeah, and they have all the money you want.

T

Tracy 34:29

I assume Wait, let me phrase that is the Loveland society system been proven and supported by the QFSQ Fs

R

RG 34:39

doesn't exist. And when I say it doesn't exist, because it's there waiting for us to be it to be activated. There's there's nothing improvement. No. We just have the nod from the Alliance. So this is the program one of the programs that they can put get behind and help us. Joe, we have an enjoyable position with them. But as far as guaranteeing anything or anything like that, I can't I can't help you.

T

Tracy 35:18

from what I gather my research there are going to be fiction Qf s portrayed to be the authentic Qf s. How do we know the difference is everything will be handled online. I don't want to be duped. The Bible says my people die for lack of knowledge. Am I expecting to know the difference when that time comes?

R

RG 35:38

Well, the only way you're going to know the difference is you're looking at their fruit. It's in the fruit. If you've got a dead tree, you're not gonna get anything. If it's if it's a bad tree, you're gonna get bad fruit, you don't know what's going on. We're facing that situation now. It's it's apparent that there are two quantum financial systems. One I call 3d and the other is five D. The one that just the 3d uses, and a CIPS cross border interbank payment system that is

not of the real quantum financial system, period. And they're setting up other things that have to do with the money. The Quantum financial system has its own money has its own gold backed currency. Why would you set up something else is so inferior. Now these are the things that I look at, I say it's already happening. Choose the one that you want to be a part of.

T Tracy 36:50

Well, contracts are written using quantum language by postmaster restful Jay Gould,

R RG 36:56

Russell j gold, he's doing his thing. And trying to establish things that he feels are solutions in society. I don't want to take anything away from him. But what he's setting up, and all of the stuff that he's doing, has to do with the old contracts, ways of doing things, and you've got to have certain language, you got to have this. This means this and this means that so the contract has to be written that way. Well, you take that into a judge and the judge says, Yeah, mmm, you know, I read through it, and yeah, that's good. Well, if it's not good, then what happens? So we're coming out from underneath all of that garbage. And I call it garbage, because it's set up to trap us. If you think that the the saara, and the new way that we're going to work is going to impede all that stuff. Then why would we need to recondition retrain whatever you want to call it, attorneys, and judges, all of that stuff is going away, because those kinds of things are not going to be a trap for the citizens who don't study law. Those who study law to take advantage of people. Because they've set the system up to do that. We're going away from that. I'm not going to be trapped by some lawyer or judge. My stuff is going to be pure in the quantum financial system in the quantum consciousness that is, is going to pervade our way of life in the future. So I'm not sure I I'm going to go along with Russell j growth and setting up that bank that he's got. I don't think that's going to work.

T Tracy 38:57

before knowing about your program. Sorry. You done. Before No. program, I just I purchased six Zim notes, I gave one to each of my four children and kept to from myself, will we be able to share an appointment? Or would we need to be contacted separately? If we share an appointment? Would we each need our own binder? Or can we share one.

R RG 39:26

It's an interesting thought. And there's an evolution of my thought on that because in the beginning, I didn't understand fully the concept of the humanitarian, and the NDA. And all of those sorts of things that we are now fine tuning to the point that we, we want to set up what we're doing so that it's most effective, not even in a family and you you get your children involved. They may not be humanitarians. So you give them you've already given them exam, they go And they get, they ask for whatever they want, and from their heart and so forth. Are they humanitarians? Are they going to do the right things with that? It's not up to you, it's not up to me to discern that they will go into their appointment. And these will be vetted as a humanitarian. If you go in together, it's like a chain. The chain is only as strong as the weakest link. What you get is going to be determined by the the humanitarian who has not fully evolved as a humanitarian. So are you going to let your 18 year old son who's still trying life out, see where I fit? Become the humanitarian that's going to determine your money. I believe each person should go in with their exam that they have be vetted. And and establish a relationship with the person on the other side of that table who's going to conduct your appointment, that is going to be a representative, representative of the Alliance, that's going to be the friend that you have. So you want all of your five children or six children whatever answer these are family have their own, or do you want just one, you want your family to get a large sum of money or according to

what the lowest will be get. Those are the questions that seem to be are, are the ways that seemed to be evolving as we get closer to the time when we actually have our redemption appointment. In my opinion, if you're the humanitarian, you gather up all of the humanity, all of the Zim, you go in for the appointment, and you don't have to share. You don't even have to, or maybe you're going to share this what you did. But you're in the one in control of the larger amounts of money. And your children don't need to have all of that money anyway. They can evolve into becoming humanitarians under your tutelage, under your humanitarian stewardship. I like that better than giving away and having separate and then go in for a one appointment. And those are the reasons why.

T Tracy 42:31

Yeah, that's what I'm doing. Go ahead. Okay, where do I sign up for the med beds?

R RG 42:38

When they're available? Don't know where when? Question,

T Tracy 42:45

I plan to have children at some point during this process and will need to take a temporary leave or pause my responsibilities for a period of time while I raise my children. Would this be alright? Could I nominate someone to manage the community centers in my absence? Would anything happen to my finances,

R RG 43:02

you're not going to stop live just because you become a humanitarian and have a lot of money to deal with things. There'll be people who will pick the ball up for you and run with it and do a really good job. You, some people have a management style where they've got to be in there and, and manage all of the minutiae. And other people say, Hey, I'm hiring you, you take care of it, I'm going to get the reports to see how you're doing. And I like that management style better. There's a way for you to go ahead and have your family that is perhaps one of the most important things that you can do. So everything else just has to fit into that. You're never going to have a problem with the Alliance for that. For sure.

T Tracy 43:51

I would like to channel or talk to my angel, how do I do it?

R RG 43:58

The most important thing is to know that you can and although you don't understand right now you are communicating with your angels. They're trying to communicate with you and tell you things. And they do that the best way by using your mind and coming up with thoughts. Once you learn how to know when those thoughts are coming from outside of your essence, as in an angel or something of that nature. Then you're well on your way but it there's it's not a slam dunk thing. But it happens and it can happen and it will happen as you raise your vibration. And there's things that are going to happen to us from my understanding that we'll get blasts from the sun that will

change us and and that will change our bodies and opportunities so the veil is going to become very thin and we won't we will be able to see through the veil and Have communications through the veil. People that the third and the fifth dimension don't have any trouble at all. So that's where we're moving into your soul, who I'll call it as oversaw, that's probably a better way to look at it is taking care of the thought processes of your life, you have a proper purpose for being here. And that purpose is the main thing that will determine what happens to you and your life. The other stuff is really good for experience. But you came here for a purpose. And that purpose, you will find some point as your guidance system, your inner guidance system gets you to the right place at the right time. Until you become aware of that, then it's something that's happening to you instead of in something that you are more control of that you get communicated through your feelings. Understand that when you say, I would like this, I asked for this. The heavens are already moving, they've rearranged the chairs, they've rearranged everything for that to take place. And then you come along and say, Oh, I don't know if I'm worthy of that. And they always put the chairs back is not serious yet. So much of what's going on in your life, in respect to the heavenly realms is dependent upon you and the attitudes that you have. If you've never heard of a program that helps you to learn, if you've had one, and you didn't do anything about it, then that's a waste of time. So if you have some of these good thoughts, these good programs, these good things that are coming into your life, and you're not incorporating them, you're basically saying to your guidance system, I'm not ready for this yet. And then it won't happen. But if you put yourself out there and do everything that you feel is necessary to do it, then it gives it a chance to happen. And if it doesn't happen right away, don't worry about it, just persist with it. You have the desire that creates the desire creates a decision that that's what you want to do. And then your ability to continue. And use discipline to get it done is the way that you progress through life, you master the three DS decision, or desire decision and, and your discipline. Those are 3d worlds stuff. That's what you have to do to master the third dimensional realms. And you can do it, nobody is going to stop you. You can go as fast as you want, or as slow as you want. Just be positive, raise your vibrations, don't think of things and do things that are mean to people ever?

T

Tracy 48:23

How do I get a master ID for others to sign into? And can I invite certain people to sign in?

R

RG 48:33

Master ID for others to sign into? Why would you ever do that needed to learn a little bit more about what the Zim benefactor is? It would never give away a master ID number. Never, ever?

T

Tracy 48:46

I think what they mean is you have they have to have a referral number. So my guess is that they're talking about their referral number that goes on the back of the card. Right?

R

RG 49:04

Yeah, okay. If that's the case, in the back of the card, that's, that's your referral, meaning that you have referred them into the program. And you get the credit for it. You get the \$50 and one person that's joins and then you get another and you get another Penny? I'm not sure if I'm saying or if I'm really understand what the question is. Can I invite certain people to sign in? Well, yeah, you refer them and give them your, your personal ID number or personal identification number. And that's the only way that they can sign in and using that anybody can sign in. If you have a referral. That's the point of getting in. That's your ticket to get into the becoming beneficiary.

T

Tracy 49:51

I am interested in community centers and real estate listing services also will like to enter my children under my number can I sign someone up without their knowledge,

R

RG 50:06

I'm going to say no, because I think that it's important for each individual to do me in control that would be the Sovereign of their life. If you're going if you want to help them, talk to them, say, this is what I like to do, I'd like to do this for you, and let them make their own decision. And then oh, yeah, I'd like to be involved in that mom or whatever. But it has to be from them asking, if you if you don't let them ask if you don't work at around for them to understand what you're doing. I don't think it's appropriate.

T

Tracy 50:46

How is benefactor being paid

R

RG 50:51

through the structured payout program. And they've established that the beginning of worth the airport redemption appointment, you'll need to read the redemption, or the structured payout document. But I think that there's some language problems here that you're not really understanding what a benefactor is, or how they're going to get paid. You go, there's a whole system for that. So do the research. whoever sent this, do the research for yourself, get acquainted with the whole system? Because if you don't, you won't be able to function properly. There is language problem, and we're trying to work with that, but but everything's in there. To understand

T

Tracy 51:43

in the RSS, am I as a benefactor the only one to put the amount of money in what others that sign up for this? What about the folks that get to sign up in one day at an extra Penny? per minute? Do I need to add or does it automatically.

R

RG 52:03

If you have somebody you want to join with? revenue sharing solutions? You give them your referral, your ID number, you give them the referral, which is giving them your ID number that they can sign up under? So your that's your referral? Is that what you're worried about, as azim benefactor you have your master ID number. And that's how they get paid. It's all done automatically. It's a it's a ledger system and account system. That's all the loved ones society, or excuse me, revenue sharing solutions is it's an accounting platform. So everything is automatic in there. Unless you change it, as is in benefactor, in going certain things, you can change but it's all automatic.

T

Tracy 52:54

So here's an example of a question. So pretending that their group is like the ninth generation down. And an eighth

generation person talks to some police or government or IRS or etc. And, or somehow one of them on the ninth level wants to check this program out what happens? I don't understand that question at all. Ron, do you?

R RG 53:22

I don't understand the question. Okay, let's check it out. You check it out the way it is. Right now, it's not going to change.

T Tracy 53:31

A beneficiary when signing up, the Qf s assigns them automatically in an account number, which is gold that is there a box to put in the info on a bank or service center that where they can download the money to can they go to the site and change the address when they want to?

R RG 53:48

Once you get in once the platform is activated? All of these questions will be the answers to these questions will be a lot easier to see a beneficiary signs up he gets an account in the quantum of it in the RSS account. He gets back office or personal office and everything like that, with his ID number he goes in and manipulator can find out what he wants to do. And then in that account, that is automatic when you sign up or register that's yours. All accounts in the quantum financial system have been set up by the individuals who own them. Now you have to activate your shell. Now, when you go into revenue sharing solutions, and you have an account in the current financial system, you just signed it up on there and then that's when the money is dragged down it goes to the computer will put it into that account in the quantum financial system. Now, I'm not sure I'm understanding the service centers financial service, you're saying bank or service centers, they call it a financial service center can They download money into your account, no money has to be into into that account from what you have done. The clerk or the the person who is at the cashier, whatever, add the financial service center us down what, who you are and you'd like to, maybe I'd like to get some cash or something like that. Or I'd like to put some cash into my quantum financial system. They got to know that that what your account is to do that. And the account knows that you have been given quantum financial system entity knows that you've given them the money and the has authorized and you have authorized them to put the money into their account or take it out. It's a very simple thing to do. So yes, the last question can go to the site and change the address when that you can do that whenever you want. You're in charge of it. Nobody is over you.

T Tracy 56:10

Don't mean, we may have to use a bank in the beginning until the bank until the financial service centers come online. Will some banks get curious where all this money is coming from? What would you say or do about that?

R RG 56:24

Okay, let's I went to my appointment, I've got my big money, it's in my account in the quantum financial system, can I transfer money to an account in a bank? The answer is yes. But why would you put any very much money in that account in a bank? Why would you do that? What is the desirability? Well, it's convenient. So I've got a debit card, and I got this, that and the other and, and you can do that. And in the transition between the bank and the

financial service centers, it's going to be it I don't believe in my mind, I think it'll be seamless, people won't really understand what's going on in the bank certainly know what's going on. Because the banks have been are going bankrupt. The the quantum consciousness the Alliance has, has eliminated the bad people in the banking industry, most of them if not all. So even the the tops of the banks are gone. Those who have in middle management who are promoting that those kinds of negative things for banks, they're going to be gone. And you get down into the purity of people who just doing a job, or they're not part of an organization or an agenda that's, that's hurting people, or just being good bankers. Those are the people who the Alliance is preparing to become financial service centers, employees. They're already on this. They already know what's going on. They already know that. There are certain Zim benefactors who have got lots of large sums of money that they didn't know what they were going to do. And then we, we tap them and their money into the the financial service centers industry, they may take over as specific bank, Wells Fargo might be bought out by somebody, and then you use your money to put their people under financial under employment contracts, you pay them through the RSS system, you pay all of the bills and everything for the for the assets, and keep the lights on and all that sort of stuff. And you get to do that without getting in money and return. If you're not available and don't have the money to do that you can't be participating in that, at that level. Is that something that's important too, I think it's important. I'm going to be a part of it. I'm also going to be a part of manufacturing antigravity machines. So there's a lot of things that are going on that can be helped out with the fact that we got the right money at the right time.

T

Tracy 59:23

If each account also gets 10 cents a minute, then that would be about 52,000 account or with six trusts. And extra over 315,000 a year. Is that correct?

R

RG 59:37

I think you're a little low on that. That's 300 and in the 40s 40,000 it's just math. Plenty. Yeah. Well, let's call it a day for now. And we'll This is the ending of part one and we'll get back to part two a little bit later. I'll get him both up. As soon as We can thank you everybody and again, thank you Tracy for your great help. Appreciate it. Have a good day.
