#### **SPEAKERS**

Ron Giles, Tracee

Ron Giles 00:00

Hello humanitarians. This is Ron Giles. I'm here with Tracee and we're going to do a question and answer session. It is November 15, halfway through 2021. So, with that introductions, let's go ahead and begin our question and answers. First one, Tracee.

Tracee 00:20

Um, okay, so I wanted to know if I had 250 t's in notes, if this was acceptable?

Ron Giles 00:30

Yes, you're looking for the higher rate, that's all so that you have plenty of money to do their RSS program. So that's the determining factor, the number of rates is important. Yes, but the number of Zim that you have is important, but it's the rate that you asked for the exam that gets you up to where you need to be to do the RSS program and have some time. Next question,

Tracee 00:57

if one benefactor wants to run his projects, and use his 80%, of redeemed amount to his own projects, and use the rest of 20%, to RSS, can that be done? Or does he have no choice about how much he wants to use for the RSS?

Ron Giles 01:16

Okay, there's a presumption on this question that a problem that I would like to address. Get away from any thoughts of 80/20, you get 20? Or get 80. And you do your stuff with this, this is not an accurate way of thinking is not right. You'll never be able to spend 20% of 1.25

quintillion dollars in a in a quarter, you will never do that. Unless you're around for a number of years. But even at that, why would you think that you needed to spend 20% on anything? Now this is this is the problem that people have is that they're trying to allow somebody else to dictate to them. When that is their responsibility, it is their stewardship responsibility, it is their choice. So these kinds of questions. If you're having these kinds of questions, then you need to go back into the and look and see what is reality. Now, when you ask me, if you have, you got to put more than 20%, or at least 20% in to the RSS program, you're missing out on you as the humanitarian. Love Won Society is a platform, it is a structure. It's there for your use, it's like a car, you go out into your car and you go where you need to go with it. It's a vehicle to get you to do certain things that you perhaps couldn't do until you join with love won society, or to do something similar to that with some other organization if there is one. So my point is, is that you as the Zim benefactor, you put up a what we're calling a master account that's connected to the RSS platform. And that is account is where the platform computer will draw down when somebody needs their money. Where do you put money into love won society always you have control of that master ID or master account, Master bank account or QFS account. You just need to be sure that that's got sufficient funds to take care of the people's needs, the beneficiary's needs, and for the contracts that you're going to sign that's going to be a huge amount. Now in there is the ability to do whatever projects you want to do. If you're going to be with love won society, you have to sign a contract that you'll pay for those people you'll pay the responsibility or the liabilities that you have created by becoming part of love won society. There's you don't put money into love won suicide we don't need your money. It's what you're doing with love won society that needs the money and that's what you have to fund and you do that by contract. You do that by agreement. Once that agreement is signed, you have a clear track of what you want to do. You know what's required of you as far as love won design is concerned. And then you get to do whatever you want to do. The work of humanitarian jobs is in the community. That's what the CAC program is all about. So, if you use the CAC program to initiate your projects, in a community, any community that you want, that's what this is all about. So get away from anything to do with a 20% going for RSS. You can do your own budgets, but there's nothing that's required except for the fact that you fulfill the responsibilities you have when you create a liability by becoming a benefactor. So we'll go from there. Next question.

Tracee 05:48

When a benefactor wants to cancel a contract with love won society, can he do that too?

R Ron Giles 05:54

If you sign a contract, how are you going to get out of it? Why would you want to get out of a contract with love won society? You're creating yourself a liability. So you just turn your back on all that want to cancel it all out? What does that do to the love won society? What does it do to the rest of the beneficiaries? Who have to pick up the load that you're carrying? Or created? Oh, this is the kind of question where I really have some serious problems. That means that you sign a contract, and it's not in your integrity to continue that contract. These are the kind of people we don't want anything to do with. If your integrity is not in place, you'll cause problems, not only for us, but for yourself. Now, there's another point to this. If you go into our contract with love won society, with this intent in your heart, you think you're going to get any money from the, from your redemption of funds, you don't have integrity, they're not interested

in in giving you money. So I don't know how to deal with this kind of thing. Even this question is, how do you get out of, do you know what a contract is? I will do this and you will do that. This is we come together we signed the contract? How do you get out of a contract with the you just signed? I'm not sure where this question is coming from. And to be honest with you, it's a little disappointing to me. Next question.

#### Tracee 07:45

I am writing and concern about the map identifying city locations of potential benefactors and potential safety and personal security concerns. Although you are intending to identify geographical gaps, where financial services and help as needed, are you not also telling the baddies who are trolling this love won society where they can begin looking for cash flowing activities and potential targets? Please address this as safety and security of your followers must be of the highest priority?

### Ron Giles 08:21

Well, I I agree with what you're saying. Except we're not going to get the funds until these kinds of people are gone. There's a cleansing of the earth that will take place before we get our money. So when you're when you're focused on the bad people, then you're asking bad people questions. Now, on a map, there will be no names. There will be no locations except for the city maybe where and we're not going to say how many benefactors are in that city. Or just say it's got benefactors. And there's no names on it. So where is the problem? Have I said that we're going to put names down there? No, I have not said that. Because I have no intentions of doing that. And we're anonymity is the major project that we're trying to do. That's why we have an NDA. We're trying to protect you. How you do, how you deal with your information is up to you, but love won society will never be publishing your name as Zim benefactor, and there's people that are going around the cities and cities. I mean, how many cities in the world how many of these people are there? You know, we're being cleansed with these kinds of people and we're not going to have to deal with these Things, eventually there will be a transition. And yes, in the transition, there could be some problems. But they will be eliminated, once they're identified, they will be eliminated. And they're not going to be in our midst, we're going into the fifth dimension, sport, the third dimension, people will be separated out from us. We don't have to drag them into fifth dimension. They don't want to go. And if these two kinds of behavior, then they won't go. So things will change. And there's going to be a lot of it those changes, we'll find the security that we're looking for. And the anonymity will always be there. As far as love won society is concerned. That's my promise to you. Next question.

# Tracee 10:49

Yeah. And we haven't even said if we're going to going to publish this for anybody to see, it may be just for our eyes only right?

# Ron Giles 10:59

It may be coded in the back office or something somewhere.

Tracee 11:03

Okay. Next question. On your website under suggested appointment preparations, it says 15,000 cash to be given an exchange, can you please tell me what we need the 15,000 cash for?

Ron Giles 11:16

Whatever you want to use it for. You don't want it, you don't need it, don't ask for it. It's leftover from when we thought we'd have to have a 90 day wait. And the concept of 90 days, between the the appointment, people have the idea that our money is going to be used and give us interest on it. It's not true. There's no interest involved with it. So we don't have to wait 90 days, or getting the full payment, the first full payment at the appointment. Now, if you want \$15,000 And that's fine. It'll come out of your mouth. But if you don't then don't ask for it's not a big deal. Next question.

Tracee 12:02

Can I officially register soon? And what's the time frame to get started? My husband is a certified residential appraiser. We know brokers agents and developers in Nebraska. I want to be a director I think.

Ron Giles 12:17

Well, that's an interesting you want to be a director. I thought you wanted to be a Zim benefactor. Only Zim benefactors that will be doing this. Each individual's Zim benefactor will be doing their own. It'll be centrally located and all of the things properties will be on a national listing service. But the the gym benefactors get the brokers and men pay for all of the things that are going to be happening in it. So if you're not a Zim benefactor, you won't be involved in in the real estate. Unless some Zim benefactor hire as you can take a lot of money.

Tracee 13:04

I have only watched the first training program, but I would guess most people would want ideas on how to get started. I can see how the RSS systems work. And having a short sale negotiation company that helps homeowners avoid foreclosure in the NRELS program, can the Benefactor divide their account to more than one program?

Ron Giles 13:27

Absolutely, yes. Again, that's one of those questions that comes from not really understanding things, but you're under your learning. And that's good. Continue to learn. Again, you ask the question, can a benefactor divide their account? I am not bossing the benefactors around, they

sign contracts and they have to abide by those but other than that you are free to roam the country or the world for that matter. Read your projects.

Tracee 14:01

And we are going to be doing a training on how to get started like implementation ideas for the RSS, then the CAC and then the NRA LS. So that is forthcoming?

Ron Giles 14:14

Yeah, we're not finished with the trainee.

Tracee 14:18

Okay, next question. I tend to utilize the RSS program and all the local churches in my area and get the pastor's that those churches to sign up under the churches, as well as signing the congregations under the church for two people for one cent download. My little church supports 20 missionary programs around the world can nonprofit church entities sign up a nonprofit missionary program or message an individual sign up? A nonprofit program?

Ron Giles 14:45

A nonprofit entity, entity. Okay, we'll say it that way, an organization that's doing nonprofit work, how that organization will survive into the new this our government, I don't know. However, you're You're welcome to do any of those things. If it's a, if it's a Bible, one, C three, doesn't matter. If it's a church, it doesn't have a 501 C three, and they just get together, we don't care. Do you care? I don't know about that. You can do it as a nonprofit organization, or you can do as an individual, it doesn't matter, you can set it up the way you'd like to. With the church congregations. My suggestion is that you go to the minister, and then the minister has the people sign up under the church, so that they can get the bonus program. And if you have a 200 congregation, and they all sign up, then that's 100 cents, where \$1 an hour, that works out to be over \$500,000 a year that that church is going to be making on that loan. You don't have to pass your plate anymore, your minister can be part of that. And he can get his pay out of that as well. So it really solves a lot of fun. A lot of problems for our church, how you initiate that or how you work with it is important because we've set it up so that the person who introduces to the church doesn't get cut out. They still get a little bit of the generation bonuses. So keep everybody in mind and then work it out the best way you on? And because we're not, it's the program, do you apply it the way you want to? Next question.

Tracee 16:40

You mentioned we can use the quarterly drop fund to purchase a home what is the proper way to hold the title to the home?

- Ron Giles 16:49

  The quarterly dropped fund to purchase a home
- Tracee 16:53
  meaning like our quarterly share income. You know what I mean?
- Ron Giles 16:58

  it's your Yeah, okay. Okay. It's your money. Yeah, you do it any way you want, was the proper way to hold title. If you want it in a trust, it's up to you. There's there's there's good things about trusts. And there's good thing about private ownership trusts are more designed to protect your assets than they are to function. So we're going to move into a whole new way of living. And, but those are those are questions that you can figure out and do it the best way
- Tracee 17:39

  Okay for us benefactor may he or she sign up non US beneficiaries for his or her program?
- R Ron Giles 17:46 Yes.

Ron Giles 17:56

you want.

- Tracee 17:48

  If the person have an employment contract with decides to change careers, what would be the plan of action?
- It comes back to a signing a contract. You don't want to sign the contract for seven years and stay in that business, then that's probably not the best thing to do for you. If for some reason, there's some contingencies that that come up, or some things that we didn't know about, you didn't know about. We're not here to dictate your life. But we're giving you benefit benefits associated with that contract. And if you'd wanted to just drop off on it. My thought, again, is, where's the integrity of signing a contract? Why would you even think of that you need to cancel a contract or change careers until after the seven years. So now, you can do that, I suppose. But there are penalties with breaking the contract. And part of those penalties will be that you don't get any of the benefits and you can't have been a member of love won society, you'll still have your beneficiary program. But the punitive way that we're setting this up is that

you got to stay there for seven years, if that's what it is seven years. If you're on that kind of a contract, then that's seven years. That's how can you say it anymore, you don't go making the

decision to change. You've already made your decision to stay there for seven years, fulfill that seven year contract, then you have all of the benefits you want, except for the one cent per quarter. Other than that, you you have all of the benefits that will continue on. So why would you want to throw that all away? Because you had the idea that you wanted to change? If the person feels that they bite, they can't make a seven year commitment on the contract, then don't don't sign the contract. You're talking about breaking your Your integrity here and I'm having a hard time with that. I'm thinking that we're, what are we dealing with here? People who don't have the honor of their word and their signature? They just think they can go willy nilly and break a contract like that, oh, my goodness. That destroys society if you can't, if your word is not your bond, and where are you going to move up into the fifth dimension on that? Because for that, that level, your word is your bond, you bought your bonds. If you don't follow through with that, you're gonna have some real serious problems in your and whatever else you want to do as far as moving into the higher realms. What if you don't have integrity to to stay with the contract? That's the question you're asking me. Let me say, there's consequences. More than you understand. So, next question.

#### Tracee 21:04

Heard advice from some that to redeem Zim we need to allocate some money to pay taxes, what do you think?

### Ron Giles 21:12

No, absolutely no taxes. What taxes would you would you be paying? That would be income tax and goes away before we even get the money? No taxes? Not even on the what they're calling the structure of payout? There's no taxes. Except for the under the GESARA compliant governments. The only tax is sales tax. So where what? How would they charge you tax for anything that you're getting? It's not gonna be there. Next question.

# Tracee 21:53

If one decides to buy a bank building to replace it with a financial service center for people, would the title be public knowledge? How do we keep it private, so the Benefactor will not be public knowledge?

### Ron Giles 22:07

Those are the kinds of questions that you need to be in the business to know how you can protect yourself from and be anonymous, the banking system, the financial service centers, and the financial service industry are going to be very much controlled by the Alliance. When I say that, we'll, they'll use our money. But we'll fit in there with a hand in the glove sort of thing. I'm not sure yet how that's going to work out, we'll find out a little bit more mountain there, I would not be so concerned about this,

Tracee 22:43

.....

I have a good. Um, you can get an LLC in Wisconsin, that nobody can trace the name back to you. And it's not expensive to file it, they do all the work for you, you could even use them as an address. And so LLC is a privacy state, I think Nevada is also I mean, excuse me, Wisconsin, and Nevada. And I know there's others that are privacy states. So you can buy anything you buy not on your personal name, but in this private LLC name. And so nobody knows it really came from you.

#### Ron Giles 23:19

That's a good idea. But we're getting away from anything to do with limited liabilities, legal fictions, and that sort of thing. Trust will survive, but I don't believe anything to do with the corporations. The corporations, we don't know this or not, he made me do. All corporations are owned by the Vatican. They set it up that way. I didn't know all corporations, every corporation is owned by the Vatican, even the even the corporation of the United States, USA Inc. Even the Utah State of Utah is a corporation, it's owned by the larger corporation which is owned by the Vatican. So we're getting away from all of that. And it's going to change. So it'll always be for the better. The whole corporate concept is that you don't have to take responsibility for the things that you do and you hide behind a corporation. That is not the way the heavens work. Each person has a stewardship responsibility. And, and you can't hide behind something like that. If I did damage to somebody, and I caused that myself, how appropriate is to be hiding behind something that will indemnify me against damage to that person. And I say that's going away. If I hurt somebody in an automobile accident, it was my fault. Then I take upon myself the responsibility financially for that family or for that, that situation I might have insurance. Or it may not, that whole idea might be going away. But things are going to change. And it's hard to know right now how those changes will affect us in our day to day lives, but just know that things are gonna work out really good for us. And so public knowledge about benefactors, and so forth. And I'm not sure that that's so important. We still want to have our anonymity just because we don't want some people knocking on our door to ask for money. But we're not going to be in a position where we need to hide. It's just we want anonymity and trusts are just perfect for that there's no reason to be doing anything else, in my opinion, at least as I look in here, what's going on, I see things in the into the future that are not going to survive through this transition. And I believe that trust or excuse me, trust will survive. But I don't believe that the corporation's legal fictions will survive.

# Tracee 26:11

I have that document I need to keep, I need to remember to post it. I'll put it on my note for today. Okay, where do our birth certificates tie in?

# Ron Giles 26:23

Golly, I don't know. I just have to simply say, I don't know. It's all changing. The whole birth certificate scam is going away with a cabals created. So, other than that, I don't know, this is not a love won society question. So I don't know everything. I can't know everything. I don't, I don't know everything. Whatever. So these kinds of things. It's nice to know, but I have no clue. Really.

- Tracee 26:58
  - Okay, I have dealings with large chain stores, electrical and plumbing suppliers, building supplies, do it yourself stores, etc, who also 1000s of different products from many different suppliers. Is it feasible to offer employment ESS to these chains? Or would be more appropriate?
- R Ron Giles 27:17 that would there be economic stabilization? Yeah. To these chains, yes.
- Tracee 27:24
  They're not manufacturers, they're sellers. So that would be ECS.
- Ron Giles 27:30

Well, economic or employment contracts. And he's that's probably employment contracts, there's where ESS is the employment or economic stabilization system. And that's where those change those, that's where those large change will be. We will get involved in by everything that they've got. But that's it, like you said, that's a supplier rather than the people who are supplying so the larger stores like that, I'm not sure how to do it. It'll present itself in a real good way. And keep in mind that a lot of these large corporations are going to go away. They're cabal oriented, and they need to go away. Because we're changing society into a rather than a pyramid scheme, where all of the money rises to the top. Everybody will be a part of the and participate in the economic system. And the idea of having to work for somebody else, work for the Cabal that you are a creator, as a human being you're a creator, is your uniqueness. So tied up with a corporation, that you are, you've lost your personality. Now, you're going to be able to do a lot of different things. So I guess the bottom line is this, we'll have to wait and see. I don't know how it's all going to work out. But I know that we have the money to do what is necessary to get the job done. And will do so appropriately. And in a way that is harmonious with the Alliance. And guess who's going to be our counselor. Somebody is representing the Alliance to us. A lot of these questions will be discussed and worked down in the best way possible between you as as him benefactor and your counselor, your friend, your mentor. That's representing the Alliance. Next question.

Tracee 29:47

May I ask who is the Alliance on the ground here when you say they contacted you? To see which best way would be to contact each of us for the redemption appointment? How did they contact you?

Ron Giles 30:03

I nave my relationship with the, with representatives of the Alliance, it was developed over a long period of time. I don't speak for the Alliance, but I'm told that I am part of the Alliance. What does that mean boots on, I'm part of the boots on the ground. That's, that's the part of the earth part of the Alliance. And in that, don't confuse that that relationship with us being contacted by the Alliance for reduction appointments, and so forth. It's not the same. Now, there's nothing about me that is, puts me above other people in terms of the capabilities of doing what you want to do. Anybody can be a part of the Alliance, anybody can be, can be contacting them. There's nothing unusual about me, except I've just been working out for a long time. And I've have a job to do, I have a calling, I have a purpose that I came here in this life to do. And that's fulfilling what I'm doing right now. And each of us are going to have the uniqueness of that opportunity for themselves to be in harmony with the Alliance. And you've got a mentor that will be there to help you. Now that mentor is your connection to the alliance. So cultivate that, I'm going to have one, and I'm going to cultivate that, along with the other sources of of information I can the channels of information I get from the Alliance. So we're all changing. And there's nothing about me, that's unusual, because I'm a human. You two are human, you have divine natural attributes, that's in your DNA, your spark of life, your spark of divinity, it's who you are. Focus on that and learn how to use that as a part for your life as a part of your life as a way of doing things. And it'll be fun. Next question.

### Tracee 32:27

When and where do I sign up and pay my \$10? Registration? I would like to get things rolling so that I can start signing up my trustees.

### Ron Giles 32:37

I think this is a question that you need to go into the quantum financial QFS 2020. And start looking around because I don't know you're you're dabbling in it, but you're not getting involved with it. And that's the kind of question that I see. Oh, well, there's a lot of information. But you're asking questions that are not that have no sense if you really understood what was going on. So I say, go back to the to the Q Fs, go back and listen to things. The \$10 registration fee has nothing to do with Zim benefactors. Absolutely nothing except for that's how their chain of beneficiaries is created. And dollars, his registration fee for revenue sharing solutions for beneficiaries. And we don't have that program going yet. So how could you? What can I tell you? And that's why it's for me, I'm just G. Why don't people get this? This is so elemental. But it's if you don't get involved with it, then you're dabbling with it, and dabblers don't really do a whole lot of good. If you want to be as in benefactor, then get in there and become a Zim benefactor, knowing everything you need to know. I went through pilot training in the Air Force. Nothing that I learned could be forgotten because I needed on a daily basis, as I'm flying a jet that supersonic. What part of the information is not important? If I'm going to be a pilot, I've got to know everything. I got to get to the point where the eye can almost feel the air going over the wings. You're that sensitive to the aircraft. You get in a zone. And if you're not in the zone, you're not a very good pilot. So I use that as a as an example because if you're only dabbling with it, you're going to kill yourself if you're a pilot because You don't know enough to keep yourself safe. And you don't know enough to keep yourself out of harm's way by flying into a thunderstorm or something like that. Those are basic things that you need to know. So you've got to get into the love won society programs, you got to find out what's going on. And then as you do, you'll find that these kinds of questions, you'll see how, from my point of view, how just scratching my head, I don't know how to help you with that. You've got to become a sim

benefactor, you got to know what you're doing. You've got to know the programs. So I'd love to help you out. But there's no frame upon which I can give you information. There's no basis of understanding that you have that I can make sense to you. So that's the only thing that I can say and, and bless you for asking that. I'm sorry that I just, I don't know how to answer it except for go to the stuff and get involved in, go to the website and get involved in, gain your own information become who you want to be. Next question.

### Tracee 36:10

Tina, Canada is on its way for just GESARA, because you mentioned that if a country is not, it won't be possible to receive funds for humanitarian projects, or that it would be very difficult. Can you elaborate?

### Ron Giles 36:22

I believe it is. Yes. Because you mentioned that if a country is not on it, it won't be possible to receive funds for humanitarian projects. I've never said that. I'm only saying that just our countries are not talking about individuals here. We've not received funds for humanitarian projects for that, it would be very difficult. Can you elaborate, I think there's a misunderstanding there. Just our countries are going to be a part of the quantum financial system. And if your country is not, then it's going to be very difficult for you as a functioning member of or a benefactor of love won society to do your work. This is a potential problem. But the alliance is going to work with us and they're not going to go premature in giving the money out until there is safety for us to do it. And again, we're gonna go through an appointment with a representative of the Alliance. Who knows these things. They're gonna work out everything for you. Not one humanitarian, who came to this earth to be a part of this humanitarian work is going to be left out, not one. You can't name one because there is not one that will be left out. So you can have all of the knowledge and information you need. So I don't I don't know is Guatemala is GESARA compliant. Tim, back to GESARA compliant? Those are questions I don't know. wouldn't have a clue. But I do know that it will all be taken care of by those who do No. No, thanks. Question.

# Tracee 38:19

Okay, I have already purchased currency. I have Zims. And about five other currencies. My fiance and I purchased together but I purchased the majority of them I am the main one focused on doing the humanitarian projects with the Zim if the currency purchases in my name, and I gifted to him the portion he purchased, would this be a problem?

# Ron Giles 38:42

No, I think that would be appropriate. Yeah, let him go. Perhaps a conflict of interest. Sometimes when you're in a marriage type of relationship and you buy things commonly owned by them, then you have a falling out with the relationship. How do you separate that all out? My solution as far as a becoming a Zim benefactor or anything as like that would be you'd go into your own. You have your exam, you go into the redemption appointment on your own. And I'm

not preaching against husband or wife going on and doing that. I'm just saying that practicalities it's a real good idea to have yours and, and mine and or Yours, Mine and Ours, but you have to have yours first. And then you can join together and you're not manipulated because one person is stronger than the other. You can stand up for yourself. And that's why I say as a humanitarian, as humanitarians, what you get is a rate will be determined by your the intent of Your heart and maybe the intent of your spouse's heart, it's not as much as Sure. So will he get as much? I don't know. I really don't. I don't, it's none of my business. But if you go in with somebody else at the appointment time, how do you separate if there's some kind of a concern. But if you go in there separately, and then join together afterwards, then you are in full control of the use of your funds, which is your stewardship. So combined stewardship, they can't work. And I'm not saying that they can't. But I'm saying that the more practical way of looking at this is to go in as a humanitarian, go in and get your funds. And if you want to do work with other people really closely, then then you can do after the appointment. What is there to gain by doing it together in the appointment and then having a potential frustration of not seeing eye to eye on the spend ature of the money. You might want to do this, the other person might want to do that. How's that resolved if you don't have your own money, I'm just saying for the practicality of it. I would encourage people to go in and do the redemptions on their own merit, get their money and then join together with one another. And it may be somebody else that you'd rather join together with rather than a spouse. But you have the ability to make the decision if you've made your decision in the beginning to get your own money. Next question.

#### Tracee 41:47

CAC director is tasked with visiting state run orphanages to open trust for each child with the download go into an account in the child's name. I wish the CAC to be custodian lips, custodian of these trusts, so they are not meddled with, do all trust have to be notarized?

# Ron Giles 42:14

I'm not sure that I've made a statement saying that is tasked with a visiting state run orphanages. You as a benefactor might task a director to go to state run orphanages to open up trust for each child. I'm not sure that's what the intent of what I was talking about. With the download go into an account in the child's name, if he's under 18, can't or see. I wish the CAC to be a custodian of these trusts so that they are not meddled with. Do all trusts had to be notarized? I don't think a trust has to be notarized. You don't even have to register a trust, you just have to function it, create it legally, and then you start functioning with that trust. That's my understanding, I could be wrong. I don't know I've said a press before and they've never been notarized doesn't matter. They can act in the public, then it's probably a good idea. I don't I don't know. But I'm just I think it's it's inappropriate to go to an orphanage and set up a trust for each child. It's not your child, you don't have responsibility for that child. That child is not in your stewardship responsibility. And creating that may be you're stepping over into cross dominions, which is inappropriate. So there's a lot of stuff that we're going to have to learn about. And one of the major projects that we have two concepts that we have to understand is the concept of dominion. Each person has their own dominion, their own reason for being here. A kingdom is I'm the king of my domain. A queendom is the queen of that domain. If you want to join with others, you can, but you do it on a voluntary basis. But if you go into other people's things and start doing them for that for them, then and you're not asked to be a part of their

life, then you are inappropriate. That's crossing dominion. I didn't know all this before. But I'm learning a lot about Dominion And I'm learning a lot about the problems that we as benefactors potentially can drop into. When I say drop, you're dropping from a higher level of understanding into a an earth bound, understanding where you can go in and help people without their permission, I'm going to do this for the homeless, you're going to have a home, well, I don't want a home, and you start arguing with them, you're out of bounds. That's why you do things in harmony with them. You don't just give somebody somebody, I think that's inappropriate, you work with them, you assist them in leg up onto the horse, if that's the right terminology. But you don't do it for him, you can't get on the horse for them yourself, you can only assist them to get up on the horse. There's a subtle difference there that we're going to have to learn. Because if we try and do things for other people that are unfortunate on them, we are at fault, and our joy and our happiness will be interrupted. Until we gain the real understanding of this concept. You only assist. You'll notice that every time I've talked about this, I've emphasized the fact that the mentor at your appointment is there to assist you not to do it for you. They won't overstep their boundaries by telling you things. That's why I say they that they'll never give you a rate, take it or leave it. That's not from the Alliance. If they do that, then get your stuff up and walk out. Because they are not of the Alliance. And they don't have the real money. That's just a scam for you. The way that these people have bastardize, this whole process of when I say these people, the gurus and people that pretend like they know what they're doing. There's no Alliance involved in saying this is your rate, take it or leave it, they would never do that. crossing over into somebody else's dominion, they will assist you. And you ask and you'll get there's a whole new way of living. And we can't take all of these garbage things with us into the future. And so it's important that you come up to speed as a humanitarian, so that you're acting within the bounds of propriety, as you interact with the people you're trying to help. Don't pretend like you know how to help them. Until you asked, How can I help? How can I assist you? We have some money here. How will I? How can I assist you? How can I help you with some of the problems you're having in your life? Well, I'm homeless? Well, let's take a look and see if we can find some help for you. This is a whole new way of looking at things and I think that those who say I'm going to do this, and I'm going to do that, and I'm going to set up a health salon, and I'm going to do this and and all of these people are going to come there. Well, they may and they may not depends on their choice. You can't take their choices away. Okay, I'll get down off the podium here.

# Tracee 48:44

May the CAC geography include areas of interest other than local geography I'm interested in introducing LWS in the West Indies, South America, Mexico, Southeast Asia, Oceana and the continent of Africa.

# Ron Giles 49:01

I think that that's just wonderful. There's no place that you are restricted to go with the CAC program and that's why we're kind of looking on having a map so we can see where there's some open areas that would be better served if we don't go in there and compete not compete, but do stuff that's already being done for the people. So yeah, wherever you want to go. As long as you're on the internet, you have access to the RSS program and anything else you want to do.

#### Tracee 49:38

When we people want to be a director for a CAC and begin to explain the RSS and CAC programs, as it stands now, they can do their own internet search typing in revenue sharing solutions, which will direct them to the QFS 2020 website detailing your whole platform. I believe they can start putting two and two together and perhaps figure out, I could be a benefactor when I want to be anonymous, just wondering if you will be taking the Benefactor information piece off the website after the RV?

#### Ron Giles 50:11

What benefactor information do I have now? We have an email, and there's a name associated with the email. We can take that off. I not thought of that. You know, we're not publishing people's names as benefactors. There's a lot of people who don't want to be that are already being trained, because it might be over their head and they don't want to do it. I don't know. So I'm not sure. Revenue sharing solutions will be directed to the QFS 2020. website? I don't think so. Stay there. Were training with it. And you're assuming a lot by asking that, then those are questions that I have not dealt with, dealt with yet. Let's see. Next question.

### Tracee 51:10

I'll add to that, um, you can say that you got a new job, that you are working for a humanitarian, and you have been tasked with XYZ. They don't need to know that you're the benefactor.

### Ron Giles 51:27

That's true. And you can just simply say, I'm under an NDA, as far as who that is. Right one for yourself, then you're not lying.

# Tracee 51:39

I can't find the math 52,004 16 times six equals 314 496 plus original beneficiary of 52 416 equals 366912. This is 1000s. Is the difference in bonuses added in here. Please explain. It also states the full potential of the RSS program would be receiving 747,008 24 per year, the ECS would be in addition to that. So with 52,005 60 plus 131 400, for 30 referrals, and 373 91246 Trust equals 557. So what am I missing? That is short by 189 952. Please help me compute. I'm sure you've all well, I'm it's correct. But I do not follow it.

# Ron Giles 52:34

I'm not prepared to go through two calculations. And talking about some of the stuff is the bare minimums. Without, you know, if you have a beneficiary and has six trust, then it's going to be \$28,000 a month, whatever that is, for a year 346 or 314, whatever it is. There's so many variables. Because you have your thrown in here an employment contract, how do you know

how much that employment contract is going to be? How do you know what the director is set up for that particular person you just don't. So trying to try to nail it down is only a proximity of what can take place? Only the bare minimums. So that's why I like to look at it. And then from there, how do we know how much it's going to be? How much is there in your calculations here, can a beneficiary make a million dollars a year by going out and I'm bringing in churches and other organizations and things of that nature. Those are things you you have no idea to be able to prepare for. And that's why I say it's so hard to nail down how much money you're going to need. Do all the math you want, it will never be accurate. I mean, two plus two is always going to be four. That's not the inaccuracy that I'm talking about. But estimating what people are going to be receiving is very, very difficult. So allow yourself to be getting the highest rates possible. And perhaps even buying some of these large bonds, these gold and silver bonds and get some of those and an ask for some real good rates on those because we don't know what's coming. And as I always like to say if we missed calculated, and we can't do a project for housing or food or something of this nature, the fives involved with that that are not going to get the benefits because we didn't plan ahead for Though now deal with that, those who think that they don't have a need for the large amounts of money, if you have the money, then you have the availability to use it for the right purposes. But if you don't have it, it's like going and getting into your airplane and, and trying to fly somewhere and you're halfway there, your sputter sputter and then you have to find a place to set it down. Don't Don't miss calculate here. And if you're going to err, err on the bigger side, way bigger, because we don't know what the alliance has in store for us. So we prepare now for that. Contingency plans. And even with all of our planning, do we really understand it? No, we just try and respond to what our hearts are telling us and go for the things that we need to go through. So when we get to the appointment, then we'll have a counselor from then on, we can do our humanitarian work through that the help of an assistant so that person, don't prepare for the future and prepare in a way that we have contingency plans. And we've figured out every possible way that we could need some more money, and we just go out and get it. Be sure that we do as much as we possibly can to be prepared for what's coming. Because we have no clue. It's gonna be really fun. If we prepare right, we'll have that much more fun. Next question.

# Tracee 56:35

Last question, I am not sure when we ascend or shift to five d, why we would need money there. Possibly my timeline research is premature. I found property here on 3d Earth and waiting for the redemption to be able to purchase it for my humanitarian project. Will we be creating completely new property and 5g? Maybe to look like this one? I have no idea what he's there. Because it is perfect for my vision.

# Ron Giles 57:01

Well, those are good questions, and I hope you find an answer to it somewhere. I have no idea. I have an idea what you're talking about. But are we going to be creating our own worlds without ends? I don't know. We're fully capable of doing it as children of God. If we drop into our divine essence of who we really are, there's no limitations. So if you want to create an earth and go ahead and do it, if you want to create an earth to do your projects, whatever I say, go for it. Go. Other than that, I don't know how they help you with that question. So is that it for today? Then Tracy was a wrap. Well, let's let's call that a wrap for today. And I appreciate everybody participating with this. And then thank you for the questions. I try to be

delicate with things that are a little bit questioning for me, but I hope that I'm not offending anybody by being at having a direct approach. And with that, send love and appreciation for everybody and hope you have a really good day and that you're learning how to become an efficient and effective Zim benefactor. Thank you. And Tracee, thank you for your help.

Tracee 58:30
My pleasure.
