SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Good morning humanitarians. This is Ron Giles. I'm here with Tracee and we're going to do a question and answer period today. It is November the 17th 2021. So with that introduction, let's go ahead, Tracee. Thank you.

T Tracee 00:19

Okay, so for beneficiary planning to refinance, for if they wanted to remodel do they need to apply and be qualified?

R Ron Giles 00:30

They need to apply qualification, like they haven't done it last five years. So that sort of thing. I'm not sure that we have a lot of qualifications. You know, I'm thinking of raising the age to 21. So that kids out of high school can mature a little bit if they want to get a house and save up money and so forth. But yeah, there's no qualification. So I'm aware. So let's just go ahead and do it for. Next question.

T Tracee 01:03

Towards the end of your presentation, it says a downpayment of at least 5% is required to purchase a home to the NRELS, I thought the NRELS gave a 20% discount, and that would be the down payment?

R Ron Giles 01:18

No, the 5% is so that people will have some their own skin in the game going into it. At the end, that would give them a 25% ownership position, or equity in the property. But we don't replace

a 5% down. If you don't have a down payment. You have young people wanting to get into \$12 million homes and that sort of thing. And so we just have to be careful with what we do. So that's what we what we have determined. So the 20% discount is not the downpayment. Next question?

T Tracee 02:02

Do you have to use one of your trust to purchase your home? When you refinance? Do you use the same trust

R Ron Giles 02:12

As a beneficiary, you have six trusts that you can use for whatever you want, if you want to use one of them for the home, that's okay. If you have a trust that you've already set up and want to buy your home through that trust, that is okay. The ownership position in the home is not so important as the number of homes or whatever you you have. So if you want to buy it in a name of a trust that you've already set up, it's not the beneficiary trust, and that can happen. We have no problems with that. Next question.

T Tracee 02:48

I have heard credible people also recommend the purchase of Dong and dinar. And I have purchased some how will these currencies be used at the redemption appointment?

R Ron Giles 02:58

They will be exchanged, and I'm asking for the highest rate available to me. And other than that, the speculations of exchange currencies, as in rates. I have no reliable sources for any of that stuff. The Alliance does not give out rate. So that's a good indication that where that's coming from, or that it is not coming from the Alliance. Next question.

T Tracee 03:29

Sorry, this will be a bit tedious to explain bear with me. I have held multiple currencies since 2013. And I'm very drawn to LWS for many reasons. I am married to a vaccinated man who believes in conspiracy theorists and also believes that my foreign currencies are all BS, he knows I hold currencies. So if in the event all is revealed, and it becomes apparent that we can no longer hold together this marriage, and all assets must be split, should I at my exchange appointment, but the zoom into a trust so that it cannot be messed with at a later date? I am not putting my energy toward a marital split. But if this does occur, he is not humanitarian, and this could seriously derail my plans. Any thoughts you can share as I know I am not the only person in this situation going towards the RV.

R Ron Giles 04:10

R Ron Giles 04:16

Okay, well, I that's a real dilemma. And my heart goes out to you in terms of the positive potential of having to disassociate yourself through divorce, whether with your husband, who is not a humanitarian, and this is why I have always thought it important for each individual in a marriage relationship to have their own funds available to them. Now, the amount of money and so forth, and and the terms upon which your money is given to you from through the alliance would preclude him from ever getting any of that money he might go after it, but he won't get very far because we have a system, a new legal system that's going to be in place where they will honor the fact that this money is yours because of who you are not because of what you've done together. Especially with him opposing it. And so, yes, put it in a trust, but it in some way, as much as you can. I'm going to use word indemnify stop any, any stuff that's going to happen by putting in a trust or something a potential problem anyway. Put it in a trust, it's in a different name, you're the trustee. And they're not going to be able to pierce that at all. The Alliance, the quantum financial system, piece of gold digger, he won't get anything, period. Next question.

T Tracee 06:00

And to add to that, I did upload a trust template into the forum under the trust tab. So anybody can use it. Okay. Next question is I have no money. But yes, I want to help make this world a better place a great place I would like to, but as many individuals know that they are not alone, they are loved and Jesus will never leave them. The thing is, I don't know where to start was getting started. When I was diagnosed with breast cancer, it metastasized into my right thigh femur, is there any way I can help people, I want to leave this place better for all humanity?

R Ron Giles 06:42

Well, that's a good question. You're obviously registered at love won society or QFS 2020. And a show you have some interest in becoming as Zim benefactor, I have no money. You know, you could spend \$5, just under \$4.89, for shipping. This is from somebody in California. So \$5, here you're in the game is and if you ask for the 500,000, you'll be right in there with everybody else. That would be my suggestion. Med beds will be good for you. And things of things will work out for you. I love your heart and the desire to serve other people serve other people and help them. Let's get you in a position where you can do some really good stuff for \$5 here in the game. And then from there, you just need to study and learn how to become a beneficiary, as excuse me, as them benefactor and your heart's content, your heart will be content with the ability that you have to be of service to mankind. That's my suggestion. Next question.

T Tracee 08:06

Could you please tell me if the Zimbabwe and agriculture checks will be accepted in the revaluation? I have friends that really need help, so I'm hoping the checks will be part of the revaluation?

R Ron Giles 08:19

You know, it's an interesting question, I, I really have no knowledge about the agricultural checks, and whether they're redeemable or not. Having said that, without full knowledge of one way or the other, I would tend to believe that the alliance will redeem the agricultural checks. And I don't know if you invested in them, or if they were given to you or what the circumstances, but it's going to be it's going to have a lot to do with your intent. If you bought them to do humanitarian work and the possibility of having them redeemed, there's a good likelihood that they will be but to tell you one way or the other, I don't know. So next question.

T Tracee 09:12

Do you know if the alliance is aware of the trauma that is happening to the planet?

R Ron Giles 09:18

We've got a divine consciousness that is totally aware of everything that's going on that is at the base and the root of all that we're doing as far as the alliance is concerned. That quantum consciousness that divine consciousness knows all things. They know what's happening to the planet. The planet is a living entity whose body is the earth. That entity is totally aware of every atom on this earth that entity is in total communications with all other planets and all other entities, all other things in the quantum consciousness. So, absolutely, yes. The Alliance is totally aware of everything that is happening to this planet. Next question.

T Tracee 10:29

Is it possible to keep my bean is in benefactor confidential and not have to reveal this to my directors?

R Ron Giles 10:38

Yeah, depends on how you want to set them. You can always be the, you don't have to be the benefactor, you can work for a benefactor. And then if you want to really make it so that you're not lying to them. Really trust? It's, it's a simple thing to do. And I don't think your benefactors need to, or your directors need to know where the real source of the money's coming from. You're just working for a benefactor? Not yourself, or you are it is yourself, but you you're working for a benefactor or a non profit organization. That is an you know, there's things like, we're, we've been charged with the distribution of funds to mankind. Is that a lie? No, it's not a lie. It's what you're going to be doing. So this, this entity, this non profit organization, has been tasked with distribution of these funds. We've organized this, the love won society organized this way of doing it. And they did that under the auspices of they would be getting money from these people to do the things that we're trying to do right now. It's a story. And it's true. It's just the way that you present it is going to be the thing that'll be successful. But directors do not need to know that you are the benefactor period. Next question.

T Tracee 12:16

Can I purchase an RSS beneficiary account for members and families of rebel armies in exchange for surrendering their firearms and becoming productive members of the community, I will hire a special group to do the negotiations.

R Ron Giles 12:32

I would suggest that you discuss that sort of thing with your mentor, your counselor, your alliance representative, those are really good questions to discuss with them as a benefactor, you can do those sorts of things. You can you can put a code in there to it that is like your master ID that they can set through and, and it'll, it'll waive the \$10 fee. So you don't have to pay it the \$10 fee, because it's just to yourself, so you can waive it if that's what you want to do. Next question.

T Tracee 13:22

As a zim benefactor, can I go to orphanages, nursing homes, homes, for the age special needs, etc, and purchase an RSS beneficiary account for each orphan again, via a trust account or resident and offer employment contract shares along with the RSS program to all the employees?

R Ron Giles 13:42

Yes, I think that that's a good idea. Keep in mind that orphanages usually have children that are under the age of 18. So how do you set up a program for them? I'm not sure that the setting up of even a trust for the children is is the better way to go. But you're going to learn to come from your heart when you do these things. So when he asked me, Can you do it? Yeah. You can do anything you want, as far as your use of the funds are concerned. Again, we counsel with our mentor, our counselor, and get some really good advice for these kinds of things. And you can also ask them, Well, if this is a good thing, is there a really good way that you can suggest that we approach this and as long as you give him or her the ability to talk to you and you've are establishing an open communications? Then he's not crossing over boundaries or crossing over Dominions to talk to you about things, but it is always asking it shall be given. And then you, you ask and then gives him or her the permission to tell you things. And you'll work out that association with them with that person as you move forward, great resource for you. Next question.

T Tracee 15:22

As a Zim benefactor, I would like to purchase companies and operate them as a nonprofit, can I integrate the RSS ECS and NRELS Programs?

R Ron Giles 15:35

Yes. Companies, purchasing companies, there's, there's an intent for doing that, there's a way to help is if it's going to be beneficial for the communities, whatever you can do that

to help is if it's going to be beneficial for the communities, whatever, you can go down that road. I don't, whenever I've talked about buying corporations that are already existing at which would be qualified as a company, well, with what we're talking about here, I don't get a lot of positive feelings about that being the best way to work with them, you're gonna, you're not going to do things that buy you a job. When I say that, I'm not gonna buy a company and then try and figure out how to run it. I'm not gonna buy stock in the company and be a member of the board and try to figure out how to manipulate the board to do certain things. I personally am not going to be involved in that it's not because I don't like it. I'm just too busy with the really important things. And that's getting into the communities and putting my time and effort into Community Assistance Centers, and teaching directors and, and finding new directors in different locations. I see that as my major job. However, I've got con projects that I'd like to do as well. So use your heart, connect your mind to your heart, and start thinking from the heart. And, and you'll be fine. No, and then always you have the Alliance counselor for you. Next question.

T Tracee 17:17

Does the beneficiary start with a second registrant and that person goes to third, the third with the fourth and so on to say 2000? Is that the best way to handle it?

R Ron Giles 17:30

Does the beneficiary start with the second registering? I'm not sure what that means, except for maybe you start with one person that's your first beneficiary. And then they start and understand that one person has a circle of influence, that once they get the knowledge of what's going on, then then you might have 20 or 30 people in your circle of influence. And that will multiply that so much quicker. So there's a lot that's going to be going on in terms of how do you 2000 You we might have a million people at a time that are registering on the website? No, we're gonna have to do do the capacity to accomplish that. How long does it take there to sign up, it only takes you five minutes. And then you've got a lifetime of learning how to use it. I don't say the lifetime to learn it. You'll learn it fairly quickly. In its effect, computer, something's you something's in the in the website, or you won't even once you go through it. I'm not. So the interest, I'm just interested in the amount of money that comes here. Just know that it's taken care of by some higher accounting types. God's pretty good at accounting. So if you really want to get involved with it, you can and know everything about it. And that's why I say it could take a lifetime of information or studying to get into that. It would be for me because I don't have any interest in all of that extra stuff. Not a I'm not a bean counter. I want to go out and get the job done. Go do other things that I really enjoy doing, and spend my time out. Next question.

T Tracee 19:25

How does the ECS grow to the 131,400? Is this sample saying the ECS holder has to refer 30 benny's to order the one to earn the 131 400? Or am I missing something on the math?

R Ron Giles 19:42

You're missing not only the math, but you're missing out on the idea. The 131,400 that is 25 cents per minute download for 365 days. You can call it an employment. You can call it what you want. can work up to be have 25 cents coming to their beneficiary account. If you do an employment contract, it could be at 25 cents, it could be at 50 cents could be at \$1. If you've got somebody that really, you really want on your team and are willing to pay that and get him away from him or her away from some other job that she's doing, people are going to really want to enjoy. They'll really want to come and work for us because it's giving money away. We're not talking about a bottom line, we have to be professional to make money. We're talking about people who can get in and really have a lot of fun and a million dollars a month is available for anybody that wants to really work and get the job done. So when I say that 30 Benny's, I'm not sure what that means to earn 136. No, a contract. employment contract that clarifies sand is where you get the 131,400. Oh, the ECS holder does not get anything as further than a beneficiary would do if they referred people, although their their basic income with their employment contract is 25 cents or whatever has been negotiated a workout for the payment. You're kind of need to separate those two ideas. ECS is sets fees in the in this year in the contract, it gets another penny per quarters and that sort of thing. That is all different than the beneficiary account. Next question.

T Tracee 21:46

Will we issue checks against our funded QFS accounts?

R Ron Giles 21:51

I don't believe we'll have a checking account. I don't think that they're going to be worried about that. A card is will get you into the the merchants. And if you want to pay bills or something like that, in the account to account transfer. There's no reason for checks. Unless you lose your credit card and go out to dinner, oh, I can't pay for my room. Yeah, those are the sorts of things that could happen. But it's even at that you can give the merchant your account number. Just give it to him verbally, then, and they can just charge it that way. Who knows that that's happening? quantum consciousness does. We're going into a new way of living, and it's going to be kind of fun. Next question.

T Tracee 22:47

Do you think the QFS will interface with existing checking accounts to do deals after benefactors are funded? And until everyone knows how to do a QFS transfer? How do you see this transition working working?

R Ron Giles 23:05

I don't think that checking accounts will be is going to happen so fast, you're thinking it's gonna take a long time. There may be public announcements, every time you go into a bank that has now become a financial service center, they will have all of that information and be transferring and doing funds and all that sort of thing. So the whole banking system as it was, is going to go away and become and transition into a financial service center industry. And so it's not going to

take long. Now, if you were a merchant, and you found out about this, would you not want to set up your merchant account in the quantum financial system, and then take every card that comes along is nothing restricting, but I take that back. If you take a Visa card, then you're going to get charged your two and a half percent for the for the purchase. That's why they do things. Now as a merchant, you're gonna make two and a half percent on every one of your transactions, because you're putting it through the quantum financial system that does not charge for anything. So there is an incentive for merchants to get involved. And once the word gets out, I think it's going to go like wildfire. Everybody's going to want to be in the quantum financial system. And it'd be nice if we had some help from the alliance and disseminating that. I believe that we can help every person that comes to be wants to become a beneficiary to set up their own account in the quantum financial system as in terms of how they're registering. So we'll see how that all works out. So really desirable ways to work with the Alliance. And are they interested in doing that? Yes. They're supporting us as we move forward. So we'll see how that support goes. And when it looks like transition is going to be not a problem, it will go really fast, in my opinion, almost seamless. Seamless meaning is here or here. It wasn't today. And then tomorrow, it is, I think, is going to kind of flow through there. So there's not a real strong line of demarcation, except for the gym benefactors who get their money at that particular point in time. Next question.

T

Tracee 25:50

I just read a recent email regarding the redemption of all Zim bonds for humanitarians. I had requested a link for eBay purchase of 100 T No, but I've not seen a response. I have 250 T notes presently, does recent Alliance plan mean I do not need to get 100? T No.

R

Ron Giles 26:11

Okay, if you have asked and I have not responded, then I apologize. I always respond very quickly to that, because it's just going into the link and copying it and pasting it into an email. So it doesn't take me much time. I don't spend a lot of time usually unexplained what it is. If you've asked for it, then the here's the link. So if you haven't had that, if you did not get the link, try it again. And and do it on a response from the emails. That will always be faster for me. Next question.

T

Tracee 26:54

How do we get the RSS to a 15? Or 16 year old homeless mom? At what age do they become? Or what age are they considered adults?

R

Ron Giles 27:07

As far as the a home? Well, as far as the RSS program is concerned to have to be 18 to buy a home, then that they have I'm thinking to pull it up to 21. But they do have to have a they have to be 18. Oh, how do we get the RSS to a 15-16. You don't. There are other ways to help them out. And you'll have the ability to do that with your with your own Zim benefactor account that you can establish for somebody. But for them to register and become a beneficiary in the RSS

program, they have to be 18. Now if you initiate it yourself as as in benefactor, there are other things that you can do. We leave that open to or your ability to make decisions on the use of your money. And then just be sure that you do it appropriately. A counselor will help you with that. Next question,

T Tracee 28:17

And that I have a feeling this is the same person dealing with minors that have you know, had problems with parents or whatever. But I do believe that a lot of humanitarian projects will address this, this real issue here and perhaps on the forum, somebody can come up with a really solid project that would address these children who don't have an adult helping them. Okay, so next question about timeframe. What if the opportunity to present comes around and I'm not prepared to wait and I'm prepared, but I've agreed to some other job for a while. Three months or three years, can the kickoff of the humanitarian project be delayed? Or do I need to be ready to rock once I present my ideas and appear before my angelic helper?

R Ron Giles 29:09

Okay, are you referring to something that is now existing with you and you're saying should I break my contract or whatever and when you when you go into this, the opportunities were not available, discuss it with whomever. I don't believe in breaking contracts. Your word is your word, but you can go back and renegotiate the agreement. And it's probably around money. I suppose. You've got a whole plethora, a whole banquet of opportunities to help an employer without having to stay there and work for them. They're interested in making money work out a deal shouldn't be Problem my opinion. I would not break contracts, got a contract. That's your word, renegotiate it. Learn how to make a new agreement. Next question.

T Tracee 30:18

That was funny. I just thought that word about renegotiate. Right when you said it. So that was funny. Okay, I mentioned this in the love won society telegram channel and thought I needed to ask directly but Ron, you changed, change the LW s site so that info on benefactors couldn't be accessed by people applying to be beneficiaries or possibly director, directors or assistants. That's weird. I as well as others, talking about a director or assistant director. Yeah, I as others are concerned that the identity of current benefactors may be compromised as the site is now.

R Ron Giles 30:59

I'm not sure how, who has access to our site with information who would do that? Who has that? We don't give out any private information. That's why I'm so reluctant to be involved in gatherings and that sort of thing. I say it's okay to do it on your own, but we're not going to be a part of it. Nor would we sponsor it because we want you to remain anonymous. And that is your choice. So we're not going to break that competence. So I'm not sure what your what the question is here. And thought I needed to ask directly, but Ron, you change the LWS site? I did? I don't know that. So that the info on benefactors couldn't be accessed by people applying to be beneficiaries? How do you apply for a benefit to become a beneficiary? You go to the RSS

website and you want to join? You fill out the form, pay the \$10. And you're a beneficiary. There is nobody else that will know that you're becoming a beneficiary. And certainly no beneficiary will know who the benefactor is, in the head of the chain of benefactors is that excuse me, the head of the chain of beneficiaries is paying for you don't ever know that. Unless somebody puts out the word lime is a benefactor puts the word out themselves. So that it's all set up so that it's not going to nobody will know. So there's no way for a beneficiary to know who it is they get a referral from somebody. And that's already in the program. And then they go and register. And that's all there is to one question.

T

Tracee 33:07

How will the Alliance plan to negotiate with First Nations and the indigenous people in Canada?

R

Ron Giles 33:15

I don't know that there's anything specific about one country as opposed to another. We're working with humanitarians, the Alliance through the inspiration to the given to the benefactors will move into areas that will be of benefit to everybody. Specifically, the plan is in place we have to do that now the Alliance. Alliance won't do it. They're depending on us to get the job done. So how are we going to do that? With the First Nations and indigenous people in Canada, Australia, wherever there's indigenous people. Next question.

T

Tracee 34:12

My wife and I belong to an unconquered nation and each nation has its challenges, biases and needs. We are willing to work closely with the Alliance to do the training required as it is specific and takes time some corporate nations are asserting their land rights as we speak in ways that will make Canada look more like Africa. Has this been considered?

R

Ron Giles 34:35

All of that goes away. Ownership of land by a government is part of a settlement for when you foreclose on the government. I see that the alliance or the the Cabal thinks that they foreclosed on America and this is just an example they think they foreclose on America. And in the foreclosure or in the bankruptcy, they took over America and the land and the people and saying, You, you foreclosed on the loan to us. And these are the terms of the foreclosure. We own the land, we own the people, we own their future income. In America, we don't own our own property, period. And that's important for you to note, we do not own our own property, if you think you own it, don't pay your taxes for a couple of years, and sees what they do with something you think you own. They have the rights to your property. And this is where the whole NESARA thing came in. Because banks and governments were foreclosing on the loyal title property. A loyal title means that there is no higher title available. And you cannot lose your property, it's illegal for you to lose your property through foreclosure on a loyal pile of land period. That is the whole basis of what the Farmers Union did in their, in their lawsuit that ended up in the NESARA. So there's a lot of things that are going to change from the way that they are now. And that's one of them. Title will go back to a libel a loyal title. And you will be

the owner of the property and it cannot be foreclosed on. That means that you have to voluntarily sign on the dotted line to transfer title. And you don't have to do it if you don't want to. Even if they say well, you put it up and we get to foreclose on you because you didn't pay you're either tough, whatever. It's my land, and you are trying to do something illegal. And the government was trying to help you to do that. By not only allowing it to take place, but to record the new owner on the land. That is illegal. That's the basis of the the farmers claim. So concept of they own the land goes away. And if there's anybody, any country or whatever, that is not just are compliant. They will be in a very short period of time, it could be less than a year, because they will suffer greatly financially and in the community of nations. Next question.

T

Tracee 37:59

I think this has been asked before, but I'm still not clear on the answer. Do I need to purchase Zim bonds in order to qualify for the money through RSS?

R

Ron Giles 38:11

Well, if you don't have the Zim bonds to take into your appointment, then they can't redeem the Zim bond, or you don't get any money. Somebody, I saw an argument with some people on the chat room in the chat room about where to purchase Zim bonds. It doesn't matter where you purchase them. If you ask me for a link on eBay that I have found a good price. It's not that E bay is the place to get. I'm not advertising for eBay. I don't care where you get your money. If you ask me, here's a link where you can get 10 100 T notes for \$13 free shipping. I'm just sharing the the link with you. I have nothing involved with that person. I have no nothing involved with this. The sellers. I'm not promoting eBay. I'm just saying here's a good place to buy it. And if you can't afford \$13 for 10, then you can maybe you can afford \$5 just under three, just under \$4 to purchase one 100 You know, and then they charge 89 cents for shipping. So \$5 And you've got one under Tino. eBay is not the thing. If you don't have the Zim bond, then you do not get the higher rates. You do not have you don't have anything to exchange or to redeem. So if you if you think you can get by and give it a try, but it's not going to be consistent. with your heart, and then knowing that comes from their order to qualify for the money through revenue sharing solutions. You're mixing things up here. Love won society as a structure. We don't have money for people to redeem their gym through. You go to the alliance sponsored redemption appointment. That's where you get your money. It has nothing to do with love won society. Love won society really has nothing to do with any Zim redemption. Love won society is only a structure that you can use for your humanitarian activities. So don't expect anything coming from love won society for your redemptions. You go in there with the idea that you want to use love won society then let them know. They appreciate knowing that. But there's others who will not be using love won society that would justify getting the higher rates and whatever they want to do. I rather doubt that many people besides me and love won society there are even tell you to get more than a one for one, some people are going to be happy to get five cents for one zoom. So those are the people that are not really involved in humanitarian activities. My perspective, so please do not, please understand that love won society it has nothing to do with the redemption appointment. It is between you and the Alliance. Present yours them if you have them, if you don't have them, I have a hard time thinking you're going to get anything unless you're exchanging your Zim and Dong, or your dong and dinar and those those other currencies. And that that will that be okay. I will say? Nope. Let's go on to the next question.

T

Tracee 42:11

Is LWS the official platform through the Alliance for receiving and sending funds for humanitarian purposes?

R

Ron Giles 42:20

No. Would you say the official platform anybody can do what love won society is doing and the alliance would support it. They're supporting love won society in terms of perhaps this is the only one they know of I don't know. However, the love won society and the revenue sharing solutions of the programs that we have, were created in the heavens before they came here on the earth. All things are created spiritually before they're physically on the earth. Love won society was downloaded because it has already been created in the heavens, the Alliance knows this. So they're giving their stamp of approval on love won society. There are other organizations who will be perhaps distributing funds. And it's not it may not be through level one society. I have a conflict of interest with that, because I think we're setting up our program to be a balance between employment contracts and beneficiary accounts as somebody comes in and throws money in there and upset that balance. So be it. I'm not in charge of that sort of thing. Let the Alliance deal with that. We're just doing our part. So we're not the platform officially of the Alliance. But the Alliance knows of our program and gives their stamp of approval for us to be existing. How's that? Next question?

T

Tracee 44:03

I have watched the RSS, CAC trainings and I have downloaded and printed the documents you suggested in the information you have so generously provided about the RSS appointment. You have stated that a revocable trust document will be made available at the appointment to temporarily use as your structure to receive funds. You will need to name the Trust Is that still true or do I need to have the trust drawn up in advance?

R

Ron Giles 44:30

That is still true. Next question.

T

Tracee 44:34

Cool. That was fast. Under your explanation. And your explanation of LWS and currencies held by LWS International. You list Zim total VND I have no dogs, either currencies if you have them. Please explain number three. Does this mean money I currently have coming in to fund my personal retirement slash my personal savings?

R

Ron Giles 44:59

It has to do with At the the exchange of devalued currencies, other currencies would be the

rupiah and there's a bunch of others. The Afghan dinar dyno did all. Those are the other currencies I'm talking about has nothing to do what you personally have. Next question.

T

Tracee 45:25

What is required in 10, or more proof of funds statement of clear clean and non terroristic reference my name on the letter? Can you explain this?

R

Ron Giles 45:35

Well, a proof of funds is just basically that look at the term proof of funds. That's what a bank gives out to somebody who has funds in their bank. And that's, this is a letter that says the proof of funds, the money is in the bank. If you wanted to go out and buy real estate, there's some properties you can't even get into unless you have a proof of funds, that you're capable of buying that house because they just don't want tire kickers going through and, and wearing out their carpets and things like this. And they don't want people to know what's in their own home. This is your ticket to get into some properties. proof of funds, I have that I have here a proof of funds for you to see that I can buy this property, if I'm so inclined, I'm capable or whatever, if I'm inclined. That's all they want. That's all you need that for. And if you don't go and buy properties where or do things with a proof of funds, you may even have proof of funds as you go into a contract. We'll see. I shouldn't have even put that in there. Because it has caused more confusions for people who don't understand financial instruments. But for those who do, this is a good chance to get that taken care of at the appointment, then you could go out the next day and buy something. If you want to keep in mind, you're going to get your first structured payout payment at that appointment. So you'll have if you're the 100 T note, it was 500 You'll have 1.25 quintillion dollars as you walk out the door in your account. This is all that that letter is for now, where does it come from? Who was? What's the letterhead? Is it the Alliance? Or something? I don't know. We'll see. I'm just asking for it and what they'd produce or say, No, we can't do that, then then we'll figure out a better way to do it. But that's my first asking. This is something that we'll need as we move forward in making purchases, or perhaps participating in a contract that changes the lives of people forever. As in we're going to buy all your your produce that you produce on your farm. And this is a whole new structure payment system that the farmers you're not used to Yeah, they're going to really love it, because it's a good way to do things. Next question.

T

Tracee 48:30

Will the Zim benefactors be funding the love won society programs in addition to our own if yes, what part of our funds will go first to LWS.

R

Ron Giles 48:42

I don't like that statement, part of our funds will go first to LWS. If you sign a contract with us. You're setting up an account. We call it a master account that the platform can use to draw money for the liabilities that you create as a Zim benefactor in initiating your RSS program with beneficiaries. If you don't sign the contract, what do you would what would you do with love

won society? You're not a benefactor, authorized to do anything. Once you are as in benefactor and assign that way, go, put your money establish the account, put in maybe put in a quintillion dollars in the beginning. You still have point two five quintillion for your next payments, but you put all that money in that account that master account for the revenue sharing solutions program. That's your responsibility to keep that that account fully funded so that you never need to draw real quickly in something out so that could be a word Workout in some kind of an automatic way. And that's what I would prefer. So that you don't have to worry about it. And I don't have to worry if the 5700 zim benefactors are all taking care of their master account. Because I have the liability, and I'm passing it on to you. Love won society has the liability of all of the beneficiaries that go through and all of the the money that goes through love won societies or the RSS program. I have a bond for that I will have a bond for that. It's huge. Oh, it'll never let the point is it'll never be drawn again. Because the the Alliance doesn't mess up your payment. I wouldn't expect God to foreclose on things. Next question.

T

Tracee 50:56

Would it be appropriate to use my own website and email as a director and direct communication to love won society?

R

Ron Giles 51:05

Those are things personal opinions or personal ideas and concepts that will help you to support your your work as a director. I think it's appropriate. It's not a requirement, it's appropriate. The director needs to do what he needs to do to be sure that he's functioning at a very high level communications is is essential. Or the director with the people he's working with. I believe that emails are really good

T

Tracee 51:39

Is LWI International, up online yet to study and I can't get revenue sharing out solutions up either

R

Ron Giles 51:48

Either of them there they are available or not. We don't have websites.

T

Tracee 51:55

How big an area should a CAC director oversee? Inhabitants businesses altogether?

R

Ron Giles 52:01

We call it community assistance centers because it's the community that the director is responsible for. I call it a geographical area. near where I live, there's a geographical area of

Glendale. So I would have one for Glendale, another one for Kearns and other one for West Valley. And then other ones for those small geo geo geographical areas. And then you give them as many in assistance or have them hire as many assistants as they feel that they need. Don't you don't want to have a large geographical area. If I have here we have a city of what in this area about a million people, not a lot of population compared to other countries but or areas, but it is large. And so we have the geographical areas be separated up into groups, and director for each one of them. The director is is beginning to loom as a very, very important position or as in benefactor. How many assistants and so forth is the key one director for a geographical area, a lot of assistance for the real estate and finding the construction and doing the employment contracts with businesses and so on and so forth, are going to have a lot of hats that they're wearing. And they're going to have to really be up to speed to be able to handle that. Unless they can delegate to other people of course they'll still retain responsibilities. But you can delegate to other people for specific things and that's their job and you pay him to do that and and if you if they don't do a good job and you bring him in here to talk to him, find out what's going on. Where's his are my educating you enough? Are you are you happy doing this and delighted. And so, you know, I don't think it's appropriate to fire people. unless for some egregious experience or something that they have done. That is illegal. Anyway. That's just a way to be able to control things better. If you have a large area you may have some problems for one director. Be wise when you get there you'll see what you need. You'll solve problems when the problems arise we're shooting down ghosts. Now rather than problems, when the problems really arise, then we deal with it. We can do much shooting down ghosts that we don't know is going to come up and all that sort of stuff. And we will be just projected, and have an ideas in our minds how we're going to solve a problem. But until a problem presents itself, along with the problem and think about this, along with the problem comes the solution to that problem. It's just that you have to seek it out and find it. Every problem has a solution, and is right there with the problem as is presented to you. And it could be just the next step that you do to get the problem solved. But we're going to have a lot of fun with this, because we're going to be inspired to do the right thing. I just really trust the heavens, I trust the communications that the heavens can give to us. Because my heart is connected to the quantum pneus, the quantum field of understanding the quantum field of knowing by heart is connected to that our bodies are connected. If you really understand what this body is this, I call it the Adam Kadmon body that contains the human DNA. That is the human DNA is divine natural attributes. Although Lina uses that term. And they have one here for the earth, it is divine. That whole system that we have and is designed for communications, from the quantum knowledge of everything our our heart is is connected, it's connected to God. It's connected to all knowledge. If you don't believe me just start using Kinesiology. We won't go into that. But there are people who have a thriving business using muscle testing, to determine because your body knows everything, and they just use the muscle testing to get the knowledge from your body. Don't call any further into that. Next question.

T

Tracee 57:19

Last question, are the CAC directors allowed to participate in the referral bonus and the generation bonus programs

R

Ron Giles 57:27

As a beneficiary? Yes, they can. But as a CAC director with a contract, they don't they're not participating, that is not a bonus program as the employment contract program. And the bonus

program is over here. And they can be a director and be a beneficiary and in the beneficiary program, they can participate in the bonus programs, one cent for every two people, you think that director is not going to be in position to bring in hundreds of people? Yeah, there's no reason to just pay him his 25 cents per minute or whatever. He's going to be out there doing his thing. And I'm going to give bonuses for the numbers of people that are put it under contract employment contract for a week and set some goals and set some bonuses if they meet the goals and that sort of thing. We had, we're going to have so much fun with this. People are just going to love the way that this thing works out so well. With that let's let's and we've had our our hour of fun. So I thank everybody for being here and, and listening and those who do get the chance to listen to it. We're hoping always that sending our blessings that the information we send out is going to be useful for you. And with that, thank you Tracee for your assistance. And we'll probably have some more because we have the end now because of the hour. We still have more questions to go. So we'll do that again very shortly. Bye
