people, question, humanitarian, zim, money, appointment, benefactor, rss, alliance, thought processes, director, higher rates, reports, program, contacted, job, heavens, heart, person, mind

SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Good afternoon humanitarians. This is Ron Giles. I'm here with Tracee. And we have question and answer in mind. So today is the 26th of November 2021. We've got a few questions here. So let's get started.

T Tracee 00:18

I am aware that I am a sovereign humanitarian and the buck stops with me, can you please share your skeleton job descriptions for the CAC director, assistant director and their respective minimum compensation, I am aware this will be adjusted by the cost of living in each locality?

R Ron Giles 00:35

we are doing that now, like a job description for the directors and the CAC assistant directors. As far as the compensation and so forth are concerned, that's obviously going to be part of the cost of living in each locality. But in my mind, the director is going to be a very, very essential person to do a lot of stuff that that is basically an extension of the the Zim benefactor, in this structure, rather than benefactor, moving in towards the concept of a benefactor slash manager, because we don't want outside influences or people to understand or think that they're working for a benefactor. And that there's a benefactor. And I'm the Benefactor sort of thing if you're the manager of the CAC program, I think that will alleviate the possibility of people finding out who's got the money and so forth. However, we're planning on doing that the job description is for a director can be expanded into other areas far beyond what we thought the director of the community is, is concerned, because if we have the inner cities, as one thing, we have just regular cities, and that's another city, another situation. And if you get out into the suburbs, and then out into the rural areas, the directors responsibilities may change and may change quite drastically. And so the concept of a director then would be somebody who's assisting in moving the whole program of love won society, into implementation, both with the economic stabilization system where you're offering contracts to farmers and large businesses and as for thing, and as well as other areas, so the director could

be in a rural setting could be somebody who has a lot of expertise as a farmer and knows how to help talk farm ease to farmers. So I think that there's going to be a lot of to do there. As far as the application is in its widening, even as we're speaking in my mind, I'm thinking of a whole bunch of other things that will go in there so that we can, you can have a place to start. So that's what we're trying to accomplish with that. And we will do that. Next question.

T Tracee 03:19

As my mind creates more and more ideas for humanitarian projects. I'm also wondering with all the humanitarians whom I know personally, should I invite them in now as benefactors or wait until I'm a benefactor and invite them in as directors? As I write this, I realized I should explain to them now what it's all about. And then they can decide Do you have a comment on this?

R Ron Giles 03:40

Yes, I do. There's a certain amount you can share with like minded people. With our program. I'm not sure that you want to hire benefactors, invite them in as, as the Benefactor wait until I'm a benefactor and invite them in as directors. A benefactor would have the Zim they would all be ready be positioned to go in and get the higher rates so that they can become Zim benefactor, and fulfill the liabilities that are created by them in their RSS program. So I'm not sure I understand exactly that. But perhaps, if you have people identified that you would like to direct be directors and so forth. I don't think it's a real good idea unless there's, you know, unless it's friends or family or something like that, that that you want to get involved with. And then of course, you want to keep a certain amount of anonymity with people. So as far as getting a lot of money sharing is appropriate, if it's appropriate sharing with people who have a like mind. Otherwise, inappropriate sharing is where you start getting people opposing you causing problems. So if you share inappropriately, you can get yourself labeled as a lunatic or whatever else you want to call yourself, whatever they want to call you. And so be wise in, in sharing, but don't share too much where we're anxious to get going. But until we have money, we have nothing to talk about outside of our close friendships, who perhaps would participate in becoming a Zim benefactor, if they knew that they could buy Zim and do it themselves. So you just have to be wise in the way that you want to implement this. But I would caution you to be Have patience until we have the money because money talks, you have money in your hands, and then you they'll listen. But until then, they may think you're a wacko, which most of us are, perhaps who knows, at the end, right? We just have to go with the flow. Next question, please.

T Tracee 06:10

Okay, on the RSS program, I want to work with metaphysical churches by putting them on a basic program at 10 cents a minute. So are they limited to a maximum number of only 20 members signing up, or what if they get at three to join up, or about 41 Extra pennies for downloads to the church cannot work or is the better way to fundraise for them,

R Ron Giles 06:34

I would like to see you do something like this with all organizations. It doesn't matter whether

I would like to see you do something like this with an organizations. It doesn't matter whether they're metaphysical, Christian, Muslim, whatever. We don't put our belief systems in front of us as we go into these people. If you have an organization, a religious organization has members of their community that go to church there, you go to the minister or whatever they're called. And you offered the program to them. And then the structure is that the people in his organization will sign up under that ID number, so that everybody is supporting the church by signing up under the minister. And then if there's let's say, there's 200 people in the church, then that will give him a penny for every two people that sign up. So that's, that's 100 cents, or \$1 per minute download, that's over \$500,000 per year. That's money that the church can start using instead of passing the plate, and so forth. And I'm not saying that that's been a burden to because because people come and service there, and you're giving them the service. So but I think that that's a great way to for a church to be funded, not only with the money to run what they're doing, but to participate in some meaningful, and I've said that it's not meaningful, but some very meaningful humanitarian activities that cost money, and are prohibitive until they get this kind of money in their hands. So I would like to see that happen. And yes, to one penny for every two people that sign up under that minister or the churches or whatever, you want to set it up as that signs up under that original ID number so that they can all the church can have the benefits. And then the people in the congregation can go find people outside in order for them to increase their downloads, if that's what they want to do. Next question.

T

Tracee 08:57

Most people are brainwashed to know that if they are receiving money from different sources, they're supposed to declare that and pay taxes on it. So what is the story to tell them so that they get a new understanding of why no taxes on the RSS money?

R

Ron Giles 09:11

The RSS money won't be here until major changes are already taking place in the government's. GESARA governments are required to be involved in the RSS program. So there's a structure that says you don't pay taxes. And there may be some counseling and things of this nature that have to go on as you get down into the communities that don't really understand what's going on. But income tax is going to be going away. So we're going to be paying sales tax on non essential items, only new, non essential items so things are going to be changing and they'll know about it. So it's not a big thing for us to have to say something about it or be out there teaching people about this sort of thing. But your information has to come through some way. And it might be that you're the first one to talk to him about it. If so, then we don't pay taxes, period. There's no, it's an income tax, that's normal. And that's why the IRS and all of the garbage that goes on with having to know everything about you, because they need to know how much just levy taxes on you. So all of that is going away. Privacy will be ours again. So it's a transition. We might have a little bit to do. But I don't think that this is going to be a major problem. Question.

T

Tracee 10:37

When we are not careful about our consciousness, this can become a 3D Carnival of wealth management can we enjoy in our program discussion, solidarity of heart, in love to live in

present trust our inner knowing respect others dominion

R

Ron Giles 10:52

I agree with that, I wouldn't say that we are creating a 3D Carnival of wealth management, I would say that you're not pulling on a pretense. It's who you are. humanitarians don't have a pretense that they're out there trying to do good and says that's what they normally do anyway. So we're not trying to be pretentious by putting on something. In other words, it's an invitation to a better way of life that we're presenting to them. And we represent that better way of life, by the way that we treat other people. And let that be the message. We're serving one another out of love and harmony, for correct principles that we live by. Those correct principles may have to do with the fifth dimension. Our job isn't to preach to people, our job isn't to try and change people. Our job is to share with them in a way that they can see our good works and glorify those, that which we're trying to serve, which is our Father in heaven, or whatever that means to people. And it's not exclusive to us. Most people have the concept of an authority that created all of this. And let that be that we believe in that that we're not preaching and other people don't need to know about it from our preaching or pretense or whatever we just go out and be ourselves is humanitarians. Let the rest of it just happen. We're there to do the work. Yes. But the work is not preaching and teaching and getting into other people's lives and think that they're broken to where we have to fix them. That's very important as we move forward, that's respecting the demeaning of others, which go about our work, which go back to who we what we are, and do the work that we are here to do. So. no pretense. We just, that's who we are. Other than that, just be a good example. And you'll be fine. Next question.

T

Tracee 13:08

I listened to your q&a and you say that I have, I may be able to purchase more Zim. I am not sure if it is possible. At this point in time, I have a lot of love to share. However, I am praying that I will be able to help others as I envisioned. Is it not too late to purchase more Zim I have 100 trillion Zim. I know that my upline will answer my questions. However, I want to make sure that I can help as many others as possible. So I guess they're wondering if they should go ahead and get some or if it's, if they're running out of time?

R

Ron Giles 13:39

Well, you're not running out of the time, you know, there's going to be a time for delivery and all that sort of stuff. But I have a couple of sources where you can get 10 100 T notes, that's 10 times what you already have for \$13. And it's free shipping. And it's from America, it's in California, both of them are in California. So you kind of figure out the time that it takes to get there. I'd say it's inside a week for sure. But my suggest if you ask me, I'll say always get more. But don't ask for a lesser rate, then the 100 T note. If you're asking for 500 and that's in your heart, then it doesn't matter the number of Zim that you have. That's the same rate the rate is in your heart and you're just more zeros or more opportunity are more opportunities to do humanitarian work. So you can multiply by 10 your ability to do humanitarian work with \$13 in a week or shelf time and I think we got plenty of time to do that. Next question.

T

Tracee 14:50

Can you tell me why it has to be a three ring binder that we use for the appointment I can only find two ring binders in the shops and on the internet. Also, I only have a two ring hole punch a thingy. I have lots of binders with different fittings that I can use, but not with three holes. Why is this?

R

Ron Giles 15:10

I go to the store and I see three ring binders. I see I go to the store and I look for two ring binders. But I can't find me. So I'm just saying three ring binders. It's a binder. That's, that's really easy for your presentation, rather than to bring a briefcase full of notes and stuff like that. It's just a way of organizing. If you have find a better way or an easier way for you, then there's no problem. Please understand that these are only suggestions. The suggestions are there to open up your mind to what can be done. And once you your open mind, your mind is open to those things, then let your mind take over. And it'll it'll connect with your heart. And so the things that you're doing is remember heart. And that's the most important thing you can do. Why is this? Just convenience? Do it the way you want? Not a problem? Next question.

T

Tracee 16:05

I understand why I need a copy for the person at the appointment a copy for me. But why does my husband need a copy of the info as he and I are one can you explain as I am having issues finding the right binders? And they're also asking how many tabs do they need, like the sections because they have to order everything off the internet, and they want to make sure that they get the right amount.

R

Ron Giles 16:28

Those are those are problems. So I haven't thought about those. But as far as your binder for your husband, if he if two of you can sit and watch and, and follow along or make a presentation. And that's all you need to do. And the reality is, is that you're the person who's conducting the appointment, maybe they won't need a binder. I don't know all of those things have not been through it before. So I'm just speculating. And please understand, some of this is just my thought processes that are preparing me as I'm doing my work. And this is the thoughts that I have. If you have better ways and do your way, it's always better to do it your way, because you're familiar with that. I'm just setting up away as an example of the way that I'm doing it. And am I any better than anybody else's way? No, I don't think so. I just want you to cover all the things that are necessary to appointment. But the person at the appointment will be the one conducting the interview. And you're there to answer the questions. And your presentation shows that you have gone through the thought processes to prepare for that experience. And you're bringing to that experience your preparations that give you a lot of satisfaction and feelings of self worth, that you can stand in front of an angel or something that whatever it might appear to you, I don't know, I'm saying an angel could be in the Senate being we don't know. But the fact is, is that you want to do your best for that appointment, because it's going to be pivotal for you. It'll be your you know, your first impressions of the lasting impressions. This is what you're presenting that that appointment first impression for the

people that you're the person that you're going to be working with. And all they know you they haven't felt of your presence and your thought processes and that sort of thing so much is they will after a period of time after a wave working together. And that's the creation of the relationship that you're working with. With them. So do your best. And don't let things get in the way. Don't let one, two ring binders getting in the way of wondering or three ring binders. All of those are just non essential things. So in your mind, I'm doing the best that I can. And some of these people saying you got to have all of this information about proof of identity and all that sort of stuff. Oh, and they worry about I don't have a passport and they worry about all of these kinds of things. These are incidental things that have really no meaning beyond that you have them. If you have them fine. If you don't, then don't worry about it. The angel will know who you are anyway. So there's no real reason for you to be proving everything and showing off and like as if this was a job interview for a 3d job that you're going to be performing. Don't Don't worry about this. It's just going to be a loving, wonderful, wonderfully loving experience with a highly evolved spiritual being. That's coming down here she specifically for you. You help you do your humanitarian work, which fulfills your heart's desires is going to be a wonderful experience by knowing that that way and expect that that will be true and then make it true. Next question.

T

Tracee 20:19

Okay. Could you please describe in the details possible? What is the Alliance vetting process going to consist of background checks, or whatever do you think will be involved?

R

Ron Giles 20:32

Well, if it's, if it indeed is what I say it is, and that this person is going to do have already studied from the other side of the veil, who you are what you are, there's no background checks, they, they know that sort of stuff as a part of the universal knowing the quantum field of understanding. That's what they tap into. You have an Akashic Record a personal Akashic Record, meaning all of your lives, if you don't believe in multiple lives, then it doesn't matter. They know everything about you. So there's no reason for you to have to concern yourself about what they're going to background checks and all this sort of stuff. What does that involve? They'll do their due diligence, we just do ours. And you come together, and there's going to be a beautiful experience. So don't worry about that. No need to worry about that. Next question.

T

Tracee 21:30

Now, you stated some time ago that the RV would be before the end of the year 2021. It seems that answer changed slightly too, and it's safe for humanitarians. Do you have any timeframe or further light you could shed on this subject?

R

Ron Giles 21:45

Anytime a date is given, it's always speculation. That's why the Alliance don't give dates unless it's a military deception operation. And there's there's a benefit of giving an enemy certain information. And then they respond to that information. And it's not accurate and true. So you

information. And then they respond to that information. And it's not accurate and true. So you have the upper advantage. There's no real dates given, there's no way to know. You know, how long is it going to take you to build a road across America, who has a certain amount of you go by mile by mile, how much how long that might take and so on. But the job is finished when the job is finished. When it's safe for us to go out on the battlefield and know that all of the machine gun deaths have been eliminated, then it's safe to go out there on the battlefield. Until then it's not. We don't have a way of knowing that. How long is it going to take for all of the machine gun nests to be taken care of? Who knows that that's what we're up against. So if I say it's going to be by the end of I believe it's going to be by the end of 2021. It's only a it's not even really a gut feeling. It's almost a projection of my hope that it's done by 2021. It may be done by the end of November, it was short. But it could be by the end of middle part of December, we just don't know. So if you're trying to tie something down, the only thing you have control of is to tie down your preparations. And if you focus on things outside of your control, then you're going to have some disappointments. If you depend on your own self to prepare for things, then that's where you have your thought processes that can get down into the deeper things like we're doing with these trainings. At what is it going to be to be what direct are going to look like that up to that today? How's the RSS program going? All these are details we're getting down into the details. Do we really know? No. We're just shooting down ghosts shooting down ghosts is mean, we're gonna fall out there that this might be a problem, but we don't know it's going to be a problem. You know, we we want to shoot down the ghost before we get them so that we have a plan of attack, if that's the right terms to use. So we do our best to look down the road and see what there and prepare for it. And then we have to wait until we get there might get a flat tire on the way it's going to it's going to delay something. Well, we don't know when the flat tires are going to happen. We don't know when our perimeter is been breached and we have to go over and attack the people who are trying to come out through the perimeter. Those are the battlefields. That's the battlefield that I'm talking about. That's the, that's the way that things are happening. And let's let's be realistic, we have an expectation that the heavens can just snap their finger, and it's all done. That's not according to free agency. That is a primary thing that they're working with. We had pre agency, we came here to do our things, people are stepping on our free agency, which is inappropriate. So we have rules, they have rules. And according to those rules are the way things happen. And the battle that we're in right now is according to the way things are supposed, according to universal law, that was set up for the third dimensional experience. So they can't just come in and kill everybody off the bad guys, they could do that. But that's not appropriate according to the third dimensional laws. So we have to obey them, they do. And if you don't think they won't do their will have a dispensation for certain things that they can do. But it has to be okayed by God in the higher realms, and he's put out his decrees and that decree is the way it's going to be. So we live by those rules. Even if we are at war with the dark side. And the the light will prevail, according to those rules. Just like Trump's not going to come back and tell everything is all done legally, period, exclamation point. Otherwise, you have problems. That's the way I look at things. And I, from my experience where they haven't, that's the way that they work with us. So that time will come in divine timing. And it's our job to not get all mad at the heavens or the lions or anybody else, that we're not getting what we want. Our job is to just have patience to deal with things the way they come. Not get out of sorts with anybody. Try and maintain an equilibrium of peace and calmness. Avoid swearing at people, you know, that sort of stuff that gets you out of balance, or out of a call, say Alice shorts, and I don't know what a sword is. But I hope that there's certain goods things. You're all out of sorts and you don't have any left and go to the store, buy some more. I don't know, how do you buy sorts, but at any rate, you understand what I'm saying. And our job is to have patience and understanding that things

happen. And we'll get our blessing when it's time to bless us. Maybe we're the ones that are holding it up with all of our getting all upset with everybody. And that could be a very real thing. We're not ready for it. That's not going to happen for us. Go ahead. Okay, next question.

T

Tracee 28:09

Will there be a video of how to interview a director?

R

Ron Giles 28:13

I suppose where there will be, we'll help you as much as we possibly can. We don't know. We don't know how to do a director interview. At least yet. We're figuring it out. But we'll do what we can. And we'll share. Next question.

T

Tracee 28:34

When we start the RSS and LWS programs, would you give us best advice on how much to start RSS and NRELS programs? Like 500 trillion or more?

R

Ron Giles 28:47

Would you say started? You have a money there? Are you saying that you got a budget for it? Just just started 500 trillion? How many 500 trillions. Are there any 1.25 quintillion? I don't know. I don't care. I just know I've got plenty. So I'm not sure how to answer that question. How much is it going to take? I don't know how many people are going to be in your RSS downlines compared to somebody else's? Who knows. It's one of those things you can't nail down. It's one of those things that's just out there. So just if you need a cup, look for a bathtub of water. That's what I'm doing with the 500,000. We don't know that a cup of water might not be enough. That's why you asked for a tub of water or 27 buckets of water or something like that. That's we're preparing we're over preparing because we don't know what's coming. Zeros just simply mean opportunities to serve. If we run out of zeros behind or funds, then we can't expand more into other areas. And if that doesn't break your heart that there are children over there and those areas, other areas that you can't fulfill, it breaks my heart to even think of that opportunity that possibility of, we can only say half of you people, we can only assist half of us to get through life with money. That would be the most tragic thing that I could ever imagine. For us to participate in and not have enough money. So let's just be sure we're doing the right thing, how much we don't know, I advise you to just my master account for my RSS account. It's a good idea for me to put a quintillion dollars in there, I can park it in there, and it's not going to hurt anybody. I'm not going to put it in a bank account, start making money. It doesn't work either. Where you park your money and whichever account you want, you can do. But it will never be in a situation where you are going to be running short of money if you are prepared. And that's why I say \$500,000. If not one person in this world that I'm aware of that's asking you or anybody else to ask for \$500,000 That makes me a lunatic. That makes me greedy. That makes I can't believe all the words I've been told. To go back and talk to the alliance, my representative from the Alliance. We afford this yes, you can. You want to 500? Yes, that's 500,000 No problems with that. You want a million. There's no problem with that

either. But I mean, there's enough for all of us to have a million dollar presume we have no idea how much they have. So we push our limits of thought processes in this. And we're always going to fall short of what the limit would be because there is no limit. It's hard to think about them. But we've got the job of bringing mankind into helping mankind into the golden age of mankind. How much is that going to take? You don't know? Either do why. And we're the ones that have to do the work in the blind until we get into the redemption appointment. And we prepared ourselves to do the things that we need to do. If you're prepared, you shall not fear. That's the way I look at things. Next question.

T

Tracee 32:43

And then Australian want to do the RSS program as well as all your other programs? Am I able to do these here? And would I get help as in guidance from LWS to do this? As I do not know, if there are any other Australians wanting to do it.

R

Ron Giles 33:00

My suggestion to you is to go on to telegram and start networking. And asking if there's some people who live in your area that can contact you by private message. That's the only way really that I know of how to get help. Can you do these things in Australia? Are you kidding me? There's hundreds of people in Australia that are Zim holders. And I don't know all of them. But I know there's 20 or so that I know of. And so you're going to be able to do it. And then you're going to be able to do it in a in a marvelous way. Australia needs just as much help as any other countries. So you don't have as many populations as perhaps in other countries, but they got a lot of land and all that. However, yes, you can do it. Network, find some good people to work with. And and if you were to send me a request for some Australians, I can go and ask other Australians that they would be interested in talking with you. And then I will ask you to give me permission to have them contact you. And if I'm not overstepping on boundaries or dominions, then I will do that. worried at all together we can help each other. Next question.

T

Tracee 34:36

What exactly is embedded humanitarian?

R

Ron Giles 34:40

Well, the question is what is vetted me that it means you being cleared of you know, you're not greedy and uglier and... you don't have to be pretty to be it's a way of determining Your heart. And the best way to do that is to have God speak to you. Or if you have a job to determine what humanitarians are, then you tune in and and have the heavens help you to understand who are humanitarians and who are not. That 10 humanitarians means to me that you go into your appointment within an Ascended being or something like that, they have already determined you to be a humanitarian or not. And it's only when I say, see, some people say, Well, I be humanitarian, I'd like to do something like that. But their real interest is in creating a legacy for themselves and their family and live on the top of the hill and look down on other people. That's not a humanitarian, although they think they are in my definition of

humanitarian. So a vetted humanitarian is one who is not just thinking they are, but they really are in their heart. And the only way I can know that is if the heavens come in and help us and that's what they're going to do. They're the ones that determine how much money we'll get. In reality, we determine what we're asking for. Through going into our heart, and determining that in some way, the heavens will either give it to you in your mind or in your heart, somehow, you will get the message. That's the spiritual guidance that you're entitled to. And when I say entitled to We didn't come here, without that, we came here with it. The best way to turn that down is for people to destroy our DNA. That's what they're trying to do. So we can't even talk to our gods. Wherever, wherever we want that to be or believe that to be. That's why they're attacking us. And our DNA, they don't want us to be able to communicate with God, because you can't control those who can communicate with God, they want to control us, and use our creative energies to to further their position. We were taught how to be hateful, spiteful, racist, and all that stuff by other people who come in and pre pre judged or pre determined how we're going to think by conditioning us in a society that does that sort of thing. It's not permitted in the heavens to have that kind of judgment over other people, or, and so they're using us who created weapons of war humanitarians used to think it's some other species guy. Creativity is for humans. That's what makes us distinct and different than other species. And our human DNA is that source. And we get that information that is vital for us as humanitarians to do our work so that we'll know what we need to do and have the guidance to help us through it. There are those who want to destroy that. And there are those who are trying to stop us by giving us Oh, you can only get 12 \$11 million for 100 T No, you know, I say around the corner and up here, block, buddy, I'm going to get what I'm supposed to get. There's no none of your business telling me that I can only get \$11 million for a 100 T note is violating my dominion. So if you know where the door is, don't let it hit you on the way out. I want nothing to do with that kind of stuff. We're humanitarians. We're sovereign humanitarians. We also sovereign, Alliance humanitarians. And we've got a job to do and that's what we're preparing to do. Next question.

T

Tracee 39:15

if an RV takes place, we have not been contacted by the Alliance. Do we just take everything to the RV minus ours them and then wait to be contacted far as an appointment?

R

Ron Giles 39:29

Do we just take everything to the RV?

T

Tracee 39:32

Like their currency, I am assuming

R

Ron Giles 39:34

Oh, I see. I see what you're saying. Like. Let's go back to why are you not contacted by the Alliance? That's the question you want to be asking. I'm not contacted by the Alliance. Why am I not contacted by the Alliance? Not what do I do if they don't get a hold of me? The really important thing is that you determine yourself to be humanitarian, if you don't get called, and

you're not, what a great disappointment to think that you are all this time and you're not. Have you purified your life? Have you determined some of the errant thought processes in your life that make it so that you're not a humanitarian? Do I come from judgment? Do I come from greed? Do I come from a desire of power over people? Am I a husband that has power over my wife, and she better do what I tell her to do, or the children the same way. It gets right down into your everyday living. If you've come from greed, and power over other people, and think you're so arrogant and proud and great in and of yourself, and your thought processes, and are not subject to what the Spirit is trying to tell you, you may not even get a telephone call, if that's the way that they're going to the alliance is going to contact you. So if you don't get contacted by the Alliance, I would be on the floor crying. And a pool of tears is probably not going to suffice for me. So okay, getting back to your question. Take everything you've got into your appointment if you if you get one, and be at the mercy, I say mercy, but be at the grace of those who know better, and be in harmony with that. You may not get the money in the beginning, but you may get a chance to serve as a humanitarian, using other people's money. Next question,

T

Tracee 41:43

if I am not giving out my master QFS, my QFS master ID number, what number do I give to prospective beneficiaries. I've studied all teaching material, but somehow have not figured this out.

R

Ron Giles 41:55

You are as a benefactor, you are at the top of your peoples, that chain of benefactors, you can start with one, you can start with 2500. If you can get out to that many, use your master ID for those people that you want to get in contact, or want to bring into the program who don't have another person to refer them. Because they're not in the program yet. Your master ID is to help people begin, then when you have somebody in the program, they use their ID to refer other people. And then watch how that spreads like a wildfire. Everybody wants to be on this program. There's no reason not to be seven and a half 7.7 billion people I say in this in this world, every every person should be on the RSS program. And they should also get employment contracts. I think that that's wise for everybody should have an employment contract, if even if they're starting their own business, let's give them a contract. We want them to be happy. We want them to be successful in what they're doing. But some people measure success by the amount of money they're making. And that's not what we want. We want their service to mankind will pay for all of that. And then each person can come from their uniqueness as they're adding to society. So every person in the world should have a contract and the employment contract, and every person in the world should be on the RSS program. That is my belief. And that's why I say let's go for the higher rates, so we can afford that. Next question.

T

Tracee 43:36

How beneficiaries received their debit cards to access cash if needed? Do we have any more info on these issues?

R

Ron Giles 43:44

We don't have any more issue my my gut feeling gut feeling and it could be wrong. It will get whatever you need at the appointment. They're not stupid. They know how to they know that we need something like that. might even have our names already written on it. Right there into the plastic. I don't know. But that's what I assume is going to take place. We'll get our card. We may get more than one card. We'll see. But it will be at I believe it will be at the appointment. I don't think they need to send it by email or mail. Snail mail, call it I think it'll come down. Next question.

T

Tracee 44:32

I'm 72 years old and I don't know what I can do anymore except help people I want to be a benefactor and I want as much as I can possibly get for my Zoom because the more I get the more I can give to others. I first and foremost want to help the children and I think that more we can get at the more we can give. I also want to help little town that I live then go back to houses bird sellers as we are tornadoes every year but I want to help all the little towns Also want to plant trees? Better than ever? Yeah, masking is shouldn't my ask for the larger return on my Zim?

R

Ron Giles 45:09

Of course? Well, yes, absolutely. You, you know, I'm 75 years old another month. So what does it matter our age we get in? No, I'm just gonna do my geriatrics shuffle over to the bed up in there and be sure I bring on some new running shoes. And when I'm finished, I'm up, I'm good for another 100 years. In top perfect shape, just my job from then on to keep it we're going to have all that we need to do a lot of work for a rare very long period of time. So ask for the higher rates. And then ask for a little bit higher. If your heart tells you that, then check in with it. I asked for 500,000 Oh, that feels good. Ask next week and see if your idea in your mind has penetrated into the reality that you can ask for more. And get it? And then you ask for a million. That's, that's a lot. And then that tweak, you say, well, that's not all that much money. There's other people that are asking for more. And you check in with right? Would it be appropriate for me to ask for more? 2 million, cool. Next week, I'm going to be up to six, or whatever. We don't know. Just keep abreast of that. Because that's what I do. And when I first started out 80 million or 80,000, excuse me. Then it went up and up and up. And then some clown named Alex or yo yo. That way you can ask for whatever you want, you can ask for 500 pounds on stairs, there's my man. I mean is where he's gone to is a different story. But they laid that plant they planted that seed in my mind 500,000 It took me a while to get up that high. But I did. And now I'm higher than that my quite a bit. We just tuned in because sometimes our mind will limit our receiving so we don't get the accurate amount. Because we don't think that we're either worthy to do that or won't need it or some other greedy thought processes. I'm going to ask you a question. Is it better to leave it in an account within the as an inactive gold certificate in the quantum financial system? Is it is it better for it to be activated and put in my account where it can be spent, or leave it is an inactive status in the quantum financial system that won't be activated until somebody comes along like us and has activated Where's a better place for that? It is always activated. The answer will always be to be activated and put in an account where it has the capacity to be used. Now that's compliance with the Alliance desires. And for these clowns and idiots that these clowns these gurus that think they know everything that

they know the Alliance, they don't know the Alliance. They're all frustrated and upset and because they're losing their position in life. Because everybody else is going to get more than they're going to get whatever, I don't care what they think. I think that they're limited so that they're gonna stay in, they think they can stay in business. They're not, they're gone. They're going to be history. And their only place in history is going to be Nemesis on society. Unless they turn their thinking around and get on the right side of what's happening. Well, they're millions or billions now or just a trickle. It dried up on the way down the hill, compared to what we're going to do. They pick the wrong side. Don't that's my my way of looking at things I hoping that so ask for the higher rate. Don't leave it at just one try. Keep keep open. Let your mind expand into larger and greater thinking. Because that's what God's children do. No limitations. Next question.

T

Tracee 50:00

As the benefactors we may eventually hire 1000s of directors around the world participate in CAC programs along with their assistance, will it be necessary to hire numerous different regional accountants to produce the necessary individual business reports that will need to be reviewed? Or will one international accounting firm be able to handle it all?

R

Ron Giles 50:21

That's a really, really good question. My inclination is KPMG, as is an international organization, accounting firm, and there are possibilities that there are some really bad people in there. But generally speaking, they are one that the alliance has told me is okay to use. If I have a big one like that, then I can get reports from Germany and I get reports from Africa, and I can get reports from Australia and New Zealand everywhere, where they're existing. If there's not, then let's find some people that an accounting firm that can could coordinate with as other larger accounting firms like KPMG. You can find those on the internet there. But yes, I would use a big one. If you could, if not, then use one close locally, they're going to be giving you the reports that you need to manage things. And it may be that you need to learn how to coordinate from one country to another, I don't know, you'll have to set it up. There will be some counselors available for you to find out those kinds of information. That's one of those that would be really good to ask them a question.

T

Tracee 51:47

This must go along with it. It's another good one, why is the Benefactor have to personally review all of the business reports the accountant produces, I can't imagine that I will have the time or energy to perform this enormous task. And I'm concerned it would be overwhelming and stressful burden.

R

Ron Giles 52:03

Oh, it's a very overwhelming, very expressive press roll burden. For the top management to be looking at all of those reports that are generated into the lower parts of what you're doing lower meaning lesser numbers of people, the reports down there, you don't need to see the

director report to to you as a gym benefactor. You'd want to know all that, and you want to, but there might be just certain things that you want. If you're managing each individual, then you're going to be stressfully burdened. It's only a management tool to read reports. And you have reports upon reports upon reports, and then you get the total report that tells you how much how much funds are being used on a weekly, daily, or weekly, monthly basis, or whatever you use in an hour basis. The RSS platform will help entering those kinds of things as a totals as totals and your job is the totals. My interest in Guinea is in getting the home how much money am I giving out into society society on a weekly, monthly or at least a quarterly basis. If I'm not doing a really good job, and we're having all this money that's putting it into that, that catch all bonding account that we put all our money in. And because the next tranche that next quarter just came in, we haven't finished paying or haven't finished spending the money from the last one. It's a good way for you to know how well you're doing. So I'm looking for tolls, not my new reports. That's that's the way my personal opinion, I like to see the overview. Let those who have responsibility and managing people manage those things. At our level. We're managing numbers to some to a major degree. I'm talking about really large organizations. If you just do in your community, in your, your local town, and so forth and so on and, you know, do things on their level that you're working with. You'll be happy. Next question.

T

Tracee 54:32

Well restricted government regulations. Okay. All forms of farming. Will they go away the government regulations?

R

Ron Giles 54:41

It's an excellent question. And I'm going to say just out of my thoughts about the NESAR GESARA, and the way that we're moving into governments will be small. The restrictions that government gives in terms of regulations is as a result of have greedy people and people without good motives making up decisions and doing something. And if there's a restriction somewhere in a government agency of some sorts because somebody has overstepped their boundary, and you feel that they feel like they need to put something in place to stop that from happening, that's totally irresponsible to, for a citizenry, to be in a position where they have to have help from the government keep a moral compass of what they should be doing and should not be doing. A regulation that says you can't put garbage into the rivers, who are we to think that we can put garbage in rivers and make more money by doing that, that is so totally out of line. The irresponsibility of government and regulations comes as a result of irresponsible people doing things that they shouldn't be doing. Now, if we're going to clutter up the earth and clutter up our waterways and, and try and live in that kind of crap, then we're really not going to be around on this earth for much longer. Because the Earth will not tolerate what's been going on before. Think we're going through volcanoes and all kinds of earthquakes and so forth nowadays. That's because the Earth is being destroyed by people who don't care what they do. Now, if we're going to be that way, then welcome to what the earth is going to do for to us. I'm not going to do that. I'm going to responsible, we have enough money so that the bottom line is not the determining factor on the things that we do. What is right is right, what is wrong is wrong. And you don't do wrong things for what you believe to be a right reason, which is greed, and increasing your profits. We're here to serve not only mankind, but the Earth and its people

and its things it's life. It's the forest, the trees, the animals, come from our heart, in harmony with the heavens. God created all these things, let's be in harmony with what he's created. Next question.

T

Tracee 57:38

Okay, last question. Is everyone aware that industrial hub pulls toxins like loss of fate, Roundup and radiation out of the soil?

R

Ron Giles 57:50

It's a good question. Probably they don't know. And, but hemp has been approved to be grown by farmers. President Trump put that in and I don't think the President administration is taking that back. And growing, this is one of the greatest things we can do for mother to my opinion. So I would hope that everybody does, who's involved to the point where they can make decisions about that. hemp products, there's 1000s of them. Even the hemp plant itself, 240 compounds in it that are vitally important for the body, if we just use it in an inappropriate way. And smoking isn't the appropriate way. Emphasis is what the new future crop is going to be, because it'll replace so many different things that now are being depleted because there's not enough emphasis is really reproducible every year, two or three crops. In certain locations, we can grow maybe even for crops like Africa or something like that. And what we can do with all that stuff, it takes money to do it. Yes. What have we got more than time, we got money. We do all those kinds of things, because we don't need to make money for it. So that's what our job is to find where we are needed, and do the things that other people wouldn't do because they can't make profit doing it. But we do it. Let them have the profit. Isn't that a wonderful thing? Isn't that the greatest way to live? I think it is. And I think that's the way that the alliance is set it up. And that's why humanitarians with their hearts will be doing the work. Exciting. So with that being the last question, and let's just go ahead and close for now. Thank you Tracee for your help. And as always, we appreciate the questions and opportunities to answer. And I'll just say one thing for the new people that come in and haven't got a lot of information. Yeah. Your questions are not offensive. They're irritating for those who have been around the corner if you turn around the block a few times, but we have patience with you, because you're learning, my suggestion is to you is to dive into we on the on the QFS2020.com website, start with the menu items in the beginning, and then work your way through it. That would be the documents first, get a background understanding. And then get into the training videos. Where there's some verbal stuff and understand to be on perhaps what the written word can be. And make it your your responsibility to know exactly what you need to know, to become an effective humanitarian. And in this case, of effective benefactors in benefactor. And from there, I think that you'll find that the things that we have presented in our Question and Answers and so forth, and all those documentation will bring you up to a level where the Alliance agent who is going to come and do your redemption appointment will take you from there and fine tune you into an instrument of humanitarianism that you never thought you could possibly do. That's where we're headed. That's the golden age that's waiting for us. So, welcome to our training and welcome to your new life as a humanitarian. We love and appreciate you, as well as all of us who have put our foot to the plow or put our plow to the ground and start doing the work that's necessary to create the golden age of mankind. Blessings to you all, thank you for your participation. And thank you to Tracee for your wonderful work appreciated by us all. Okay, we'll say goodbye for now.
