SPEAKERS

Ron Giles, Tracee

R Ron Giles 00:00

Good morning humanitarians. This is Ron Giles. I'm here with Tracee, we're going to do a question and answer perhaps maybe even two today. But this will be our, our final, just general questions. The next time we ask answer questions, it will be specific questions about a video that we send out that's associated. The questions will be associated with that video. Otherwise, we're just having too many videos of questions and so forth. And the questions, although oftentimes, there are redundant, there's a few new ones in there. But as people go through them, and they say, Oh, I've heard this, I've heard this, I've heard this, I've heard this, well, then they just get tired and quit listening to the video. So we're going to not do that anymore. And just make it specific to the video that was published with that email. So that's a precursor to what's going to be taking place. Go ahead.

T Tracee 00:59

Also, tell them about the FAQs that we're going to be doing.

R Ron Giles 01:04

Yeah, we're going to work on frequently asked questions, we're going to find some people who will help us to go through the videos and, and identify groups of questions so that we can be sure that most everything is covered. But that will be the frequently asked questions. And I'm only going to do that for things pertaining to love won society. So if you're asking me about other people or other other things, obviously Zim is part of it. Will will help with that. But I'd like everybody to remember that loved ones society has a specific lane that we're in, we're trying to train people to become managing directors in the revenue sharing solutions on the CAC program. We've been calling them Zim benefactors. But for the public, that is inappropriate, because we don't want them thinking that they're associated with them, and that their benefactors in the loved one society programs. So we're going to discontinue that label. And hope you understand why. And for the new people, we're going to be changing over. So it may

be a little bit confusing, but benefactors now a managing director, why they're in a CAC, managing director or a function as a CAC, Managing Director, or functioning as an RSS managing director. Hopefully, that will be helpful. Let's go ahead with the first question.

T Tracee 02:48

Ron, I was wondering if there was one on one training with you? If so, how would I go about this? Just checking I would love to meet you and be able to sit down with you personally and get real facts from you.

R Ron Giles 03:02

Well, I appreciate that competence in the things, I have to say it's impossible. We have 9000 people, over 9000 people that are training right now. And I don't have time to do all that. Even if I were to charge for my services, which I do not want to do. There's just not enough time and an effort. I've got to be continuing on with the projects that I'm working on right now. So with your love won society, so it's impossible. I would love to do it. But thank you for the offer, but it's just not going to happen. Next question.

T Tracee 03:40

I have a simple question that I've been trying to get an answer for some time on other platforms. In the queue, ifs are quantum consciousness. Is there a need for insurance is that part of Deep State or Cabal? Because I believe there's so much corruption insurance, and people suing other people. I'm a business owner, I work with a mentally handicapped, and disabled and insurance is my biggest, biggest expense and it keeps going higher every year

R Ron Giles 04:03

Insurance probably will go away. You have a lot of money, you don't need insurance, including health insurance, car insurance, all those sorts of things. You'll be paying cash for cars, you have an accident or something like that, then you work it out between the two people involved. No insurance ever needs to be involved. If the police come out and say you you're the one that's at fault, and you take care of \$1 is going to be about insurance. Next question.

T Tracee 04:34

Is this right? rounded numbers? 10 cents a minute. 50,000. Is that 50,000? Because it's 50. Zero?

R Ron Giles 04:45

Well, they're looking at per year on that it's 50 to 52,000 a year 1000 A week,

T

Tracee 04:54

So they can have six at 10 cents. That's the trust to be 30 300,000 Why? would most people work? That's 250,000 more than they're making right now, at 125,000. More if they work on a contract, just thinking to myself, that should be the other way around if you want people to work because this right?

R

Ron Giles 05:16

I appreciate your your math and all that sort of stuff, we've gone through this a number of times, this is the direction we have got from the heavens, it's not going to change. I've heard 3% of the people will not work regardless. So I'm not designing the whole world for 93% of the people leaving out the other 97% that will take advantage of this and flourish and thrive out of this program. Please don't be sending me these kinds of things. We've gone through it, that ship has sailed. This is a way it's going to be period. Next question.

T

Tracee 06:00

When a beneficiary first signs up for their new RSS account, will they be given their own auto generated user ID? Or do they select their own? If they select their own? Will this be an issue? If someone else likes the same one was 6 billion plus people on the planet?

R

Ron Giles 06:19

Don't you worry about that, you put up your own ID number. If it's duplicated, it won't accept it gives me ID, your PIN, your ID number is what you want to put up. And if it's duplicated, then it won't let you have that. And you'll have to change it. It's a PIN numbers that you're interested in. So these are these are kinds of questions that they're just curious questions. So there's no need to be asking these kinds of questions. It will be well it will be when the RSS program is up and running these questions about the future and all of these kinds of problems. They will be taken care of you just have to have faith and let things happen as they will. Next question.

T

Tracee 07:08

If I purchased Zim way back when for self interest sake, but I have since had a complete change of heart and want to fulfill humanitarian calling. Do I need to purchase additional Zim under the new pure intentions? Or will the Alliance recognize my heart regardless of intention during original purpose purchase?

R

Ron Giles 07:27

The question about buying more than you have right now. And or just going with what you have is a personal question. personal decision rates are the determining factor of how much money you have. If you've got one 10 T note, the equivalent of that is asking for \$5 million. Instead of

buy more Zim, you can just ask for \$5 million to get up into the quintillions. And I'm suggesting that 100 Tino will get you into the quintillions. And that's where you need to be as far as being available for the revenue sharing solutions program. So that's the rate the two determining factor whether you buy more, it's up to you. Next question.

T Tracee 08:17

Ron keeps talking about buying more Zim in order to be able to play a bigger role. Since there are no limitations on humanitarians? Doesn't it make sense to just ask for a higher rate person then spend money buying additional Zim?

R Ron Giles 08:32

That's up to you. Some people buy more Zim and still keep the same rate as they were going to ask for the original amount meaning that they're going to have that much more available for them to do other things. Remember, we're going to do this for 100 years it's all going to your heart. You're asking questions that you could ask your heart. next question

T Tracee 08:59

With regard to the appointment binder. Aside from the my request suggestions, requirements information outlining what I have what I want the term structure payout etc. Am I meant to photocopy and attach the LWS documents ie the RSS tech manual CAC tech manual documents? I guess those are the PDFs.

R Ron Giles 09:21

You know when when you asking me what you should do if they're available, if you want to use them, then print them and put them in your binder that's up to you. If you feel that it's necessary for your communications at the appointment then do so if not then just make bullet points of what you wanted to just they all they know the revenue sharing solutions program. They know that all of that maybe the thing that they might would like you to talk about, rather than RSS programs, stuff like that would be your own projects that you want to do. Next question

T Tracee 09:59

I put them in my binder. Okay, well, a person who wants to register for RSS be required to watch the wealth management video series before they can register or is the video series optional?

R Ron Giles 10:12

We don't require we don't have conditions like that. We encourage people to watch the wealth

management, because this may be new money for them that they've never had an opportunity before. If you get a lot of money and you use it inappropriately won't bring you the joy to happen. So you're looking for, we're giving you the education so that you can find out how to use money, and how to make it work for you. That way, it can bring you the greatest joy that is available for you and your family. That's the only reason why would we ever have a condition upon this. It's not that's not true, we would, there's no way to enforce it. And I just give it there, it's available if you want to use it, then use them, or watch them and incorporate them into your life because it'll be very helpful for you. But it's crushing dominion for me to require people certain things to do when I'm trying to get them the money that they deserve, and as children of God. Next question.

T Tracee 11:19

What are the reasons there is needed to have the chance to be a benefactor? I heard you mention you purchase yours on eBay? Is there anything I should be looking for to make sure I have purchased the correct ones?

R Ron Giles 11:32

No, there's no reason for you to be concerned about that. Even if it's fake, like the gold and the silver. The Alliance is not looking towards the Zim. There is no resale value in the Zim. There is no value to the Alliance for any of the Zim. And people ask me what says here it's not is non currency, or fake. It's defunct currency. So if I send you a link, I have checked that out with the allies, they will redeem those at this is why they're doing it because they want to give us get the money in the hands of the humanitarian so that they can do the work. Simple as that. They don't care about the Zim. If you purchase it for the purpose of doing humanitarian work, they will redeem them, they know your heart. They don't care about the Zim. Next question.

T Tracee 12:32

On the one hand, there is talk about the qualification of a benefactor, which is decided by the Alliance, who knows everything about us. But at the same time, we are supposed to prepare for a possible meeting with the project folder. If the Alliance knows us in our abilities better than we know ourselves, what is the point of a project folder and a concept for an implementation that will unfold from moment to moment?

R Ron Giles 12:51

This is an interesting question. And I want you to think through what your question is. If they already know who I am, and what I'm asking for, and all that sort of thing. You're asking, Well, why should I prepare? Why should I think it through? Why don't I just turn over my life to the alliance? What is the purpose for working with you? If they can do it themselves? And they know all the people that are involved, then why do they even need us? I won't go into this very deeply. But you have a demand you came here for a purpose. If that purpose has been reached by you being a humanitarian, then they want you involved. And so that's why this is only for humanitarians. Now have you really thought it through of all of the 9000 people that were

training, which ones of you have had experience with this before and know all about it, so that you can just step right into the role. They are requiring you to do the thought the thought processes that will help you to mature and develop as a humanitarian. If they give you everything, without you thinking about it, that's crossing dominion, they will not go there. They won't offer you a rate. If you go in there and say, well, I'll just take the best rate you can give me no, that's not going to work. Because they won't offer you a rate you should there will you offer me a rate and then I'll take it or and they say no, you have to ask for a rate that you want and they will give it to you. So it's like you're sitting by the stove. If I put wood in there and then I'll give you the soul says to put some wood in here and like fire I'll give you some heat. And you say well I need the heat in order to get out and and keep warm so I can build a fire which goes first There are certain things that this whole program is done. According to the alliance way of doing business, the alliance has, I shouldn't say business, they have rules and regulations that have been established at the beginning of time for this particular type of thing. They will not cross over that boundary period, people who have this idea will if they know who I am, then I just kind of stay in there and get my money and go about my work. And you come out of there and saying, What the hell am I supposed to be doing with this money, I don't really know what to do. Well, those are the kinds of people who won't get the money, because they have not done the preparations that are necessary, in order for you to receive the funds. They know you can do it, they know your capabilities. But if you haven't gone to school, if you haven't learned everything you need to know, if you haven't come up to a knowledgeable base that you can function as humanitarian, you probably won't get the money even though you could if you applied yourself and done the things that you needed to do. This isn't a free ride. It's an assisted, right. And you have to show up and do the things that are necessary. And then you qualify for the money. This, this idea that they know everything, so I just don't have to think it through, I don't have to do anything. You'll be sitting outside wondering why the hell they kicked you out of the meeting without giving you any money. So be prepared. Don't assume things from the that they're going to do for you because they won't they will assist you. And you've got to ask for it. That is the premise. That's the beginning, ask and it shall be given, seek and you shall find knock, and it shall be open. That requires you to do something, doesn't it? Then with those having met those qualifications, they can assist you.

T

Tracee 17:08

There are some people mostly among the elderly, who did not know how to use computers or smartphones? How will they be able to use the RSS platform?

R

Ron Giles 17:18

Learn how to use them. Simple.

T

Tracee 17:23

Well, also people who are showing them, the RSS can help them. I mean, that's part of your responsibility as a beneficiary to go and help people. If you want to get them as a referral, then you go help them.

R

Ron Giles 17:38

Well, there's a lot of things that they can do. But you're asking, you're saying, well, it's all in the end, and they can't, they don't know all this stuff, we'll learn how to use it. This is your future, you're going to jump into med bed, you got a future ahead of you learn how to use computer. If you don't, you know, get out your horse and buggy. When you need a ride into town. Don't use a car, because you don't have to use it. You know how to hook up your horse to the buggy and away you go. Well, what would you rather do? I'm 75 years old, I'm learning new things all the time. I'm not really good at a lot of things. And I need help from other people and and the heavens are opening up that that kind of a blessing. And here's Tracy helping me to get this all done. I wouldn't know how to do it by myself. So there's no excuse. You you prepare and the things work out for you. So that's why I say if you don't want to use a computer, don't Good luck. Learn how to use it. There's plenty of people who will help you. Next question, please.

T

Tracee 18:49

Well, people on SSI SSA retirement or disability be able to come become beneficiaries? Well, they're permanent downloads be on top.

R

Ron Giles 18:59

Let's just Let's just stop right there. How would I know? If you're on a disability or anything else, how can I make that condition? Think about the practicalities. How can I enforce something like that? I don't care what the essay, SSI and the SSA and all that sort of stuff is concerned? How much longer will the government be doing that? I don't know. I don't care what we'll be getting our own money, we don't need it from the government. The government's are going to be basically shut down and trimmed down to size to where they're just functioning for under certain areas of our life. We're taking over the building of roads we're taking over the funding of this, that and the other we're not going to tax people to do that, like the government does and is still the funds and make a life out of so called service to mankind. That's not That's the cabals way of doing things and we're doing things differently. SSI don't care about those things. And they get that in addition, that's great. The beneficiary program is for the individual. Doesn't matter if they're old, young or in between. If you can, if you're alive and breathing, get on the internet and can have a bank account or something like that a way to get the money in the transition QFS will be there in a while. Maybe it'll be there at the same time. We'll see. But you've got to come up to the next question.

T

Tracee 20:36

In one of your videos, you mentioned that as benefactors, we will sign an NDA who will we sign this with?

R

Ron Giles 20:44

The people that are their. next question.

T

Tracee 20:48

There would be people that would ask to know who we work for, who was our boss, when we say we are managing director who don't have the final say, so we don't become a target? What would the proper answer be as to who is the big boss that has the ultimate authority?

R

Ron Giles 21:05

If you're under an NDA, you can't tell it. I have a certain amount of responsibility. This is my job. How I get that responsibility, who I got it from. And all of that is is an NDA. And I there's no reason to be if you go into the clerk and say, Who's your boss? And where do they get their money from? There's certain questions that are just totally inappropriate. So why would people go there? If you have to tell everybody everything that's going on, then you're going to have some problems in life? Just simply say it's, it's beyond my paygrade? I don't know. I don't know it's a good way to answer a question.

T

Tracee 21:51

I like that. That's a great one. I really use that one. I don't know. I work for a very large corporate restaurant chain, they have been very good to me. And I would like to be a blessing to my manager and fellow employees, can I do an employer contract with them on top of what they get from the company? I don't want to do it with the whole company, just a local restaurant where I work right now.

R

Ron Giles 22:14

That's up to you work it out best with the between you and the restaurant owner. You know, if it's a chain, then there are certain things that they have to do and the things that are available, but a contract for their employees paid by somebody outside of the business will not should not if it is a problem, then you got a problem with the company overreach over control. The point is, is that the person who is running the restaurant is capable of taking care of these kinds of things. You go in and work out a deal with him. That's my suggestion. That's what I would do. I will do.

T

Tracee 22:57

I have asked this once before, but it was poorly asked by me. So here it goes. Again. If tomorrow we were told to trade in our foreign country currencies for the RV. Should we go and trade all of our currencies in for the RV but not turn in our Zim? I hope this is understandable. Should we just wait to turn in everything at the same time?

R

Ron Giles 23:17

I think you should wait to turn everything in at the same time. I don't know I don't have faith in what's going on now with the revaluation of the dinar who I've got, my brother went into the bank and they said no, we don't do that. So are they lying to us? I don't know. Because it's not to

bank and they said no, we don't do that. So are they lying to us? I don't know. Because it got to the bank where he went to know so all of this sort of stuff is just until I get the the word from the Alliance then it's all speculation and it's all fiat currency. When we come when we get our information to go to the redemption appointment, it's in the quantum financial system it'll be gold back currency. They're even saying that there's gold back Iraqi dinar Well, there's no gold back I record it's gold standard pile of gold over there. And now our this is our backing our currency, and then you sell the gold away and the currency has no value that is redeemable. So the quantum financial system is the only secure system that we will have until that comes along. I don't know how to give you a question or an answer to your questions. I would just simply say, I don't know. Next question.

T Tracee 24:37
How will the Alliance contact me?

R Ron Giles 24:41
Wait until a contact you'll then you'll know period? I don't know. You haven't told us.

T Tracee 24:48
Do you have another website besides QFS 2020 Tracy has mentioned it a couple times that she posted a trust template Doc's under trust tab on the website however, there is no trust tab on QFS2020. I posted it in the forum.

R Ron Giles 25:04
Forum, Telegram forum, or no, the forum. Yeah, I will send out the link to the forum and, and you just have to learn how to navigate through there and find it. But the links are available. And we've sent them out a number of times, we add to it quite often. So you have to update it. That's why we don't put it on the on the website. And we don't want people going to the website and finding out all of the intricacies of what we're doing. Or sorry, post a picture. I'd always had a good answer.

T Tracee 25:44
Well, there is a link that I've sent out several times that if you click on it, it's a Google Drive link. It says important links for LWS, it has all of the links to each YouTube video that we posted. They are all unlisted. So you can't just go to the channel and find it. And we posted that because we wanted to be able to let people that are non English speakers translate the closed caption to their own language. It also has all the training, all the q&a is the link to the bitch shoot channel, the forum. And any other link that we create, I put it on that live document. So if you just have that link one time, you can always access everything as it's updated. So I will send that out again today when we send out the director thing because yesterday I meant to but I forgot.

R

Ron Giles 26:35

Okay, now we're trying to do things as best we can. But go ahead.

T

Tracee 26:39

Oh, this must be for the same person. I don't know how to access a telegram account is there is no link on the QFS 2020 site. Can you please help me locate these two resources? Yes, we just said that. So I'll resend that. Have you noticed the positional change in the sun's path? I'm not sure if that's a thing to discuss. I live in rural Australia. So the sun's path has a big effect on me. And I'm just wondering if the alliance is waiting for something political or natural in the way of events before they make a move? I have to say I have noticed a change. And I mentioned it to my husband recently it feels lower than normal. What about you, Ron?

R

Ron Giles 27:18

Well, it could be and yet you know, this is something for me. I I don't get out in the sun that much. So I don't know the sales things. And I haven't heard and the light hasn't seemed to give me any information about it. So I'm not qualified to comment on that. devices if it's happening. Yes. Whatever. Extra question.

T

Tracee 27:42

Have you heard all the information that Michelle fielding put out on the video with Nick Veni, amen. It sounds very interesting. I'm wondering how it will affect all of us as humanitarians.

R

Ron Giles 27:53

Sounds pretty good. How it affects us is up to the individual how it affects them. I like Michelle and I like Nicolas so I think that they're good people.

T

Tracee 28:07

And lots of newbies on telegram in the chats I think they're mixing apples and oranges or maybe I'm bananas. As I interpreted it there are going to be in an ordinary redemption appointments at redemption centers for ordinary people to cash in dinar Dong cetera. And then separate Alliance appointments for those who are going to become benefactors and to cash in Zim the ordinary people would not be mixed in with benefactors for safety and privacy reasons there will be 1000s who hold Dong and dinar that have no earthly idea about benefactors Some think they take their precious metals to the appointment to cash in. Some are instructing others to take their Dong and dinar etc, to their alliance redemption appointment, aka the Benefactor redemption appointment. So can we have a clear and distinct message about this? I

think we will all cash in as ordinary people, any dinar and Dong we may have because these will be before and separate from the Zim Cash in. Isn't the Alliance appointment separate and entirely different from the ordinary redemption activity?

R

Ron Giles 29:12

Well, a lot of people are speculating that the exchange has called it what it is. An exchange is where you take your money, its currency. Its actual currency, dog dinars actual currency within that country. Those are active currencies. When you exchange for revaluation, that's the difference between redemption and exchange because you don't redeem your DeLong and dinar because they're not bonds. So terminology is really important here, you exchange them you do not redeem. That's why Zim is a different animal. It is a contract of value that has been cancelled by The Zimbabwe government or any other government who issued issued bonds, and their government was taken over by some other thing that they couldn't or wouldn't redeem their bonds for. We have the same problem with Federal Reserve notes that were put out in 1934. There's \$100 billion notes. They are not going to do anything with that. That's for sure. There's, there's this is a long question. And I'm not sure that there's a real good answer for everybody. The way that I look at it, if you want to follow the gurus, and want to exchange and go to the banks and do that, there's going to be opportunities to do that. I'm safely tucked in myself safely tucked in to the alliance way of doing things. When I'm told to go to the line contact and said, we'd like you to come in and redeem your exam and you can bring your other currencies along with you, we'll give you a good rate for those as well. That's the only place that I really want to do so now if I had some dinar and I needed some money, then if the bank was revaluating the currency, and that's a nice thing to do. That has nothing to do with humanitarian work, although they want you to think it does. It's a it's a legal transaction. And they cannot put conditions around the legal transaction, unless they're in part of the transaction. And they're not. It's just a normal way of doing business of exchanging one currency for another. So you can go for a holiday in Vietnam if you wanted to do that, or Kuwait or any other revalued currencies. But that's their normal pace of business as what the Forex foreign exchange, currency currency exchange is all about, that's going to go away, because when the Global Currency Reset takes place, all currencies will be the same. However, and until that happens, you do have variants between one currency and another. Your bank is if you want to do it first before you go to the redemption centers redemption appointments, and that's a different thing. Now, the idea of redemption centers, keep in mind that redemption is for Zim. There's no redemption centers for exchange of currencies. The whole idea of redemption centers just goes away, because they're not going to have a center where you go, and they have a military, security and all that sort of stuff. It's going to be a private appointment between you and your angel or your alliance agent. They'll set it all up and you'll go there and you'll make your appointment, or you'll do your exchange. Here's me you have do your redemption, if you have currency or redeem them. But keep in mind that the alliance has a way of doing things the banks have their own way. And all that I hear right now coming from these people who don't really understand the difference between an exchange and a redemption, and they're calling it go to the redemption center and get your dong exchanged us. You know, as far as I'm concerned that that's fake news. I don't see that happening. I don't see the military doing that to exchange your currency, just go to a bank. That's their job. So that's the way I see things. I'm waiting for the Alliance. I don't have that much. I have some Dong five or 6 million and Dong but others have their need the money. So go ahead and do it. If that's what you feel is appropriate when the time comes and you have the opportunity. Going in exchange here. Somebody who currency relieve your suffering, but I'm waiting for the Alliance for the redemption appointment. Next question.

T

Tracee 34:06

If I set up an LLC, is it okay to use that as my business name for example, New Earth LLC Community Assistance Center, Ada County, I plan to put a center in each county in Idaho to start and grow from there.

R

Ron Giles 34:19

Why would you want to call that New Earth LLC Community Assistance Center at the county? Does that roll off your tongue release? He is at the recent one to do that. Just just color the account, Ada County committee the Assistance Center. There's nothing that you need to do about naming it the earth LLC. I would not do that. So is that that should be the answer the question as far as my opinion is concerned. So, next question.

T

Tracee 34:56

If I'm legally married, but my husband isn't a believer in this news system can I still be a sim benefactor on my own without needing him to be a part of it or sign anything allowing me to work as humanitarian I live in the state of Idaho, if that matters,

R

Ron Giles 35:11

it doesn't matter, all countries are going to be discharged compliant. And that includes each of the states. In America, as well as the local and city governments, or county and city governments. It's going to be a transition, you put your you go through the redemption appointment, and your money will go into quantum financial system, and he cannot, will not, could not, will never have control of that money. It's yours. And if he tries to, then he's he's in violations, and those, what is he going to try? And do? You know, how can he How can he enforce his will upon you? When if he tries, the alliance will the qf s will shut him down, things are changing, you're not going to be under the control, and women are not going to have that kind of control over them anymore. You are becoming financially independent. There's no codependency involved on another person financially saw going away, though he's a non believer, then let him not believe. And you just go about becoming a Zim benefactor of managing director and go about your activities, if he wants to come along fine. You know, take him out to dinner every now and then if he's going to continue to be a jerk about it all. But you don't have any responsibilities as far as your personal affairs, especially humanitarian affairs, to have your husband involved or sign anything or anything of that nature. I'm not trying to cause problems, but I just want people to understand that things are changing. It's not going to be the way it was. A husband cannot force himself or his ideas on another person who is in financially independent, can't happen wouldn't happen, caused problems at home. If he does that, if he's going to be that way. You want him around for the next 100 years. Those are questions that you have to work out for yourself on an individual basis. So other than that, I don't know what to tell you. Next question.

T

Tracee 37:25

I am well aware of current real estate broker contracts. But this new layout will take a bit for brokers to comprehend in lieu of a three six or 7% Commission. Make sure I am understanding a selling slash buying broker agrees to the Commission contract to NRELS and receives a one time 10 cent RSS download for brokers and for each of their agents one, two or 100. Correct. Not six trust then a realtor sells a listing with NRELS and the broker and the realtor each receives a five cent additional download up to the first 250 in sales. Correct. And one cent more for each 50,000 of sales up to 500,000, which is 10 cents. Is there any additional for higher sales like 800? Or a million or more sale?

R

Ron Giles 38:20

Okay, well, when I wrote that I'm saying from 250, up to 5000. And then I used 5 million, or 500,000, as that will be 10 cents. If it has no limitations as far as it's \$50 for every one penny for every \$50 over 257 Go up to 10 day and if you want God 30 million if you want to just as the \$1,000 gives you a 1.1 cent as a commission, and that's forever. Go ahead. Next question. Or is there there's more to that question? I'm sorry.

T

Tracee 38:58

Yeah. What if the broker and sales agent list and sell the home? Do they receive still the five cents each? Or would it be 10 cents each? If they list and sell it?

R

Ron Giles 39:08

If they list and sell it? And it was the same agent? Yes. They will get the buying and the selling Commission's

T

Tracee 39:14

if a broker wants to add an employment contract and the broker select certain agents to exclude an employment contract, because they're not performing very well, or would it have to be 100% participation? I know you say we can do anything we want. But could there be certainly galleries that will prevent a broker or a benefactor from following through and signing the contract?

R

Ron Giles 39:37

If there is then we just don't do business with it. We're there they're gonna do things our way. I don't know that there's laws that I'm aware of that would contract or contradict what we're trying to accomplish. There may be in other countries especially I don't know. But you take the realist Pay professionals in those areas and then have them work out the best way to do it. Our listing service, it can be for other countries established in other countries, but it's basically here for the United States. Because it's according to the US laws, where you record titles and all that

sort of thing. How that happens in other countries, I just do not know I've never been there. No, I don't know a thing about it. But if it can work, then it's going to be up to the people in that country to make it work. The basic principles of buying something at retail and then selling that 20% Less, there should be absolutely no laws against that, because then they're getting involved in transpersonal transactions. And I don't believe that's part of the government's responsibility. And this or should be there, you get into a dictator, country and their governments are going to be different. So I don't know. If you're in commerce, you don't even have private ownership. So what we're not even talking about the same thing. So they're trying to do here in America, so we'll get rid of those guys. This, this whole idea is something with real the national real estate listing service, with a nail down some more of those things as we get our money, and then it becomes real, and we have to make the decisions on things. Until then, it's just an idea. It's just a program that we want to do and can do, and are willing to do it when the money comes. And then when we get into devils in the details, or get into the details, we could be deviled out of those details and make them be angels for taking care of the details for our stuff. So we'll we'll work that through. And of course, always, as is always the case, we will have the greatest counselor that can be provided in this world for us, in terms of the person who's assigned to us, when we get our money, let's use them well, then then they can work through all of the problems in the for different country, and come up with a solution so that that country can participate in the purchasing of homes for people and, and getting people off the streets into homes or out of out of rentals and into their homes, where they can establish it for the foreseeable future. Raising children's with the concept of the hearth, the fireplace, the center of the home, the heart, for children can grow up in security and love and not have to worry about things outside of the family. I mean, messing things up for the next question, please. I hope we did okay with that. But there's a lot of questions about the NRELS, and the brokers and all of that sort of stuff. I think you have a pretty good idea that the basics of what we're trying to do. We'll see how it all works out when we're finished in start saying contracts.

T

Tracee 43:05

Next question. We are using the term benefactor throughout the NRELS action plan. Yet we have avoided using this term before to keep us anonymous. I know how to handle this by simply say the benefactor is who I'm working for. But will this handle the terminology differently in the final contract to be used?

R

Ron Giles 43:26

That's a good question. And those are decisions that need to be made. I do not like the word benefactor. I've gotten it in there. But the more I see it, the more I think that it's inappropriate for us to use. A benefactor is His person who's giving money away. Well, that's what we're doing. Yeah, so it did applies. But I don't want us to be called calling each other benefactors just call us managing directors. Everybody gets to do what they want to do. But there's some suggestions on ways to do things. And if there's a good way and we come up with it and use it, if it works for you. If it doesn't, then don't use your own way of doing it. Because it's got to fit with you. It's got to fit in your personality. Will and there's there's needs to be some order of some sort.

T

Tracee 44:18

Somebody down here says me I have your blessing to refer to myself as the executive director of such and such Community Assistance Center as opposed to managing director.

R

Ron Giles 44:29

Yeah, you can do that.

T

Tracee 44:30

Yeah, like that.

R

Ron Giles 44:32

I like I like to I like to executive that makes you to in important position. As you want to do that and walk over walk around with your label on it. Whenever you want to sign the sign on your on your desk, as long as the buck stops here, whatever. I don't, you know, whatever you feel is appropriate. I like the idea. You'd have my blessing on that, you know Next question.

T

Tracee 45:04

Is it appropriate for me to have a director in the state of Kansas as long as I can train them from a distance, along with the assistant directors? I understand I'm sovereign, but out of respect, I would appreciate your input.

R

Ron Giles 45:17

Well, my input would be you can do that. You can assign a director of the state. You can sign a director for the cities, the counties, rural districts, all of those sorts of things. If there's some kind of a geographical way of saying this, this is our community, put the director in charge of it. And go from there.

T

Tracee 45:48

Yeah, okay. You're fine. Waiting on a form or open enrollment to come through email or some divine way. Is this the same as the Charlie Ward's humanitarian program? He has talked about on his Insider's club?

R

Ron Giles 46:01

No, it is not. Next question.

T

Tracee 46:04

You explained the structured payout like it is so simple, but it doesn't make sense, either 10% of the primary principle per year, secondary principal, for 100 years, for a total of 1,000% of the primary principle, the annual payout amount never changes, or 10% of the remaining primary principal each year secondary principal for 100 years, for a total of 100% of the initial primary payout amount, the annual payout amount gets smaller each year, it doesn't matter either way, to me, they will both be enormous amounts per year. However, the way you explain it is confusing to people who understand basic math.

R

Ron Giles 46:45

Who understand basic math? Well, think about it, if you if you understand, if you understand basic math, you'll take the primary principle. What is the primary principle? What is the amount of the primary principle? That's the rate times the number of Zim you have? That's the primary principle. We only have the primary principle for the purposes of determining what our structured payouts going to be. You can use 5% of that primary principle, up to 10 whatever percent up to 10%. Now, 10% of 50 quintillion dollars is five quintillion dollars. That is the figure that you're going to get on a and on an annual basis. Does that make sense? An annual basis for 500 years is 500 quintillion dollars. Is that correct? That's just pure math. There's no decrease. We're not once the figure of 50 quintillion dollars is arrived at then disregard that as money. It's just a way to determine what percentage you're going to have that you're going to get on a structured bam. Now we talked about that money being put into your motherlode. But it's not the real, that's really not what's going to take place at your point that you will establish an account. A mother lode account, but in that motherlode account will be your first structured payout payment. And from then on, that's what you will be working with till your next quarter get at 1.25. And then eventually, during that year, you're going to get the full 500 Or five quintillion dollars. So if you think that the 50 quintillion is going into your bank, and then there's been drawn down over a period of time, that's not correct. The 50 quintillion dollars is just in the amount that you will determine what payment the amount of the payment that you want on an annual basis. And you can receive that quarterly. Totally done. That's basic math. Or maybe that's what I forgot to say is that the original 50 quintillion dollars does not go into your account. It is only used as a primary principle to determine your 10% of that to be your monthly or your annual payment out of the structured payout. That will be for the 100 years or the term that you have asked for. Now what I'm saying is that the term that you asked for is so important because the only ask for 50 years you're only going to get 250 quintillion dollars. In your structured payout account, if you're going to 100 years gonna be full 500,000 or 500 quintillion in it.

T

Tracee 50:11

So Can I comment on that? So if I'm understanding you, right, it's almost like a gift that duplicates your original value. So if you want to do 100 years at 10%, then you're going to end up with 10 times the original amount. If you want to do 10%, for 50 years, you're going to end up with five times the original amount. Yes. Okay. So it's like a blessing.

R

Ron Giles 50:41

Well, it's for the structured, the structured payment is a blessing for us. So that we have a

well, it's for the structured, the structured payout is a blessing for us. So that we have a consistent amount of money each quarter, or each year. To use it's a budget for us to use. We get the same budget for 500. Year her for 100 years. Yes.

T Tracee 51:00

Okay, got it. Let's go next. How is cash exchange to pay for humanitarian services? Is it in the queue Fs? Or is it a cash transaction?

R Ron Giles 51:13

How is cash exchange to pay for humanitarian services? Why do you pay cash for humanitarian services. If you're paying somebody you just give them climate contract is a download from the RSS program, if you want to pay them, you just transfer money to their QFS account. You don't have to pay cash for any humanitarian activity. So you can get tracked cash to make transactions, but it's not necessary. If other people have a, an account in the quantum financial system, which everybody will then use an account to account transfer within the quantum financial system initiated by the person who wants to pay in, all you need to know is the the account of the person that you're sending it to. If the light senses that it's not your money, and the other person senses that it's not, they haven't given their permission, then there could be some problems. But if you're the one that's initiating it, and it should be fine, you're just paying a bill or a transaction. Next question.

T Tracee 52:32

Are we allowed to pay our directors and other help actual salaries plus the downloads? I'm sure we can do whatever we want. But just asking.

R Ron Giles 52:43

Yes, you can do that. I don't know why you would. But you can give them bonuses and things of that nature. Yes.

T Tracee 52:51

Last question. How? How about safety for myself and my family? What if some crazy people find out I'm a benefactor and hold me or my sisters? Unless they get out a large sum? I'm not so sure that saying some random billionaires are funding all this? Won't journalists look into where the money is coming from and maybe say something? I don't know. Just seeing if anyone spoke about these things.

R Ron Giles 53:16

There's a transition. We're assuming as we answer this question, that things are not changing that there will be people who will try and kidnap and charge ransom for our lives, and so forth

and there will be people who will try and kidnap and charge ransom for our lives, and so forth. My understanding and my firm, firm, firm belief is that those kinds of people will not be inflicting their garbage in our lives as we move on up into the higher dimensions. If they're not of the same vibration, they won't be here. It gets into different things that we call timelines. The timeline for those people, those types of people will separate from our timeline, we won't even have to, we won't even they won't even know what's going on. And they'll just continue to do things with their they're doing with people who are there who are the same like mine. They won't be a part of us. So just don't worry about that. The transition is the time that we have to concern ourselves. And an NDA is given to us. Show that we can practice being anonymous. So our minds will be forced to come up with some ideas that will work for us. Because if you break the NDA, there's some serious consequences. That could happen. I'm not saying that they will. I'm saying they could happen. If somebody just totally disregards your NDA walks out and starts telling their rate and how much money they got, where they got it from, their accounts would be frozen. Whether they just make it slept and tell her wife on a pillow talk or something like now got this money, they're not gonna take that away from you. I don't believe in keeping secrets between the husband and the wife anyway. I think that we should be open and safe to be open. And about there are exemptions to the NDA. So you can ask for people you've talked to. That's my understanding at the present time, we'll see what the NDA is. But I believe that it's a predisposition, it will give us the incentive to be predisposed to keeping ourselves anonymous. And that's going to be the secret to the success. Do not concern yourself. You can go with all kinds of fears, what ifs, and you can torment your life with what is and create the fear that will destroy your life, have faith in the fact that you are chosen from the heavens to do humanitarian work, and they're going to support you in maintaining your life and your life experience. All of the people that are going to interfere with that are going to be taken away and have their own experience in some other location. That's more appropriate for them. Oh, that's the way I view things. So I'm not worried about it at all. I'll worry about it as somebody can kidnap my dog. And, you know, my get my gun out? Yes, yes. That's it for today, then, Tracy? Our hour is up. So let's call it a day for today. And we'll go from there. Hopefully, we'll have another q&a Or maybe another q&a that's associated with a specific video that we're sending out. We'll go from there.

T

Tracee 57:00

Yeah. So this is let me just finish this as the last one you guys that we are doing that's just on all of these topics, because we're going to be collecting frequently asked questions, and you'll have access to those.

R

Ron Giles 57:15

Yes, and that will be your source of information is going to require people to do their own thinking and come up with their own solutions to problems. It'll be refined as you go through your activities, we can make mistakes. And we'll have plenty of money to resolve those, those mistakes, we're not going to lose everything, unless we go totally berserk. So where we're on the inside of we're underneath the umbrella of protection from the alliance. And let's just be sure that we maintain our integrity and our do our due diligence to make certain that everything is done right on our side and they will do the same from their site. And that will be just a real happiness and joyful experience for all of us. Do I Sam? So thank you, everybody. And we'll be on some more videos we have some ideas so we want to present as well so there can meet up. Thank you again, Tracy for your help. And we'll say goodbye for now.
