SPEAKERS

Ron Giles, Tracee

R

Ron Giles 00:00

Good morning humanitarians. This is Ron Giles. I'm here with Tracee. And we're going to do a question and answer period. It is December 2 2021. And we've got 20 or so questions. So let's start in on it, then. First question Tracee.

T

Tracee 00:22

Okay, regarding the redemption appointment, I understand that you don't have specific information to give out regarding how we will be contacted, where the meeting will be. But do you suggest we have members of our team attend with us? Or should the benefactors go solo?

R

Ron Giles 00:38

It's an excellent question. And I appreciate the chance to say something about this, there will be an NDA, that you have to sign in, anybody who's at that meeting will have to sign in as well. My suggestion, and this is just my suggestion, having think thought things through, it's better for one Zim benefactor, to go into the appointment. And be vetted as humanitarian and ask for the rates and so forth and get them and then collaborate with other people having your own money that you are in charge of. And if you want to collaborate with others that are doing a similar type of project whenever or that you're collaborating with us, and you brought that up, and so forth. Together, I don't see any advantage and going in together, simply because the money is coming to you as an individual, not as a project. They're not funding projects, or funding individuals, that's in funding projects, and go in with a number of people and get funding for that particular project. But that's not the case. You're the humanitarian. And so when you go in and request something, they're giving it to you, not to a project, and not to other people, you will be in control of the money for other people and have other people involved with you. Yes, you don't have to do it yourself. But you're the The buck stops there begins and ends with you, too. If you're collaborating with somebody, then do so. But be sure that the money that you combine together and so forth, has really good controls over it. So it's not being spent by it for the wrong things. And that happened, I suppose it can to a degree if

there's something wrong with it, the the powers that be will step in and block it. So one thing that it's important for you to honor the fact that you will be having an NDA and somebody else who goes in there and sign the NDA with you can cause you some major problems by breaking the NDA. So let's not even approach that potential. And just allow it to be true that you go in and you redeem, and you get your money, and you've you're the one that's in charge. And then you can do whatever you feel you'd like to do with other people. Having established yourself as the humanitarian, as the sovereign, who is in charge of your phones, otherwise, you go in with other people. And this is mine, and that is yours. And they, you know, you got to be equally yoked in your association with other people. And you don't want to have them have power over you. In terms of making decisions with the use of your money. You always need to be in control. But I hope that's clear. That's just my opinion. But I can give you some real good reasons for next question.

T

Tracee 03:56

I'm doing not I'm going alone. And then I'm going to take my husband out to a really nice dinner and give him a card that says happy retirement.

R

Ron Giles 04:06

There you go. I love it. You're thinking 99

T

Tracee 04:12

Okay, next question. I know I can't frickin wait. Okay, I have amassed a large group through all of my current work fighting mandates in our area, just thinking that I want to get through redemption phase and then bring them on board. What thoughts can you share on this sounds like the same person.

R

Ron Giles 04:30

There are people you can share with and you'll you'll feel there's a concept that you have to share appropriately. If you share appropriately, with people that are similar or close to the same thought processes, then you can expand their thinking but if you're presenting something brand new to somebody, you can be blown out of the water and most of us have had that experience. We share with people who are not ready to listen to what we're doing. And that brings a lot of condemnation, even contempt towards you, because how could you think of such a stupid thing? sort of thing? It's, it's similar to what we feel about people who are getting the jab? How can they be so stupid to do that to their bodies? Well, that has to do with some of the thoughts and ideas that we can share with people. But if we share inappropriately, it comes back to haunt us. That's why I'm very careful about who I talk to about anything that I'm doing. Because if they're not similarly engaged in it, then there's there's not the camaraderie. And there's also the ability for others to start tearing you down, which in turn creates negative energies for you. So the concept of the principle of sharing appropriately is very relevant right now. And it's been evidenced by what has been going on and the fact that we're losing friends and neighbors, and so forth, for whatever. Now, it's not to say that you don't have your own

way of thinking, and you have to sometimes share with other people. But be careful, don't be a blabber mouth, don't be the first one to have to say something. Otherwise, you could have some consequences that you don't really want. With that, let's go to the next question.

T

Tracee 06:31

Can more than one person sign up anyone to be a beneficiary? No.

R

Ron Giles 06:36

I want to be sure I understand that, can one can more than one person sign up anyone to be a beneficiary? Anybody can sign up another person who is not a beneficiary to register and using your ID number and become a beneficiary? So if that's the answer the question that you're answering, then yes, they can. No, no sure, the way you

T

Tracee 07:02

Can more than one person, meaning to benefactors sign up anyone to be a beneficiary. That's how I read it. And that's no right, because you a beneficiary can only go into the system one time.

R

Ron Giles 07:16

That's true. So in other words, the RSS program is not the beneficiaries, ownership, they're having to pay for it. But it's not that you set up your program, and that will have that benefactor over there sets up their program. And so they have their beneficiaries, you have your beneficiaries, and they can't be crossed over. Yes, you cannot only one beneficiary account per person, for a person. Yes, six trust and so forth.

T

Tracee 07:52

Well, then the next part of that is can more than one person take out a trust on another person or like the same child. So for instance, if a dad is a beneficiary, and mom's a beneficiary, and then they each have six trust, can they each have a trust for their one child?

R

Ron Giles 08:10

Yes. whatever purpose you want, for your trust, it's fine. If you are setting up a trust for your side child, then your trust is going to do certain things for the child and your trustee. If your wife wants to set one up for the then she's got the money that she's using for the child and can do benefits for the child are really high. But so you take into consideration a husband and a wife can have 12 trusts. And then they have two beneficiaries, accounts so that 14 beneficiary accounts, that's \$58,000 a month when you this gives me 56 Yeah, 28 and 28 per person is 56. So that's, that's a horrendous measurement. But that's 12 Trust, you can do them for whatever

you want. And it doesn't matter if somebody else has got a trust for you. You're setting the trust up, you're the trustee. The beneficiary can be a beneficiary for a number of different trusts, it doesn't matter, but you are the trustee for the trust that you set up for either a child or a mentally incapacitated person or something of this nature.

T

Tracee 09:35

Okay, well, the Alliance, will the Alliance appointment be different than the bank appointment to exchange currency?

R

Ron Giles 09:43

Yes, yeah. And there's some very main differences and yet there's some subtle differences as well. I don't know so much about the exchange am exploring it. Trying to understand better because you have fiat currency that the banks are going to offer for exchanges, how far down the road are we going to be when that takes place? How much further down the road in trends that transition? Is that going to take place? And when will it stop? We don't know that I'm, I'm preparing to do a post on that specific subject. And I'm gaining as much information as I can so that that post will be accurate. But the Alliance appointment and at the bank, and the exchange will be different. Yes, for sure.

T

Tracee 10:38

Okay, that's interesting. So does that mean that the alliance appointment will be before or after the bank appointment to exchange currency? And then at the latter, or the bank appointment, is that when you bring your dong dinar and all that other stuff?

R

Ron Giles 10:55

Okay, I'm glad he gave, you said that. Because there is, as far as you exchanging the currencies, that you have to take them in with you for your redemption appointment. And they will give you a real good rate for your dong and dinar. And that will also be going into your QFS account. If you are lucky enough to be the humanitarian that gets contacted by the lions, you take in your all that you have with you, and they will give you money for the exchange as well is for redemption. And you asked for the rate that you want, so forth. So now, if it's not a humanitarian, then I really don't know how, how it's going to work for people who the bank has the responsibility to exchange, that's their business. They give you not their only business, but they give you money in exchange if you're going on holiday or something and you want dinar to go to Iraq, and you go to the bank and get dinar. So you can go on your trip. That's what banks do. And there's exchange companies that do the same thing. And they're at airports and that sort of thing. So that is a business already. We're not interfering with that business. Now you talk about the redemption, read or excuse me the revaluation of currencies. And that brings in a whole new different experience because the banks are running out of money. Number one, they did not want people, the public do have dinar to revalue but it took off without them knowing about it. And there's no way it's like the cat in the bag. Once it's out, you're not going to get it back in. So what have they done? They don't want you to have the

money and they're running out of money themselves, do you think the RV is going to take place for them? For people? As far as the banks are concerned, it will never happen. And I've said that before, and I'll say it again. They're going out of money, they're going out of business, and they don't want you to have the money. You think they're the bank's gonna get you to let you have the exchange? Very little, if any, very little, if any, if it was going to happen, what happened 20 years ago, instead of 20 years later, and then happening now. You have the question.

T

Tracee 13:40

I have lots of questions about this. So some people are saying that that the humanitarians could possibly be exchanging at a military base. Have you heard that one?

R

Ron Giles 13:50

Sure.

T

Tracee 13:52

How does that feel?

R

Ron Giles 13:53

A military base is it secures is a secure installation. And there's been a lot of concern about that. But that's going away because the reality is if you're going to have a redemption appointment from somebody on the other side of the veil, I don't know if it's an angel or Archangel or ascended master or resurrected being or whatever it might be. There's a whole set of different rules that they have. I mean, how are they going to get to your location? How are they going to get to the redemption appointment? Maybe the redemption appointment will be in your own home. About that? We don't know. We won't know until we get contacted and make the arrangements. And at that point in time, you can ask the questions and then when you have your redemption appointment, you can ask all of the kinds of things you need to know because that person who's going to be doing the redemption appointment then The interview will be your new buddy, your new friend, your nail, constant companion, if you want to call it that, who will be with you to answer all your questions. They're not going to do stuff for you, but they'll counsel with you and help you to understand certain concepts and ideas, and maybe even help you finding people so forth. So things are going to really change. So we thought we'd have a redemption appointment at a secured location, where and it's at a redemption center, we call them have called them, I, I'm slowly getting rid of the whole idea of a redemption center. We don't know where we're going to have the redemption appointment. It may be at a secured bank, when I say secured. Banks are becoming secured the bad people being taken out. They're preparing the banking system to be the new financial service centers. And if there's good bankers in there good people involved, there's no reason to, to fire them and let them go and then rebuild something. Now you just transition them into positions within the financial service centers. Industry. And, and so things are going to be changing, allow the thought processes to change, don't hold on to things that don't work anymore. Redemption

centers the concept of redemption centers that we've had for so many years are going away, because the alliance is taking over and they're doing the redemption appointment. And using people from the other side of the veil to do the rules change as a person just come through the walls. Do they just appear at your table? I don't know. When they knock on the door, I don't know. But you'll find out because they love you. And they want your they need us to do the work. So they're giving us every opportunity to be successful in bringing forth the golden age of mankind. What a wonderful opportunity it is to be alive. We just have to endure and enduring and rather than just endure, why don't we just flourish? Why don't we really get our humanitarian outfit on and wear it around and figure out how we're going to do it before we get the money? What a wonderful opportunity we have now as we wait, instead of being frustrated because it hasn't happened. Are you ready? Are you really ready? What is it going to be like when it happens? What's it going to be like to have this money go up and go out and make a major purchase of something that you've wanted just so you can see how it works. Just so you can know inside? Without any doubt in your mind that these funds are now available for you to do the work that you want to do. This is what's coming for us.

T

Tracee 18:32

From your lips to God's ears. Okay, why do I have this Wait, hold on this phone I skipped I'm developing many things to include narrowing down a shortlist of directors to interview for their roles and their specific area of expertise but want to gain clarity. Since the prospective directors are highly experienced in their field or sector of the economy. I want to verify the RV and what else must occur before the redemption appointment.

R

Ron Giles 18:58

Well, there's a long list that the alliance has that half of things that have to occur before the RV or redemption can take place. We're not privileged to that. So it's hard for us to know. And that's why perhaps it's so frustrating because we don't know, we don't. But there are certain things that we can look to as Allmans I look to the Global Currency Reset. They're saying that the money is already now being looted well as it is the Global Currency Reset been done yet. Are all values this Forex, foreign exchange, whatever the you want to call it, forex foreign exchange system, is that all on a par value it to where there's no reason to be exchanging currencies because they're all the same value, you're not going to make any money. Those are the kinds of things that have to happen. They are the Global Currency Reset has to take place before the quantum financial system can accept money and make transactions. That's one of the elements who talks about that. There's how there's a long list of them. How many of those on the list have been checked off? I don't know. I'd sure like to have a little peek at that list. But I'm not previous to that. We just have to, but not just endure, and let's not, let's not think, Oh, this is so hard. Let's just not get into that pity party and wonder what the hell's going on? Why aren't we getting our money? And so on, so forth? Let's just say it's coming. And will it does? Am I prepared? Have I done everything I need to do? What am I thought processes? Okay, I've got directors, I've got people that I wanted to become part of my program. Yes, isn't that fun. And going through this now is the best way to do it. So that when the time comes, you've already entertained the thoughts and ideas that need to be in place. As you make decisions about people who are coming on board with you. And directors a position that's going to be really, really important. For as in benefactor, who's doing the CAC. There'll be many directors in many different locations, doing the things that you want them to do. Some are going to be

urban, some are going to be suburban, suburban are going to be rural. The ones in the in the cities are going to be different than the ones that are out in working with farmers, or small communities outside of large metropolitan area. So those are the kinds of thoughts that need to be thought about or compounded over, as you get yourself prepared. So those are the things that we can do now. So let's not just endure, let's focus on the fact that it's going to happen, and we need to be prepared. So what is there that I need to do to prepare for it? And I certainly hope that I get prepared before there really and then happens and I'm caught with my pants down and haven't prepared well enough. Or, you know, when you get the money then it's a different story. You can take a couple of weeks off. go have dinner with your husband. Love them. Okay, I'm feeling like I'm rambling a little bit. Got a question? Yeah.

T

Tracee 22:43

Okay, next, why do I have this? Why do I have this feeling that I'm part of this big picture? I don't believe it is a bad part. But too many things have been happening lately. And it is like I play a part in the answers. I have no idea. That sounds like a question for Janine. Right? Yeah. Yeah. Tarot cards.

R

Ron Giles 23:05

Don't do Tarot tarot cards. I appreciate Janine and what she does, she's very good. Yeah. So those are, those are good questions. You are a part of a bigger, something that is bigger than we have any concept of at the present time. We're preparing ourselves to be the ones to do the work. And isn't that a lovely opportunity. So we are part of something really big. And the part that we have to play in it is uniquely our part. We're, we're prepared for it. We've set ourselves aside, we've learned we've had certain experiences in our life that have prepared us that experience will be able to use. And because we are the humanitarians that have to do the work, we have been prepared and are preparing ourselves to the life experiences that we've had in this incarnation, and perhaps many others, if that is indeed the case. So we are there is a bigger picture that we're going to be a part of, but it's not going to happen unless we show up collectively and individually as humanitarians. That's what we have to focus on. Are we prepared to do the job that is put upon us? Yes, there's problems with I need money for this. I need money for that and somebody's dying and somebody, they need med beds. I have a sister that passed away. She was looking for med beds, that technology, life is going to happen. But the point that we need to know and understand now is that this is going to happen and we need to be prepared for it. God is in charge. Life and death, if you want to call it death, transition, I call it a transition. But God is in charge of it. And who better to know and the creator of us all, who knows everything about us. That's who's in charge. So let's just let that be true. And work within that concept and focus on our ability to do our job. If we focus on that, then that's what we focus on, we'll come about, if you focus on the negative, you're going to be in the dumps for a long time. Because that's what you're recreating over and over with your thought processes. Eliminate that ill will and that bad feeling, get it gone. And don't go back to it and don't revisit it and think it's okay, because it's not, you're creating what you focus on the focus on the good stuff. And that is what will happen for us. Next question, please.

T

Tracee 26:10

Is the love won program meant for us outside of America as well as I am in Australia?

R

Ron Giles 26:18

Absolutely. Are the hall? Yes. I'm glad you're in Australia. Yeah, Australia is a wonderful place. My daughter's is there. This family.

T

Tracee 26:33

This may have been answered, I don't know you have been asked if we needed a trust, your reply was optional. But really no, I might be stuck in the present system. And I do know the QFS will be totally different. But my concern is if if someone Sue's you or marriage breaks down, seems the woman can take whatever she wants from her husband, he is quite often left destitute if he has not got his property sewn up in a trust that is not owned by him. And otherwise, oh, nothing but control everything. Please explain how this sort of incident will apply in the queue of s.

R

Ron Giles 27:10

We're approaching some unusual situations that we've not been involved with. If you've listened to me before, I've said each individual should go to the redemption appointment, and get their own money. Now, this includes husbands and wives, not one of us enters a marriage situation with the idea that we're going to eventually get divorced. And yet divorce happens, relationships break down. times together, it's a walk, attend experience. And when that is experience is completed, and you've learned what you need, from that experience, brought forth the children and so forth. There's times when that will be terminated. And you'll move on. We don't know we can't see down the down the highway a long ways. And so if we prepare ourselves by maintaining our own stewardship responsibilities, and if I if my wife wanted to maintain a separate financial situation, I think that that's wise. codependency is really hard. Because the person who makes the money makes the decisions, and then you don't have a chance to make the decisions as well. Well, guess what, all of that goes away, because each person has a beneficiary account. They're in charge of their own funds. I think that that's better that way. Because there's no codependency on the person who makes the money and you have to placate or work with them to do things that you want to do. They get to do the things they want to do. Well, that's going away. You know, it's honor and obey your husband all the days of your life. And all that said, I do and why did you say that? If he's honorable person and you want to stay with him, he's not been flushing down the toilet. I'm just simply saying that. You have to prepare your lives, especially now when you're going to have funds. There's no codependency required anymore. There's collaboration. You're equally yoked into a relationship where you wake up in the morning and say, I still I want to stay here. I want to be with you. Or you wake up in the morning say You know, this isn't working for me. And you have the means to get out of a bad relationship or do you have the means to do the things you want to do? There's a lot of people are going to have some problems with that. Because they want to have power over their spouses. exercise control. But if a person has their own money, you can't do that anymore. That's why the Cabal doesn't want us to have money because they know they can't control us. If we have our own funds, Okay, guess what brothers and sisters all have that power over other people is going away, it's inappropriate. And you'll find that it's also having problems with eternal or excuse me universal laws. And so there's a lot of problems that are

going to have to be solved. As we move forward in in society. Having your own money is the essential part. So if you feel like you want have a trust, set up your own trust, you got six individually set up. If you want to have a home that you work with the air that you live in together and you want to have joint ownership, we'll figure out a way to work that through. So that if there's a breakdown of the marriage, that it's not going to be devastating for everybody, which it has been in the past if there's just one breadwinner. So the things you're going to change and allow yourself to change the thought processes. Being independent is a good thing. That way you get to choose what you want to do. And coercion and power over others is not the way to get what you want. Right, I've said I'll get off my podium here for a minute and we'll go to the next question.

T

Tracee 31:38

Okey dokey. Would you think it would be a bad idea to respond to an email and phone number with a small portion of currencies and wait for him? It says redemption of Zim with LWS.

R

Ron Giles 31:52

Well, how does how do you redeem them with LWS love won society is not the Alliance. LWS is a structure that humanitarians can use to enhance their projects and the things that they're going to do. I don't know it come down real hard on this concept. Love won society is a structure it is not the redemption. You have Zim you go to the redemption appointment. And now you can become a gym benefactor. If you want to. If you don't, there's no requirement turned your back on the old ws unless you're using that as part of your part projects and and say that, but you don't have to do that with us. LWS is not part of the redemption appointment. Can be if you want it to be, but it is not required. I'm going to do love won society's programs, I'm going to put it in my three ring binders say this is what I intend to do. You're welcome to do that. If you intend to use level one society's programs, or to enhance your ability to be a humanitarian. You are a humanitarian. We'll get your own money, you'll go through your own redemption. And when you're got your money, and you want to become a part of love won society, then you sign a contract that will say, I'll be an RSS benefactor. And we'll go from there. So there's a lot of these ideas that that are just not appropriate ideas to respond to an email a phone number with a small portion of currencies, who said this calling you Who is it emailing you and wait for him to go through redemption of exam or whatever? I'm not sure the questions. I'm just giving a sort of an answer without being specific. So the question is a little bit hard for me to explain or hard for me to respond to say yes or no or this is what should be done. I apologize for that. Next question.

T

Tracee 34:19

I was reading that larger Zen benefactors will purchase bank assets and explain this new financial service industries called financial service centers. This will be a great way to use substantial amounts of one's humanitarian funds. What are they saying? Are we as in benefactors supposed to be buying banks?

R

Ron Giles 34:39

Well, will I say we benefactors should be buying banks. How many benefactors are there? Some will be involved in the banking, financial service centers. Others won't. You have a lot of money you're able to do that. Then make it known that and explore it through alliances, looking for good people with money to do the things that need to get done as far as the financial service centers are concerned, do we buy does each one a whoever, by a bank and participating in that way or what I don't know, what's a good questions. However, there will be those who just gravitate to that. And that's what they will do. And so will that be true? Not everybody is going to be using their money for that, because there's only so much need, and you got a lot of money, and you may be needing to do some other things as well. So it's a selective group. I don't know how they will be selected. But just the same way as the med beds, there's all kinds of people want to do med beds? Well, a lot of people want to do banking. I don't know how to do that. Kefir, we'll see. So with that, let's go to the next question.

T

Tracee 36:05

Do we buy stuff like new farm machinery like new for young farmers who want to get into farming but have not earned enough money yet to purchase these items, or new furniture for people who just saved enough to finally put the 5% down and now don't have enough for furniture? Or livestock? I know you're saying going to say it's your money do with it? What you feel is right? Well, if you know that, why are you asking the question?

R

Ron Giles 36:36

Well, maybe you're needing permission for me to do that. And I'm, you know, I'm not involved in it. So I say, yeah, go ahead, do it, you know, take the rest of the day off, you're tired, take the rest of the day off, go home, I'm not your boss, that I can suggest that there are things that will be inappropriate for me to comment on and so forth, and so on. And I'm certainly not going to be hot wanting you disposed to certain ideas and concepts, how you work, your your humanitarian work, is going to be uniquely yours. And you'll have a lot of fun doing it unless you're trying to be somebody else. Find the needs and solve the problems. And that's what's going to happen for us. Next question, please.

T

Tracee 37:29

I just went back over the RSS trading. And I'm wondering where the contract is for us to sign to be a part of the RSS program. Sorry, if you already mentioned this in other q&a days?

R

Ron Giles 37:44

Well, there's no problem. There's no contract yet. We're thinking of things that need to go into that contract. But I don't know. We're looking for common law lawyers. That's what we'll be looking for to do contracts that were that will be very thoughtful and very meaningful for the participants involved. But they have not been done yet. takes money to do that. And there's not that money available yet. So if you're looking for contracts, keep looking. Because they will eventually end show up, because that's the movement forward, but we don't have them yet. It's not time for them. We don't know everything about them yet. So next question.

T

Tracee 38:28

Do you not think in this new golden age that the need for a trust account will become obsolete our new legal laws coming?

R

Ron Giles 38:38

When when you say a question like that, are you talking about the end result? Are you talking about the transition to get there? I'm looking at the transition we take for where we are now. And we take what we need to do and feel we need to do to protect ourselves. And then when we move in now, we know that the corporations are part of the overall cabal plan so LLCs and so forth, can be useful to the point that it is a transitionary phase. Maybe a trust is better, who knows. I've got a corporation soul. Oh, what am I going to do with that it's designed to participate in society and do in commerce as a result of what the Cabal has done, that's gone going away. So would that not go away as well? Probably So trust is always a good thing. However. There is a clue here. They have trust documents, they will have trust documents at your redemption appointment. Does that kind of gives you an idea of what they think about trusts. You may want one or you may not it's up to you. You have the quantum financial system. This behind you, you can't get sued, and have the quantum financial system go along with you, or go along with that lawsuit against you. It has to it's all voluntary. You can, nobody can come and force you to do things in the quantum financial system period. I'm saying that as if I really know what I'm talking about. But that's the way I view it. And I could be wrong. And if I am wrong, I'll be the first to admit it. But I see the quantum financial system as a way to protect us from people who would be suing us for damages, and so forth. Now, let's look at that, from the other point of view. If I've done something to somebody that they feel that they need to sue me, would it not be best for me to go to them and discuss the situation? And work out a settlement, that we don't have to be power over others? Are we not getting away from we're getting away from that stuff? Why do we want to carry that stuff with us? If I'm in involved in an accident, and the breadwinner is killed? Do I depend on the insurance company that take care of those people? Or do I personally take care of it to the point where I pay for things that the breadwinner was paying for before. If I take full responsibility, there will never be a need for the insurance company or anybody else to get involved. I will take care of it because I am responsible. I have a stewardship responsibility. As part of living with one another in a society where we serve each other, instead of mess each other up. Sometimes an accident might happen. Maybe we're going to get away from cars do have accidents, may we're going to get anti gravity machines that go in and out of the face. So that they're not available for crashing into one another. Who knows. That's what I believe. That's what's coming. So again, it's a transition. Tech yourself the way you feel is necessary. But don't be planning on stuff in the future and saying it's going to be this way. And that way. We'll see when we get there. It's like the bridge that was it's all Crickety bridge we don't, it may be washed out during the spring, I don't know, we won't know until we get there. And then we make a decision on whether we want to use the bridge or not. Or have to drive some other location and cross the string. Right, most of the the things that we need to understand that we don't have the power now, we can do what if until the cows come home. But until we're there, we cannot make the decision or have no idea how to make the decision. So let's just allow it to be put it on the back burner until it requires us to make a decision on it. That is the only these what if questions are really, really just you're projecting your fear of the future. Think about things and know that what is in the future that is coming is going to be different than the way it is now. And that we

serve one another instead of mess each other up. What if Jesus came down and you know, or whomever you feel is important. And what's the staff out there and parts of the Red Sea and we walk across things that we had no idea what to do? We don't know what's coming. So let's just allow things to be become more spiritual, as in I say more natural. Spiritual is not connotates some kind of woowoo stuff. I just say it's natural. It's not woowoo it's just the way things are in the heavens. That's natural. Next question.

T

Tracee 44:25

Okay. This one is kind of I don't think you said this, but it says you said during the appointment, some right for your humanitarian stuff. Does that mean we went through the forthcoming email link and hope we get an alliance agent to hear from the alliance by some other way?

R

Ron Giles 44:47

It's hard to know how to answer that. My my statement has been in the past. The Elijah Lyons agent is not going to give you take this or Leave it rate, you're giving away your power, if you think that they have the power to do that, or would exercise that power over you. Number one, they would never do that. They don't give you a an ultimatum, that's power over somebody else. That's them thinking they know better about your life than you do. It is totally inappropriate. Please understand where I'm coming from. If an agent that your go to an appointment, starts talking about things like that, pick up your money and leave because that is not a an agent from the Alliance, they would never do that. Okay, now, what if, what if you've got all of these fears projecting here? I'd like you to assume, and it's not making you and me, I'm just saying I'd like you to assume I'd like you to have faith. I'd like you to have a knowing that when you go into that appointment, you will have an edge member of the angelic realm or somebody on the other side of the veil, who is becoming your friend. Do you think the alliance would contact you and give you an opportunity to go see somebody of this nature? No, I'll say No way in hell. I want you to get rid of this concept of I may be involved with somebody that's not in my best interest. Because if you focus on that, that's what you're going to get. And that's why I have so much problem with the gurus who set up all kinds of these conditions and fears that the alliance would never have a part be a part of. And they're projecting that as if the alliance would allow that to take place. Who was it? Who said the base of that kind of garbage. He had got to quit listening to the Guru's you got to quit listening to their diatribe, you got to quit listening to their limiting concepts and understandings, you got to quit worrying about the loopholes, or the loops are the things you have to jump through. In order to get your funds. They are going to give you as much as they possibly can. Because they know you have a job to do. Why would they short you? If you're flying an airplane, from here to London? Well, I My job is to get from here to London and I need this Well, I'm sorry, we can only give you enough gas to get halfway there. What the hell. That's just dumb as a stick. You don't do that to people, if you want them to fulfill their responsibilities. So get rid of the gurus, get rid of all of the limiting understandings and ideas, quit projecting your fears into this particular situation, and allow the Alliance to do their job for you have faith that everything will work out specifically for you as a humanitarian that has a job to do. You're getting your marching orders, you're getting the things that you need at that appointment, for the next 100 years for you to do humanitarian work, if you want that longer period of time, kind of come down on this. And maybe it's time

that I do come down and let people know really quit having these stupid thoughts. Quit projecting them out as a possibility. Because the alliance will not do things this way. gurus would keep following them, then you're going to be going where they go. Next question.

T Tracee 49:09

It would be giddy when we are approaching people about the RSS as they most likely won't have a QFS debit or credit card. How will they pay the \$10?

R Ron Giles 49:20

Let them work it out. That's not our problem.

T Tracee 49:23

Well, they could probably pay it through their whatever bank card they already have, right? Like a regular credit card.

R Ron Giles 49:31

Okay, I mean, it's a problem solve the problem. If it does, if you don't have QFS card now, use your debit card that you already have. Yeah, don't make it a problem. Solve it. I always say find somebody that is.

T Tracee 49:52

There's a great quote that says it's an energetic quote, but it says instead of focusing your energy on the problem, focus your energy on the solution. And then it will appear. Yes. Okay, nonprofit organizations can sign up for the RSS, will they also get the six trust? Or is it just for individuals?

R Ron Giles 50:14

You know, that's a good question. And I haven't thought it through to that point. The six trusts are available, we'll probably make it available for the nonprofit organization as well. That's not going to be the real source of their money, their real source of getting their people involved with them. And they get one penny for each two people's 200 people in your organization. That's \$1 that's over \$500,000 per year. That's where their money real money is coming from. Whether they have trust with a nonprofit, I'm not sure yet. It's a decision that I have not inquired about or discuss with others. Thank you for bringing it up because maybe that needs to be put on the table. We'll make a determination next question.

T Tracee 51:10

Tracee 51:10

Do we take the actual Zim dinar to our meeting or copies of it only?

Ron Giles 51:18

Why would you take a copy?

Tracee 51:22

Yeah, it's not like you're gonna take a copy of \$1 bill to the store that's funny yeah.

Ron Giles 51:29

You know I don't mind to make fun of that but why would you even consider taking copies and why copies only when they get the dinar Dong or whatever Zim especially the Zim has no value outside of that appointment. dinar is an active currency so it does have but there's two different things there are two different animals a zim is is a defunct currency no value to it except for what you can buy and sell them for their redemption value is only with the Alliance dinar I don't know how to but why would you take copies you got them take them next question.

Tracee 52:17

We thought dinar was for family investments can be used for family or only humanitarian purposes.

Ron Giles 52:26

Dinar is what you want to do. I think family investments good way to return on investment. There are those who decided that they wanted people to do humanitarian works and and or you got to do 80% of humanitarian works and all of this garbage or you can only spend 20% on yourself. Return on investment is your money. The Zim is not a return on your investment. Return the Zim is only for those who will use the money for humanitarian work, thus only for humanitarians. And only humanitarians will get redemption funds, period. Exclamation point. If you're not a humanitarian, you have Zim give it to somebody who is a humanitarian, because you're not going to get any money for it. If you're not like humanitarian, they will not give you money as redemption for any of the Zim bonds by say that really strong donor. Does what I've received is very, very, very strong. Next question.

Tracee 53:39

What's very, very, very strong.

R

Ron Giles 53:45

Only Zim only humanitarians will get Zim redemption funds.

T

Tracee 53:50

Okay, got it. Um, last question, if we need contacts to help with our projects, where would we find experts?

R

Ron Giles 54:00

It's a good question. And it's one that when you get in the business, when you have money, there will be the right people show up, give you counsel and by. There's headhunters for larger, responsible jobs, CEOs and that sort of stuff. There's people that will find those people for you. I'm not sure that I'm going to use a lot of that off, I'll use it until I find something better. But I think that something better is just asking for the right people to show up at the right time. And then when they show up to identify help you identify themselves or identify those people as ones being sent from from Godfather whatever you want to say. To fulfill that request, in my opinion, that's the best way to do. Okay, well if that's it, then Let's say thank you for everybody for the questions that we had some really good ones and some that were marginal but they're still questions that need to be answered and so I have no problems in in answering them and send my blessings and love to all of you future humanitarians, or President humanitarians waiting for your funds. We're all in this together. And we are so loved and appreciated for what we are going to do. And on that, we are loved and appreciated for what we're going to do. Thank you, Tracee, for your excellent help today. I appreciate that. And to everyone we'll say goodbye for now, and have the rest of a good day.
