SUMMARY KEYWORDS

zim, money, people, benefactor, humanitarian, rss, question, beneficiary, account, redemption, appointment, alliance, funds, trust, projects, quantum, qf, loved, set, humanitarian projects

SPEAKERS

Tracy, RG

- **RG 00:00**

I'd like to welcome everybody here to our question and answer period . This is Ron Giles, and our moderator or question answer is, is Tracy. And so with that introduction, let's go ahead and begin. Jc Thank you.

- **Tracy 00:18**

My pleasure. Okay . This question says, Is it really so that all businesses would have at least one account established in Of s? At the start of just saara, it seems like a huge exercise to get all accounts established at one go when Of s kicks off? If companies themselves need to register into Of s, which they have no idea about? And then set up an account? How would that how would they know that they are expected to do that? Or would the accounts they have now be integrated into Of s, perhaps in the background, and the companies would be required to do nothing, if not done automatically business to business trade would apparently continue for some time within the normal banking system, as they, by definition are not beneficiaries within RSS to get their Of s accounts . So mouthful ,

- **RG 01:14**

Well, okay, the accounts are established into the quantum financial system, it's not a big thing. For the quantum financial system, they know everything's have the accounts are already established. But each individual and each individual business has to activate that account. And to activate it, they have to put money into that account. So there's going to be a process for everybody to follow. For those who have Zim and, and redemption exchange funds, that is a transaction, exchanged redemption transaction , that will activate their accounts, our accounts in the contract financial system. And then from there, we we get to use it and establish more accounts of whatever we will we want to do. But each business has the responsibility of establishing and activating their accounts by putting money into the accounts, and then they can start using them . So I'm not sure how that's going to happen. I have not been given any information about that. But I just know that each person has a responsibility to activate their own account. It's not going to be automatic. That's the heavens do not do things like that. The establishment of the there account is already in the quantum financial system. But they have to activate it and in activating that, then it's, it's completed.

Tracy 02:54

Okay, could it be an idea to have an FAQ grouped by topics? So that is easy to find back accordingly without having to search through so many videos to find the answer.

- RG 03:09

That's a real good idea. And, and perhaps it will be one that we can work on. That's labor intensive, analyzing and so forth. And we don't have anybody right now that is prepared to do that sort of thing. Because it's labor intensive, time intensive, but it's a desirable thing to do. And there'll be a time when we'll, I feel that we need to do that. So I'll have I'll say, yes, it's going to be in the mail. So we'll get it down. It's desirable to do it's just matter getting to do you

- Tracy 03:43

want to volunteer.

- RG 03:50

I would love to have some people identify themselves, but we're not going to pursue that at this point in times, unless somebody just simply wants to take over that without having to be trained or something I don't know. Well consider. I

- Tracy 04:05

am the holder of one mother box of Treaty of Versailles g seven Platinum box 1928, with a face value of 3 trillion US dollars, and one mother box or Yugoslavian dinar certificates with face value of 5 trillion dinars How can I enroll these assets into the Q s system I'm also prepared several humanitarian projects with the Philippines waiting for funding please help me how to monetize these assets for humanitarian projects in the Philippines and maybe other countries.

- RG 04:40

You need to send me a specific email with this kind of information and we can start discussing emailing back and forth and because there's some specific things that need to be taken place and I can help you with that.

- Tracy 04:56

Okay, I will flag this and then that way, I I will know to email this to you. So you have the person's contact info. We are nearly 12 humans to start a project in Germany living with animals and humans together. We need a benefactor for our project. But I don't know how I can ask a friend, can you please give me a tip how to handle it to get a benefactor for our humanitarian project?

- RG 05:24

Wow, that's, that's interesting. Also flagged that one for me, because there's people in Germany already that can

help out who will become benefactors and maybe we can line them up with and have them incorporate as a project for themselves . We can we can facilitate

- Tracy 05:47

when engaging with local clubs, like football, sports clubs, etc. They often have existing sponsor sponsors to work with to obtain help with repair maintenance, chattels, equipment, etc. So clearly, I do see our ability to help their membership with a way to earn additional income, which could assure continuity of membership fees, etc. Plus, offer them Additional funding by way of grants and an ECS to engage additional staff, etc. Do you perceive any additional ways where our loved one society system might make a real difference?

- RG 06:24

I see the the consistent flow of money coming into the program when two people join, they get a penny, in addition, one more penny on their download. So they have a lot, then they can, it does give them a cash flow. They can either use sponsors or not, it's up to them. But they will have a substantial cash flow coming into their organization, if it's set up properly. And, and there's some suggestions in our wealth management program of how to do some of those sorts of things. That will be coming out later. But yes, there's some substantial help that we can give to these people. And it just takes some inventive minds to create how they want to use it. Mm hmm.

- Tracy 07:16

Okay, I could not understand English. But my question is, how will we be told that we can hand over our Zim

- RG 07:25

the Alliance speaks all languages. And there's the Alliance, who will be contacting you to do your humanity, your redemption appointments, the person who calls you will be the one to talk to about what you need to do. And because they already know who you are, and have contacted you, you can have full faith and trust in that process, they will contact you, you don't really need to do a whole lot, except be open to the fact that you're loved and appreciated in a humanitarian and you will be contacted, because you're the one that needs the money to go to work. And that's what they want, they want you to have the money and let you go to work. So just because you don't speak English, they speak your language and will contact you in your language in your location, so that you'll be fine.

- Tracy 08:22

eautiful if we are going to be getting a new internet system, how are we going to be able to connect to all the information on the loved one society system.

- RG 08:34

It won't be now or and then cut off and you can't use the all there'll be a tran sition . And it will always benevolent be benevolent as they move into the newer technology. But there's got to be a way for everybody to transition make the transition. And it's not like you have to get a lot of money and all that sort of stuff to do it. It will be very easy for us, the quantum internet is already functioning. We just don't know about it yet. When the thing turns on as far as public

notice, or understanding the computers that we have will be our connection into that internet as well. So it's not going to be a problem for us. I can assure you that loved one society will always be available to people with an internet and with a computer.

- Tracy 09:32

Are we going to be able to use our existing computers on the new internet?

- RG 09:37

Yes.

- Tracy 09:38

Do you know anything about the Q phones that are coming out? Will we be able to connect to the Of show will these be distributed to the people around the world?

- RG 09:51

The cue phones are a here's this is my opinion and I need to stay that as such because I have not studied the cue phones. To understand them fully. There's some examples of this already being done in Africa where they use a new phone, or a mobile phone for their and their phone number to access their bank accounts. It's a good idea. But it can be controlled by other forces that may not have an interest in, in our best good. So I'm, I'm open to the idea. But I'm also wary of the fact that this whole system is being brought out by this god man movement. And the cue phone is associated with that. And they've got all of this money and buildings in move, and all of that sort of stuff already lined up. I don't have any faith or trust in that whole queue, god man system that they're trying to introduce, I believe it to be a ruse, if you understand the word ruse, they're wanting it to be like the quantum financial system, but I'm calling it a three d quantum financial system . or excuse me, a five D, meaning it's Earth based . Anything Earth base right now is cabal. Anything Earth based right now, that says their quantum financial system is is absolutely false. It is not the real quantum financial system. And I'm going to get into that in some of my posts in the near future. And explain to you or everybody in my way of looking at what the differences are, and why I make such a bold statement, calling one, five D and calling the other 3d, Earth based, heaven based. So we'll get into that. But I am very, very wary of cue phones. And that whole movement I feel uncomfortable with it would not participate in it at all, either myself or with any of my money.

- Tracy 12:23

I want to be able to give my children and others a large amount of money, how can I do this anonymously

- RG 12:31

as a gym benefactor, you have the opportunity to set up a certain set of circumstances for those people, you've got the directors in the CDC that could be helpful. And be and hide behind them as as in benefactor or as a benefactor that's helping them. But there's so much that you can do with the RSS program with a download to take care of all

of your family and help them to and just sign them up on that and let them make as much money as they want to. I'm not sure that it's a good idea to give people a large sum of money as a download, or excuse me not download, but as a lump sum of money. I would avoid that at all costs, because the RSS program gives it a little bit at a time. It doesn't it makes them they don't get a large sum all of a sudden. But if it's your family members and people like that, there's a certain amount of things that you can do as as in benefactor, and still remain anonymous. and explore those thoughts and ideas. Because a non anonymity is absolutely essential for us. And to what degree you want those people to know who's the benefactor? No, you wouldn't want them to because you said you did. But there's, there's got to be a way to do that. I don't know all of the answers to that. I'm with I'm getting the same problem myself. But I think that the answer is involved in the revenue sharing solutions program and a number of different levels. So our minds just have to be applied to it. We'll come up with the right ideas to do what we need to do. It's my belief.

- Tracy 14:33

What if I'm a Zim benefactor, and someone reaches out to me to be a beneficiary and wants to set me up on the LS s program? How do I refuse them and not let them know why I don't need it.

- RG 14:47

Just say you're already a member can idea and have ended discussion?

- Tracy 14:53

I understand that a registered member of loved one society can have unlimited registered members, which he She recruits, but only six trust accounts Am I correct? If so why? Since a trust is also a shareholder,

- RG 15:09

the six trusts are associated with the beneficiary, under their ID then do their user ID. So they're only allowed six of them. And once their slots are filled, then you can't have any more as a beneficiary. You can then you can register, let's say this way, there will be unlimited numbers of people who will register underneath your master ID number that you will never know who they are. Because there's no way to keep track of a billion people. And you might have a billion people underneath you or hundreds of 1000s, or even, you know, whatever it is, you won't know them or have anything to do with them, because it's all done by computer. So as in benefactors, it has a major anonymity with anybody beneficiary said there can establish six trust accounts, or six, six slots for them. And I'm not sure and with the way the question is constructed, that there's good understanding of the difference between recruiting because you don't register people, they will register themselves, and then they become the beneficiaries in that six trusts are available to them. So if I'm understanding that correctly, then that should answer that question.

- Tracy 16:39

As a Zen benefactor, how do you approach potential beneficiaries like my kids to sign up with RSS program without it sounding like a gimmick scam? Or it's too good to be true?

RG 16:52

Well, it is too good to be true. So how do you get away from that? The proof is in the pudding . Your taste it, see if it tastes good? Or it's pudding? Okay, good. If you were to take over your computer, and you say to them, I've got something that I think is interesting. I got involved in this program had cost me \$10. And I'm getting this download, you want to see it? What do you mean download? Well, they're putting money into my account that I've established with them a beneficiary account, and they're just download, where's the money chemical? Well, there's people that want to do this and get this money out into the hands of people, maybe they're saving their conscious, or whatever you want to call it. The point is, is that the proof is in the pudding, show them the end, open up your account. If you don't want them to know how much money have in, well, you're gonna have a hard time with that. But they can see the consistent download of 10 cents or plus 10 cents for each of the trust and so forth . And they can see it themselves, sign them up. If you want to put it here, I'll pay your \$10 just register here, see, here's my referral so that you can sign up to let the data and tomorrow you'll have \$144 in your account. Oh well. And by the end of the week, you'll have 1000 if you're still credited, if it's still a problem for you, you'll have to deal with having \$1,000 a week coming to you. There's nothing you can do about it once you've registered it'll come it's bonded so at last the rest of your life bequeath it to your children. Cool. So it's it's their laws or problems that people will just have to have a kind of an idea of solving and but there's a lot of different ways to solve that problem.

- **Tracy 18:56**

And at that point, maybe we'll have some really cool videos that you can just introduce them with people's, you know, stories or whatever. So

- **RG 19:05**

yeah, I'd like to do a video like that and show the money coming into their account. So would that be beautiful when it happens? Yeah, and why himself

- **Tracy 19:16**

in part of the World Series is why give away money. Okay, next question . When a beneficiary asks for their RSS funds to be deposited to their OS account, does the RSS system automatically deduct the requested funds for the benefactors TFS account or does the benefactor have to manually process each request manually? That's a good question .

- **RG 19:40**

Okay, let me be sure. I understand that when a bishop beneficiary asked for the RSS funds to be deposited to their Qf Scout, does ers assist system automatically deduct the requested funds from the benefactors Qf has account? That would be the master account. Yes. And does the benefactor have to manually process each request manually, every time there is request to come through it comes through the computer, the computer will honor that request and draw the funds from the benefactors Qf s account and transfer it over to the beneficiary account within the quantum financial system. It's all done automatically . When the beneficiary pushes the button to transfer his money or her money.

Tracy 20:31

All you need to realize is the RSS is simply a ledger account. It does not hold funds. It's a ledger account. Am I correct in saying that?

- RG 20:44

You are, and that's a good point to bring up.

- Tracy 20:47

Yeah, it's not like a bank that we actually have it. We're holding money of yours. It's a ledger. Okay, please. Yeah.

- RG 20:55

And to get your money, you have to pull it out of that ledger and pull it into your account?

- Tracy 21:01

Yeah. Okay, please correct me, Zim redemption won't be taxable. Right? What about the trust? It won't be taxable, right?

- RG 21:10

It's a good question. But it can be totally eliminated by the idea of nesara. Or just are, if a government is just are compliant, then they're part of the quantum, they can be part of the quantum financial system. If there's a country, that taxes money on their funds, they will not be a part of the quantum financial system. So there's no reason to believe that income tax will ever be charged again, in a country that is can just are compliant. That goes away, just are compliant means that they have a taxable in or excuse me, a sales tax revenue from their people. That's all that they have, as far as getting money from their people. Government has to be downsized. So it was never supposed to be like it is now. They've made it a source of money for themselves so that they can extract more money out of people. Government will be sized down to where it's supposed to be of service to people, instead of being a source of income for themselves, who are elected officials. And the people and career politicians have been doing this for years. rigged the elections, they stay in power and they just move on up. House Pelosi give \$170 million dollars of assets spin in business for if she'd been in the business of politics for 40 years. I don't mean to say that against her, but that's what happens. Every now let's let him know.

- Tracy 22:59

Where do we get the form to fill out the background checked? Do we submitted out the appointment?

- RG 23:06

Well, you talk about a form for a background check. I'm not sure I'm understanding what you are referring to. You are not required to have a back ground check. You're sitting across from an angel that knows who you are. They already

background check. Even being required .

8

Tracy 23:36

I was gifted Zim bonds the person who gifted them to me had cancer and wanted someone else the opportunity to do humanitarian work. She selected me, how will the Alliance know my phone number or address if they are not connected to the gifted zims.

-

RG 23:54

It's not the same as the person. If God knows who you are, where you are, and your phone number, then the Alliance does because the Alliance or Ascended Masters, they're the extension of God through into humanitarians work that we're going to be doing. And that's the Alliance it's her job. And we get to be a part of that so they know who you are. You'll be fine.

8

Tracy 24:21

On the homepage of the RSS platform will Loveland society be listed with its website above? registration?

-

RG 24:28

I'm not sure I understand that question .

8

Tracy 24:31

I think what they mean is that when we send people, potential beneficiaries to the RSS platform, will it say loved one society and will it have the website on that page on the RSS platform?

-

RG 24:47

Well, it'll be the revenue sharing dot solutions, email address. That's how you will access your your office back office. I call it a personal office will love one Society be listed on there. It's probable haven't thought about that. But there's no reason not to, you know, a subsidiary of loved one society or something like that we can do it.

8

Tracy 25:12

Do we set up our six trusts at the redemption appointment or do that later with a lawyer?

-

RG 25:18

You do that whenever you want to add the appointment is is not the place to do your resume benefactor, you're not as them beneficiary . So you're not going to be setting up trusts for other people's beneficiary accounts. So be sure

you understand the difference between a beneficiary and a creator beneficiary is part or people who register under your benefactor user ID. So there's no six process at the appointment set up benefactor doesn't need them.

- Tracy 25:55

Is it benefactor is the giver the beneficiary is the receiver, the receiver the one that gets the six trust because why we're gonna set up a trust and pay ourselves inside the trust, the trust that you would set up at the appointment that we've alluded to, would be to protect yourself with a privacy so that you have a trust to give to your family down the road? Right? Because you've alluded to, that they will have blank trust that we can set up at our appointment. I think that's the confusion.

- RG 26:30

Yeah, the six trusts for the beneficiary is something they set up with their lawyer or whomever afterwards.

- Tracy 26:39

I was just wondering if the payment method of one cent downloads for example, was your idea? Or was it suggested by the Alliance? That's 10 cent? I don't know if the question came in with one cent. If that was a typo.

- RG 26:53

It was an evolved evolutionary thought process that came up with that. But you know, how do you? How can you not give credit to the heavens? When thoughts come to you that are so far reaching like this? I know where the source is. Yeah, it came to my mind. I was not told. Some people say I give glory to God that God doesn't want glory. And neither do I. So it's just an inspiration that came and there it is.

- Tracy 27:27

I live separated from my official wife and divorce will follow in the near future, how can I ensure that she is not entitled to part of the funds that I received with my appointment in the event of the divorce?

- RG 27:40

It's an excellent question. And my question is, have you separated your Zim? Does he have some Zim or do you have some Zim is that that separation that you go your own ways and do your own redemption appointment. And this is for this particular reason is why I say even those who have really good relationships in their marriage, should go ahead and redeem their own Zim and have access to their own money for the things that they want to do. Don't join the Zim together, join together after you've gone through your appointment. And then you have the ability to say yea or nay and you're not being controlled by somebody else. You may be manipulated through emotions, and all that sort of stuff, but you still have control over your own money. And that's the best way to do it. In a divorce like you're going through now. I'm I would suspect that you would want her to have them as well as you. If that's not the case, then what you'd need to do is becoming humanitarian. You know, the question also, you know, I can I can send some real problems here with the future and money. And it's important for you to focus on the fact that the Zim is

not money, it is an opportunity to do humanitarian work. How do you separate that amongst humanitarians? Is your business. But I would be focusing on humanitarian work rather than the Zim and just recognize it the Zim is an opportunity to give service to mankind . How you use that, if you were to be selfish with it, or something of this nature, from one to the other. Your wife doesn't deserve it and all that sort of thinking, I'd question the person's incentive to be a humanitarian because they're worried about money. But it can all work out. It will all work out if you're both humanitarians. Just as you do this.

- Tracy 29:53

I have several projects in motion at the present time and listening very carefully . I was saying This question for my angels, I'm sorry, but I'm always thinking cost benefit. I will build a home. I'm going to put people on the RSS they will buy the home. does the money come back full circle to my master account?

- RG 30:16

Yes. Well, when you say full circle, you're going to give them the money to pay for the loan. So you buy the house and give them the money to pay for it. And that money will come back to you. Yes, full circle.

- Tracy 30:32

Regarding the redemption appointment, you say we will be getting contacted personally by the angels. What do you say about all the people like the Guru's Nick Flemmi, Mark z and website dinar Chronicles are saying a safelink website will be coming out publicly for people to redeem. That's funny that this questions here,

- RG 30:49

let's just make a statement. Everybody gets to believe it what they want to do, and everybody's position to do the work in life that they're, they came here to do to accomplish . I don't know what any of these other people are going to do. Perhaps I can just simply say it's none of my business. And really, and in fact, it is not my business, I've got all of my humanitarian stuff to put together. I'm just here to help other people with a loved one society platform so that they have a structure to help them. And whoever uses it, are ones who have gone through the redemption appointment and have the higher rates so that they can afford to be to participate in the programs . Other than that, if Mark z want to be a part of our program, then he can go through the redemption appointment, we get so higher rates, and he's certainly welcome to be a part of his his well, you'll get to come from his humanitarian heart, if indeed he does have one. And that's not a judgment call on my part, I'm not gonna go there. That's none of my business. Same with Nick Fleming or Bruce or anybody else.

- Tracy 32:08

Referring only to the RSS when a beneficiary begins to receive bonuses such as the one time \$50 bonus when he or she signed someone up, and the one cent per minute download for every two people he or she signs up is the additional permanent download done automatically .

RG 32:26

Yes, as part of the part of the program, the platform,

- Tracy 32:31

me and many others have heard that you should collect gold and silver as an investment in the future. But now it feels a bit unnecessary as we can get as much money, as azim benefactor Should I sell the estate, all silver and gold and rely on the saara just sorry, instead,

- RG 32:49

I'm not going to give financial advice. I have my own thoughts about the price of gold and so forth in the future and silver, or other assets. As always, you need to seek counsel and advice from people who know this area. From the way that I see things, I have no real reason to be buying gold, you have gold back currency, then the need for gold to as a hedge against inflation. Just that whole idea goes away because there's no inflation coming with the quantum financial system . So holding gold as a hedge against inflation is not, in my opinion is not important. Some people just like to have gold because it's pretty and they like to have it around same with silver . And so everybody has their own ideas about what they want to buy, and they're certainly welcome to do whatever they want to do. There's not a lot of people in the market places now. commodities, especially that know what the future is going to bring. A lot of people are saying that Gold's gonna go way up by Well, it may. I don't know, I just know that when I get the sums of money that I'm requesting for the Zim that I have. I won't need to have any extra money.

- Tracy 34:15

Is the Alliance suggesting the 100 year timeframe? Or can we ask for a longer timeframe like 200 years or longer? Please advice .

- RG 34:24

My advice is to have a little counsel with the angels sitting across the table from you to redemption appointment, get what they think I'm going to ask for 100. But if I can get 200. If I can get 300. If if we're going to have money using money that long. I know. It'd be good to have it then. But if we're going into the fifth dimension, were we doing our own creating by our thoughts. Maybe we won't have a need for for money, I just don't know. However, there's people who we counsel with and those people kind of have a peek into the future. sure that we don't have right now. So we counsel and get advice, seek out counsel seek out advice. And they're there to assist us. So they're a resource for us to make up our own minds.

- Tracy 35:14

Will the Alliance be able to redeem our currencies like the Dong and bulevar to or will they be dealing only with Zim bonds?

- RG 35:24

They will be doing both. Bring what you have.

- Tracy 35:30

According to IDC, and all other RV Intel rooms and chats, RV is now imminent if they happen to post a website link where we can securely make our redemption appointment. Can we use that appointment to redeem our dogs, dinars and other currencies than wait for the alliance to contact us regarding the Zim bonds? appointment? This way, we have some money while we wait for Alliance to contact us.

- RG 35:51

All go or no go? When it happens. It happens for everybody. There's no waiting for the Alliance . In my opinion, the Alliance would be the first, if there was a separation between the two, something that's not as good as the Alliance is not going to happen. Before the Alliance does anything else is a result, a residual result of belief systems of people who have not connected to the higher realms, or the higher way of doing things which is the Alliance way,

- Tracy 36:25

there are 1000s of people, some of whom have been waiting for years to redeem, who have been told about the safing website or 800 number as a means to make their redemption appointment. They know nothing about the Alliance way of redeeming or do not trust it, as it's not the common narrative going around in RV circles will they miss out on the RV?

- RG 36:44

What an excellent question. And I don't really understand nor do I know, in my mind, I want to believe that the Alliance's is above any punishment sort of thing . If you don't believe us now, then we're not going to let you in that each individual gets to have their chance to be vetted and be in front of the and get their money for the humanitarian work of their humanitarian s. You know, that is the underlying operating procedure. If you're a humanitarian, they want you to have your money. So they're going to get it to you. There's no way around that because we are the ones that they are dependent upon to move society into the golden age of mankind. Who isn't one humanitarian that has Zima that will be left down. Even if you don't believe in the right processes. You know, here it is today, when is it going to happen? And what's going to take place between now and then is the Alliance going to be unfolding and putting people who are not part of the humanitarian projects and so forth? Oh, aside and not let them be a part I don't have a clue. I just know that we as humanitarians will get what we're asking for and wanting to do. Because we're humanitarians, others, the chips will fall where they do and it's nothing a punishment is just that's the way things are.

- Tracy 38:14

Am I correct in assuming we should not use them funds to finance projects like Vietnam mega cities, as described a man of God document five, this idea must be copied from a Klaus Schwab great reset handbook.

- RG 38:35

I think you're onto something there, my dear whoever it is, I don't believe any of this is going to come to pass as a

going to go away before that opportunity presents itself. I would not be involved with this project at all, in any way, shape or form. There are too many cabal, footprints all over this, that I would have a very very difficult time resolving to feel like I can put humanitarian funds into something of this nature. And until I can see a different way, I'm not going to be involved with it. And I that's just me and everybody gets a chance to do what they're going to do and want to do for that matter. But for me, I'm not going to be part of it.

- Tracy 39:39

You've mentioned several times about an RSS website unable unable to find it. Are you able to add a link for easy connection to it please.

- RG 39:51

It does not exist yet. The RSS is saved as far as it being our website. Well, it does not exist yet. Can you imagine this is one of the things that people just don't understand. Can you imagine, we're going to be paying out all of this money. And we don't have the money yet to pay out, just start doing the math on that. We don't have it. Nobody has the money to pay that kind of RSS program. Let's be wise, we've got to have the money to do it. First. When the money comes in, we'll set up the platform and start from there.

- Tracy 40:32

If I can as a Zim holder, as well be is and benefactor because I have already about 30 humanitarian projects between 14,000,400 and 50 million, I have 12 times \$10,000,000,000,000.03 times \$50 trillion in my hands, so it sounds like about 100 t a little bit more. So the question is, yeah, so they already are as in benefactor, if they have it. Anyway, you see the question,

- RG 41:06

museum holder becomes a Zim benefactor, if they want to, they signed a contract or an agreement with loved one society to be a xym benefactor, and take upon themselves the responsibility and the liability of the RSS program, and to fund it, how much how many other projects you have, has really very little to do with your participation in the RSS program, becoming as in benefactor, it's only there to help and then enhance, help you with your projects and enhance your ability to use distributed money, love, and society will not stand in the way of anything that you want to do, it'll just enhance what you're already got planned. I hope you didn't see that. hidden within there. It's not so hidden, it's been very public. But in there is the ability to do any projects that you want. The C CAC program is a wonderful opportunity to have people who have boots on the ground that can do things. So take a look at it and apply it and see if it can help if it doesn't tend don't do it.

- Tracy 42:26

I have heard you mentioned that if you die as a Zim benefactor, that the account can be passed down to family, since you are under an NDA Is that something you set up through a will? Would you be able to let your children know your zoom benefactor or under NDA would need to keep that private from spouse and children,

RG 42:44

okay, understand that the NDA is for your protection. When I say your protection, you want to remain anonymous, you don't want to put a target for people to come and you know, it's not a negative thing, if you have money, your problem is, is you're gonna have a line of people outside your door wanting to get your money or borrow money from you. It's not like they're gonna kidnap you, or something of that nefarious like that. So the NDA is, is there for you to be anonymous from other people. Now, once you kind of learn how to do that, in terms of having a benefactor over you sort of thing, and the money isn't yours, then you can start dealing with these things. an NDA is not going to prevent you from doing your family business. So there are ways for you to, obviously you're going to have to take if you're gonna die in the next 100 years or whatever, then take that person aside, and start talking to them about what you're doing. Now. The person who's going to take my place, as an overseer of loved one, society is my son, he already knows about it. He knows what I'm doing. He will become a part of what I do. How will he know how much money we have, and all that sort of stuff? There'll be a time and he'll find out but we don't need to, he doesn't need to know that. Yeah. So I'm gonna need to know basis. So even if I have an NDA, there are certain things that I will just be the, the sole owner of that information. So how you deal with your with other people. If the NDA is still active in 100 years, or however many years, then we deal with that. But I think it's only going to be for maybe a 90 day period of time. And then yeah, I will use my own discretion about the information that I share with other people. Knowing that I can be counted in sharing, I can share in appropriately that will give them more information than they want to be able to keep and more information that I give them that I could that could get out that could cause some problems. So we just have to be wise. Use guidelines, don't act like they're rules that you're going to get punished for. But your decisions have consequences. And those decisions and consequences, or they'll come together, you have to own the decision to give out information and the consequences. So be careful, be wise, and think things through, don't come for your ego, we always want to come from my ego, and let everybody know how wonderful we are, and all that sort of stuff. And so we share inappropriately with other people, and we get ourselves in trouble. So just be wise.

- Tracy 45:44

Is the training exclusively for us residents or citizens?

- RG 45:49

Absolutely not to love one Society International, for everybody will try and get to into different languages and ways to do that, or translate. We just don't are fully equipped for that quite yet. We're moving towards it. But we're not there yet.

- Tracy 46:08

I have my own projects that are to be of service to our great earth as a Zim bond holder, my projects are to do with our oceans. Am I able to use my bonds for this? Or does it have to exclusively be for other people's projects that I fund for the benefit of people, as opposed to earth or oceans?

- RG 46:28

Well, I can see the question, the reason for that question. We don't know what technology is coming. We want to prepare ourselves to take care of the oceans if there's things that we know that we can do. But it may be that we'll use our money to implement new technology that will help the oceans. There's a lot of extraterrestrials that have an

interest in turning Mother Earth back into its pristine way that was in the beginning . Whenever that was back to the Garden of Eden, I'm not sure. However, you are the one that you're the humanitarian . This is, you know, these kinds of questions could come up, use this as a template answer. I'm the humanitarian. The money is given to me as my stewardship responsibility. What I do with that money, in what I accomplish, is what I give back to is what is the talents that I take back to the master, and I'm accounted for. And if I've done a good job, and I get a little bit more, that's the kind of concept It is your responsibility, you have been given the money, you do what you want to do with it, because you are the humanitarian, they acknowledge that and you get to do what you want to do to come from your heart in your work. They're not going to oversee you, or tell you you can't do this, or tell you you can't do that. If it's in your heart, then do it. How's that?

- Tracy 48:15

That's good? Well, a beneficiary possibly be funded by more than one benefactor, I'm assuming for the RSS.

- RG 48:23

Know, it's a chain of people who register under the referral system. Each person who is referred is a has an ID number. And those series or chains of ID numbers are the ones that are being being paid from the master ID. So it will not be more than one benefactor.

- Tracy 48:48

To me, what this is saying is it's like kind of beneficiary double dip, like sign up under, say, you know, Cindy and Linda, like, they want to sign up under two people, right? So that they get to double dip. That's the way I perceive that question .

- RG 49:03

Okay. And the simple as answer is try it and see if you get away with it. The consequences could be you'll be dumped from the whole program. The Alliance knows who you are, alliances has signed up. The Alliance knows who is trying to double dip. The possibility of getting your account frozen, and you not being able to participate is real. because you're being dishonest. If you go there, there are consequences. You want to try it out, try it out. But know that there's some problems that you can have in the future. Don't mess with this. Don't even try it. You're gonna lose.

- Tracy 49:52

When we sign up a nonprofit do they get the full six trust along with their RSS download

- RG 50:01

Yes.

- Tracy 50:04

If we set up a trust in the RSS for a business, but their operating expenses exceeds the 4000 a month provided by the trust, what would you recommend for helping the company over the rest of their overhead?

- **RG 50:20**

We're going to introduce a benefactor account, benefactors beneficiary account, that somebody an organization that they might want to give money to, they can set up an account, that doesn't have to be a employment and contract or any of those things or the other accounts, part of the other account system is for benefactors to use to set up an account for people that they want to give money to. It's going to be a download. So it's not a lump sum. This goes back to what we were talking about with that other one before that another question before, it's an opportunity, we want to enhance your ability to get money out into the hands of people that you love. And so this account is somebody and you are in charge of how much download, they get this 10 says, then that's 1000 a month. If it's 25 cents as 2500 a month, you're in charge of that, and you can do what you want to do with it. Because it's your money. And it's your heart that's involved in this.

- **Tracy 51:36**

I have become a little confused. If we do have to pay \$10? Or do we need to buy them in order to join an RSS program? If so, how can it be done? Is there a link where we can buy them? Could you please help me? It sounds

- **RG 51:53**

like you want to be a part of it. And when you say the pay the \$10 USD as a beneficiary, you pay the \$10 and you register as a beneficiary and have an account. If you're a benefactor, then you buy them go through the redemption process, and become a Zim benefactor. Understand that there's two different things going on there. If you want to be a Zim benefactor, you'll need to buy Zim Where is that found you can go on. I like eBay, because I'm familiar with it. There's places there where you can buy 100 t note, I would restrict myself from using a source that's from China. It's gonna take a long time to get here. There's some places in California, a couple of them, some vendors in California that have Zim and they can, and there's a new one that's in in Florida, that you can buy the Zim and they are the gold ones. And you can buy them and then they also have some silver ones. They're only a couple of bucks with maybe two or three \$4 to ship them. So there's places to buy them to become as in benefactor. But keep in mind that the Zim redemption is only for humanitarian s. If you're in it for the money, you might as well just save your money and go out to dinner. Because if you're not a humanitarian, you're not going to get money from the Zim redemption.

- **Tracy 53:36**

Question about the man of God documents coming out by Charlie Ward? Are these not on the same page as loved one society?

- **RG 53:43**

No, they're not on the same page.

Tracy 53:45

Okay, next question. When May I start? Go up to the gate?

- RG 53:49

When they shoot the gun? The gate opens and we start when that happens? I don't know. Nobody does. So we just prepare for the start. And in preparing, we do all of the things that are necessary to hit the ground running. If you're waiting around for the money and complaining that's the thing has this happened yet? That's not your best use of time in my opinion. prepare, prepare, prepare.

Tracy 54:23

Perhaps if you could answer the question as an example, that would be so helpful. Here is my example. We want to call our main mother lode benefactor account Grace to You, then we will each my husband and I sign up under our mother lode account with our own individual RSS accounts. Next we will each be able to have six additional accounts. I'm assuming those trusts I know you always call them trust. So is the redemption appointment, where we request these 12 Trust be created or is that something we will do when we are signing up for our RSS accounts. And must the additional accounts be trust? Is there any reason to have more than one account for our redemption funds?

- RG 55:09

There's a lot of things in that question that deserves some attention. Let me just say it this way, a husband and a wife who have joint ownership of their salmon, and we talked about this a little earlier, I always believe it's best to have separate the Zim and go through the between the two people and go through their redemption appointment separately. Your husband may not be as much of a humanitarian as you. And you might not be as much as him, it's the weak link is the strength of the chain. So person who is is not as high up on that humanitarian is the one who may not get as much money. And if you're both in there together, then you're riding the foot, you're riding the coattails of somebody that you're something that you're not. And I'm not sure I'm I'm saying this and that I'm not sure that that may be the case. But when it comes time to spending money, somebody's got to be in charge. And nobody should be in charge over another humanitarian in the use of the other humanitarians funds. Nobody is your stewardship on an individual basis. If you want to do things together afterwards. Go for it. But always remember that you are the steward of your funds. Now, Grace account, that's a good idea. I love that name. And I think that would be appropriate. And that's just between you and your husband, you can set up an account wherein you can both put in money, you're going to get a certain amount from them structured payout every month, and you can put money into the into a joint account and use that for your humanitarian activities. I would personally I would set up two different accounts. As Jim benefactors when you get into the RSS program, you are autonomous and can have complete control over yours, while at the same time gaining the benefit of working together. And I think that's important too.

Tracy 57:32

But just confused, because she wants to set the six additional accounts. I mean, does a benefactor do that or just a beneficiary? That's all I'm benefactor.

RG 57:45

Yeah , benefactor is? Yeah, you're talking . She's mixing the benefactors. And the beneficiaries like that person before. The beneficiary are the ones who set up an account or a trust. If you're a Zim benefactor, you don't need to set up six accounts or any or six trust accounts or anything else. And you don't do any of that as a benefactor. At your appointment. You become a Zim benefactor afterwards by signing the contracts. And then you start performing your humanitarian activities. To get your gym benefactor, you have a personal master ID number that's when you start your beneficiaries and your your chain of beneficiaries that you're going to support and sustain financially. They're the ones who get the six trusts, not the Zim benefactors. This is kind of a duplicate of what we were talking about before.

- Tracy 58:44

Yeah. I have my Zim, dinar, Dong, etc. listed with Charlie Ward, is he going to present everybody's notes as a collective and not individually?

- RG 58:56

We're getting some real close to some . in answering that question, I don't want to be disparaging towards Charlie Ward, those who have put their serial numbers of their Zim with Harvey, they still have their exam, their physical exam. The point that I'm trying to say is that he alliance will not allow money to be given to somebody who has not gone through the vetting process of a face to face redemption appointment. That's where you will get the introduction to the angel that will be your counselor, your advisor, your assistant, as you move into your humanitarian activities. That whole process that Charlie's put out there, bypasses all of that. Now if it works, Important, I wouldn't say it that way. This is not appropriate . This is not of the light. And I have told Charlie this in some fashion a number of times that you only can get your money through a redemption appointment face to face. Now, Charlie's going to go ahead and do what he wants to do. And then I have no problem with that. I think Charlie's a good person. But wait, he's getting his information from a source that is not of a lie. Let's just leave it at that. Can I answer what I don't do and you don't, don't do anything as far as contacting him and tell him for cease and desist and all that. The Alliance knows whose own the owner of the museum and you just go in and redeem it. Just don't worry about any of that stuff.

- Tracy 1:00:58

Okay, so they can just do it themselves is what you're saying? Yes,

- RG 1:01:03

that's what I'm saying. Yeah.

- Tracy 1:01:05

All right. Well, that wraps up we've been on more than an hour, so

- RG 1:01:09

u.c.H if'r hanna ... u.l.c.r.ro """" f.r.c me. I'm ... if Th...ol, """"", T...s... T...s...o, f... "" "" ... h...l r...f...s... r...l h...d...n... m... fr.
