

0:08

Hello humanitarians. This is Ron Giles. I'm here with Tracy who is going to ask the questions for our question and answer period today. It is November the 10th. My birthday.

0:24

Oh, happy birthday to Tracy.

0:27

Well, it is her birthday November the 10th 2021. Of course you weren't born into 21 but whatever. Okay, Tracy, first question. Okey dokey. If we are paying companies and employees from our zooms, will we still have enough funds to carry out our humanitarian projects?

0:48

Yes. So if I wanted to find a church and all the helpers, a wage plus some local small businesses, we don't earn interest on the funds. How will we have enough for the projects?

1:00

At present? I have nine huge projects all over the world. Could you help to explain please?

1:07

Yes, I could help you help explain that, that I feel like in order for you to really understand you need to do some research on your own and that's why we have the website, Q fs 2020. Calm so that you can go and do your research on your own.

1:26

We've got over 5500 people that we have a trainee now, so I can't do things on a personal basis. So even though you're making new and wanting to do stuff, the only thing that really will serve your purposes, as a humanitarian is to dig into that and get all the information you can find. Ask yourself a bunch of questions and then go and find the answers. And that will help you to get familiar with the with what's going on familiar with the programs and so forth.

1:59

Oh, that's my best answer for your questions.

2:03

My answer my best answer is asked for the higher rates and you will have plenty to do everything you want to do.

2:11

Okay.

2:14

I thought you were going to shuffle.

2:17

I have a mentally challenged family member unfortunately they are in a home can I use the RSS program to pay for someone to take care of them in their own home which I believe would help them?

2:30

Why would you ask me?

2:32

Who would you ask that question to?

2:37

I simply say that because if you understand where you who you are and what you're trying to do, then you would know that you are in charge of the money. And nobody's going to tell you what you can and can't do with it. So that's coming from your heart and there you go. Sure. It's yours to do what you need.

2:57

Next question.

2:59

Regarding the up to six trust beneficiaries can make is it up to the beneficiary to come up with the trust documents or will there be any help from similar to the redemption appointment?

3:15

It is anticipated that we'll have some trust documents that you can fill out that will be embedded on the website in your back office or in your personal office.

3:28

So the answer to that would be yes, that's our plans.

3:32

But loved ones society is not responsible for anything to do with your trust. That's you. You're going to get paid a lot for doing it. So take the responsibility and create the trust yourself. But we'll make it as best we can. But it's not our job. It's yours.

3:52

Next question.

3:54

Um you know what the we do have that example trust that they can use as a template that I can post in the forum if you think that would be helpful.

4:03

Well, I think that that would be okay, I'll find it. Would there be a way to list where the Zim holders currently reside, state or region, and where we plan to move to or work on projects that way we don't overlap on communities, we assist and complained to branch out with our funds and projects.

4:24

It's a very good idea for us and we're gonna do something along those lines. It just takes planning and takes people to do the work and so forth. And the best way to present it, is it by region, country or whatever. And, but I think it's a good idea to see where our people are so that you can pick a spot that hasn't been done and, and Color In Your, your flavor of humanitarian work there for the CAC and so forth.

4:56

I think it's a good idea. We'll try to do that as best we can. Next question.

5:01

Well, each of the trust who will be performing in an underlying business in the industries of construction a store selling items, even if not for profit, creating products excetera be required to have a business license in each county where they are based to do this work.

5:21

I do not have a clue.

5:26

Interesting question.

5:28

You guys really need to keep these questions based for loved one societies, because that's what we're training on here. As far as the world we're stepping into.

5:39

You know, we just don't have real clarity with that. Until we're there. Right, Ron?

5:45

Well, well, it's a question that I can answer. I don't get there. You can read them find out those kinds of things for yourself.

5:54

The concern I have will each have the trust. Well, why are why is a business a trust? Well, if the business is your trust, it's the trust if the business is is a corporation or LLC or whatever. So be it. It is what it is. And opinions about those things are, are run rampant. That what we're coming into, we don't know. So those are kinds of questions that you'll have an answer when we're there. Should I cross the bridge? Well, we don't know until we come to it. And I think I think they're confused because there see this line right here says the question was about the six trust beneficiaries. And now this one is about trusting businesses. I think that the person's kind of confused with that. So okay, well filing with your state as a DBA doing business as be required for doing this work for each trust with an underlying business. Oh my goodness. We're getting you need to check with your own authorities.

6:59

To do what he can be telling me what to do anyway.

7:06

Oh, no.

7:08

It's my money.

7:10

You know, I don't tell you what to do. With your money. You don't tell me what to do with my money.

7:16

Yeah, and when we become when we step into the New Republic, and our governments are smaller, you know, hopefully all this be, you know, bullcrap will just go away. It's ridiculous. Yeah, it's called red tape. Red tape goes away. We burned the red tape. We were the limiting regulations, and get rid of most of the government and then we are in a position to fail and fly and do whatever we want to do without a lot of restrictions holding us back. And government's not going to be the way it is now. It's not going to be over us.

7:51

We're going to be running the government and if the people don't like the way we run it, then they get out of the government period.

7:58

That's why I'm looking at. We're not putting up with the Cabal type. power over other people. Ever again, ever. It will never happen again.

8:10

Your next question? Okay. So on our restructured payout sheet for the binary requested 15,000 cash to be given at the exchange. This amount seems minimal to what will be needed to get started. Is there a reason you chose to 15,000 What specifically do you intend to do with the cash on hand since we will have the debit card for most needs?

8:33

Well, there there's things that have evolved, you know, four or five years ago, it was you can ask for \$15,000 in cash, because you're going to have to wait to get your money and all of this sort of stuff. So a lot of that is just leftover things that you put in there that, you know, ask for 15,000 in cash. Do if I don't get it, am I going to be upset? Do they not have cash therefore, see, we were looking at having a place where you go and redemption centers and there's going to be no 10 or 15 people that will redeem there. And so if you ask for too much money then so they don't want to live in there for 15,000 I don't think that that has much relevancy. So I understand what your why your question probably probably isn't relevant. If it's if it's Arabic, give me 15 And that's 15 cash that you take home with you.

9:34

I don't know that that's so important, as it has been for the main reason. You're going to get your first structured payout at that point. In time when you leave that redemption appointment. You will have your first structured payout payment in your account in the quantum financial system. And you can transfer the money around to a bank or wherever you need to do that until you get your cards. It's just convenient from then on. We are the masters. These guys are not necessarily our servants, as in master servant relationships. But we're the ones that ask them and help and help to assist us in the things that we're trying to do.

10:20

Next question.

10:23

Would it be wise to contact governments around the world to let them know that a benefactor wants to fund governmental expenses for projects they find too expensive for their budgets? Someone will need to work closely with governments to handle financial shortcomings and to fund highways, bridges, hospitals, such as the VA, etc. Well, the government's know who we are or how to contact us for help, if not with a team of emissaries from a benefactor be able to visit and help the various nations around the world.

10:55

I can see where your vision is.

11:00

Keep in mind that there there will be 1000s of benefactors all over the world.

11:10

Now, our job isn't governments and funding governments. But if you get into the CAC program and you have people there who are seeing a need and the government is unable to fulfill it, then I would be contacting maybe somebody who's over a particular programs or something of this nature and see if you can help financially.

11:35

We're not here to save the government. We're here for the people.

11:40

Now if we can use the government to help the people then we do that. The large job is not to help the government and fund the government. To some degree, we can assist but those who want to take upon themselves to fund the government might have some problems.

11:59

Now, I am saying that in a in a local way.

12:06

Local problems have to be solved on a local basis. So how do you set up a whole worldwide organization to go down and help some county or province or whatever it is government do something when you don't even live there? How do you manage that? How do you be sure that the money's not getting in the wrong hands?

12:33

Don't create a something that's going to come back and bite you.

12:40

The Dragons are in the caves don't go walking around and trying to find dragons. You get burned. There's ways to do things that are appropriate. Get a vision of helping, and then see how Spirit leads you.

12:54

Again, this kind of a question is something you can ask your counselor at your appointment or as you move on with your humanitarian activities.

13:06

Visions are good, but sometimes we don't have a very good understanding or basis upon which we build those visions because we don't understand what's going on. You're trying to build a foundation of something of that nature. How do you do that?

13:23

Has anybody done that before? Who's gonna who's gonna be the one that's got that that's got the best thing you're going to be doing things that nobody's ever done.

13:33

And so get to help from your advisor, your counselor, your spiritual guide, whatever, and you'll be in good shape. And that again, these are questions. We don't know the answers. To until we're there and then we make up our mind. We're going to go across the bridge, that wreck of the old bridge or we're going to go down another place and and cross over there. You don't make the decisions until there it's time to make the decisions. Plan ahead if you can, but you're shooting down ghosts that may never materialize.

14:09

Next question.

14:11

When a beneficiary takes out six trust, do they pay \$10 for each trust, and do they open their own account or do they get added to the original account of the beneficiary?

14:22

Again, added to the original accounts account for the beneficiary. That's where it's all set up.

14:31

I'm trying to remember in my literature, if that requires another, another \$10 And I don't think it does. You will get \$50 for each trust that you create, although trust cannot treat create another trust and the trust don't count as a benefit as in the bonus program of getting one penny for every two new registrations.

14:57

So there's some things that will fine tune and everybody we're all bound up. It's good question.

15:03

Next question.

15:06

I have so many project ideas that just keep coming to me. I'm currently at 30 Question Do I need to make a presentation on each one of these projects that my appointment with the Alliance and if so how much time will I have? Or do I just present two or three of the biggest ones?

15:23

Okay, let me ask you a question. If you were the one that was assigned to come and down and do the appointment for Jim holder at this point in time and you knew everything about this individual.

15:43

You knew what their thoughts and the intents of their heart are, you know, the list of projects that they're going to do.

15:52

Would you want them to go through every single one of them and trying to explain it in their words?

16:00

That's gonna take you a long time. And there's no real need to do that. The thing that you want your homework is to think through some projects.

16:12

Write down some bullet points in the event that they asked you. So you'll have some ideas of what to say.

16:20

But please understand that this is not the time for you to sell anything they're not interested to really be honest with you. They're not really interested in your projects.

16:31

Your projects are part of your heart.

16:35

They're not funding your projects.

16:39

They're funding you as a humanitarian.

16:43

Where do you think you should spend your time talking? About your projects or presenting yourself in a life that shows that you have the intent to do humanitarian work?

16:54

That's what they're looking for.

16:57

So don't put so much faith and trust in your projects is going to be selling you to that person as a humanitarian.

17:06

I could guess maybe 50 60% of the projects that people would present at their presentation will never even get fogged up later.

17:17

How many? How many? Gym benefactors can be financing med beds?

17:26

How many are going to have the chance to even distribute them?

17:32

It just those are things that you just don't know until you get there. Have them in place. Have your projects in place. But don't be putting your faith and trust in a project to sell you as a humanitarian at that appointment, because that's not what it's about. It's about you as a humanitarian, receiving the funds that you need, from your heart at the rate that comes from your heart.

17:59

To do your work. And that is your stewardship responsibility.

18:06

We have grand ideas about things we want to we want to save the world. That's a savior complex. I want to save the world The world needs saving. Why do you think the world needs safety? Is the world broken? Beyond God's ability to do things? Well, that's where we come from our heart which would come from our guidance system. And we work in harmony with the Alliance and with people and we don't just give them things that we think they need because well that's what I would want if I was in there. Now you find out you look around to see see things you communicate. What is it I can help you with? I've got some phones How can I help you and don't be offering them for a brand new house when they're right on the streets. They don't know how to take care of a house. There's a step by step process and learning how to do these things. So let's be wise in the way that we conduct ourselves. As we go about our humanitarian work. We are not the saviors.

19:12

We already have one.

19:16

So just let it be that we're here to assist people not to do things for them.

19:24

Wouldn't it be great if every person on the street that's homeless?

19:28

You're given an opportunity to build physically helping build their own home? Then they can call it theirs instead of a gift or a grant from the government or from somebody outside of them? I love that give them dignity.

19:43

Sweat equity, then it's yours.

19:47

You know where the nails are, you know, where you messed up on the pain, you know all of the things about that place and that becomes who you are.

19:57

So there's a way to do things that are appropriate and a way to do things that don't come from a savior complex.

20:06

We're here to assist. The heavens will assist us.

20:11

Let's not let's use as an example and say, I'm not here to do it for you. I'm here to assist you. How can I help you?

20:20

Come yourself out of the the depths of poverty.

20:25

Let them tell you how they can have how to help them. And then you're then you're on solid foundation, your son solid and you're not coming from an ego savior complex.

20:38

And that's one of the biggest things that we as humanity parents have to get rid of. Because it's counterproductive. It's me, me i I'm going to do this. I'm going to do that. Well, you're not going to do anything without the help of the spirit and the help of the heavens to do things in harmony with the Alliance. If the alliance was not there, then who would you be in harmony with? Well, you'd be in harmony with yourself and is that harmony. That's the whole issue of what people are working with. So let's not be arrogant, let's not be haughty and proud. Let's not be I mean me as we go about our humanitarian activities. Let's just simply be in harmony and assist rather than do things for people when they can do it themselves if we help them with the funds, and resources to get things done.

21:34

Next question.

21:36

I printed out the loved one society binder documents at the beginning of the year has there been any changes made to these documents that I need to print them again?

21:45

There's probably some changes that would would be updated.

21:50

But that would be need be for you. You don't need to have updated stuff that you present at the appointment, because they're not going to read it. They've already read it before then Yep, they've read too.

22:03

I don't think you need to do that.

22:06

Next question.

22:08

Well, the trust documents available our redemption appointment be suitable to use and all countries or will it be according to the US law only?

22:19

Well, if an angel came down and was going to help you in Germany, what great help is he if it's the documents come from or she or it I don't know where to go from America that don't work in Germany. So I can't use these here. I got the wrong set.

22:40

They're going to be in harmony with where you are and who you are. Next question.

22:50

If you owe the IRS money, do you still need to pay them

22:59

the IRS you'll have all documents. If you don't believe me, just ask one of them and they're trying to get your skin they go do that until they have a building to go to work in anymore. Now, the IRS will go away and we have to work in harmony with things the way they are so we don't paint a target on ourselves and end up in jail for a little while. It'll all be redone, pay your taxes. And the IRS would probably be paying them back to you because it was illegal. So but they still have teeth in them the legal teeth that can cause you some problems, so don't pretend that it's already happened. Just know that we all you have to work with the system where we are.

23:49

Next question. According to the Bureau way of redeeming we have been told that we need to take the following to our appointments to color photo IDs like a driver's license and passport to proofs about dress within the last 30 days like a utility bill bank statement. A blue pen specifically for signing any paperwork and a payable on death document is any of the above still true for the Alliance for everyday mean?

24:15

Still true. The Alliance never came out with that stuff. Anyway.

24:20

Understand that the alliance is a line upon line precept upon precept. They do a little bit here, a little bit there and then they do something and then there's something a little bit more.

24:33

They don't give you a list. of things that you have to do by the years from now, or however long it's going to take for the redemption to take place.

24:44

Well, now we know that to photo eye color photo ID why.

24:51

Let's let's just wonder why. Why do you need to do that? Who is it that's trying to get that kind of information. It is certainly not the Alliance. who already knows who you are in all of your vivid colors.

25:09

They don't care if you have a driver's license or a passport. It's all for dysfunction within third dimension.

25:18

Now, I think if we are going to err then take in those things. It's not going to hurt you.

25:26

But I have people who just labored Oh, I just lost my driver's license and I know I don't have anything I and my passport is expired and I don't have anything to prove my ended and my phone is with somebody else. So my utility bills are paid by the apartment, all of that sort of stuff. There is all kinds of headaches and anxiety that's caused over this kind of garbage.

25:52

You are who you are to appreciate yourself. You know you don't wear your dirty shoes, wear some shine shoes sort of thing. You want to look good and be who you are.

26:04

There's a lot of pretense that can come around, you can give driver's license and you can give all kinds of identification. You can make it all up.

26:14

They know who you are. So a lot of the stuff that these I'm gonna say these people who don't understand the Alliance way of dealing with things they're going to give you their long list because that's where they are. That's who they are.

26:28

That's what they think they need that they think that the alliance will meet because that's what they would make you do if you are jumping through all their hoops I hope that helps. Next question. Well, I'm very excited about my projects. I've been waiting for this blessing for over 20 years. It has been a very long journey. I'm so exhausted and feel I need months, a few months break to heal and organize my life before I can even consider starting my projects are we expected to start on our projects as soon as we redeem or will it be okay to take a few months off Fill my cup and come back refreshed? And is it okay to join loved one society after a few months of redemption?

27:15

Again, this is something you're asking Can I do this mother Mae eye? Is it okay?

27:22

Who was the sovereign hair who's telling who what to do?

27:27

Are you complying with outside regulations and dogma and ways of doing that government does think no, we're out from underneath that.

27:40

So you know, you've been waiting all this time and exhausted What am I gonna do? I gotta have a vacation. Take the damn vacation. Take two or three weeks off, take a month off.

27:56

Yeah, if you get the big money lump on society is not going anywhere. You can sign a contract with us whenever you want.

28:03

If you have those larger funds to to not create a liability for loved one society, but the ability to pay for the things and fund the things that you're going to do.

28:17

So as long as you've got the money, take you back at the fact that I think it's a really, really good idea.

28:24

Take a couple of weeks now remember that there's a lot of people getting a lot of money all of a sudden and they're going to be vacationing so the resorts might be overloaded. Who knows.

28:36

Isn't that a good thing though? Because we all get the chance to take some vacation take take some time off, go to the mountains, go to the sea, go to the seashore. Enjoy yourself.

28:48

The work can wait.

28:50

As I say that I'm thinking to myself, gee, we're going to hurry this up because a lot of people need us and I'm telling you to go take a vacation.

29:00

Just do what's in your heart to do and your heart will tell you your heart will tell you what you need to fill your cup. And then you can go share with others.

29:13

Next question, you know, with that said, I mean to me, a couple of weeks of vacation is more than sufficient because it's like you're going to be anxious to get back Yes. And get back on track to stay there two weeks. Yeah, we are waiting.

29:29

Okay, when we register our first chain of beneficiaries and they start getting paid well their account show payment coming from loved ones society or will it show benefactors name or trusting set up on the master account or the beneficiaries account just show benefactors master ideas? The one paying them? No, no, it will not be coming from anybody. It will just drop into their account. Nobody gets credit for it.

29:56

Or will it show benefactors name never.

30:00

We will never show a benefactor. Same on anything that we give to other people.

30:07

Or that goes to our program. You are safe and secure and your anonymity from love on society and letting everybody know what's going on.

30:18

The master account the beneficiary will they may learn from somebody else that there's a master account that master account that's our words. All they're concerned about is benefit benefactors giving them money and from that they won't know anything else unless somebody tells him and what they tell him may or may not be true. We don't know what people are going to say.

30:47

But as far as love wants to say is concerned nobody will know who the benefactor is. Nobody know there's there's a master account. That's just the functional way that revenue sharing solutions platform will work. The car engine has those pistons that are going up and down and

firing off and all this sort of stuff. Nobody needs to know that stuff. That's the functioning part of it. Less of breaks down and somebody's got to come fix it. But we have the alliance and we're going to be in the quantum consciousness.

31:19

Lab. One society will be quantum consciousness, quantum, internet, whatever you want to call it, and it'll be safe and secure and won't be it will not be breaking down very.

31:33

So there's no reason for you to be concerned about that. Next question. I live in an international medical destination city as a sovereign citizen can I just pay all medical care expenses for residents in a specific geographic area?

31:49

If that's what you want to do, then who says you can't?

31:53

If you say you can and you can work it out. I'm not sure that that's the right way to do things. But until a med beds come down, maybe that's the way to do it. I don't know. It's up to you.

32:07

What's good, what was the look like when you get there?

32:11

Did you see the need to look around? Take a look.

32:15

Oh, I could do that. I could do that. And we can do this. We can do that.

32:20

We're setting up this thing for everybody to get free. Whatever. Those who can't pay will will pay their bills and all that sorts. You can go in and do that negotiate it then then this is the way to send in your claims and all of that stuff is stuff that has to be worked out in your mind and with the people there. I don't think there's a way to just simply center the pay for everybody's how far away is your region? What are the boundaries violated? Well, I just live over here and not then and they didn't pay mine.

32:54

There's all kinds of problems with that sort of idea. Was the geographical area and what are the boundaries that didn't determine the geographical area? So these are some of the practical things that you don't know until you get? I can appreciate the question. And yet I say the answer is we don't know.

33:15

But as a humanitarian if it can be done, you find a way to do it. If that's what's intent intent in your heart, then do it.

33:24

And who's gonna say no, you can't do that.

33:28

Who's gonna say no, that you can't do that?

33:32

I asked that question. If you think there's somebody who's gonna say no, then tell me who that person is. Or tell me who they are. Is there a group of those idiots out there that are trying to boss us around? We're we're humanitarians were sovereign humanitarians.

33:47

They think that they're going to step on our boundaries that's against into Universal law, they will not do that.

33:57

So if there's others that would do that they're not part of the alliance and we don't give a about those kinds of opinions.

34:07

Trying to keep it family friendly.

34:11

Next question.

34:14

Given the food and commodity shortage or forced shortages and rampant inflation that are happening now, especially in the USA, surely the vast amount of extra liquidity will make inflation jump hard, at least in the short term. Does the Alliance have a contingency plan for this transitory period?

34:32

Well, the inflation concept is is an assumption. I don't believe in that.

34:38

You look at our program, we're not going to be dissipating in that or causing that.

34:44

In fact, there will be no inflation.

34:46

Consumer prices will be the same from year to year. The who suffers if there's a lack of food?

34:57

Well, the producers are there and they they lose their money and and then there's not enough food and so forth for anybody. So the inflation goes up. Now, why was society in our program with the economic stabilization coming in? It's a good word, economic stabilization system.

35:20

We own things we do not charge money for them. There is no inflation because there's too much money available.

35:31

It's just the lack of things that would cause some kind of an inflationary thing. And we buffer that so there's no inflation to the consumers.

35:42

And that's the way we've set this up for and we've set it up that way for a reason.

35:47

Inflation destroys lives, destroys families, it destroys economies.

35:54

Do you think the debt slavery system was designed that way? Yeah, it's a debt slave system.

36:02

And we're not going to participate that we're not going to allow it in our lives again, period.

36:06

So there's ways to get around it.

36:10

Does the Alliance have a contingency plan for this transitory period? Absolutely.

36:17

There's nothing that it just think of all of the contingencies that are going on right now. There's a plan for all of that.

36:26

The Alliance is no they're not stupid.

36:29

And they're not naive and they do things meticulously with military precision. they've ever been in the military and or pilot or something like that, you know, the precision that you have to do and be in a certain place at a certain time. And you can't just take the direct route, you have to go over here and over there and over there. So the enemy if they're following you, they don't know what's going to happen.

36:53

Because you're changing courses. All they're all changes at all. They're out. We don't know where Yeah, that's the way it is. military precision.

37:04

We are loved and appreciated and we have the best resources that God has ever put in a man's possession at this point in time, because we're going into the golden age of mankind. And we're not putting up with this garbage that we've had to put up with all these many generations.

37:24

So things are changing.

37:28

And some of these concerns that we have are projections of in our own mind, because we don't have an overall view of what's going to take place.

37:39

So is there a lack of faith in this question? I would say it's a lack of faith, I would say perhaps it's a lack of knowledge. And then having paste in that knowledge from looping It's good stuff.

37:55

Next question. Please confirm if you can that by the time we would be at our appointments, everything all caps that have nothing to do with us because that old paradigm system will have faded from our view. It has always been a feeling in my heart that we would be considered as ambassadors of goodwill wherever we go by those we meet. I look forward to your reassurance regarding our freedom from concern about birth certificates, etc.

38:22

Well, I think that I think that we're gonna transition and watch the SAR is, is just sorry, is implemented around the world and all of those things go away. That's all cabal stuff.

38:37

That's how strong it's done.

38:40

That's all fictitious entities, legal entities that were created by the state to consumers or to control us all going away by referee.

38:55

Next question.

38:59

I am wondering how do I get started and where I send the \$10 Looking forward to hearing from you soon how do we go about adding others on as well? Clearly, they're new.

39:09

They're new, and the RSS program is not up and running. Just imagine if it were running now and we didn't have the money.

39:20

We'd have liabilities who couldn't pay.

39:24

So billions and trillions and quintillions of dollars are going to be involved in this program. Who has the money to do that till we get the rd who has the money to put things together and tell them this these kinds of questions are just a pipe dream for us until such time as we have the money so please understand that this takes money. We don't have it yet.

39:50

So when we do we'll get it.

39:52

Next question.

39:54

Well loved one society send us an email when it is time to redeem our zoom.

39:59

No.

40:01

I was contacted by the Yeah, but loved one society won't be sending out anything. Okay. We looked instructed to do so and there's a caveat there. If we're asked to do something, we'll do it if it solves a problem, but the plan right now is the alliance will contact all humanitarians that will be available or are in line to receive funds to do humanitarian work. It doesn't matter whether you live in Outer Mongolia or Timbuktu. The Alliance will find you

40:38

period. So how that's going to happen, I don't know.

40:43

But we don't have to worry about it. My main question now is on redemption. How are we going to get the notification so far I've been reading the dinar chronicle daily and I found you from all the information I received so far. The advice is for 70 years plus you have no option but receive what they give you at the redemption center. also advised not to negotiate at the interview. Be thankful for whatever rate they give you if you tried to negotiate they may lose your chance to participate in the tier four B Zim exchange. Negotiation is a sign of greed. Is this true?

41:16

It's not necessarily a sign of greed. It's a necessary it is a sign of ignorance, in my opinion.

41:26

There's you can read the dinar Chronicles all you want, but when you start believing it and when you start applying it to Zim for BS M exchange and you can't negotiate and they're going to offer you this and if you don't accept it and you want more than his limitations.

41:48

You're buying into cabal limitation, propaganda.

41:54

When you believe this stuff.

41:58

Now, if these people understood who sovereign humanitarians are, they would not be speaking to us this way.

42:08

But they don't and they don't know who's on our side.

42:13

That is the alliance. The alliance would never offer you a take it or leave it with for Zim redemption. Now, I've said that before and I'll say it again.

42:26

They do not offer you any rate whatsoever at the redemption appointment.

42:34

If you don't ask for it, you might not even get anything because the solemn responsibility is they are waiting for you to ask for what you want.

42:50

They know where that comes from. It comes from your heart. We've been telling you this for a long time now. The rate is in your heart.

43:01

When you go in for the redemption appointment, they know what your rate is because they can see your heart is just you having to ask for it first. Before you get it.

43:13

That is a lot. Ask and you shall receive.

43:17

That is a functional directive that comes as a promise from God.

43:23

We're going to have to learn how to use that Ask and it shall be given because if you don't ask properly, it's not going to be given.

43:32

I can ask for God for a bike for Christmas.

43:38

I didn't get last year, okay this year. That's a cancellation of that request.

43:44

Those are the kinds of things how do we cancel our request? How can we cancel the asking? By our stupidity and our thought processes. If you're not going to refine your thought processes, you're going to have a real hard time with asking, you shall see. Because if you don't ask and ask properly, and then allow it to take place. God knows the best way to give you everything you don't have to sit and try and figure out how he's going to do it. Or she or whatever you want to call it.

44:15

Divine Providence knows everything knows you're asking for what you're asking for and but their directive is to get from them to you asking the child to given and you got to do the way that will work.

44:31

Hasn't worked in the past and guess who's at fault. They haven't Are you? Lack of understanding lack of knowledge got sharpen up being sharp is no part time job especially what we're coming into.

44:46

You're gonna have to bring your A game.

44:49

Take you can just coast through this without putting forth the effort.

44:55

Your Coast trying to coast uphill. It's not going to work for you.

45:00

So you got to do everything that you can.

45:03

And then hafting having thought it through and do it, then that's when you ask. And if you got it right then the confirmation will come with the blessings that you're asking for. This particular case go into your heart, find out what your rate is.

45:20

Okay, right, again, they're not going to give you a rate.

45:26

They're not going to even offer you a rate

45:31

they go by asking shall be given.

45:34

That is their directive.

45:38

If you don't know that, then you come up with all of this guru garbage.

45:44

Where you have to jump through all of these different hoops and pretend like you're this and that and the other end and denying the fact that they know you are already a sovereign humanitarian.

45:59

Oh, just let that be true.

46:02

If you don't feel it's true, then go inside and find out.

46:07

Stay there until you do.

46:10

What do we need to bring to the interview to show that you have a humanitarian project? Go through your presentation and do a written presentation or what do you recommend for that?

46:22

I recommend that you thought Think it through work out some bullet points. And you are now then prepared if they asked you then you can say you're prepared to say and and I'm going to do this, like this project. I've seen this in our neighborhoods and this but there's a whole bunch of wheelchair people they don't have ramps to get in their house. So I wanted you thought it through you better place for the money. It's the thought processes that they're looking for, not the results of the thought process.

46:55

So

46:58

then the projects will come and go it's an again I go back to this whenever I remember to go back to their funding you as a humanitarian not your project.

47:12

They just want you to apply them through.

47:16

X question.

47:20

I am a healthy 80 year old I would like to request the 100. Alliance your plan to get it started and let my legacy to continue the humanitarian project wonder if it this is not written correctly. If it is, is this a viable plan? So basically she wants to talk to me so she's 80 years old and she'd like to have a legacy that they pass on to her children. It's an admirable thing. But keep in mind that this work is humanitarian work. We're going to get the med beds we'll get ourselves young and an active again and and we'll be able to put in a full day's work. A full day's work maybe 23 hours. We don't know what it's going to take. Our bodies will take will will see us through and because we will take care of our bodies and have that taken care of now for 100 years. 100 years is a long time to be doing humanitarian work and so 100 years they have to worry about getting rid of the this month's this quarters allotment or payments before the next one comes.

48:29

Our bond count has got 14 707 37 quintillion dollars in there. Oh.

48:39

Good. Is that a problem that you're having with that? No. The point is, is that it's going to happen for a long time. And we're preparing now ahead of time, and we don't know what's going to be

there for the next 100 years. However, we're preparing now. And it's going to be just perfect because we're going to come from our hearts, who seemed connected. Our bodies and hearts are connected to the quantum consciousness. And we get our information from the heart gets the information from there and if we use the heart instead of the pea brain we're in good shape because that's where the future is for us as we go into our humanitarian activities for the next 100 years. Hmm, next question, what would you suggest or how best would you suggest to assist those who for example, have been in addiction or on government payments where you can just go and ask them? What are you passionate about creating or doing? They may not have motivation for work and giving this demographic of people 1000 A week will possibly land them in purchasing more numbing and substance abuses these people have never known anything but lack let's say there were steps one through five would be best get them into med bed facilities first, then connect them to the RS and slowly rebuild.

49:58

If you have a plan, then that might work on how you think that people should go through these things.

50:07

And as the administrator the plan, you think I'm gonna do this, I'm gonna do that. We're gonna make him do this. We're gonna make him do that. You can't do that.

50:16

You can't control other people.

50:20

The only thing you can control is your part of it.

50:24

You might have this big plan and along comes somebody the next door neighbor and says I got this plan and get the \$1,000 a week.

50:32

And all you pay is \$10 and I could pay that for you if you'd like me to and away they go and then your plans. This step by step one through five is all gone out the window.

50:45

We can't micromanage people's lives.

50:49

There's going to be problems with people initially I'll say going to be problems with people saying well look, I got this money I can go get my drugs now.

50:59

And then go down and down and down to the point where they're almost dead and then say, you know I do have this money. I can pull myself out of it.

51:10

I don't like where I am. I don't like what I'm doing. I don't like who I have become now the desperation is if you don't have resources, but if you have resources you have hope.

51:24

If you have hope then you got a chance to change your life.

51:34

They'll get into the flow, the energetic flow of service.

51:40

If you feel people's cups up with water, then they can have some to share.

51:46

And it is in that energetic flow of service one to another that creates a synergistic approach to humanitarian work.

51:59

This is what's available for us.

52:03

synergism is the sum of all parts plus one.

52:08

What is the one if the collective consciousness of all of those involved? It's a collective thought processes that move. There is a synergism that's going to be involved as we get into our service.

52:26

It will be addictive almost to serve one another because of the high that you get from the joy and the happiness created as you help other people as you serve one another. This is the energetic flow of service.

52:43

It's a phenomenal that's a phenomena that that is going to happen.

52:49

The only way we can do our job is to have the assistance available for people as they reach out.

53:00

And as they reach out, they're reaching out because they want to change their lives. That they don't want to change your life. You can't afford them.

53:08

You got to wait until they want to do it and then then no matter the 12 steps or any other steps. If they have the resources to get themselves out they will at that point in time and we're not the judge or the one that's guiding and directing their life spiritual standpoint.

53:28

They're responding to their soul's inner guidance system.

53:35

And when a time comes for them to do things and they'll do it when the time comes for people to wake up and smell the roses and see her the crap that's around them that's caused by the swamp. They'll wake up, but until then they'll sleep slumber on. It's not our job. We just do what we can do

53:56

and that's a wrap my dear.

53:59

Okay, last question was already answered. So that's it for today. Thank you Tracy for your help.

54:07

As always, we send our blessings and love to you in a hopeful and a prayer that the question and answer periods are of value to you. And we send it forth without aloud and this is us in our service mode to whomever wants to listen and whoever can benefit from it will.

54:29

So with that we'll end and send you our love and appreciation and have a good day.

54:37

Awesome.
