

Good morning humanitarians. This is Ron Giles. Along with Tracy. We're going to do another q&a today. It's November the second, and we're in 2021. So with the introduction, traceless. Go ahead and start the questions, please.

Okay, first question. I understand most of the basics of the RSS, but have a question about the funds themselves. Presumably, we received the money in rainbow currency paid into a new system, which I'm assuming qf is totally separate from the present fiat banking system. So how will this money be accepted in the world that exists right now? Or will there be a changeover period, when the existing banks accept rainbow in exchange for spendable Fiat? If they don't? It means we are waiting for a total reset? Can you explain this changeover to a brand new currency and confirm that we will not receive existing Fiat?

It's a good question. fiat currency is going away and be replaced, obviously, in the quantum financial system, when we go through our redemption, our money will be put into the quantum financial system in the currency that we are currently living in the country we're currently living in. However, that really doesn't make a whole lot of matter because all currencies are going to be on par value with one another, that is called the Global Currency Reset. And so some of the questions and some of the things that you're concerned about here, first of all the banking system is going down. Now, I say that, and we understand that. But the banking system will not completely go away because they're good people in the banking system will be transitioning into the financial services industry. And if they just close it all out, and then open it back up, it might. So they're gonna do a hopefully as seamless transition from the banking system as it is now to the financial service centers. So Chase, Manhattan might be a financial service, or it could be Chase financial, Chase, financial services centers, or key financial services, or Wells Fargo financial services, certain human humanitarians will, benefactors for that matter, will take over and start paying for those banking services. In the financial service centers, we will pay the people for using the RSS program and doing contracts for all of those people. And so it's going to take a big gap, a big person, a person who has had a larger Zim and number of Zim and choosing the larger rate. This is why I say you don't know it's coming along. So do it, you know, do some more so that the banks will change over and when you talk about the rainbow currency that's here in the United States. And it may be that that's the currency that will, will be associated with the financial services. So I can go into the financial service center and get cash draw down cash, which would be there in America would be the rainbow currency. And gold certificates, the digital gold certificates are transferred to the serial number on the paper, the cash when the cash is used in the system and goes back into the quantum financial system by a merchant, this depositing their money or something, then it will go through a machine and the machine will marry the certificates back to the well it will take it from the serial number on the piece of paper to marry it back to the digital gold certificate. That's how cash is going to be used within the system. So we're not going to have a lot of fiat currency. And don't worry about any of that kind of problem, because that's all going away and changing over. Thanks, question.

Oh, it's fun, mentally prepare for what is about to take place. I know I've been chosen. I have Zim another currency. and studying like mad, the proper programs but still feel unprepared?

Well, welcome to 99% of us, we really don't know. Because it's, we're doing the best we can to beat prepare. And it's a sort of thing that we won't know how prepared or ill prepared we are until we get to the quantum financial system. Until we go about implementing the quantum or the RSS programs, and LW s programs, you've got to jump into the pool and start swimming. That's the only way that you're

going to know. And you'll be surprised how well you're prepared. Because the things that are most important will come back to your mind. And, and you'll be able to function on that level. So let me just make a statement. You say I have Zim and other currencies, or I have I know I have been chosen. Rather than chosen, we're showing up. Now there's a slight difference. And it's not a big point. But I believe that all of us prepared in the before we came here to this incarnation. And we prepared and and loved one society was part of what we prepared for us to use. And I believe in my mind that those who use the loved one society were ones who created in the pre existence or before we came here. That being said, it's not a matter of us being chosen. It's a matter of us showing up for work that we have already prepared to do. So it's a slight difference. But it's a, it's a good thing to understand, you're more important than just being chosen. Many are called but few are chosen. And even those who are chosen. They have a precondition, pre contract wherever you pre arranged purpose for being here. And it's nobody's doing that for you or to you, it's you. You're the one that showed up, you're the one that did all of the preparation. So you're you're learning things that you already know. And although it may be a little bit difficult to fully understand that concept, it is true, it is nevertheless true. And that's how we have to look at this. This is my baby, this is what I'm supposed to be here for. It's not because I'm chosen, or I raised my hand and they called on me. This is who I am. This is why I came here. They know that. So subtle difference. Next question.

In my binder, what do you mean by naming your trust? Is that the name of the main benefactor account? Where all funds are released or released? Can we name it anything?

Well, it that's an interesting question, trust. Again, you don't have to have a trust, you could use it in your own name. Or do everything in your own name. With that in mind, don't get hung up on trust. Because that doesn't help you. When you're talking about naming the trust and that sort of thing, I'm simply saying, if you want to do a trust, and you want to prepare, or fill out the documents before you go, you need to have already thought of the name of that trust. That's a simple little thing. If you didn't make one up while you're there. Ron Giles Family Trust, I can do anything I want with it. I am a sovereign. They are the servants to me. It's hard for us to understand that Jesus is the servant or the Alliance. So the Ascended Masters are servants. Perhaps maybe the wrong word. Maybe collaborator. As we go through our life experience. We've got to come up to the standard of who we really are, in our minds. We are no less than the angels. We are no less than anybody else, our job and our life and our experience. If we don't fulfill it and the one this doesn't get the benefit of us having a being around. So we're coming to the we're coming to the fullness of our full measure of our stature in becoming humanitarians. When I say becoming me You need that we're functioning at that level, and doing the things that humanitarian just do. 10 are hard to do it. So it's not a thing and not a big deal. Certainly nothing that we had to overcome. But I want this lady to know, I think it feels like it's a lady. Here, you're going to have a new friend, when you go into your appointment, this friend is going to go go through the redemption appointment with you, and get you your money. And they don't just get your money in and out the door, you go as in, we've done this and it's all finished. Now they're, they're going to help you to become a humanitarian. There, that's why they're there. And they've opened up the veil so that we can do this. But what extended how that happens, I don't know we'll see. But I do expect that everything will be just perfect for us to learn how to become humanitarians, and will get all the help and assistance that we need. Don't feel unprepared, we all are, don't feel unusual, or that your something wrong with you because you feel unprepared. No, that's there for a reason, it's helping you to see in your mind that I really got to dig into this and get to the point where the loved ones Society programs are an extension of

me, I'm responsible for doing them. And indeed you are, you're doing your part to implement a portion of the loved one society programs for your purposes. So you are a very, very important person, in this whole humanitarian activity we're bringing into the golden age of mankind, and not one of us is going to be left behind because every single one of us is needed. And you'll find that out as you get into it. And start functioning at the level that you feel is commensurate with who you are. You'll be doing a real good job, you'll be having a lot of fun. This is the most enjoyable work that you could ever get involved with. Next question.

Ron said, we will be asking for a proof of income letter from the Alliance to become a benefactor please clarify, are we all required to obtain proof of income to be Zim benefactors? I think she's talking about the proof of funds. And is it confused here?

Well, a bit of a bit of confusion. And it's my fault. I introduced the concept that and i in i have not inquired about this to an office, if this is actually the way they'd like us to do it. Loved One society has this sign we'll be signing a contract for people becomes in benefactors was in benefactors are going to create a liability for the loved one Society Program as then becoming as in benefactor. The liability is that you are required to pay the people in your chain of beneficiaries as well as the chain of employment contracts that have gone out through your CAC program that through the ESS, and so forth. That creates a tremendous liability. And it has to be done by agreement or contract, we'll have you say, in order for you to really have the ability to do that, I have to take your word that you went to the redemption appointment, and got the higher rates that are necessary for you to perform at that higher level. I'm just simply introducing the idea that maybe it'd be a nice thing if the alliance would just give you a letter indicating that you have sufficient money to do the RSS program or the loved ones society's program. Let's let's put that on the back burner for now. I would like to have that happen. And I'm going to ask or get permission to ask her asked if that can happen there. That can be the way that they're that proof of funds. takes away any question between the gym, benefactor and loved one society. So I'm not saying that that's absolutely necessary, but I would like everybody to put that down on their request page and see if they can, if we can do that. This is the beginning of the prompt in for that but I understand why you're confused and that was my fault. And let's let's move forward on that and just ask for the fans for You have sufficient to do the RSS program. Next question.

When a beneficiary initiates the transfer request, the RSS fulfills request by getting money out of the benefactors master of S account, does the money have to be withdrawn from the Q Fs mother lode account?

No, in fact, I, I see it's a an account that you set up with the RSS platform computer to draw money out of the account. I am hoping that you'll use a different account to create your master account for the RSS program. And we'll work out some maybe some programs of how but how the money is transferred into the that particular account, even on an automatic basis that you can monitor so that it makes it so that you don't have to spend so much time or any time being sure that there's money in that account. So we'll work out the details about that. But you set up your own account that you call a master RSS account. And that's and then you establish that with the computer, and that's where the money will come from. So we don't, I don't think it's appropriate to have come from the mother lode account, because I don't want to have a free rein in the computer to have a free rein to go into your account. I think it needs to be separate, so that you have a degree of control over it all. A question?

That's a good point. When I go to the appointment, I'm going to ask to open two more accounts besides the motherlode account, one account is for Operation uses. And that will be the operations account I would like to use for the RSS programs, separating accounts for RSS from other accounts will help me see how much the RSS has paid out, and how big my other humanitarian projects and donation, I may expand and work on. Does this sound good?

Yes, that's perfect. I can't see any fault without it at all.

I need to know when I need to know when and where I can redeem my notes. Where do I redeem? And how much will they be and when? Oh, that's good, bless you.

We've gone through this before and you need to be sure that you've gone through all of the, the the information available to get your questions answered there and but the alliance will contact you. And from there you'll be able to establish make your appointment and go in and do your redemption. All of that is going to be set up for you by the Alliance. Next question.

Where are the redemption centers located in Arizona?

Anybody who says there are redemption centers already established and functioning is not telling you the truth? There are no redemption centers that are set up. And so how can I tell you that where the redemption Center is located in Arizona, or Timbuktu? Or Paris, France? I those are questions that we don't know yet. So there's nothing forested really, we're not going to know of any I wouldn't know of any redemption centers unless I was notified that that's the one I was going to go to. It's not published. Next question.

How do you account for what you fund in terms of your chosen projects?

Well, it's your job to figure out the way you want it done. Usually it's through counting prem or something of this nature. You know, people have said, Well, you got to get a wealth manager because you got to know you don't need a wealth manager. You need an accountant. You need the services of an accountant to be able to function in a management capacity with the with your money going out. And oftentimes, that money will be going out because of contracts or opportunities for directors to do things from make certain decisions up to a million dollars or something this this way. It's all going to be your accounting system is the way that you want to set it up. And I would suggest if you don't know how to do all that, that you contact a reputable accounting firm. Or if you have an accountant that's in your neighborhood or somebody Using the trust, and that's better. However, the larger ones mean that you set up the account in the in the firm KPMG is the one that I'm looking at, because they're international. They're in Africa and everywhere. So it's good to have that kind of power behind you. And yes, it's going to be very expensive. But we have the money to do that. And so we set it up according to the things that we need to do in a way that we can help get the reports to do our management and know exactly what's going on, or at least have available to us to know that. Sometimes the upper ups don't even get involved in this minutia. But sometimes they do. Because they need one and all the details. It all depends on what your manual management style is, and how much of that information you you want to delegate to others to acquire and then have a roundtable talk at some particular way, you know, once a week or something like that. Next question,

I think it must be from the same person because it says, Does the training teach us accounting skills or administration?

No, we can't go into that. Keep in mind that left one society is is a pump as a structure that you can use. Now, the idea with this is to assist you in your humanitarian work. Love wants, society has no responsibility to train you before you become a Zim benefactor. We're just doing this now. So that you'll see what's available. And at a point in time in the future, when you want to go ahead and implement the programs and to do your projects, then you sign a contract. And that that's that's the point when it all takes place. So the training now is in preparation for that point, a lot of people saying, well, I want to be a gym, oh, well, let's go through the training. And then when you feel comfortable, and you get to the point where you've gone through your appointment, and you want to use love on society's programs, then we'll sign the contract and away you go. It'll be really good. You'll know beforehand what it's all about. Next question.

Am I training to be a benefactor? Or do you not need skills for that

the tourney to be a benefactor, there's a certain amount of that, that we're going into, you know, like the CAC, how do you do the CAC will do that will help with that sort of thing. But how do I how do I teach those accounting skills in administration? It's not a school, I'm not a teacher. I'm not setting up some kind of schooling for benefactors to do somebody can do that in the future. But the point is, is that you got to have the money to do it. And that's when the movie takes place. And so it has to accumulate or come to a pinnacle right then and when decisions are made. Some people will go to their thing and not water sign the contract, become a gym benefactor for a while, and that's okay. It's up to them. When they're ready, then they're ready to start. Next question.

Ron, you suggest asking for an exchange rate of 500,000 per Zim dollar on 100 T note, I only have 110 T note? Can you please suggest what rate I should ask for to make sure I have enough to tide me over the 100 years on the RSS and CAC.

It's a good question. I do suggest the 500. Now if you got a 110 T No. There's two options for you. You can go on eBay and buy 10 100 T notes for \$13 and ship it for free. So there's no reason to not have what you need. And 10 T notes. You know, multiply 1.25 quintillion a quarter by Tam and that's 12.5 quintillion per quarter. So that will put you in really good stead for doing anything that you want to do for the next maybe 200 years as long as money is is usable, that we want to be sure that it's still coming and it might be maybe 50 to 75 years and we'll be into the third dimensional realms and or fifth dimension around so we want to use money anyway. So, we're we're doing we're trying to go for the overkill to be prepared for whatever's coming. And we don't know what that is. So that's why we over prepare. Oh, next question.

I am single 55 years old and no children, what should I put in place in case I leave the earth plane in the next 30 years?

Well, it's a good question. But I, that's precluding the fact that we have med beds coming up. And now our med beds, everything they're said that it, I don't know, we will know. I want to know everything before I go in into one of those. So that I'm sure that and that they're not going to mess with my DNA and all kinds of destructive stuff, which can happen with the men. So I'm going to be very careful. But let's, let's assume that that's a real good technology that will be used either, even right down into your home, having a med bed in your home. So if you stub your toe and break it, then you can go in there and fix it swiftly with that. With that thought in mind, we're going to be around a long time. Now, if you don't have children, inheritance is not necessarily giving your money to somebody, it's not necessarily

your children, you can set up a trust and have trustees, and the beneficiary or the trustee will take responsibility to do all of the things that you would be doing. There's ways of delegating those responsibilities so that if you were to pass away for some reason, or decide that this isn't for me anymore, I'll just turn it over somebody else. asked your your, your guide your counselor what you should do, you should never leave this plane without having made preparations for to continue your responsibilities as a humanitarian, so that you have a person who can help you a counselor X question.

I am currently not a Zim holder, I've been looking to start and get involved with the humanitarian projects for a while now, what's the best way to get started?

Send me a return email. With the desire that you'd like to I checked yesterday, the 10. T notes for \$13 is you can you can check and see how many of those sections are set that you want. And there are over 100 set that means is there are over 1000 of those can, can Jim sets available. So that's a good place to get, I don't know anything that there's one or you can get one for just about \$4. Or you can get 10 for \$13. That's a choice to make. I know which one I would choose. So there's there's no reason for you to not get the zoom that you need. Now, when you I'm not a Zim holder, and I would like to look around and get started to become a humanitarian software. Well, this is your beginning, make a commitment. Make a commitment, show that commitment by buying the gym, go through all of the training. And don't miss out on anything. We're trying to help you out by preparing some. I'm going to call them a test question then since kind of like an open book, then the tests are given them the beginning of the of the term so that you'll know the most important things to learn why you they're learning. So in what we're doing, it's important that you learn everything. So one little bit of information is something you might need for some particular purpose. So you learn everything, and you become the professional humanitarian or the professional gym benefactor or what have you, we'll call it rise to the standard that you feel is important to be able to function at a very high level of being a humanitarian. That's what we're trying to work out here. So but that's where it starts tonight. I wish you the best in what you're trying to accomplish. Next question.

If homeless can receive a home through this program, how do we get around to put down the 5% down payment?

That's an interesting question. Is this person on the beneficiary? Yeah, Have the beneficiary account, you teach that individual if they want to go through all this, to get the house, we're giving them money to make the down payment, if they'll just do it properly. There's no reason for a 5% down payment can't be made by anybody if they got a beneficiary account, so we're taking care of them. Next question.

And plus, I think a lot of people will have a project to do with homeless. I mean, I know I do. I'm okay. My question is, I am moving this November and December to Germany or possibly Switzerland. And I have Zimbabwe. Bonds and dinar, when the redemption happens, how can I be notified to redeem by you with loved one society? Even if I'm in Europe, please let me know. What should I do to step up? What should I do step by step to redeem my project as a humanitarian is to do the RSS project is this enough to help others.

It's enough to help others for sure. However, you need to keep in mind with we've discussed this before the alliance is the one that will contact you not loved one to say, there's nothing loving, that loved one society will know before you will know. Because we're all going to find out the alliance will be contacting us on an individual basis, at the appropriate time for us as humanitarians to go in and do our

redemption process. I hesitate to say this. But we may go before the general population, because they may be over there doing their Fiat stuff with their exchanges and so forth. They may give us the money and with the NDA. So we keep our mouth shut, nobody will know that was that has happened. And then we just get to start our programs that make us better than somebody else. Now, are we humanitarians? That does make a difference, because only humanitarians will receive these funds. Nobody that is not humanitarian, will get funds from the redemption of Zim as an appointment, period, if you're not a humanitarian, and they know who you are, they know who we are. We are the ones that they'll contact to get the job done. Those who are not who don't get the the contact, then and you think you're humanitarian and you don't get contact Boy, you better be thinking again, you're deluding yourself, you're lying to yourself. If you really want to do humanitarian work, comes from the heart. If you don't have a heart for it, then do things that are really stupid, like what they're doing to kit. And not to say that those who aren't humanitarians, they get money or that way. It's an example that the worst one you use. So humanitarians are different. And they're the ones to be called. Now, does that mean that other people can't get involved in humanitarian work? No, the ones with the money really do need some help. But they have been calling on the people who are humanitarians that didn't get the funds in the beginning. So it's going to work out and it's, it's designed for that. So wherever you move, it's not a problem. They'll find you. God knows where you are. God knows where they are, where you are, the alliance will find you. If God could contact you through some particular way, the alliance can do it. Just know that it will be done. Because if you are a humanitarian, you need to get your money and get in place so that you can do your work. Next question.

How do I get the high payout amount? What criteria do I have to meet?

You go into your heart, find out what you want, what your heart wants you to ask for, and then you ask for it. It's not a big deal. Your biggest problem is focusing on your heart and learning to feel or communicate with your heart. And you'll be able to do the things you need to do. So. You're going to be okay, when you come from your heart and that's how can I say that? Not enough times? Because that's really where it's at. Next question.

Isn't the Zim or any other currency exchange for money out of the qf s? Not just a permission slip because What you give with the Zim or any other currency is useless for the Alliance for my inner standing and you need a plan, and then the money will be there to accomplish your goals. What do you feel about that?

Well, I think that's a good premise to start with, if you don't have a plan, you're not coming from your heart. But is that easy to see, as you say, and maybe it's not as true as I want it to be. But if you don't plan then you've not used then you fail the plan he has a plan, then is, whatever that saying is, it's important for you to have thought this thing through that creates the humanitarian juices in your heart and in your systems to start producing more thoughts and ideas. Those thoughts and those ideas is where your your guidance system comes through to you. And that's how you get to the right place at the right time for you to accomplish the purpose for which you came to the earth. So without that plan, then you're going to have a real hard time doing anything. Now. You say exchange for money out of the qf no new financial system. The Quantum financial system will be the only financial system now how it gets there, eventually, is called transition, how it's going to transition. I don't know for sure. But if the alliance is giving their money, it will be in the quantum financial system. Let's just put it that way. If you go to an unauthorized source, or if you take out one of these gurus stuff, and they send you off into

Timbuktu to do your redemption appointment, there's a very likelihood that it may be a bank or something else that's given you the \$11 million. But then, on that note, if it is not important for you to have money, why do we have a \$100 trillion note? And why would the Alliance teach you out of just a one to one is a trillion dollars, or 10 100 trillion? Why would they teach teach you out of that to give you \$11 billion? There's got to be some really good thinking going on. In order for people to understand why this is such a ridiculous statement that these people are doing \$11 or \$11 million for a 100 t now. Why would they give you a 1100 \$11 billion for a worthless piece of paper? Worthless mini that has nothing. There's no value anywhere other than the redemption process. Joe? Maybe I should get off on that, but I really have it. There's a burr in my channel about talent. Let's put it that way. You need a plan? You need a plan. Yeah. And get your money. Okay, ready? Next question.

Sorry, this question has been asked before but I have forgotten should our country take a longer time to become just our compliant? Could we still be able to have redemption appointments, signed under myself from other countries, I'm a citizen of another country and have friends and family there too.

Well, just are compliant is one of the prerequisites for the entire RV, plan to take place. They're waiting around for the for all countries to be GSR compliant, not waiting around in the background underneath everything is all the work that is being taken to become GSR compliant for every country in the world. Any country in the world that does not become GSR compliant cannot be part of the quantum financial system. Let's suppose that if they don't become the SAR compliant, in the beginning, they can become GSR compliant once their dictators overthrown and all that sort of stuff. But if you're not there in the good beginning, when the quantum financial system is, is opened up, then your seat at the table is gone. And you won't have any voting rights. You will be part of you can be part of the quantum financial system but you won't have any voting rights for it for things that need to be handled at level. So it's really difficult for us to force our government to become just our compliance. Is America just aren't compliant right now. No, look at what's going on. mandates and all that stuff. is never a part of GSR. They're overstepping their boundary. And they will be eliminated as a result of overstepping their boundary period, it cannot last. This is not part of GSR compliant. So, there are still a lot of the world to clean up. How much of that has already been done, I don't know, is a janitor putting this stuff away and locking the door and then leaving the building? We don't know. But it's available for us to just allow that to take place. And until and when and until that takes place, then that's when we're that's what we're looking for to have our RV. So a lot of the problems that people have is not understanding that this is a plan, there is a major plan. It's a master chess match. That's fine, the chess match. Those who are playing this game know exactly what's going on. They know the next moves that the opponent's going to make. They know everything. So it's going to happen. But we don't know the tiny. And it's going to take place at a time perhaps when we are so totally surprised that it took place.

I am in lots of different telegram groups. Most say they are humanitarians that are extremely racist. It's so bad. How will they fit in? And would the Alliance still pick them knowing their heart?

That's a good question. And that would be a judgment on my part to say that they will or they won't. I'll give you my feelings of which side of that fence I'd want to be on. If I'm racist in any degree, and have any racist activities in love on society, it would not be chosen. It would not be supported by the Alliance. Anybody who thinks they're humanitarian and has a problem with race, gender, or any of that sort of stuff, it's very likely that they're not humanitarians, regardless of what they think they are. Most people who have those kinds of thoughts and feelings in their heart are not totally aware of what's going on,

and are pretending in their mind or lying to themselves. Those are the people who won't be guided towards the fifth dimension. Because they haven't done the critical work that's necessary to qualify. If you've got those little things in you that are holding you back, you have time now to find what those things are, and then make some changes. But if you haven't, you claim to be a humanitarian, you have racism in your heart that hatred. That's not going to that means you are disqualified from being in my opinion disqualified from being considered a better humanitarian. And they will not be getting their funds, if indeed they are not vetted to be embedded as a humanitarian. Now, imbibing Is this my choice? No. It's just the way it's set up. It's set up for the purity. It's not set up for to be half mediocre. This is this. This is the whole financial system that will take us into the fifth dimension or into the golden age of mankind. You're not going to pull up with any garbage, especially from people. So check yourself in there but allow most people to be who they are. Because without judgment, because I can see that that's not going to happen for them. But that's a judgment on my part that I don't need to go there other than just state by eye observations, or opinion about next question.

What will we do if we run across a person who is in the US illegally with the RSS

but the person is in the country illegally? Is that is that man breaking the law? Is he a criminal?

Santa Cruz yes, they're gonna be allowed to use their money. Probably not. The Alliance won't pull up there. Oh, we don't have to worry about ourselves, isn't that fun? We don't have to worry about other people. We can just focus on what we're doing and let the alliance and QoS and all that all those things people will ever take care of all that. We don't even have to get involved. Next question.

I have listened to all your work, thank you. However, I'm not going to go into my appointment without having some idea of and where and who I will be dealing with that LW s, I need to know how this contract with LW s will work. Your reluctance to address this outright has become somewhat frustrating as I'm attempting to put a plan together based on the LW s platform but haven't any way in which to actually join up with LW s.

Okay. Oh, all you say is true? Because I don't know what's going to be in that, in that that contract has some ideas that you have to state that you have gone through your appointment and have the higher rates? I can't I can't tell you how that's going to be enforced. I can't tell you the ins and outs of the contract because I don't have them now. Am I trying to avoid this? No, it's not available. Now the point that you need to understand, please, that I'm not trying to be harsh. But I'm not here to perform at your level of expectations. I'm doing the best that I can. And the best that I can is all you're going to get. If I'm lacking or something of this nature. I apologize. This is all brand new. It's not claimed in press that already for the to go. We're working on this little bit at a time. I'm 75 years old. I am Is there anything in this life is qualified me to make a contract now. I understand I was in real estate, I understand the five points of a contract. But I don't have all the ins and outs for this sort of thing. You know, you're being very critical here when you shouldn't be. The reason I say that is because we are allowing other people to use our program our platform. Again, game nothing. Nothing, not one thing except for the line doing what my father wants me to do. I have nothing financially to gain I have nothing I don't get up on the stage and say Look at me, I've done a wonderful job. Because all these people are in here now. I'm doing what I can to get it put together. And if you want to be critical, then then fine. If this is something that you'd really don't want to do, then don't do it. For free, no coercion. So all voluntary, so we're doing the best we can. Thank you. Next question.

Okay, you have mentioned during other q&a sessions that we would be meeting with an Ascended Master or an angel who would be our mentor. And during the appointment, one would have to sign a contract with LW s. And somewhat. US said, I'm given the above

know the point that is not where you sign the L down the OSI won't be there. They won't sign for us. So you do everything with Eldo? Yes. After you have got your mind. Next, continue.

Yeah. Wouldn't it be like they do the exchange, and then after RV, then that's when we build everything out. And then after that, that's when they sign the contract. Right? Right. I keep hearing that in order to become a sovereign individual. We have to obtain documents, go to court and remove ourselves from our Social Security accounts, our bank accounts, mortgage counselors who gets driver's license any other documents that currently tie us to the government today? I hear that unless we do that we are not sovereign individuals. Do you agree with this? And do you think we have to jump through any of these hoops?

You are a sovereign individual and what the government has decided is that you are not. And you have to go through all of their garbage to determine that you're a sovereign individuals. Now. Please understand that there's people who think you've got to go through these things so that the government will declare you as sovereign individual that puts you weapons on the top of the eye, the all seeing eye, now, they still control you and always will. And they control you by ways that you don't know. So all of that has to go away. As far as the government of the people is concerned, because we are sovereign without them, we are sovereign. Without a constitution, we are sovereign because we are born sovereigns. We have no allegiance to anything except for who we are. Anybody who requires allegiance to something outside of us is inappropriate. That's what the Cabal has done. I am a sovereign individual by birth. Nobody put me into that except for the Cabal, and a government that wants power over people. We're getting rid of that. That's why just sorry, that's why bizarre. That's why we're getting rid of all of the governments of this country of this world, because they're doing power over the people instead of gaining their power from the people by doing things in their best interest. Just are compliant governments will be in compliance with the humanitarians or with the sovereigns that we are, we are the people, we are the sovereign children of God. If you try to set up something over if you're in opposition, and that will not survive the golden age of mankind. If you're part of the government, and you are listening to this, you better get your acting here. Because you're not gonna be around. You don't get to do that kind of stuff to humanitarians or to humans. We've had it enough is enough, and we're not going to tolerate it, nor will we put up with it, nor will we support it. Nor will we stand back and let you do this to us again. Our God has spoken enough is enough. And we're not going to put up with any of that again, even if we have don't have documents to tell us that we're sovereigns and all of that bullshit that they have cried to create over us. I'm not jumping to one of their damn hoops. Not one because I know who I am. Let's go ahead and close for now. This is the question answer period for November the second and thank you, Tracy, for all your kind work on helping getting yourself prepared. And we'll say goodbye for now and send blessings and love to all of you. Thank you
