I'd like to welcome everybody here to our next to the wealth management series. And this is number five growing your beneficiary account with some promotional ideas of how you can do that. There are some things to note as you're working out, the idea is that you want to do public advertising is against RSS policy. A person who wants to join with us must be referred by a fit beneficiary already registered in the RSS. A new registrant must use their user ID of the person referring them to register as a beneficiary. The promotional calling card is a great tool for sharing our story. Order 500 cards for printing sources noted in your personal profile that's not there yet, obviously. But there's a number of places you can go online to do that. Always give 10 or 15 blank cards to each person you registered for their use until they receive their cards. To avoid errors, we suggest you purchase two small rubber stamps to print your name and your user ID on the cards. Just note here. This is really, really important because if you give them the card and they go on the site themselves, and they don't have your legible name and your user ID on the cards, then they're going to have a hard time registering, purchase a laptop computer and learn how to get on the internet to access your RSS account. This is a very valuable tool as you go about your promotional activities. Unless you are in a remote location. There are gadgets available to get on the internet in most locations. When you're out and about doing you're hearing. Alright, let's go your circle of influence of family and friends. That's a good place to start. You will receive a thank you bonus of \$50 for each person registered using your user ID. The promotional card will save you a lot of explanation. refer them to the RSM swab site to get more information, that information will satisfy their need for knowledge. They want it to be true, so let them prove it for themselves. This is a copy of what we propose to be a card. This can be changed. These are PowerPoint presentations, or slides. And you can prepare these kinds of things for yourself. We have one as the front of the card and then the back of the card. And you will notice on the back of the card, there's a place for your there's an address for it to get into it. And by referral only in the name of you were referred by the individual and their user ID. And that's all you need to get into the program. You may use the \$50 Thank you bonus to pay the \$10 registration fee for those who offer resistance to registering the praise. I know how you feel about something new. I felt the same way until I took the plunge and found out for myself in the beginning of your sharing, you may not have a solid testimony of the program. So let the website give them the information and then you can share your feelings about it. And the more you register, the easier it will become. Be prepared

with your own little spiel and put yourself in their shoes. Knowledge of the program will instill confidence and enthusiasm. So do your due diligence. It is almost impossible to fail when your purpose is to give away money. If people resist don't persist, they'll come around real soon on their own, especially if they have that card and they do their own research. So leave them your card, the web addresses printed in the back and they can look up the information for themselves. The card also has a user ID number so they can register if they want to give it a try. Is it the intentions of RSS to bond all RS beneficiary accounts to maintain credibility in the program. coworkers and people you know in your circle of influence. When your registration is complete, RSS will begin to download revenue into your RSS account. You will have \$1,444 in your account the first 24 hour period. Now, you might consider helping somebody read Mr. And they'll go on there and they'll go to their back office and they can see 10 cents per minute being downloaded into their account. You can also show them that your \$50 Thank you fee has already been put into your account. These are the things that give credibility for them. Share your enthusiasm about how you will be paying off bills, etc. And can do other things you've not been able to do before. Again, the promotional card is a great tool, get them to the website and let them investigate for themselves. don't oversell, it doesn't work and is irritating organizations. As you're sharing gets seasoned Tibet, reach out to organizations that you are familiar with a church you belong to is a great way to share your newfound wealth. Clubs are a great source as well. If it is a nonprofit organization with registrations as a club or church, they will qualify, we recommend that you register the name of the organization with all members registering under that user ID. This will avoid bad feelings and will give a great opportunity to receive additional funds for the organization. Through the event beneficiary bonus program, the need for dues or donations may just simply go away. As an example, in addition to the the \$50 Thank you bonus the registration bonus as one cent for every two people who register under the organization's user ID number. If the organization has, let's say 200 members, and they all sign up under the name of the organization, and the organization is the user ID, their ID, the organization will receive an additional \$1 per minute download for a total download of \$1.10 per minute. With the way we figure that 200 people divided by two persons per one cent increase equals \$1 per minute, plus the original \$10 is \$1.10 per minute download. And this is for the organization \$1.10 cent download permitted equals \$66 per hour 66 times 24 hours per day equals \$1,584 per day \$1,584 per day, times seven equals \$11,088 per week \$11,088 per week times 52 weeks equals \$576,000.05 176 per year. Okay for businesses a little bit different approach for businesses. RSS only deals with individuals nonprofits and trusts. Therefore the business owner be the one to register first, all employees would come under his or her user ID. This does create a problem for the business owners as the low employee wage earners register for their own beneficiary count. They are now receiving \$1,000 per week and may want to quit and do something else or stay home with their families. But this is remedied by the employment contract program found in the document economic stabilization system. Both the owner and the employees can receive employment contract shares, which starts out at 25 cents download and can be scaled up or down to reflect the present pay scale. This is controlled by the Ben Zim benefactor and the director whichever is delegated to do that. With the individual share and the contract share a person would be receiving a minimum of \$183,456 per year. Keep in mind the employment contract shares are administered by directors in the CAC program. Let's look at travel as an opportunity to expand your business. When a beneficiary wants to increase his revenue flow. There are other ways to find people in an enjoyable way. Traveling for the specific region to find new people offers great opportunities, cruises, road trips, etc. give opportunity to talk to people Often when striking up a conversation, people will invariably ask you what you do for a living? Your short answer is, I work for a nonprofit that gives money away. Have your card ready and give them a chance to investigate the revenue sharing program. That can be just a few, maybe three or four minutes introduction and then carry on with the conversation so they don't feel like you're just using

them to get into your program. Get a laptop computer with a new technology to access the internet whenever and wherever you are. Connect to the RSS website and selectively show them what is happening. You can help register a new shareholder on the spot. By the way a computer gives access to the educational videos, you can share with them as they read and listen. Try to keep your meeting short. If they don't register now, they probably will sometime later when they realize what is being offered to them. If you go on a cruise, be sure you take plenty of cards with you. Your new beneficiaries are not going to be your competition because of the generation bonuses. So give them plenty of cars to use till they get their own maybe 25 to 50 cards. Funding government activities through trusts. Governments are run by people doing a job. They are a target to become beneficiaries. Your purpose in contacting them is to offer them a trust under the government assistance program called gap. Government agencies are always underfunded, the City Fire Department could have a trust set up for equipment and maintenance with the fire chief and upper management being trustees. There could be a community drive to register new beneficiaries and receive more permitted income. Those who have government friends may have a listening ear to create more income for underfunded government activities. While it is a violation of policies and procedures for trust to register a trust, all government agencies are made up of people who deal with financial shortages. And they can't create trust to solve many of their financial problems at work. To a way where teachers could create a trust for their classroom to buy supplies and equipment that is not in the official budget. This is a way to get people or get things financed or funded. And you can use your directors to see if they'll work out a trust program for these people and can adjust the amount of money on the Trust for whatever they want to do. And you can be called a beneficiary trust or whatever, we'll we're going to fine tune that so that there's flexibility within how much money you give to a government agency or anybody else, rather than just a 10 cent per minute trust download. And I think that that's important so that there's flexibility for the Zen benefactor and their directors to do what needs to be done without trying to mess up what's going on inside the beneficiary platform. Now each beneficiary may register six individual Trust, which increases their download per minute by 10 cents per trust. That's \$1,000 per week increase for the beneficiary who controls the trust and can donate what they want to the cause. Your competition for government assistance program is the directors in the CAC CRO program who administer their employee contract shares. You might become acquainted with a community assistance director for that area and refer people to them with maybe every other person registering under your beneficiary ID number. Find your niche and build a higher download for yourself. Some will travel to churches in a specific location and register a bunch of churches and businesses or organizations. Instead of focusing on individuals. Having a beneficiary account you have a cash flow to support whatever you want to do. The opportunities are as numerous as there are people with RSS you can start a new life of abundance and prosperity Really and learn to live stress free as we were intended to be, we support your endeavors. As long as you follow the policies and procedures with that will say that everybody gets a chance to reach the level of financial success that they want. If you're willing to work, you can go out and do a lot of really interesting and clever ways of reading the RSS program. We have no problems with you going out and building a million dollars a month if that's what you want to do. Because we know that in building a million dollars a month, there's that many more people who will benefit through the RSS program. So we support you 100% And don't call it get greedy. We say calling it a an opportunity that you're taking advantage of. To increase the money flowing into society. We welcome your most clever and initiatives of getting people to join loved one society and the RSS program. I thank you very much today for your participation or listening to this and hope that is helpful as a wealth management way of gaining more wealth. Thank you. And thank you Tracee for your help.
