SPEAKERS

Ron Giles, Speaker, Carrie, Dominick

C Carrie 00:00
Shall we go on to our topic today? Wealth Management, number five continuation?

R Ron Giles 00:07
Sounds good to me.

C Carrie 00:09
Did you have any opening comments, however that you'd like to make? Before we do that, I'm sorry, I didn't ask you that first.

R Ron Giles 00:17
Well, being very brief, I'm gonna say that the next two or three weeks are going to be your, we're going to be sending out and giving more information from what the alliance is going to be doing to the beneficiary programs, the alliance is taking over, basically, the beneficiary and the things are going to be opening up for them to do a lot of stuff on their own. And, in doing so the point that I'm well, let me put it this way, we have managing directors who will go around and set up CAC programs, but they'll do the RSS program, there are as program will be RSS program will be will, will spread like wildfire. And I say that and I, I, you know, if you ever been in a wildfire, you understand what I'm saying it's gonna go really fast, you might have a managing director might start in one location. And within 30 days, you might have over a million people in your downline, or those people are getting funds, but they're also getting opportunities for doing other things. And we'll be giving that sending this out information wise, excuse me, at a particular period of time when all the decisions are made and the T's are crossed, and the i's are dotted, dotted. And then we'll be able to send this this information out. But it's it's going to be required that all of our managing directors, we commit to getting prepared. Because it's the preparation, it has to do with your thought processes. lethargic

thinking does not work with the Alliance. And I'm just going to say it out. I'm just going to say it this way. If you think that you're going to get funds, because you are called of God to be a humanitarian. There may be a different understanding that you need to take into consideration before you have an expectation. Are you prepared to be a humanitarian? Just because you have a heart wants to share does not necessarily mean that you're the one who needs to get the funds from the alliance and start doing humanitarian work. Your humanitarian heart might be needed to have somebody else get the funds, and you have a specific purpose and reason for doing things that you're going to be doing. And then you'll get your opportunity to do things. But I want people to know that with a calling. You have to prepare yourself. You have to be thinking about what you're going to do as a humanitarian. You have to think beyond your projects, your projects, the ones that I have seen and marvelous projects, they'll probably be over in a year or two, maybe with new technologies. It'll be less than that. We don't know. And so if you're just thinking I'm going to build wheelchair ramps for the houses in my neighborhood, well, that's good. That's a really good thing. But you don't need billions of dollars or trillions or quintillions. To do that. The Alliance will allow you the amount of money that they feel that you need to do the things that you are doing. If you are only thinking about your project instead of taking the responsibility to pull mankind out of the financial distresses that happened to us because of the Cabal. If that's the only thing you're going to do, then you're not going to be getting the money that will really do the job. Now is this a warning? I don't think it's a warning. It's just a probably new to not not somebody At your projects, but what else can you be doing. And when we start unloading, or giving out this information, you're going to find out that the beneficiary program is much, much, much, much, much bigger than you had any idea. And the alliance is going to be in charge of all this. We're lucky to have the Alliance to give us the directions that we need. Because the things that they're doing now are monumental. And it's all going to be safe and secure, because the alliances are the ones that will be judging if you want to call it that, determining whether projects can happen and should happen within the boundaries that are set up in the beneficiary program. It's fun, it's exciting, we're excited to be releasing some of these things. And I feel that it's the next step that we need to take. As far as humanitarians who are going to carry the, the bulk of the requirements are needed to pull out of the financial woes that we're in as a humanity, and create a brand new economic system that works for every person. That's what the economic stabilization system is designed, economic stabilization, and everybody gets to be a part of that. So we're starting to fulfill the responsibility that we have is loved one society, the alliance has taken a lot further than any of us have any idea. We do not understand. Love one society is the program that the alliance is going to use to bring changes to the earth. And it will be our responsibility to be ready for that. And so I'm saying let's buckle up. Let's get off the couch. Let's start making some concerted effort to do things beyond what we think we're going to do. Because we're humanitarians, we have these projects, if you think your project is going to last a long time, well, once you get started, it'll last because you'll have the money for 100 years. But a lot of the things, building wheelchair ramps for for homes, when it's done, what is your next job? What is your next project? What is the next thing you're going to help your community with? Well, there's all kinds of things that are available. And we'll find those things out for us. Because the alliance is depending upon us to do it. And where much is given, much is exempted expect, excuse me. And so if you're planning on getting the larger sums of money, then you better have a use for that money. Now, this is the reason why I'm saying you have to expand your thinking, you have to go further than you thought you needed to go. You need to get more projects, if that's the idea. I don't know if that's really the idea. You need to get involved in other things. And these are the things that are now going to be presented to you. And as managing directors, you have to shoulder the responsibility to get it out to the world. And if you really look at what's coming, you'll see that the alliance really does love us and is making our jobs so much easier and fully capable of getting out to the millions and, and billions perhaps of the beneficiaries who don't

have don't live close to a managing director and have the CAC programs up and running. These people will be doing stuff for their communities until we can get the CAC is out there and organized. And so it's going to be kind of interesting to see how this goes. I hope that people are asking for vision. I hope that in your prayers and in your in your thought processes, that you create a vision of what you can do. Let your heart talk to you. Let your heart do the thinking for this. And you you're not going to be disappointed because your heart has tapped into all the knowledge that is necessary for you to accomplish what you need. to do, especially if you're really, uh, called humanitarian God called humanitarian. So some exciting things are coming. And I hope that you dig in and prepare yourself. And then be sure that you, you ask for the things that you want. And be sure that comes from your heart. And you'll be inside or underneath the umbrella of the Alliance, and be able to function fully without any problems associated with it. We're excited, we're having we, the people who have been called to participate in some of their duties, decision making things with loved ones society. And that's, that's what we have been asked to do. And that's what we're doing. So I hope everybody enjoys themselves. And I'm looking forward to a really good live chat today. With that, I guess I'll open that up for what we're going to do.

C

Carrie 11:12

That's very exciting news. Can't wait to see what's coming. So we did actually cover the first two sets of bullets last week, but I'll just go through them catch everybody up who missed it, maybe other people that you want to present the RSS program to would be coworkers, and large organizations. And then we did review the bonuses, the thank you bonus, the \$50 Thank you bonus, the referral bonus adding one cent per minute for every two signups. So if an organization had 200 members, for instance, that has a potential of adding \$1 per minute to the download, which goes on, of course forever. And that amount equals an additional \$576,000. So for instance, for a church, Ron said that something that could allow them to expand their buildings or their programs, and also, of course, not need to take up any collections. So Ron, is there anything you'd like to add to those first two sections there? I know we did cover it last week. But alright. Let's go to some other considerations in the RSS program. In businesses, we want to sign up the owners first, then they sign up their employees using their user ID, employees may want to quit, but that's where the BOC and the ECA contracts come into play. owners and employees can earn employment contracts, that will substantially increase their ability to make more money, stay employed and stay productive. So, Ron, your comments on that?

R

Ron Giles 13:06

Okay. I'm just trying to see where you're winning.

C

Carrie 13:10

Okay, I'm on the third set of bullets, because we covered the first two. So the first one starts with other people. The second one starts with let's take a quick review. And the third set that we're on right now is some other considerations. Okay.

R

Ron Giles 13:31

When, if you're an A, if you're a business owner, small business owner, and what is a small compared to a large, lots of things that we need to do find out a little bit better, and we'll do that. But in the CAAC program, we're talking mainly about the smaller employers, the National Economic Stabilization is the loved one industries, we'll talk about some of the larger, that's where we'll have contracts to, for all of our managing directors to be part of it so that we can organize it in a very effective way. Once we do organize it, it will be a major major factor in creating a new economic system. So that's kind of exciting. But when you're talking about the CAC program, we're talking about signing up owners, putting them under contract and there's there's going to be some new things involved with this as well. It'll always be better. And to some extent is it's focusing on what they can do, a beneficiary can do when there's no managing director or director CAC around to help them and so we're working downside, there's a lot of stuff that can happen with the beneficiaries on their own, we'll show that too. So things are going to be changing a little bit at this level. And, but the basic contracts and understanding of how business owners and their employees can be given contracts and, and make a lot more money than they're making. Now. Keep in mind that on the other side is the RSS program and how much they can learn there. So we want to, we want their work and their labor, to be a very strong contributor to their financial situation. So that they can still want to do things that are productive for their community. So let's see, they may want to quit Yeah. If a person is in a business that they don't really want to spend a lot of time at, then it's not their career sort of thing. They need to find out, don't sign one of our contracts, because you're gonna have to be around for a while. And it's different going to be different levels of contracts. But let's understand that there is a reality of people wanting to work in a specific in a specific field. And they may not have opportunities to do that at the beginning, because it doesn't make enough money for them to live on. Well, with the RSS program, things are going to open up to where you can do find some businesses or some create your own business. We're doing things that you really enjoy doing. And it's a variety that of people doing the things that they enjoy doing, that creates the success of the community. Not everybody wants to fix cars, not everybody wants to bake bread, but everybody wants to have a restaurant. But all of those things are necessary for a community. So each each person can get to do the things that they really enjoy doing. And I think that's the most important thing. So let's go to the next one. Are there any?

C

Carrie 17:25

Well, we're gonna take questions in just a little bit. Maybe get through a little of this first. I just noticed we did it. We did actually do the next section to how to offer to organizations traveled to different locations, take a road trip, visit other areas to discuss the program, set up a cruise or some kind of promotional have people come to a large venue or hosted dinner at a restaurant. We did talk about all that. Is there anything else that you'd like to add to that before we go on, Ron?

R

Ron Giles 17:57

No, that's, that's efficient. Okay. All right, ideas.

C

Carrie 18:02

Carrie 18:52

So this is the new material for today. What do you say if people want to know what you do for a living and what this program is all about? You can say I work for a nonprofit that's giving money away, you can say that I'm part of a humanitarian group, who's funding the program, have cards ready to hand out and ask a few minutes of their time to share with them. You can have a laptop to show them the site and what's happening in real time on the site. Remember that the beneficiaries will not be your competition, all need to share this wealth transfer, so handout as many cards as you can.

R

Ron Giles 18:44

Okay. I don't think that there's anything there that I would, I would need to add to that.

C

Carrie 18:57

Okay, so

R

Ron Giles 18:59

let me just let me just quickly go through it again, nonprofits, that's a good thing to do. humanitarian groups, or what you want to say to people, this is an important thing. When you're in business, you want to somebody says, Well, what do you do for a living? Well, you don't want to give them a 1520 minute oration about what you're doing for a living. They call it an elevator clothes. You have the first floor to the higher levels that you're going up to. And in that short period of time, you need to have something to say to them to satisfy their request about what you do for a living. So you have to prepare the right things to say. And this is going to be part of the NDA. You don't tell where the money came from you don't have who has the money and all that sort of stuff. Those are part of an NDA. And From my understanding, it'll be about 90 days. And in that 90 days, you get some habits about what you say to people about what kind of work you do. Well, I'm fortunate enough to work for a company that is it's a nonprofit organization, they get donations given to them for specific purposes. And they've hired me to help in distributing, distributing those kinds of funds. So that's, that's my job is. And if, you know, if my job is to help you, then here I am. If my job is here to help you to find the RSS program, then here's the cards and you can go through whatever you need to do there, it's important that you have the right things to say. And so work on to work on something that you can say to people that either even your family members, I've got a brand new job, it's really exciting. And there's a lot of things going on. And they do them. And they go on with all of the fun things that are happening. And that'll get them excited. And we have this RSS prep program and you think \$4,000 a month, and you sign up for \$10. And you and you can't pay the \$10, before the thing is programmed, before it's up and running. So going asking people, we can still get a lot of new people, where do I pay the \$10. So I can start getting that money. You're not here for the money, you're here for the learning and exercise and exercise in your humanitarian activities. So there's a lot of people are just wanting to the money in the SK RS has been a source of that too. But it's all going to be controlled by the Alliance, we're not going to be the ones to judge people. So it will be in control there. But I like the idea of having a laptop that you can show your stuff to know if you want to go on vacation to do it, then everybody's asking what do you do for a living? You go on vacation, you go on a cruise, and you sit down with people at your dinner table. And they ask you what do you do for a living,

they just have a short conversation with him about that. So you have the elevator. I won't say clothes, you have an elevator thing that you give to them. And then you have some that you might want to talk about and dinner table. But don't be pushing this. Don't be out there saying you've just got to get involved. You know, you'll leave people. If you force them, they they'll resist you. If you push them, they'll resist you. But if you share with them appropriately, then they will buy into what you're doing. And this is This is Psychology. And nobody likes somebody being that's pushing you to do things. And I'm gonna say it this way. There are universal laws that you must not break. You have to wait for people to ask you. You don't just jump in and start invading their dominion and start giving them your new idea. You share with them appropriately when they ask. And I'm having a real hard time. Personally, I'm having a real hard time with a lot of our people. I'm going to be doing this, I'm going to be building homes for the homeless, I'm going to find everybody and I'm going to give them clothes and they're going to get food and they're going to this is not the way to to obey universal laws and creating in trying to create something that's really good. If you don't obey these laws, whatever you do will have a tainted nature to it. You will have your own personal tainted negative activity with it. And once you have shared that kind of stuff with people, it's going to be hard for them to get it out of their mind out of their their thoughts. And you might have the best program in the world. But if you don't present it properly there nobody nobody's going to sign up. I didn't say this is so good. Why aren't people showing up? Why aren't they signing up? Why do I have to work so hard to get people because you're not Sharing, you're forcing your opinion on other peoples that is crossing dominion, You are trespassing on somebody else's life. You've got to obey those laws in order for you to be successful as a humanitarian. You assume that just because they're poor, they, you need to give them everything that you can get your hands on, you destroy the nature of the individual. When you give them stuff that they should be able to earn themselves, a leg up is a different thing. Somebody that can't climb up on the horse, you give them a leg up onto the horse. But you don't go giving a leg up on the horse for people who don't need you to do that. Just because you have money doesn't make you any better. So be sure that we're careful with this. obey the laws, the universal laws that have been created so that we can enjoy ourselves. A good example of this is when you talk to Q, fac public IP, it's a question and answer period. Well, what do you think about so and so where it says I'd rather not talk about that. Why? Because it's none of his business to tell you something about somebody else, he may have private information that he's not going to tell you. So if you get on a private conversation with him, and you talk about people that you have heard this sort of thing and that sort of thing, and then he can have a private conversation with you, then it's different than some of the public? Well, we're having private conversations. So we need to share appropriately so that we don't cause problems for ourselves. If you share inappropriately, you will be promptly persecuted not prosecuted, you will be persecuted, people will think that you're crazy. And we're giving something that though here's a word, it's too good to be true. So it's not true. If you present it in a way, that's too good to be true, then they're going to say it's not true. So you're going to have to figure out a way to do things that do not push them. Let them my idea with a cart, it's a simple thing. I'm making \$144 a day on this. And I don't have to do much, I just have to pay my \$10 and set up my account. And there it is. If you're interested, check it out. Here's the card. Here's the website that has a whole bunch of videos and things that you can watch. Then shut up. Don't be promoting it. Those who who are eternal promoters are not going to have the success that they feel that they would that's available for them if they continue to squander all that they've got on people who are not wanting to listen to you. So gently share, and let him go find out for themselves. That's what the purpose for the card is. And when you give them the card, then you have your name. Yeah, and your user ID and they can go ahead and sign up that they'll find the website, they'll sign up, if they want to, they'll read all this stuff. And then they if they want to sign up, there's the information, you've done everything you possibly can to help them. So give them the card just to briefly tell a little bit

about it. And then if it's interesting to then hear, go to the websites on the card. And if you want to look at it, as soon as it goes good, then here's the information the sign up, and then then let it go. Don't promote them. Get us in a rainstorm. You know, be be selective, be careful what you're doing. Some people just don't have the time to sit and talk to you. And you'll talk their legs off if you don't have that concise concept in your mind. Anyway, I didn't mean to go off on that but that's that's really important. Okay, so there's some things with a laptop, you go on a vacation and you sit down with people and if they have some interest, let me show you. Me sure and certainly explain it to you and show you how Do I have my laptop. But once you do that when the person needs to go out and leave and go for another appointment, now you don't do that people will take the time at the appropriate time to do that. So be very careful. Now I'm talking to managing directors, how many of you managing directors are going to be out there promoting the revenue sharing solutions program? Is that your project? Because if it is, it will grow so fast, it'll be way beyond your ability to control it. That's when you just share with other people, a few people, and then let them internet with their network with other people. And it'll grow so fast that you won't be able to recognize what happened in a very short period of time. So those are the things that you want to understand. You know, there's things that you can do to promote it as a managing director, but in my humble opinion, they may not be necessary, because you get it into one town and you think you're gonna have to go out and do all kinds of projects to get people to sign up, and then all of a sudden, everybody signed up and you say, Well, I don't need to do this. So that'd be nice thing to do. Okay, so remember that the beneficiaries will not be your competition, you, you present it to one person in the family and let that person do the rest of the family. Then you go on to another family and do the same thing. But you're not there to compete with them. Let them get the beneficiary get the bonuses, registration bonuses, and the thank you notes, or Thank you, bonus, all that sort of stuff. Leave it for other people. You got all the money in the world, you don't need it. Okay, let's ask some questions or move on to the next one.

C

Carrie 32:19

All right, well, let's move on. And we'll do questions at the end of this next section here. So presenting the RSS program to government agencies by using trusts and grants. Government agencies are always underfunded. city departments like first responders can have a trust offered to them or a holding account offered to them under the government Assistant Program. We can use these holding accounts for equipment and maintenance needs, and have upper management be the trustee of each government office offer an RSS registration drive to offer more citizens and RSS beneficiary account. And teachers can of course, create accounts for their classroom supplies and field trips, etc.

R

Ron Giles 33:13

Okay, good. This is a good section. I would just like to ask a question. In light of the new things that we're doing now, in light of the fact that Asara is staring at us and ready to go. And the governments that we have in place will all be torn apart, or a lot of the stuff that they thought that they were supposed to do, they're not going to have to do any more because they don't have the money to do it. on a local basis, you have those kinds of problems that are coming. So what I've outlined here maybe is old thinking, then I'm allowing myself to be wrong. But I think that we've we've gone past this, we've passed this whole idea of how to do things. Now, what does that mean? Well, we are going to be the ones who might be helping the police

departments with their budgets and with their their funds, would we would we be putting police officers under employment contracts, or other government, people who now don't have a job but still have the ability to do jobs that need to be done? But since there's no funds for them, so we have a whole different set of circumstances that are coming from us. We can use the ideas that are here, but in a different way. Because we can support these people, and because they are people, government workers or people who work. They work for the government. Well, some of them are, like the DM D, where the Department of Motor Vehicles where you have people that are just rubber stamp stuff and you go up to them, and there's no smile or anything. That's not always the case. But it's often the case, because they don't care. Well, things are going to change, things will be changing. And it's important for us to kind of feel that out. We've got the quantum education system, I'm not gonna say too much about it. But the quantum education system will be part of the beneficiary information. Wonderful, wonderful, a brand new curriculum that's been created by God to teach his children how to be children of God, and to function as children of God. It'll be an A K through 12. First, through seventh to 12th grade, and the curriculum will be such that it will start out where a family can be teaching their own children. And then it can move into other areas, and then we'll get more into that in the CAC and so forth. But the, there's no reason to overly concern yourself with teachers, because they're part of a teachers organization. And that organization is will be going away. So there's opportunities that we will have to create a whole new education system. And we anticipate spending time to fine tune and create something that will be of benefit for everybody in the world. For that matter, that we don't have to have an education system that's designed specifically so that you will work for somebody else, regurgitate all your information, to pass a test that has nothing to do with you and your life. So we're going to make it's going to change things, specifically change things so that you can become a child of functioning Child of God, functioning God and adult God. In 3d, that's gonna be where we're supposed to go. And then when you pass away, then you're that anyway. But as far as the teachings and things, that's all going to be taken care of in a different venue. So let's go ahead and I don't have much more to say, than that at this point, those government officials, but so let's just understand that they're there and we can help them and we can help them the best way we can. Any questions?

C

Carrie 38:17

Well, we're going to just finish up right here a tiny little bit and then we'll open it up for questions. Okay. Okay. All right. So find your niche and build a better download. Some people will travel to churches and other organizations to sign up beneficiaries. Some people will only do individual signups and some people may do both. However it's promoted know that the RSS program will start a new life of abundance and prosperity for everyone. People will learn to live stress free as we were always intended to be

R

Ron Giles 38:56

well there's there's a lot in there and it's all true. Really doesn't need to be expanded much. abundance and prosperity. That's what love one society is about coming from lack mentality to the abundance mentality. Why the abundance mentality as you gain the abundance mentality, you know that there are no limitations. And when you get to that point, then you're ascending into the fifth dimension where there are no limitations on an individual basis. You will be able to create the things that you need from who you are, what you are and go from there. So, things

are going to be changing and find a niche and enjoy yourself there. But as a humanitarian, you know, don't do a small niche. The magnet percent creative individual that has done a great good for the tremendous amount of people. That's where our niches

C

Carrie 40:10

Okay. All right, we have we have one little section down here, which is a summary. Is there anything you would like to summarize regarding the RSS the BOC or the ECA? I know that phf is so new. And there are lots of questions still coming. And, of course, we've done a q&a on it already. And I would guess there might be more. But would you Is there anything else you'd like to add regarding the RSS the BOC the ECA? And of course, if there's anything you'd like to add about the phf, as well.

R

Ron Giles 40:52

thing I'd like to say is that we have about 20,000 people now, and we're getting as many as five 600 a week. And all of those people are asking the same questions that are in the q&a phase. And a lot of the questions so with some of our new programs that have not been fully implemented to the point where we have covered everything so that there are fewer questions. And so we have staff that are just loaded to the hills, gills with questions that need to be answered. So what we have done with those questions is to put them in category. And a lot of the questions are the same. So if we send out an answer to a question, and there's 450 People that are asking the same question, and we can do it in a larger scale, so that you get those questions answered, without somebody having to go through and answer 54 or 400, well over 1000 votes. It's better to use some kind of a question and answer section so that we don't have to have all that. And so I'm just saying, if you have questions, read it through and read it through and read it through. And then just because this is preliminary, and all of the questions have perhaps have not been answered yet. So there's going to be questions. But why don't you wait until it's all completed. We're trying to put this out as fast as we possibly can. And sometimes we maybe shouldn't just wait until we get it all put together. But you need to understand that the alliance listens to our conversations listens to when we're talking. And a lot of our people have come, we'll come up with really good ideas that is involved with the question. And so it's not like we don't want you to ask questions, because that gives an opportunity for us to look at things as a little different way. That's the way that the heavens work with us. And when we finally come down, we've taken all of this information and we've collated it and talk about it and come up with some decisions. And we say we'd like to do it this way. Is this appropriate from the alliance? And they say, Well, you need to work on it a little bit more edit what you're doing a little bit more. And you'll find some things in there that you now have found before. But somebody asks a question, and oh, look at that we didn't even think of this. Well, the Alliance wants that kind of conversation. That Alliance wants us to be thinking about things. So they let us put out stuff for the specific purpose of getting more information through questions. And so we're not talking we're not saying don't ask the questions, but just don't expect to have every one of your questions answered, personally, because that's just taking too long. And it's really unproductive for our staff to be doing it that way. So we gathered the questions and collate them figure out what we want to say. And then we go with all the different ideas. We're getting ideas from a lot of different people and is that not the best way to do it? The Alliance doesn't download to us a lot of the information we have to think it out. That's the human part of us being in third dimension They're not going to over write us. We

have a responsibility, they're going to help us to understand that. And when we have questions, and we go and discuss and we, but they're not get very seldom do I get a yes or no. Unless we come down to the point where this is an I have to explain what we've done. And is this correct? And they say, yes, it's correct. If it's not, then they help us with some ideas. Now, the way that the way they're working with us is the way that your counselor will be working with you. They're not going to tell you things unless you ask them. And you can't say, Well, I will, I want to know everything you know, so I give you permission to download. No, that's, that doesn't work. That doesn't work. There's always a conversation, there needs to be the conversation so that you get the idea. If I had not, if it had not been done with me, in creating loved one society, I wouldn't have the clue of what's going on with loved ones society. As it is, I have thought all of these things through to the point where I can talk intelligently about loved one society. Had I not done this before gone through all of the different thought processes? I wouldn't have that knowledge available to me. Can you see the wisdom in working with the Alliance this way, and the Alliance working with us this way? It'll get done. It will begin, it'll get done in such a marvelous way that we all stand back and say, wow, look, look what's happening. This is phenomenal. We've got four and a half billion people that have signed up as a beneficiaries in our program. And the funds are just flowing into these people for the things that they want to have done. So the Alliance knows what to do. And for those who don't believe, or have any idea that we're being led by the Alliance, and who's in charge of the Alliance, need to really say that, but for those who are Christians. Jesus is the one who has the responsibility for this earth. He is the King of kings, Lord of lords. YLP and the omega for this earth. That that's who we are working with. So let's just, I just say that briefly, it doesn't, you know, there's other Buddhists and that sort of thing. Other religions, they're all working with us together, they're all paying their part. All of them have been distorted to the point where the alliance has to come in and make changes. So there's no really, really good, organized religion around the Earth. Perhaps there are some and they're functioning in a level that's different than normal. But that's okay. Jesus is the one that's responsible for the earth and is in charge of the Alliance. I'm getting confirmation on that. Orange picking. So let's just, let's go ahead and add some questions now.

C Carrie 48:48

Okay, let's start with Bruce. Bruce Haines. Your mic is open. Bruce.

S Speaker 49:00

Yeah, yes. Yes, you guys. You guys are doing a phenomenal job. Thank you so much. I have a concern that I've missed something. Carrie, you've mentioned BOAC several times. I can't find anything that I've read in the site, would it be BOAC is what does that stand for?

C Carrie 49:16

Business owners contract account and it's in the CAC section I believe,

S Speaker 49:22

okay. All right. All right. It's a subset of the CAC. My apologies.

okay. All right. All right. It's a subset of the one my apologies.

D Dominick 49:30

Guys might get confused because it's actually BOAC and it's in the literature. So instead of B and C,

S Speaker 49:37

I gotta go back to school and recruit more. So that's not a usual well you're doing a phenomenal you're doing phenomenal job. Oh, you guys. Thanks so much. Thank you very much. Appreciate your comment.

C Carrie 49:51

Yes, army that you? Yeah, I am. I'm sorry, army that your mic is open.

S Speaker 49:58

Well, number one, I'd like to say Everybody great to be able to be back live with you guys instead of just listen to the radio recording. Ron, super fantastic job I think, almost three years now I've been following you and everything is fantastic. And to see what it was when we started out and what it is today it's it's fantastic. Thinking about the wealth management that fits in I think, and I don't know how to have water happen but in a dream the other night. Somebody I don't know who he is. But when I want to introduce myself to him, he's I know who you are. And kind of spooked me a little bit. But he said that we should think about the Hometown Heroes and come up with something maybe on the back page back office page with a a button that we could honor our military veterans, our environment, our policemen, above and beyond just the standard beneficiary account, or holding account because of their willingness, and their heart to put their lives on the line for everybody else, that we should have some way for our directors to be able to show their appreciation of the humanitarian to these people for what they do have something I'd like to have everybody to discuss the what y'all think. But that was what I have. Thank you, Ron, Dom, Carrie, Janice Allen, all y'all do a great job.

R Ron Giles 51:39

Well, thank you for your help for your comments. Anytime we can, no having spent 26 years in the military, and somebody says, well, thank you for your service. And I say, well, it's just I just what I do, as you know, as a pilot, I, it taught me how to fly, I've got all this appreciation for everything that they've done for me and my life courses. It's military. So they scold you and do everything they like to do with people. But the fact is, is that we are their military is there, the police are there and the tearing down of the police and then causing problems for the fire, people who were putting out fires. And having to deal with the rioters and all that sort of stuff. It's a it's a real sad situation, that those who are on are fine people and upholding really good

activities for us in our service to our communities, can be railed upon by a bunch of idiots and, and poorly advised politicians that are trying to destroy America, you know, there's a reason for what they're doing. And if you don't believe me, that's okay. I don't care that they're trying to destroy America, because America needs to be a third world country for them to be for the Cabal to be taking, taking over us. Were a powerful force for good. So they're, they're going at us from the very depths of our souls of our country. Talking to children when they're young and telling them that we're not sure. Are you sure you're a boy? Or Or do you want to be a girl and in fifth grade, or first grade, those are things that are detrimental to our society. And they have to be starved. That's what got new quantum education system. Okay, so anytime you have a chance now, I know a police right now, I know where they are and what they're doing. And they're not acting in the best interest of the community. They are having their whole legal if you want to call it that way of making money. That is not right. And those are the kinds of people that we'll have to get rid of. When the one the big thing takes place. Understand that God is in charge of what's coming. quantum consciousness knows everything. quantum consciousness has taken over the financial system. Every bank and every bank account has money in it and that has money in it has been given a digital footprint by the Alliance by the quantum consciousness. Anytime you transfer money, they know where the money is. They know who said it, who got it, where it is. These are the kinds of things where they are in a position to know where the criminals are there only trying to wake up the people who are asleep, and not cause problems from, they don't want necessarily the wake up and really understand everything, because that might take a long time to do. But there's certain things that that people are going to find out about that, that, and when I'm saying that this about the police, I'm saying that the police have been forced into a situation where they have to defend themselves. And money is the thing that makes them survive, they're there to make money. There, they've had to turn to making money to survive. They don't really care. I mean, every day that they go out, they want to go home to their wife and family. They want to do something different. They're staying alive. Well, some of them have gone across and done things that are inappropriate. So there's, I know of a number of police departments that are, their heads are these kinds of people. And so they permit it to go on within their organization. They will be dealt with, but let's not put aside the really good people who are law enforcement whose hearts are are there to serve. And, and I really appreciate what they're doing. And I don't harass the police at all. If I got pulled over, I don't get I don't speed or something like that, in my mind drift over a little bit. And they might stop me or whatever. I would never give them any trouble. Never. Even though I you know, what's my What's your jurist, you don't have a jurisdiction over me and be an asshole, who's been a objectionable person. So we don't do that. We, we let them do their work. If we're honest and obeying the law, then we don't have to do any kind of controversial things, and stand up for our rights and so forth. If we're obeying the law, generally they don't care. They just want to do their job. And for speeding, you get a ticket? Who's folded? Is it it's not there? That's what they're there for. So, yes, every opportunity we can get to complement these people, these good people and, and help them out military as well. Military as well. I appreciate when somebody recognizes that I've put in 26 years. I don't, I don't seek that. But it's part of their appreciation. That's now it's coming to light for them. Let them express their feelings and graciously accept it. And then go on. But I love your ideas. Maybe there's some things that we can do with that. Thank you for the idea. We'll see how that goes. The back office is under the control of the Alliance. So we can make suggestions for a button back there. And I don't know where it would go to her who would go to maybe there's a way that we can work with some military people under you know, that, that we get a lot of information going to them that they can publish and say we've got a lot of people that are really appreciate what we're doing. I don't know if that's appropriate or not, but we'll see. Thank you for your recommendation.

S

Speaker 59:15

Thank you, Ron, and everyone, and thank you.

C

Carrie 59:22

Let's go to George. George, your mic is open.

S

Speaker 59:26

Yeah, sorry, I'm on the road. So hopefully, I'm not making too much noise on your latest disclosure there about what the alliance is going to do. And the people who are going to get the huge funds need to be thinking bigger than, you know, building wheelchair ramps. Definitely I can attest to that. And it seems to me that as managing directors, if we have this humongous amounts of funds that are efficiency is going to be incredibly important as far as being able to find something that needs to be done. Touch it. Get it underway, move on in something else that needs to be done, touch it, get it underway and move on. And with that being said, it seems to me there may be a place within loved one society, I guess that there's some kind of like in the sales business, we'd have a, you know, people who are inside sales, and what they would do is that they would call people and they would kind of prequalify them, and they'd find out what they're interested in what they need, and then the salesperson would get that lead. And they call that person knowing, first of all, that person is interested. And that they're, they're basically a hot lead, if you will. So if there are people that understand the government structure, or the first responder structure, or whatever that can be there, and they know all the departments and they know who to call, talk to them, find out what's needed, and come up with a list of things that really need to be done, and then pass those leads on to a managing director that can contact somebody directly, start something underway, get it going, and then move on to the next thing, it seems to me that if we were going to have any hope, of trying to utilize this kind of money, it's just going to need a lot of, you know, priming the pump somehow, so to speak, what do you think about that idea?

R

Ron Giles 1:01:17

All right. There's a lot going on that projects, a lot of duplication of projects. And we're trying to figure out the best way to approach those things. Has anybody got a project for teaching or for teachers? Or for the way that the quantum education system can be manifest? How would you like to do that right now it's going to be in the back office. The Quantum education system will be in the back office, available for each individual to take that education system, the curriculum, and start teaching their own children. Now, there's a lot of new stuff, new ideas and concepts that can be built by people who have the heart and let their the Spirit moved them in the direction of let's work out in education system. Now, why am I saying this? The national education system is funded by the federal government. The federal government is going away. Who's going to be paying for those people to stay in their demented ideas and forcing them on other people? There's no money for that anymore. And so who has the money now? We have the money, what are we going to do with it? Well, we're gonna do a really good thing. Well, let's talk about education. Instead of teaching a five year old that he should have been a girl. Or if

you want to be a girl, you can be a girl. This is so demented in thinking processes. So we've got to change. We'll get rid of the bad people. But what are we going to do to build up and know for the education system that will be effective. And again, the education system has been given to us by God. We're not going to have to memorize stuff and regurgitate it on a test. So that we can get to be a really high grade and then we can get go to school and work for somebody else. And use our creation energy for somebody else's money. No, all of that is going away. We're going to be the ones that need to do it. So managing directors, is there a possibility that you could start using your mental capacities and create a new system that includes an educational system from beginning to where it's just with parents, to groups in the neighborhood, to groups in the city? And then maybe go into the buying schools that are already existing and creating a local community that has an education system? How far can that go? And it takes time, it takes money and it takes effort, thinking part on a lot of people so Is that a new possibility for a project? I'd like to see 100. With now we've got eight people who are working on projects that have reported to love one society. What about the other? I'd like to see that up to 150, maybe 200, maybe even 1000 people who are doing local education type systems. So what they can promote, and how they can work it out. Is that part of the the CAC program, I believe it can be? Things are just widening open so that we have opportunities to serve in other areas besides creating med bed facilities. And, you know, bless her heart, she's backed out of it, Amy, or Skye is backed out of it says, I'm not talking about it ever again. She's, she's been harassed to the point where it's not worth it to her. Well, is there something there that can still be done? I don't know. But the fact is, is that there were hundreds and hundreds of people that wanted to do med beds. It's a really good idea. I think that when we inquire about med beds, we were finding that there's could be some other technologies that will come along that will be better than that? I don't know. Because it hasn't happened yet. The last time I sit, and I was told there are other things afoot. What is that? What can I tell? You know? Why can't you tell me because if I told you, then you'd be a target. Okay, well, we'll just find it our best way possible. And that's to our own inspiration, each individual. So let's let's, but here, again, is an opportunity for education. And let's make some projects out of it. Let's put it into our CAC programs, and see how we can function that way. And each managing director that wants to do a CAC program, you're gonna have to come up to speed on that. Just know that the educational system that we have curriculum that was created by God is going to be in your back office. And it may be just a link where you go to another website and get all the information you need. I don't know how it's going to be. But I'd like to see hundreds and perhaps 1000s of managing directors who want to do CAC, yes. Let's get this thing going. Let's get your minds focused on education. Not just healing, or obviously, that's good. But I'm not saying that they're bad. I'm just saying there's other things that we can focus on. So let's focus on this as much as those who have an interest in that can can focus on Well, it's not a be a big thing. It's just a small thing that will go along with your CAC. Yes. Okay. I've said enough. Next question. Okay.

C

Carrie 1:08:34

All right. Let's go to Leah. Leah, your mic is open.

S

Speaker 1:08:43

Greetings, family, hi. Education, I have a project. I have an education project for my CAC. And it comes from a deep passion for a certain type of education because of my son, I homeschool my son, my youngest. And when you mentioned the quantum education system, I got excited now

I'm hearing that it'll be part of the back office. And that's even more exciting. But what I had in mind was from like, age, whatever age to four or five to age 108. I was looking at a primary education program, being where the children are, you know, learning to live strictly from their creativity, right from the heart. And it turns into an apprenticeship program, where it doesn't matter what age you are, if you're 12 years old, and you're interested in what their apprenticeship programs offered. You can go ahead and enlist in that program and learn alongside a 30 year old like why not I thought was why do we have to separate when it comes to certain things. So the apprenticeship program is an idea to get the seniors of the community working in their passions again, one thing I noticed, because I was assisting a friend of mine with her elderly mother, she really had no creativity because she doesn't have an outlook for the future. Because she's 82 years old. She's a retired dancer, a ballet dancer, she used to dance for the Boston Ballet. And I'm thinking to myself, what load of wealthy information could she be to assist the youth in dancing, but because of her age, she's entering early dementia, she doesn't have an outlook for that. So my idea is to tie all of this together, and now I'm just even more excited to learn more about what's coming. So I don't know, am I on the right track? Like? Because after hearing about the quantum education system, I'm like, wow, how does this tiny and how's it plugging, so I'm excited to hear more. So I just want to share benign.

R

Ron Giles 1:11:20

Bless your heart, I appreciate what you're saying that 85 year old, or 105, doesn't matter. We haven't had the education that is associated with this curriculum. We haven't had. We haven't had somebody telling us how to be a child of God and how to mature and grow and develop and have the capability. Jesus said, Come follow me greater things that I've done, chair you to one of the greatest things that we can do in the education system. How are you going to learn how to receive revelations that you're supposed to be able to receive and when you're born, you have all of that, but we teach the children? Now that's, that's stupid, people think you're crazy doing that sort of stuff. And so they shut it down naturally on their own, because of the way they're being taught, what is the opportunity to open that up again, even for an 85 year old. There's things in that crew haven't seen it yet. I don't know what's there. I'm just saying that the education that's coming from God will be an education that we can become like God. And that's what we have totally misunderstood in the educational system that is presently that we are presently a result of, or participating in or learning ourselves as children. It's all going to change. And so those people who are on the front end of the thinking and the and the ideas of what might happen in a CAC to facilitate, you know, a CAC has money. And part of that is grants for certain things, grants or money that you don't have to pay back. And we believe can come up with a grant. And you will, that'll, again, will be in your back office. Because you may not be where there's a close association with the CAC. So you're going to have opportunities to do things on your own, because of what's in that back office, and the Alliance is in charge of. And if you're connected to the alliance, and you want to do something and you start promoting things, certain things and ideas and, and receiving inspiration and come up with some brand new information that has not been given to other people before maybe it's been given to a lot of people but they haven't coordinated back and forth. They just all Oh, I had I received on that I know what you're talking about. Those are the kinds of things that are going to happen. Because things are changing from the old to the new and we're going into the golden age of mankind. Can you understand why the alliance is starting to take over and be the person or the entity that was say yea or nay to somebody's activities? Because it has to follow into the guidelines that the alliance has initiated for the use of that fund those funds and when you're inside of that, and in harm In a with it, you will get your funds. These are the things that are coming. The Alliance is doing this for us. We got the counselor, we got the quantum

financial system, we got the quantum education, we got the quantum quantum voting system, we got the quantum internet, there's so many things that the alliance has, is preparing for us to use to get us to the golden age of mankind. It is unfolding line upon line, precept upon precept, here a little there a little, we'll get it all. Because that's who we are. And this, this system will be talked about for generations to come. As we change from the third dimension into the fifth dimension for this particular Earth experience. Things are really changing. It's amazing. It's amazing. So there we go. Next question. All right, thank you.

 Carrie 1:16:13

We're gonna take we're gonna take one more question. I apologize for everybody who's got your hand up? I know there's a lot
