

# Wealth Mngt 5 and NEF - Part 2

Thu, Oct 27, 2022 10:10PM 41:54

## SUMMARY KEYWORDS

project, ron, people, humanitarian, talking, cac, question, teach, create, alliance, education, god, foundation, nef, fear, ukraine, food chain, comment, uniqueness, quantum

## SPEAKERS

Ron Giles, Speaker, Carrie, Dominick

---

Carrie 00:00

to the next topic,

Speaker 00:02

I have a folk school that I have for my CAC to do, and all other humanitarian should look at it on the internet because they've been around for years. But basically, they were for wealthy people. And actually, my urologist told me that it was like he and his wife summer camp where they, you know, would go a couple of weeks and do different activities. But it teaches all different types of arts, crafts, music, dance, I have an amphitheater plan for weekends where people could come out and outdoor worship area, just all kinds of things. Trails, but there's also you know, education as far as a pair of senior citizens or grandparent to grandchild, and if they don't have a grandchild, they can have use one of my grandkids. But there's just so much that we can do, but it needs to be taught in nature, in a natural setting, it needs to be taught with every single activity of the day can be a learning experience from teaching, teaching moms how to say, you know, I've turned the light on, I turned it off in order to encourage speech, because I'm a retired speech pathologist, and I am talking with other educators, and speech pathologists, because once the med beds that everybody talks about, you know, or whatever takes place with hailing, a lot of these autistic kids that I work with for years, won't need speech therapy. So I've been talking to a lot of them about helping me in the fall school, as well as I have the best musicians in the world. In fact, their family members played on the Grand Ole Opry, and they're going to teach music for me and they, they actually teach they have an online course right now. It's about Boston music studios, if anybody wants to check it out, but they have they teach, they can teach violin, piano guitar doesn't matter. And the wife is, has a master's in voice from FSU. So I think everybody ought to look at the folk schools. And just say, it's not based on what you achieved there, there are no grades, it's basically on creativity and how you excel.

Ron Giles 02:10

That sounds like an interesting thing, if you if you were to put that on the website, or on the telegram channel, and see if there's some people that have some interest in that they can direct message you and get involved. I like that idea.

**S** Speaker 02:29

And I've already picked out my, the school that I want to purchase to turn into like a the new kind of school, what are they because they're new quantum education was coming in, I have a lot of relatives. In fact, my daughter is a fourth grade math teacher. So and she hates that new math or whatever. So, you know, all we got to do is start put our thinking caps on and start talking to our friends that are teachers and come up with a plan. I mean, we really do need to buckle down a little bit.

**R** Ron Giles 03:03

Well, the it'll open up when we get when we actually get the curriculum. Right, then, then there's nothing stopping. Yeah, well,

**S** Speaker 03:17

another thing you can teach counting it in an activity, you know, let's go gather the eggs, you know, because we also I'm gonna have farm animals and basically teach kids that how food is how you plant the seed and grow the plant and then you harvest the tomatoes, or the peppers, or whatever it is you're planting, and they can count how many tomatoes they got two or five, you know, so there's just so much anything can be turned into a learning experience any daily active or even playing hopscotch. Okay, yeah. All right.

**R** Ron Giles 03:52

Thank you for your time, I appreciate them. Don't let this go put it on the on the chat and get some people talking to you about it. Let's do that.

**S** Speaker 04:05

Okay. I'll do that. Thank you.

**C** Carrie 04:09

All right, Ron, what we're gonna do is pass over to Dom Now, and he's going to pick up the question of the NEF.

**R** Ron Giles 04:18

... -

Hi, Dom.

**D** Dominick 04:23  
Can I make a quick comment?

**R** Ron Giles 04:25  
Absolutely.

**D** Dominick 04:26  
Ron has shared with us some things that are coming the alliance has started to to allow us an opportunity to see what's in the future. And I'll tell you what, I get excited. Every time Ron has something new to share. It is really, really going to be some pretty cool things that you all will see. But I asked a favor from everybody in this group and for the recorded message that will come out later for those people that listen, please do not flood emails to Tracy about the quality of education system until we have an opportunity to roll it out. I mean, the exciting Many of this could lead to people wanting to share their thoughts and ideas and questions. And I know Tracy would probably really appreciate the opportunity just to make those comments and questions, put them in, if you want to put them in the chat, great if you want to write them down, like Ron said, because there are some really good thoughts and ideas out there that we might want to be involved with, but to not get too ahead of our skis with regard to this until we actually know what is coming and what it what the quantum education system is going to be all about. So let's not get too ahead of ourselves. With that, just know that it's just continues to become exciting. And for me to keep listening to it, I just get fired up. So Ron, thank you for sharing that.

**R** Ron Giles 05:41  
You're welcome. And one, one, just additional point, it might be that we can do a runs LW s, slash education, we got a bunch of other countries and so forth with the different languages. But maybe that's one that can, can be used to talk about education, and opportunities to grow and develop or to enhance or to fund whatever. So

**D** Dominick 06:12  
I tell you, I like that.

**R** Ron Giles 06:14  
I think, you know, maybe we talked to Tracy about setting that up.

D

Dominick 06:20

Yep, I think that's a great idea. And also one of the thing, if you were really passionate about this piece of the puzzle, I will tell you that there's as much as you may think how important this is the education of our children or seniors ourselves going forward, you'd be surprised how many people actually have a project geared around education. In our system, there's not that many, if you have an interest, and you are very passionate about this piece of it, you know, shoot me a private message. If you have educational experience, and you have some things to offer, shoot us a private message, shoot me a private message and let me know who you are. Because as we develop these things, we might have these townhall groups set up behind the scenes to come up with ideas of how to implement what the alliance has given us with the quantum financial, quantum educational system, and put it into everyone's CACS individually, because every community is going to be a little different. But maybe there's a way to adopt it. So each community will take charge of it and just run with it. So don't hesitate to reach out to us if you're passionate about this piece, because it's a big piece. What I'd like to go ahead and move on into NEF. But we're at our time is going to be nearing here. So I wanted to ask a question, would you like to just do a summary of the NEF rather than just go down the bullets? Do you want? Do you have the time to maybe just, in your mind come up with the a summary of the content of what you'd like to talk about? Or would you like me to do the bullets that way? If we do a summary it will take nearly as much time and then we go back to questions. I'll leave it up to you.

R

Ron Giles 07:54

Well, you're talking about the NEF collaboration. Yes. NEF? Yes. You know, I don't know a lot about that I've been on some discussions. I think that they have a wonderful program that's well worth looking into. But if you would like to take charge that I wouldn't mind at all, because I don't really understand it to the point that I would like to feel comfortable about commenting on it.

D

Dominick 08:29

Okay, so what I'll do that is I'll go down the bullets as I've understood it. And then if you can come in with I'll ask you to come in with any additional comments you may have, because there's some things here that you are aware of. And so it might be something that jogs a thought in your mind, then feel free to come in after each section is done. So the understanding of NEF collaboration basically what this is, is a group that has been put together from mo actually from a friend of Tracey's who is Holly and she is developing a way to allow humanitarians who want to plan and execute projects and but don't don't really have the experience for those projects. Or in the case of LWS if you have a CAC you want to build but you don't feel really confident or comfortable with doing a CAC because it's a big project is rock keep saying it keeps growing and growing and how big it's going to be that you can actually outsource those plans, those projects, those efforts into the NEF, the the the foundation that's being set up by Holly and so that project similar will be all kind of merged together. That NEF will coordinate coordinate the details they'll coordinate the planning the costing and the budgeting of every project. The NEF will provide project management to implement and execute the project. So in other words, they're going to do all the things behind the scenes that we would do as a CAC Managing Director, and then all you would do is a Uh, just get reporting

and updates that humanitarians would not be involved. If you're involved with any, if you're not going to collaborate with them at all, they'll just give you the updates on what they're doing relative to your project. Ron, did you want to make any additional comment to that?

R

Ron Giles 10:13

Yeah. Now NEF stands for what?

D

Dominick 10:18

You know, now that I'm looking at it, it's Holly's? No, new foundation? Very, there you go. Thank you, Carrie. Yep.

R

Ron Giles 10:32

Thank you. She's a smart one here. Yes, yes. Okay, so now that we know New Earth Foundation, did I say that right? Yes, yes. Okay, do or foundation. And this is a collaboration, they can? Yeah, from my perspective, they have the ability to put the pieces together structure, let's call it a structure. Much like love one, society is a structure. Well, they, they've fine tuned a structure so that a person can, wants to do a CAC, they'll learn more about the CAC program. And we'll be able to identify different areas that they perhaps haven't identified yet as far as what's going into it. But they have the ability to create some really fun things. And I think that that's why we collaborated with him so that we can help those who I'll say have not had experience or education as far as setting up a program. And they can put the things together. From my understanding, they can do it themselves, or you can they can participate with you and teach you how to do it. And kind of give you some instructions how to have what is effective for you. I could be wrong in that. But I feel like they have the ability to take over or assist you in what you need to have done. Great. Am I correct with that?

D

Dominick 12:14

You know, I know for sure that they're going to be taking on all the projects and collaborating between themselves. But I also think I heard recently, you're right, Ron, that they will allow you an option to be involved, depending on the project. But you know, the big, the biggest thing about that newer foundation is that they're going to always maintain privacy and integrity for each humanitarian that's very important, which I think is important for all of us, because of the anonymity we want to have within ourselves. That integrity is very important. Newer foundation will never publicize. But humanitarians are involved in each project. Their purpose is to consolidate many potentially 1000s of similar projects, merge them together, and then just run it by their global presence, the company that they're going to create as a global company. And their presence will offer an opportunity to be able to handle just a lot of similar projects, and executed much better, much more efficient, efficiently and effectively. So to develop, they'll develop and execute a portal site after redemption for sign up and reporting. And that's important because there many people think that they're operating right now and they're not there, there's portal site will come after redemption. And then there'll be able to post reporting and updates. That's where you'll go find it. Similar to our back office, they'll have their own

setup portal, all information on the site will be available through unique password. And there'll be zero identification within a site to whom has registered. So other services provided by the newer foundation is again, project collaboration similar and like minded projects, project planning, they'll assist humanitarians in kind of writing and polishing their plans and then hand it off to their project team. Project management, they'll have that newer foundation will have an in house team to execute the team plans. They'll also outsource things where net when necessary. So in other words, in this entire process, you can feel comfortable if you don't feel comfortable running a CAC, because you may not have the necessary expertise, you can feel comfortable that there's an option for you to turn to them. And they will effectively and efficiently run it for you and they have they have a number of people in place that they're going to be experienced in this type of situation that are going to be provide this service to us to our group as well as to their group. And then I talked about the project reporting. So the final comment Ron again if you want to comment towards the end, but the final comment on my end is that we were told that this option is tau is this newer foundation is totally optional, that you can choose it can be your choice whether you want to use it and feel free and clear to not use it. Again. It'll be based on freewill

R

Ron Giles 14:59

one comment Hello, I would like to make humanitarians have a way of doing things. Now, this is instructional. NEF is as instructional or can be an instructional thing to set in place, what you want to do, but you are always the one in charge of you and your money. And the way that you use your funds to accomplish the things that you have, and your uniqueness your mind that you bring to the table. That is why the alliance is giving you the money and not funding your projects, you will fund your projects. They are funding you. So you can do your projects. But there is an essence about you that is unique, and is that essence, that will that you need to provide for the things that you're trying to accomplish. Whatever that is, and I don't know how to identify it, I just know that it's there. And that's something that you can explore and find out for yourself, how to manifest that not only you're going to manifest it because that's who you are. But if you want to have even some definitions of who you are, what you are, and how to say that, those are the kinds of things that you will have to find out on your own. And it's important for you to do that. Because they're looking at you as a personality. You know, some of the things are a humanitarian, never doubts themselves. Now, we're learning how to do that. Perhaps we're not very good at it yet. But you get to the point where you understand and then you don't doubt, you don't fear. Doubt not fear not, is that something that Jesus said, doubt not fear, not be believing, and all things shall work out for your best good for those who love the Lord. Those are the kinds of things that you need to tune into. And so when I say that, you're going to ask for you need to ask for it to be revealed to you. And that goes right along with our loved one mission statement. You are entitled to receive revelations, if you want to call it that information, if you want to call it that. Answers to Questions. Those are the things that you have an entitlement to as a child of God, you have not been taught to do that you have not been taught to open up to the reality of who you are. But now is your chance to shine. With the alliances coming on, and then the sorrow coming in, and then cabal going away, we will have very little resistance to who we are and will be encouraged to use our own uniqueness to present our projects to the world or present what we're going to do to the world. And it may be similar to what other people have. But it's you particularly that have the essence, and the personality and the calling to use who you are and your uniqueness for the best good of mankind. You'll notice that I don't get involved with those things. You'll notice that I honor that about our loved one industry, people, family of loved ones society. That's because I understand who you are. And I honor that. Now if I don't, I'll get told about it. So you don't need to correct

me all the time. That can be painful. I'll learn if I'm overstepping my boundaries. I certainly don't want to do that. I want each of you to come up to the fullness of who you are. To manifest that to the world. So that the world it can grow and develop better than they could without you here. We're not one unless all of us are here. And we can become one we can become one in purpose and in our love and respect for one another. That's where we're going. That's what we're going to be doing. And by example of doing that, that's how we share with other people. People will honor and respect you as a humanitarian, if you fulfill, fulfill the fullness of who you are meeting the fullness of your purpose for being here. And it's available for us, where we have never had this opportunity before. And the alliance is allowing us, they're going to be helping us, you got a counselor to talk to, you'll have all of the help that you need. But you have to accept the responsibility before they can help you. This is my project. Say that to yourself in the mirror, this is my project, I am a humanitarian. And the things that I do come from God. Don't go off and get yourself all heavy and high minded. I'm not saying that I am saying that you need to understand who you are, and your purpose for being here. And you tell yourself that and you will see how God will help you you help will have the inspiration that will just simply come to you. If you've asked, it will just simply come to you in a way that you didn't know was coming. And then you'll say, oh, that's what I wanted. Yeah, there isn't that that's fantastic way to go. And you won't know where it came from. But it will be there for you. Because who are you? You're a son or daughter of God, and are entitled to the fullness being given to you of all that God has. That's where you're going with this.

D

Dominick 21:49

So Well, Ron, that was that was awesome. You know, I was hesitant to bring this up the newer Foundation, we just haven't spoken to it in a while. But I'm so glad we did. I'm so glad you clarified and kind of gave your insight to it. It's just, it's going to be valuable. And again, this is just another resource opportunity that those that may not feel comfortable. And there have been some of you that have said I just don't feel comfortable and a little overwhelmed. Just know that there's an outlet now that you can utilize and so so I guess what we'll do is, that pretty much finishes up what we had on the list, I actually carry if you don't mind, I Rod had messaged me and wanted to ask her on a message in the last group. And the last section, I told him to just go ahead and hold off. So I wrote I've gone ahead and opened your mic and then carry on let's we could just finalize this and finishes up with questions.

S

Speaker 22:43

Appreciate you, I know everybody else in this chat. appreciate you helping you so much was wrong. But I have a question and a couple of statements. First question is that a concern about the future food chain, that's going to happen because most of these big government for change, you're going to be closing for their involvement in the corruption and all that other stuff. And so in my state, we don't have small mom and pop stores very rarely the we see a lot of them. So that's a concern where when it comes to food chains, and then we have an issue with you have for a company to have a small store to get to have more than less than 20 employees to be able to get in the contract with the business owner. That's the question that one you don't need to answer. And that can be held in the chat room. Now the statements that I have is when he was talking about the schools, I we have a mindset that purchases in schools and I have teachers that I've been working with it. I've been teaching them for so many long, so many years. And I'm history teachers and involved in many projects in as teaching. And I'd like

to hear when you said that the quantum financial system, they have it all figured out. They have a plan. They know what they're doing. Fine. So when it comes to the real estate, real estate listing services, I'm afraid I'm all for with the private funding organization. I like that. But I want an M one focusing I've been focusing on ecomark economic stabilization system, because I think it's a very essential product that you put together. The second one is the hold on second for the international community clearing house. I love that because I already know some corporate individuals that have close friends of mine, that I spoke to them about to get involved with that with the level of society. That's what I have to say, Ron, I think it'd be quite a bit I'm worried about you. I really am. So that's my question and maybe if you have a statement that might my question about the food chains because of these big like Walmart and probably as big of a big organizations that they have 20,000 employees and they're going to be probably losing jobs. I'm worried about the food chain because there's going to be a food shortage I've been hearing if you have a statement or an answer on that one, I would appreciate it thank you.

R

Ron Giles 25:03

Okay. There's, there's not an opportunity to say, well, I'm going to say very often my understanding in the, in the dams, the deep underground military bases, they have stored food that would last the whole world 150 years, the food that they have stored there is of the highest quality, not the garbage that they sell to us. That is now under control of the military. So we talk about shortages. There may be distribution problem problems, but it's not the shortage of food that we're going to go through, or things it'll be that we don't have the truckers getting enough fuel to transport and get reloaded into, into our grocery stores, and so forth. If that happens, then it's good idea to have some stuff on hand so that you can bind yourself through that time. I personally, I wrote, I don't believe that there's going to be a lot of problems that cannot be solved, I think that the problems will come up, and somebody using their inspiration will solve the problems. If we are prepared. If we've got food storage for ourselves and water, and maybe some cash at home, instead of in the bank, then we'll ride that storm. We will write the wrongs. I'm diabetic, and I need insulin. Well, I've just got me another 90 day supply. And I'm going to be fine. I'm not going to overly concern myself with that. I'm not finished with what I had before. But I've got things, that's the thing to sort of thing that you plan for in advance. So you get if you have certain remedies that you need to continue to take them, then then go ahead and get an extra one, when you buy one, get an extra one. So that you have the the things that you'd need, vitamins, minerals, those kinds of stuff that we miss in our daily diet. But the the food that we're going to be getting through this program will be of the finest quality, it will be nutritional. It's not going to be laced with all of these terrible things that the pharmaceuticals have been doing to us and the food supply. Those companies will go out of business because they've been fitting this garbage. And they know they're feeding us garbage and they're destroying our lives and it's destroying our health. You think who benefits from that? Well, pharmaceuticals. And eventually, they want to kill us all off anyway. And we'll just be they'll keep enough of us to breed and just like cattle. So things are changing. And we're getting away from all of those old things. I do not have any fear. And I'm being sincere about this. I have concerns about certain things. But you don't let yourself get into fear. Because fear is the thing that you'll focus on. And then that is part of the creation process. You will create things that will maintain your fear. That's what the Alliance that's what the universe does. You focus on some they will do that as they want more of that. So that's it unless your take yourself out of autopilot. That's what's going to be coming to you the same garbage that you've had before. So take advantage of the opportunities to create your own reality. It's yours to create. You don't have to be quit that from somebody else. You don't have to just simply accept what

they're giving to you. You can create your own reality. And it's time now for each individual you think you are awake And you're pontificating, and saying I'm so great, and I'm so awake. You don't really understand the fullness of what that means. So be humble. And be allow and allow yourself to change whenever it's necessary. You set up your staff and take care of yourself. But don't go into fear, focus on things that are good. Focus on the new things, is another great thing that God has created a set of circumstances where we get fed all the food we need for 150 years that's been found, and collected by these guys for them. And now we get to use it. Thank you, Cabal, appreciate that, and your destruction of everything, you've created a way for us to live through it. I'm not saying we bless them and all that sort of stuff. There are terrible people. But that's not none of my business. That's God's business, let him judge them. Let him take care of the things that he can take care of she whatever you want to call it. Let that happen at a different level than you're involved with. Because we're creating the golden age of mankind. Let's focus on that. There's no reason to focus on fear and lack of work might be coming or isn't coming or whatever. We'll be okay. The Alliance is in control. We are not going to go to war. We are not having all of those bad things happen to those are all for the bad guys. Why did they go into Ukraine? Ukraine is the the what is it? The mafia. I forgot the name of the country. But it's it's the old because this area is area. It's the old Kazarian. Ukraine is kajaria. That's what it's used. That used to be a stain. That is the the root of all evil on this earth. came from you the Ukraine. And so we have a war with her came Trump go. Putin goes in and cleans up the bio weapons. That's what they did. That's where they did it. That's why it's there. That's why Russia went in there. Because they're there. They're creating all this stuff that they're going to send through Russia. Russia is not our enemy, Putin snarler enemy. If you think he is, then you need to check it out. He's changed it if you think that China is is our enemy, they are not our enemy. The Khazarian countries were used by our people, our politicians to send money over there. And have we not heard that. That guy isn't fired. By the time I leave here, you're not getting the billion dollars. Then he said son of a bitch. He was fired. So I could give them the billion dollars. What do you think they did with a billion dollars? If not more than half of that came back to the politicians who created the need for that over there in that country. And you have politicians, children who are working for the corporations over there and getting paid for it. That they don't know a thing about energy. I won't name names, but you can name them yourself. Those are the people who are making money on us. Some of the politicians are worth 116 \$70 million dollars on a \$200,000 a year salary. They've just been around for 40 years you multiply 40 years times 200,000. What do you get you don't get \$170 million. The Alliance knows where that money is and who owns it and who benefited from it. They are in charge. If we can get people waking up then we can don't have to worry about any of that stuff. That's that's supposed to be coming our way. We don't have to worry about it. Just let the end Alliance take care of it. Let's just focus on the things we have control over and that is our mind and our heart. Let's control ourselves. Let's find the best place for ideas and understanding, let us create the things that are best for us. And it will happen for us. The creation energy is misuse, exceptionally highly evolved, people are missed creating through their use of focusing on things as they are now instead of focusing on things that are going to come. So let's not fall into that I've got, I can give you a long list of the problems that I have. But I'm not going to do that, because that's focusing on it. I just deal with it. I don't focus on I just deal with it. Because I don't want to recreate that in my new life. And so I'm saying there is a creation process in place, and the longer we take to learn how to do that is going to be the time that it takes for us to get our funds. Who do you think they're waiting on? They're waiting for us to come up to speed so that they can bless us with the things that they're doing. We have passed a lot of those tests loved ones society has at liquid is opening up to us, you won't see it yet for a little bit. But it's coming. The Alliance is moving, and we are moving with the Alliance. We're tucked underneath their umbrella of protection. There's no need for us to fear or worry. If you want to go to fear and worry, that's your problem, because you're going to recreate that. And other

circumstances for you to continue that kind of behavior. He must like it because he's recreating Here we go. Let's find some bad stuff for these people. That's what the that's what the universe is all about. giving you what you want. And you can tell them what you don't walk by, you can tell him what you want by focusing on it. So focus on the bad stuff all you want and keep getting it. But you're not going to be a part of my life, because I'm not going to have that stuff in my life. Just won't be there. You may be there, but I'm just disregarding because I'm focusing on the golden age of mankind and what we can do to create that. I hope this helps. I really, really do hope this helps. Because there's a lot of people who are suffering and necessary and they need to change. We can all change together. Let's do it. I'll turn it back to you, Carrie, or whoever's there.

**C** Carrie 37:57

We're gonna do two more questions. We are at the bottom of the hour. We're gonna do two more questions. Please be brief. So we honor Ron's time. And first we're gonna go to Angela. And then we're gonna go to em, Larry to finish up. So Angela, your mic is open.

**S** Speaker 38:15

Hi, Ron.

**R** Ron Giles 38:16

Hello, no.

**S** Speaker 38:18

Hello, everybody. I loved this chat today. I mean, I haven't been able to participate much, but I listened to them. And this was a privilege to be actually live today. The I wanted to thank also army that because I do have a great appreciation for a military. And that is my passion projects, like I've several projects. But that one is my passion project. I guess the thing that I really want to say is, with educate no matter what we're talking about, whether it's education, or whether it's, you know, an altar, I think that what is essential is that people have a voice that they feel seen that they feel loved. I've just really seen that like God elevates love and living above everything. And, you know, I have some education projects, and I'll go ahead and post those on the chat. But I think more than anything, whether we're talking about preschool, whether we're talking about adults, no matter really what it is, is everyone craves that. The nurture part, and just being heard, and I know I did for a long time. And when God set me free, and I am free indeed. I mean, I used to be a very fear based person. And there really is no no Angela explanation for the freedom from fear. It really is a God thing. It's something that he did in my heart. And I am very, very grateful for him. And I thank everybody for participating. And I love to chat today. Thank you so much.

**R** Ron Giles 40:23

That's kind words, thank you very much for sharing with us. The privilege to have you with us

That's kind words, thank you very much for sharing with us. The privilege to have you with us.

Carrie 40:31

All right, I think we're gonna wrap up now, we have another session coming this Friday in the project's room at 2pm. Eastern. And we're going to be discussing what is coming and how to apply this for your projects and in your communities. And then, of course, we'll be back again next Tuesday with Ron and Brian, last comments you'd like to share?

R

Ron Giles 41:01

I love you all. And I'm grateful for our family of loved ones society, and how much love and gender has been generated between each of us. I look at the chat. I see so many really wonderful people that are talking about things that are just just marvelous. We are lucky. We are. I am in so much gratitude for the types of people that God is sending to us. Let's just enjoy their association and make take advantage of it and nurture and love one another. And that's the way it's going to work for us all. Blessings to everybody. Love you and we will talk again for this occasion. talk again next Tuesday.
