

# TURN PARKING LOTS INTO PROFIT AND INCREASE FOOT TRAFFIC

## PROBLEM

On average, parking lots generate little-to-no revenue, take up 1.5x commercial real estate and are costly to maintain. It's predicted that 50% of all car sales will be Electric Vehicles by 2030; in fact, manufacturer General Motors pledged to stop production of combustion engines by 2035. With over 80 types of Electric Vehicle charging providers, many businesses don't have the time to research the best solutions and apply for federal and state rebates. Proactive competitors are capturing this new market, increasing revenues, and receiving noteworthy press for their environmental corporate responsibility.

eco-enterprise

We drive sustainability for companies, nonprofits  
and governments while saving them money.

## SOLUTION

Eco-Enterprise enables clients to increase profits and exposure by offering the best performing EV charging stations (e.g.: fastest charging, multiple payment options, 24/7 accessibility, fully customizable, real-time reporting, proven reliability and customer service).

We save clients time and money by completing necessary paperwork on their behalf to receive state and federal rebates. Clearly, EV charging is the fuel of the future. When clients combine our charging stations with our building automation system (eco-system), their organization becomes a pioneer of sustainability.

# WHY ECO-ENTERPRISE?

We drive sustainability for companies, nonprofits and governments while saving them money. We do this by providing the following:

1

Unique  
Financial Solutions

2

Cutting-Edge  
Technologies

3

Smart City and  
Building Automation

Clients significantly reduce expenses by engaging Eco-Enterprise's *Unique Financial Solutions* to acquire refunds from unknown overcharges. Business and nonprofits can reallocate the immediate refunds they receive towards other capital expenditures and upgrade infrastructure. For example, Eco-Enterprise offers *Cutting-edge Technology*: COVID-CLEAN Products/Services, Power-over-Ethernet LED Lighting, HVAC Optimization, Solar Power, etc. Moreover, Eco-Enterprise provides *eco-system BAS*, a fully comprehensive Building Automation System, enabling organizations to monitor and control all buildings—increasing savings, efficiency, sustainability, and safety.
