OUR FIRM AT A GLANCE

GlobalX Trading is a full-service Import & Export firm with a mandate to find home for your stock lot materials

Our highly specialized team of industry experts work with clients to develop smart solutions for: overstock, over production, side-runs, redundancy stock, job lot, cull rolls, off spec material and damaged goods.

We serve as the interface between producers and printers / converters / manufacturer, while obtaining the best grades and best price for both parties.

THE PROBLEM

In the current state, business face many challenges associated with finding long term solutions for their secondary material. If gone unsolved, these challenges can stifle long term productivity

Obsolete and rejected material occupies valuable space that can be better utilized to boost efficiency

Businesses incur substantial disposal fee to have certain types of secondary material removed

Full time staff must dedicate valuable time to finding solutions for the downgraded materials

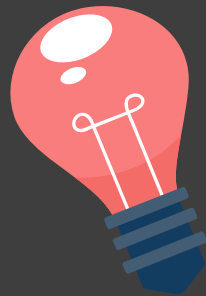

There are very few reliable point of contacts to provide regular solutions for secondary materials

OUR SOLUTIONS

The material we procure is shipped directly to verified users. Majority of the material procured is shipped outside of North America

We schedule regular and efficient pick ups of secondary materials so you can work without limitations

In many cases, we pay you for your obsolete and rejected material so there are no financial burdens on your organization

Our team of industry experts focus on delivering smart solutions for your secondary materials so your staff can focus on what's important

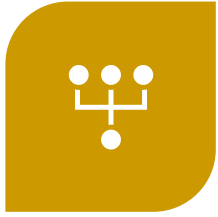

We seek to develop an ongoing relationship with your organization to provide you with a reliable point of contact.

HOW WE WORK

- Our organization has partnerships across the globe who find creative uses for the secondary materials procured from our clients
- We ensure that the downgraded & waste materials are used in a different application, which does not conflict with clients end product
- Our team of experts work with clients to develop customized programs to optimize efficiency and ensure non-competitive use of the material

OUR PROCESS

Through out the process, we provide our clients a point of contact to ensure a smooth movement of materials

STEP ONE

Identify current state and future state availability and volume of secondary material

STEP TWO

Work with clients to assess needs and constraints

STEP THREE

Based on client needs, leverage existing partnerships to find overseas home for secondary materials

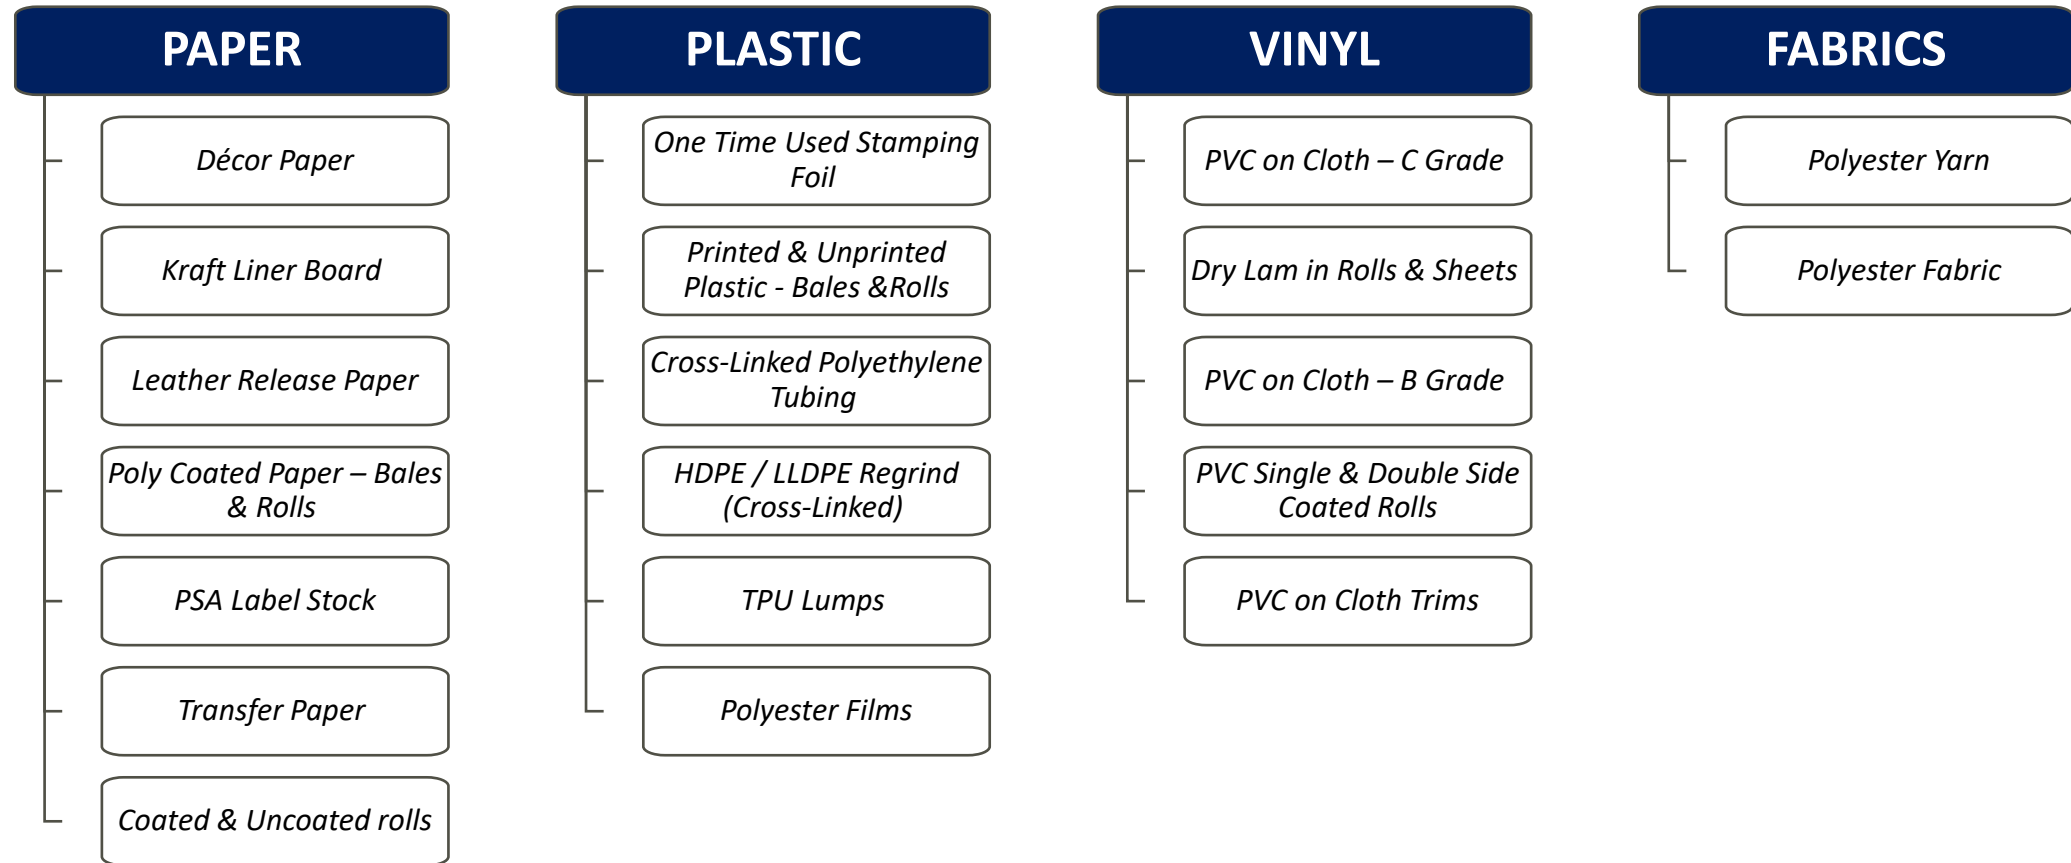

STEP FOUR

Coordinate pick up, logistics and provide oversight of all administrative and legal applications required to move the secondary material

SOME PRODUCTS WE DEAL IN

Our organization deal in a wide spectrum of products including Paper, Plastics, Fabrics and Vinyl

Our team is always happy to assist you with any questions or requests. Please note our contact information below
