

# MirrorShield

**Super Tough, Professional Mirror Protection**

**WANT TO AVOID  
MIRROR DAMAGE?**

Save your fleets mirrors, save money!

# The **problem** of broken mirrors

## Tight Streets

Narrow streets and lanes are a tight squeeze at the best of times, however for HGV's they are even narrower, coupled with 2 trucks passing each other and mirror damage is highly likely either from an impact with the other vehicle or the hedgerows and walls which line these streets.

## Large Mirrors

Vehicle mirrors are becoming larger, they provide excellent visibility and are very useful to the driver. However they also provide a much larger target for damage. They also cost more to replace, in some cases running into hundreds of pounds for a replacement mirror assembly.

## Broken Mirrors Cause VOR's

If a driver has a broken mirror, they can not drive safely.

# The **solution** to broken mirrors

## Super Tough Protection

**MirrorShield** is constructed from a formulated fibre mix which is super strong. This unrivalled level of protection is both lightweight and highly effective in protecting the mirror and its housing from low level to high level impacts.

## Highly Visible to Road Users

**MirrorShield** is available in a range of colours from stock, it can also be colour matched to your fleet. It is most commonly fitted in high visibility colours making the vehicles mirrors clear to other road users aiding in minimising collisions.

## No Compromise on Visibility

**MirrorShield's** sleek design is moulded to the shape of the vehicles mirror. This means the driver still has perfect viewing angles and maximum visibility.

# Suitable for DAF

## DAF LF 2007 Onwards. (Euro 5 and 6) Super Strong Mirror Guard/ Protector (Pair)

Part Number: MS005  
Quickfind Code: 13432

### Stock Colours Available
