

BATHTUB KING

Refinishing of California, Inc.

1875 W. Carson Street, Torrance, CA 90501

800- 882-5464

Have you ever been afraid of slipping in the bathtub?

Here at Bathtub King we have the solution
for you. **A NON-SKID**

- **WHAT IS A NON-SKID TREATMENT?**

- As your tub or shower is being refinished a special product can be applied to the bottom surface, making it slightly textured, this is applied prior to our finish coats. This option needs to be ordered before the job is started.

- **WHAT ARE THE ADVANTAGES OF A NON-SKID TREATMENT?**

- After your tub is refinished suction cup bathmats cannot be used. The suction cups can adhere and cause the surface to peel when lifting to clean.
- Or: If you prefer the adhesive style, we recommend the use of a large piece of vinyl with self-adhesive backing; Instead of small decals. You may apply after cure time. for \$20.00.

- **WHO NEEDS A NON-SKID TREATMENT?**

- Everyone can benefit from a non-slip treatment. The elderly, families with small children and rental units have a greater need for the extra safety that is achieved.

- **HOW MUCH DOES IT COST?**

- There are two different sizes available. We can treat half of the bottom area of the tub or shower for \$35.00. Or we can cover the entire bottom for \$50.00.

The Non-Skid treatment cannot be applied after refinishing; It is applied under our topcoat. Therefore, we need to know if you would like to include this option before the work is started.

This is a sample of our
non-skid treatment
