SAFETY INSTRUCTIONS

1. Read and follow all instructions before use.
2. Keep the product out of reach of children. It is recommended to use by users over 16 years old.
3. The product has built-in Li-ion battery, please don't throw it in the fire or discard it casually, or it may cause fire or explosion.
4. Do not use the product for applications outside of its intended use.
5. Do not disassemble and assemble this product without permission.
6. Do not expose the product to rain or water of any kind.
7. Do not store the product in high temperature or humid environments.
8. Do not use the product near flammable liquids or in gaseous or explosive atmospheres.
9. Keep the product dry, clean, and free from oil and grease. Please use dry cloth to clean it.
10. If the product is not used for a long time, please charge it at least once every 6 months.
11. The product and its inflation tube will heat up after long time of continuous use, please don't touch the inflation tube to avoid scalding after finish the inflation.
12. Please choose correct Unit before preset pressure, or it may cause tire burst. Please refer to the common Unit conversion: 1bar=14.5psi, 1bar=100kpa, 1bar=1.02kg/cm².

PRODUCT SPECIFICATIONS

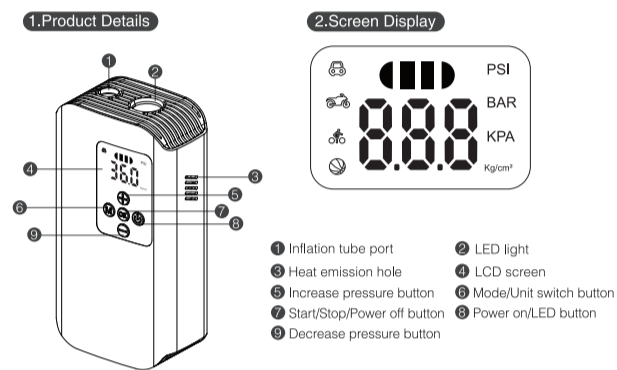

Product Name	Cordless Tire Inflator
Model No	TC15
USB Type	Type-C
Input Voltage	5V/2A 9V/2A
Charging Time	5-6H (5V/2A) / 2-3H (9V/2A)
USB Output Voltage	5V/2.4A (12W)
Pressure Measured Range	3-150PSI 150PSI Max
4 Optional Units	PSI, BAR, KPA, KG/CM ²
4 Working Modes	Cars, Motorcycles, Bikes, Balls
3 Light Modes	Flashlight, Blinking Mode, SOS

1

PRODUCT FEATURES

1. LCD Pressure Display: The product can clearly display the measured pressure (over 3PSI) and the preset pressure. The real-time pressure changes in the screen during inflation so that you can monitor the tire pressure at all times.
2. Intelligent Control: If the real-time tire pressure is higher than your preset tire pressure, the product will not work. The product will stop inflating automatically when it reaches the preset tire pressure.
3. Low Battery Indicator: When the battery is low, the LCD screen will show LO to remind you to charge the product.
4. Auto Power Off: If the product is not used for over 90s, it will auto power off.
5. High Temperature Protection: After continuous use of the product, if the temperature of its cylinder reaches 203°F, the product will stop inflating and the  in the screen will flash to remind. When the temperature drops to 185°F, the product will start to inflate again.
6. Battery Protection: Built-in with 4 upgraded protections, including over-charge/over-discharge / over-current / over-voltage protection - ensuring a long battery life.
7. Memory Function: The tire inflator can remember its last measurement type setting, which makes it more convenient for you to use next time.

OPERATION INSTRUCTIONS

1. Preset Tire Pressure

Press the "M" button to choose your desired working mode, then long press "M" button until the PSI icon flashes in the right screen, then press the "M" button again to choose your desired Unit, then press "+" or "-" button to preset your desired tire pressure value.

 - 1 Battery status
 - 2 Working mode
 - 3 Unit
 - 4 Pressure display
2. How to Inflate Tires
 - 1 Press the Power button to power on the tire inflator.
 - 2 Connect the inflation tube to the tire valve.
 - 3 Press the "M" button to choose your desired working mode, then long press "M" button until the PSI icon flashes in the right screen, then press the "M" button again to choose your desired Unit, then press "+" or "-" button to preset your desired tire pressure value.
 - 4 Press the OK button to start the tire inflator to inflate, wait until it automatically stop when it reaches the preset pressure. Then long press OK button to power off the tire inflator.
 - 5 Pull out the inflation tube from the tire valve.
