### SAFETY INSTRUCTIONS

- Read and follow all instructions before use.
- Keep the product out of reach of children. It is recommend to use by users over 16 years old.
- The product has built-in Li-ion battery, please don't throw it in the fire or discard it casually, or it may cause fire or explosion.
- Do not use the product for applications outside of its intended use.
- Do not disassemble and assemble this product without permission.
- Do not expose the product to rain or water of any kind.
- Do not store the product in high temperature or humid environments.
- Do not use the product near flammable liquids or in gaseous or explosive atmospheres.
- Keep the product dry, clean, and free from oil and grease. Please use dry cloth to clean it.
- If the product is not used for a long time, please charge it at least once every 6 months.
- The product and its inflation tube will heat up after long time of continuous use, please don't touch the inflation tube to avoid scaling after finish the inflation.
- Please choose correct Unit before preset pressure, or it may cause tire burst. Please refer to the common Unit conversion: 1bar=14.5psi, 1bar=100kpa, 1bar=1.02kg/cm<sup>2</sup>.

### PRODUCT SPECIFICATIONS

Product Name	Cordless Tire Inflator
Model No	TC15
USB Type	Type-C
Input Voltage	5V/2A 9V/2A
Charging Time	5-6H (5V/2A) / 2-3H (9V/2A)
USB Output Voltage	5V/2.4A (12W)
Pressure Measured Range	3~150PSI 150PSI Max
4 Optional Units	PSI, BAR, KPA, KG/CM <sup>2</sup>
4 Working Modes	Cars, Motorcycles, Bikes, Balls
3 Light Modes	Flashlight, Blinking Mode, SOS

1

### PRODUCT FEATURES

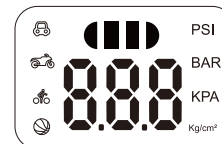

- LCD Pressure Display:** The product can clearly display the measured pressure (over 3PSI) and the preset pressure. The real-time pressure changes in the screen during inflation so that you can monitor the tire pressure at all times.
- Intelligent Control:** If the real-time tire pressure is higher than your preset tire pressure, the product will not work. The product will stop inflating automatically when it reaches the preset tire pressure.
- Low Battery Indicator:** When the battery is low, the LCD screen will show LO to remind you to charge the product.
- Auto Power Off:** If the product is not used for over 90s, it will auto power off.
- High Temperature Protection:** After continuous use of the product, if the temperature of its cylinder reaches 203°F, the product will stop inflating and the  in the screen will flash to remind. When the temperature drops to 185°F, the product will start to inflate again.
- Battery Protection:** Built-in with 4 upgraded protections, including over-charge/over-discharge / over-current / over-voltage protection - ensuring a long battery life.
- Memory Function:** The tire inflator can remember its last setting, which makes it more convenient for you to use next time.

### PRODUCT DESCRIPTION

#### 1.Product Details

- Inflation tube port
- LED light
- Heat emission hole
- LCD screen
- Increase pressure/Up button
- Mode/Unit switch button
- Power Button
- Light Button
- Decrease pressure/Down button

#### 2.Screen Display

2

#### 4 Working modes and its default pressure

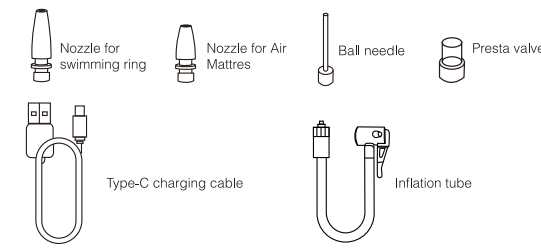

Working Mode	30PSI	30PSI	60PSI	80PSI
Default Pressure	30PSI	30PSI	60PSI	80PSI

#### 3.Button Instructions

-  Hold it for 2S to power on/off the tire inflator.  
After power on the tire inflator, press it to start/stop inflating.
-  Hold it for 2S to turn on/off the LED light.  
After turn on the LED light, press it to change the light mode in order.
-  Press it to change the Working Mode or Unit.
-  Two Functions:  
1. Press it to increase/decrease the pressure value gradually.  
Press and hold it to increase/decrease the pressure value rapidly.  
If the pressure is under 100PSI, it will increase or decrease by 0.5PSI.  
If the pressure is over 100PSI, it will increase or decrease by 1PSI.  
2. When you press M button to change the Working Mode or Unit, press it to up/down to choose the mode or unit.

#### 4.Accessories

##### 4 Air Nozzles

##### Type-C charging cable

3

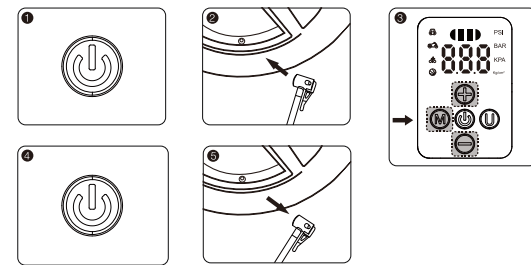

### OPERATION INSTRUCTIONS

#### 1.Preset Tire Pressure

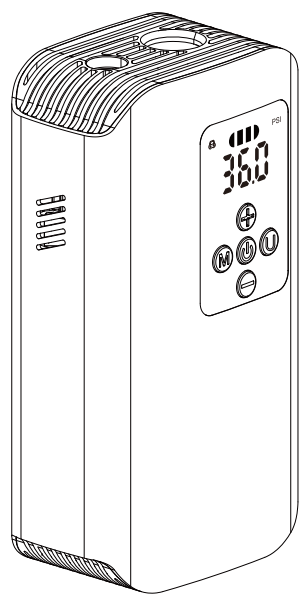

- After power on the tire inflator.
- Off you don't need to change the default Working mode and Unit, just press  to preset your desired pressure value.
- Off you need to change the Working mode or Unit, firstly, press  the  will flash, then press  to choose the Working mode you need. Press  again, the PSI will flash, then press  to choose the Unit you need. Wait until no icon flash, press  to preset your desired pressure value. **(Note: After you preset the desired pressure value, the screen will show back your real-time pressure.)**
-  Battery status  Unit  Working mode  Pressure display

#### 2.How to Inflate Tires

- Hold  for 2S to power on the tire inflator.
- Connect the inflation tube to the tire valve.
- Preset your desired pressure as the steps in part 1 Preset Tire Pressure.
- Press  to start the tire inflator to inflate, wait until it automatically stop when it reaches the preset pressure. Then hold  for 2S to power off the tire inflator.
- Pull out the inflation tube from the tire valve.

CE RoHS FC  
Made in China

#### 3.How to Inflate Balloons, Swimming rings, and Inflatable toys

As their pressure is lower than the pressure measured range (3~150PSI) of the tire inflator, the product can't stop automatically by preset pressure. You need to inflate them manually.

-  Hold  for 2S to power on the tire inflator.
-  Choose the correct air nozzle and connect the inflation tube to the inflatables.
-  Press  to start inflating.
-  After fully inflated, press  to stop inflating.

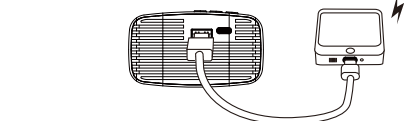

#### 4.Light Instruction

5

#### 5.Power Bank

Hold  for 2s to power on the tire inflator, then press  to activate its power bank function to charge your digital devices.

### SUGGESTED INFLATION AIR PRESSURE

Bicycle	12, 14, 16 inch bike tire	30~50PSI
	20, 22, 24 inch bike tire	40~50PSI
	26, 27.5, 29 inch mountain bike tire	45~65PSI
	700C tubular road bike tire	120~145PSI
Motorcycle	Motorcycle tires	1.8~2.8BAR
Cars	Small cars tires	2.2~2.8BAR
Balls	Basket ball	7~9PSI
	Football	8~16PSI
	Volleyball	4~5PSI
	Rugby	12~14PSI
