SAFETY INSTRUCTIONS

1. Read and follow all instructions before use.
2. Keep the product out of reach of children.
3. Do not expose the air inflator to rain or water of any kind.
4. Do not use the product for applications outside of its intended use.
5. Do not disassemble and assemble this product without permission.
6. Do not store the air inflator in high temperature or humid environments.
7. Do not place the air inflator near hot sources, such as your vehicle's exhaust pipes.
8. Do not use the air inflator near flammable liquids or in gaseous or explosive atmospheres.
9. Check inflation tube for weak and worn conditions before each use, make sure all connections are secure. Don't use if the defect is found.
10. Do not use the air inflator if the power button doesn't power it on or off. An inflator can't be controlled by power button is dangerous.
11. Keep the air inflator dry, clean, and free from oil and grease. Please use dry cloth to clean it.
