

Measurable Improvement in Government Processes

Beyond innovation, 10novate introduces new ideas for agency software applications and organizational business processes that improve performance by a measurable amount—10 times better or more. We deliver business value with explicit performance metrics and maintain a relentless focus on customers' outcomes.

10novate adheres to project management best practices including the Project Management Body of Knowledge (PMBOK) and process improvement models such as Capability Maturity Model for Integration (CMMI) to ensure successful project outcomes. We are a SECRET cleared facility.

Staff certifications: DHS Trusted Tester, PMP, SAFe Agilist, CSM, CEH, ITIL, Security+, ACCELQ Engineer

Core Competencies

Software Development and Engineering

Specialization in iterative—or Agile—software development disciplines, including Scrum and the Scaled Agile Framework (SAFe), DevOps and Continuous Integration, security controls, and test-driven development that deliver quality enterprise applications on-time, in-scope, and on-budget.

Organizational Development

Leadership development, competency assessments, program management consulting, team building, business process analysis/automation, and strategic planning.

Data Analysis and Science

Data analysis/statistical programming, research and reporting using open source and COTS tools to support quantitative and qualitative research and decision-making.

eLearning, Outreach and Digital Strategies

Comprehensive multi-media training, outreach, and communications services to strengthen capacities of agency initiatives. Digital strategy design and development to align digital assets to support organizational goals.

Management and Technology Consulting

Use case development, value engineering, strategic planning, project planning, change management, benchmarking, continuous improvement, & return-on-investment analyses.
