

**Mandatory Language for Monitoring and Reporting Violation  
Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)  
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE**

**CITY OF SEADRIFT PWS 0290004** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation(s) occurred in the monitoring period(s) 3Q2019, 2Q2018

We are taking the following actions to address this issue:        I Have turned in DLQOR To TCEQ. I had sent copy on the required date but was not received by TCEQ. This is a mail/Paperwork error only.

        
        
        
       <corrective  
actions>.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact:

Water System Official:        Robert  
Bryant       

Area code + phone number:  
       361-489-9544       

Posted date / Delivered on:        1/23/2020       

**Instructions for preparing the required Public Notice:**

Recopy the mandatory language above and insert the underlined information in the spaces indicated.

The TCEQ recommends that the public water system provide a copy of the Public Notice(s) or Notice of Enforcement to local and state officials, such as Mayors, City Council Members, County Commissioners, Judges, and/or State Representatives, that are located in or that represent the affected area(s) served by the system.

**Public Notice delivery timelines:**

The initial public notice shall be issued as soon as possible, but in no case later than 90 days after the violation was identified. All notifications require the attached Certificate of Delivery due 10 days from the posting date of the above notice.

Refer to 30 TAC §290.122 for additional information on Public Notification.

**Revised Total Coliform Rule (RTCR) Failure to Report Monitoring Events to the State that are Not Related to *E. coli*-positive Sample Results – Template 3-5**

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

**Reporting Requirement(s) Not Met for CITY OF SEADRIFT**

**PWS 0290004**

We are required to report the results of monitoring of your drinking water for specific contaminants on a regular basis by SEPT 2016, JAN 2010. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During SEPT 2016, JAN 2010, we did not report the results of monitoring for total coliform.

Our system failed to notify the state drinking water program as required by SEPT 2016, JAN 2010. Although public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

**What should I do?**

There is nothing you need to do at this time. You do not need to boil your water or take other actions.

**What is being done?** We collected distribution samples on 10/25/2018, 11/28/2018, and 12/26/2018, and were no longer in violation.

Mandatory Language for Public Notice  
Triggered Source Monitoring and Reporting Violation  
Ground Water Rule

**CITY OF SEADRIFT PWS 0290004** failed to collect the required number of triggered source bacteriological samples for fecal indicator monitoring of the ground water system during SEPT 2014. This monitoring is required by the Texas Commission on Environmental Quality's "Drinking Water Standards" and the federal "Safe Drinking Water Act," Public Law 95-523.

Triggered source samples (raw water samples) are used to monitor water quality and indicate if the water is free of fecal indicator bacteria. Following a positive routine total coliform result in our distribution system, our water system is required to submit one triggered source sample for every active ground water well. Failure to collect all required triggered source samples is a violation of the monitoring requirements and we are required to notify you of this violation.

We are taking the following actions to address this issue: <corrective actions>: To return to compliance, we collected our required "raw" samples, from Well G0290004G and Well G0290004H on 09/05/2017 and 09/27/2017, and are no longer in violation.

*Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
