

Artificial Grass for Pets – The Perfect Pet-Friendly Lawn

Many homeowners worry about how their garden will cope with pets. Artificial grass installed by 365 Lawns is designed to be durable, hygienic, and pet-friendly, making it a great choice for households with dogs or other animals.

Durable for Active Pets

Dogs can quickly damage natural grass by digging, running, and creating worn patches. Artificial grass is designed to withstand heavy use, meaning your lawn will stay neat and green even with energetic pets.

Easy to Clean

Artificial lawns are extremely easy to maintain. Pet waste can be removed easily, and the area can be rinsed with water to keep it clean and fresh.

Excellent Drainage

Our installations include a proper drainage base, allowing liquids to pass through the grass quickly. This helps prevent muddy patches and keeps the surface usable even after rain.

No Muddy Paw Prints

One of the biggest advantages of artificial grass is that it eliminates mud. Your pets can enjoy the garden without bringing muddy paw prints back into the house.

Safe and Non-Toxic

We choose safe, non-toxic materials, making it suitable for pets and children alike.
