Businesses Struggle

- Strategies needed to keep staff and customers safer
- Cleaning and disinfection become paramount
 - Surfaces sanitized nightly
 - Reduce spread of the virus
- Standard cleaning methods are obsolete

Cleaning Strategies for the Next Normal

Standard Methods

- Chemical based, not green
- Not following directions impacts efficacy
- Limited surfaces areas can be cleaned

SanusAer

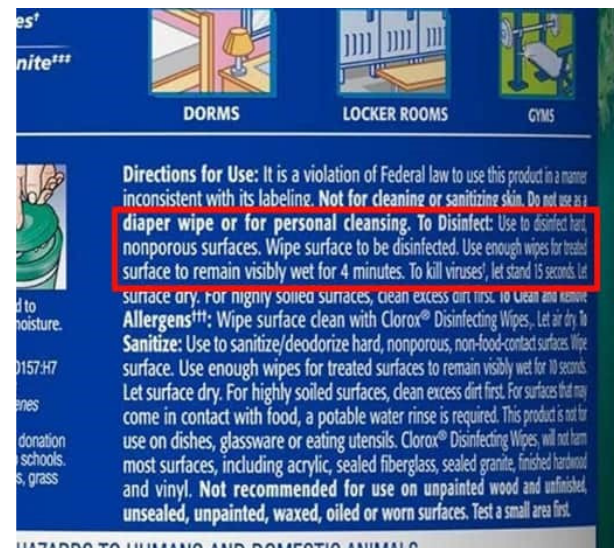

- Broad Based, Green
- A gas that reaches everywhere air currents travel
- Scientifically proven to kill the coronavirus on surfaces

Current Cleaning Methods Not Effective

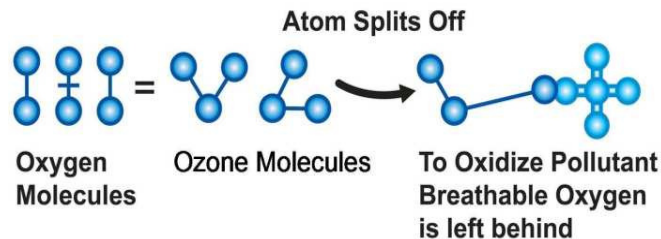

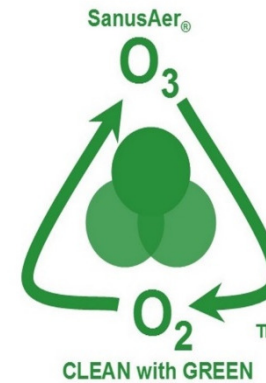

Not following directions

Requires extended exposure

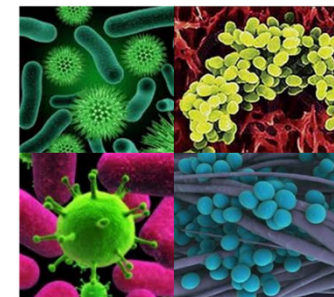

Ozone is Green

- **1,000 times more powerful than Chlorine Bleach**
 - **Completely safe**
 - **No chemical residues**
- **Naturally decomposes into clean breathable oxygen**
 - **Leaving a pleasant smell of "ultra-fresh" air.**

- **Ozone gas reaches everywhere air currents travel:**
 - It has penetrating properties
 - Broad-based, reaching all surfaces
- **In a short period of time, high ozone concentrations destroy viruses:**
 - 99.99% of viruses destroyed after 30 seconds of exposure

Daily Disinfection Treatment Protocol

- **Locate SanusAer Generator in center of Space**
 - Elevate unit if possible
- **Set timer for 1 to 2 hours maximum (at night or when business is closed)**
 - Make sure generator is off a minimum of 3 - 4 hours before re-entry
 - Gives ozone time to convert to clean, breathable O₂
- **NO People, Pets, or Plants can be in treatment area while generator is running**
 - Ozone is an irritant to breathe

THE BEST OZONE GENERATOR

GENERAL OPERATING INSTRUCTIONS
Read entire manual before operating unit. For indoor use ONLY.
1. Secure the area and post signs warning entry.
NO People, NO Pets, NO Plants in the treatment area!
2. Optional use of additional fans will help to distribute the ozone gas.
3. Based on size of the treatment area and level of pollutants, cycle
on and off using a timer. Do not run for more than 4 hours
continuously. See manual for recommendations.
4. Set the timer to turn off the unit a minimum of 2 hours before re-entry,
then ventilate the space with fresh air.
