

Engineering

Apex Automation offers our clients a truly turnkey approach. Our team of professionals are skilled in electrical and control system design. With a proven track record to significantly enhance production, reliability and operations. In addition to specifying the appropriate hardware, software and network architecture, Apex Automation engineers can develop and stamp all required documentation including Electrical Drawings, Shutdown Keys, Critical Settings and Control Narratives. Apex Automation carries the required Permits to Practice in Western Canada.

Deliverables

- MV/LV Electrical Distribution
- Panel Schematics
- Control Narratives
- Critical Settings
- P&ID's
- Cable Schedule
- Shutdown Keys
- Network Architecture

Markets

- Oil & Gas
- Pipelines
- Mining
- Drilling
- Chemical
- Agriculture
- Forestry
- Water/Wastewater
- Power Generation
