

Fabrication

Apex Automation's fabrication facility is located in Edmonton, Alberta. Having both the fabrication facility and engineering offices in the same complex as our engineering office allows improved communication throughout the fabrication process, which naturally increases the projects quality and fabrication efficiencies. As an unprecedented value to our clients, who have become accustomed to the highest quality in industry, we maintain fully trained and certified journeyman electrical staff. This ensures no gaps in design and fabrication.

Capabilities

- Control Panels
- PLC Control Panels
