

Rules and Regulations to Drone Flying

You just purchased a drone and want to know what you can and cannot do with it? Well look no further than 14 CFR Part 107 of the Federal Aviation Regulations (FARs). Part 107 describes what you can and cannot do as a recreational pilot as well as what you can and cannot do as a commercial unmanned aerial system pilot. There are 205 parts in this section as well as many subparts to those sections. We will go section by section and talk about each rule and regulation.

Subpart A is just general information about Part 107 and includes Definitions, Falsification of Documents, Inspections, and Accident Reporting.
