The Centre was recommended by one of the Doctor friend. I'm glad I found this.

The Centre is fully equipped with all the essential ambience for the child. The therapists are so perfectly trained they have answers to all our questions, logical. We might find them little strict sometimes, but that's always for the better.

If you have a child who's not progressing according to milestones please don't hesitate to approach this centre, they'll definitely help you out as required. You won't find unnecessary suggestions by the therapists.

You would definitely see positive changes in your child, only it is to have faith in the therapists and patience of course.

This center's Doctors, Therapists, and staff are all very knowledgeable and will assist your child in their mental, physical, and social development. When we first came to this center, we were concerned about our daughter. She was hyperactive, unsocial, and uncontrollable. All of the doctors worked on her, and now her hyperactivity is significantly reduced, and she is interacting with family members and other children. She has also begun to respond to our commands.

Another advantage of this center is that you can schedule one or two online sessions per week. This session is extremely beneficial because doctors guide and correct us when we work on home programs. As a result, I would advise everyone to attend at least one online session.

A very positive environment to start with therapies especially when we as parents are really worried thinking about our kids. The staff is also exceptionally trained and qualified. We would strongly recommend CRC for specially-abled children.

I would like CRC team to help me for great guidance for my son... He is doing really well, and with regular review with Sumit sir helped me a lot. The idea of small small goal setting for month or so is really helping Dakshit to improve... Thank you sir for making Dakshit and my life cheerful and giving hope for Dakshit that he will be ok like us... 🙏
