

EnergyPro empowers energy brokers, sales teams, and affiliates by offering them technology and support to thrive in the energy market. Whether brokers are individuals selling in a few utilities or part of a licensed brokerage organization, EnergyPro provides tailored solutions. With the backing of their parent company, brokers gain access to new markets, competitive pricing from major suppliers, and greater flexibility in commission payments. EnergyPro levels the playing field, giving brokers the best opportunity for success in the ever-consolidating energy industry.

Providing power supply solutions for businesses and facilities in deregulated electricity markets has been our focus for over 20 years. We offer the opportunity to shop for power supply on the free-trading market, allowing better cost control and price locking for specific periods. EnergyPro recommends hedging a fixed position in the electricity futures market for budget planning and cost reduction. With experienced staff in both wholesale and retail electricity and natural gas markets, we guide customers through their available options with expertise.

Owning our own power supplier has kept us ahead of other brokerages. By manufacturing electricity we have access to true wholesale costs in the energy market.

Coupled with a strong supplier network and industry relationships for decades, we enable access to new markets and competitive pricing from major suppliers. Through revenue sharing, brokers also benefit from upfront commissions and flexible payment terms, enhancing their financial freedom. The company offers dedicated support and technology to aid brokers in transacting business successfully.

With the implementation of AI into our technology bundle, users are able to take advantage of today's highly efficient algorithms for tasks such as lead generation, client retention, document processing, energy and natural gas analysis, historical trends, CRM tools, marketing budget and conversion metrics and much more.

We offer a range of income-generating solutions for businesses, organizations, and nonprofits. Whether you're a telecommunications company looking to cross-sell energy solutions or a church seeking to fundraise, EnergyPro has the right solution for you. Our commercial energy affiliate programs provide competitive rates to potential customers, along with lifetime commissions. Partnered with leading retail energy suppliers, we've built a system that offers the best-fit products for each organization's needs.

Additionally, customers seeking enhanced facility efficiency need to look no further. As veterans of industry, our consultants at EnergyPro provide tailored services to meet customers' specific requirements. Consulting on energy efficient hardware from lighting to HVAC, and implementing

on-demand services to sell your generated energy back into the market, we are able to lower your price beyond cutting the KW rate. With a focus on delivering results, we ensure customer satisfaction in the energy sector.

EnergyPro's Gas Advisory Services assist businesses in navigating the dynamic U.S. natural gas markets. With increased foreign demand and domestic production constraints, U.S. gas is now a globally traded commodity, impacting the energy industry significantly. Our team of natural gas advisors offers market knowledge to help businesses structure their gas supply agreements strategically, ensuring maximum cost savings.

Demand-Side Services are an important value-add for commercial businesses nationwide. This is where the impact of technology on the energy sector is seen. With renewable power costs decreasing and energy-efficient technologies available, consumers can reduce usage and their carbon footprint. Environmentally conscious corporations turn to EnergyPro for efficiency and renewable solutions to enhance sustainability. Explore your options for a more sustainable future with our array of offerings.

Our internal services address overbilling concerns for commercial, industrial, and governmental entities by utility companies. With complex utility bills and tariff schedules, businesses may be overcharged or unaware of cost-effective rate options and ancillary fees. EnergyPro's audit experts ensure accurate billing, identifying and rectifying errors, such

as meter reading inaccuracies and misclassifications. Clients can trust and rely on our system for peace of mind and cost savings.

As a leading nationwide energy brokerage firm with strategic industry relationships, we offer customers and partners low-cost energy supply and various energy solutions. Serving over 350,000 clients across all deregulated U.S. markets, EnergyPro serves as both a direct client advisor and a broker exchange platform. A strong network of 40 retail energy suppliers positions us for continued growth and success.
