# THEOHTANIS

## ERC-20 NATIVE COIN ICO DEVELOPMENT

A native coin (**cryptocurrency**) is a digital asset that is inextricably linked to its blockchain and is an integral part of it. Native coins are transferred from wallet to wallet, paying a network fee (**a miner's fee**). That is when you send a balance to another wallet, a small portion of that balance you will **"give"** to the miners to validate.
