

# WELLSTONE DIAMOND CLEAN For Polishing Concrete

**Description** Wellstone Diamond Clean is a new environmentally friendly formulation for wet grinding concrete that does 3 things:

- Keeps abrasives clear of slurry, prolonging their life and speeding up the grinding process.
- Protects grinding machinery/equipment against corrosion.
- Emulsifies concrete fines making clean-up of the floor, equipment, and grinding pads easier.

**Uses** For grinding and polishing concrete, stone, and terrazzo

## Technical Data

- VOC Less than 50 grams per liter
- Specific Gravity 1.01 (concentrate)
- PH 7-7.3

## Application

Pre-wet surface with water. Apply Wellstone Diamond Clean with onboard disperser or quality pump up sprayer as needed during the polishing process.

**Coverage Rates:** Coverage will vary depending on application conditions, finish, and concrete porosity.

**Clean up and Disposal** Use soap and water to clean equipment. Wellstone Diamond Clean is environmentally friendly and non-toxic, but alkaline when mixed with concrete slurry and fines and should not be poured into sewers or storm drains. Use up material or evaporate. Dispose of slurry residue per local regulations.

**Safety Information** For professional use only. Keep away from children. Wear gloves and eye protection. Of course you shouldn't drink it. For accidental ingestion, drink two glasses of water and consult a physician. See SDS for complete information.
