Authorization Form

Pre-Anesthetic Blood Testing

Pre-anesthetic blood testing checks the internal organs. This is a vital part of having a safe anesthetic procedure. Help us provide the best level of care for your pet by choosing to perform blood testing prior to anesthesia or sedation.

Full Chemistry

\$65

Basic internal organ screen (liver, kidneys) with full red and white blood cell count.

I DECLINE blood testing and understand the possible risks anesthesia may have on my pet.
